As described in (1) above, FDA's proposed rule would increase the number of monkeys that are tested by the intraspinal test. Because FDA is proposing to remove the intrathalamic test and the intraspinal test of 1:1,000- and 1:10,000 dilutions, testing laboratories would be able to test additional monkeys in the proposed intraspinal test while experiencing a significant reduction in the overall number of monkeys tested for neurovirulence.

FDA is proposing to require that more monkeys be tested for Type 3 poliovirus than for Type 1 or Type 2 to compensate for the higher variability experienced when Type 3 virus is tested. FDA believes that the proposed requirements described in (1) and (4) above will assure adequate data to permit a precise and statistically valid comparison between the neurovirulence of vaccine virus and the reference virus preparation while conserving monkeys and reducing overall testing requirements. The term "positive monkey," as used in (4) above and as defined in proposed § 630.16(b)(1)(i), is an animal which either survives for at least 11 days after inoculation or succumbs or is sacrificed due to a severe poliovirus infection in which neural lesions specific for poliovirus are seen in the central nervous system.

Such "positive" monkeys may be used for assessing neurovirulence, regardless of whether microscopic evidence of inoculation is found in the gray matter of the spinal cord. Under current § 630.16(b)(1)(ii), only monkeys that show microscopic evidence of inoculation into the gray matter of the spinal cord may be considered properly inoculated. Through experience, FDA has found that only monkeys that are properly inoculated will develop specific lesions caused by poliovirus. Testing laboratories often experience difficulty in locating the injection site microscopically, especially if the site is obscured by lesions. Under current requirements failure to find the injection site would mean that the monkeys could not be considered as positive even though the presence of specific lesions is adequate evidence of proper inoculation.

FDA is proposing that the neuropathology of monkeys inoculated with a monovalent virus pool be quantified and compared with the neuropathology exhibited by monkeys in the concurrent test and all previous tests of the reference virus preparation of the corresponding type. FDA is proposing that the lumbar and cervical areas of the spinal cord, and the medulla and mesencephalon of the brain of each positive monkey, be examined for evidence of lesions caused by poliovirus. The thalamus and motor cortex would also be examined, primarily for nonspecific lesions caused by agents other than poliovirus. However, unlike the current test, the evaluation of the thalamus and motor cortex would not be part of the basis of comparison for determining neurovirulence. In the early days of testing, it was common that monkeys would carry lesion-causing diseases and these nonspecific lesions could be mistaken for lesions caused by poliovirus. Through careful selection and handling of test animals, this problem has been virtually eliminated. Accordingly, FDA is proposing to require that the monkeys' tissue be examined for nonspecific lesions but evaluation and comparison of the nonspecific lesions would no longer be required.

Because of the complexity of the specific method of determining and scoring the magnitude of neurovirulence, FDA is proposing not to include it in the regulations. However, FDA is proposing that the method of evaluation be equivalent to that recommended by WHO. A manufacturer would be required to describe the method of evaluating and scoring poliovirus lesions in an amendment to its product license. To determine the magnitude of neurovirulence, a testing laboratory would grade the severity of specific lesions in the specified tissue sections examined for each monkey and the grades would be converted into a numerical value or "lesion score." The mean lesion score assigned to neurovirulence displayed by monkeys inoculated with the monovalent virus pool can then be compared with the score assigned to the neurovirulence displayed by the reference virus preparation.

FDA is proposing that a monovalent virus pool is acceptable for vaccine use if (1) the numerical value assigned for neurovirulence of the monovalent virus pool is equal to or less than that of the reference virus preparation; or (2) if the value for the monovalent virus pool is greater than that of the reference virus preparation, the difference be not greater than that calculated by a mathematical method that is expected to reject a poliovirus preparation with neurovirulence identical to the reference virus preparation at a frequency of not less than 1 in 100 when 1 group of monkeys is tested. When the numerical value assigned for neurovirulence of the monovalent virus pool is greater than that of the reference virus preparation, the difference in numerical values may be due to the inherent variability of the assay and not due to any real difference in neurovirulence.

Under the proposed rule, a testing laboratory would be required to determine whether the difference is due to the variability of the test method, or whether the difference in scores indicates that the monovalent virus pool is more neurovirulent than the reference virus preparation and is unacceptable for vaccine manufacture. If the difference in scores is greater than that calculated, a monovalent virus pool would be unacceptable for use in vaccine manufacture, regardless of which reference preparation was used in the test. For example, if a manufacturer finds that a monovalent virus pool meets the neurovirulence requirements when tested with a WHO reference preparation but FDA finds that the monovalent virus pool does not meet the neurovirulence requirements when tested with the Office of Biologics Research and Review reference preparation, the monovalent virus pool would not be acceptable for use in vaccine manufacture.

Based on the experience of testing the reference virus preparation, a testing laboratory can calculate the upper limit of the range of values within which will fall the numerical values for

neurovirulence of 99 percent of poliovirus preparations with an actual neurovirulence equal to the reference virus preparation. If the upper limit of this range is exceeded by the numerical value assigned to the neurovirulence of a monovalent virus pool, FDA is proposing that the monovalent virus pool be considered unacceptable and not used for vaccine manufacture. Under the current regulations, the neurovirulence displayed by the monovalent virus pool is compared with records of all results obtained using the reference virus preparations. If the pattern of neurovirulence displayed in the test of the monovalent virus pool is equal to or less than the results obtained in the current test or any previous test of the reference virus preparation, the monovalent virus is considered acceptable for vaccine manufacture. The comparison does not include a mathematical method for determining the probability that the monovalent virus pool has an actual neurovirulence equal to or less than the reference virus preparation.

FDA is proposing to provide for the enlargement or extension of a test for neurovirulence in monkeys if the initial results are not within the required limits. The proposed rule would provide for the inclusion of one or two additional groups of monkeys by the method previously described. The acceptability of the monovalent virus pool would be determined by comparing the cumulative results of the testing of the initial group of monkeys and the one or two additional groups with the results of testing the reference virus preparation in the same number of groups.

With the inclusion of additional monkeys, the numerical value assigned to a monovalent virus pool of acceptable neurovirulence would be expected to be closer to the mean value assigned to the reference virus preparation and the criteria for determining acceptability when one group of monkeys is tested would not be appropriate. Accordingly, FDA is proposing to require more stringent criteria when additional groups of monkeys are tested. FDA is proposing that if a total of 2 groups are tested with the same monovalent virus pool, the frequency of rejection shall be not less than 5 in 100, and if a total of 3 groups of monkeys are tested, the frequency of rejection shall be not less than 10 in 100.

FDA is proposing to require that a testing laboratory perform a minimum of four tests of each reference virus preparation to provide sufficient experience to define the performance of the reference and establish the variability of the assay. FDA believes that a minimum of four tests is necessary to assure that the range of values defining the variability of the assay is statistically valid. Once established, the upper limit calculated from the range of values defining assay variability would be used to determine the acceptability of those monovalent virus pools assigned to a numercial value of neurovirulence higher than that assigned to the reference virus preparation. Each time a reference virus preparation is tested, assuming the results are statistically compatible with previous tests of the same reference preparation, the testing laboratory would add the results to the previous testing experience of that reference virus preparation and the variability of the assay adjusted accordingly.

S. Neurovirulence in Monkeys—Use of Medical Professionals in Assessing Test Results

FDA is proposing to amend § 630.16(b)(1) by removing the requirement that observation of test monkeys for abnormalities indicative of poliomyelitis be performed under the supervision of a qualified pathologist, physician, or veterinarian. Under 21 CFR 600.10(b), caretakers and attendants of animals used in the manufacture of a biological product must be of adequate number and abilities to assure adequate animal care and otherwise fulfill their assigned functions. FDA has decided that personnel who are qualified for the care and handling of monkeys used in the manufacture and testing of vaccine are competent to carry out the observation of monkeys for clinical evidence of poliomyelitis and other viral diseases, without the direct supervision of a veterinarian or other medical professional.

FDA is also proposing to amend § 630.16(b)(1)(iii) (redesignated in this proposed rule as § 630.16(b)(1)(ii) to require that the histopathologic examination of monkeys be performed by a qualified pathologist. The examination of tissue from the central nervous system of monkeys for neuropathy is a highly technical function which has always been peformed by qualified pathologists at establishments licensed for oral poliovirus vaccine. Consistent with current practice, FDA is proposing to require that a qualified pathologist perform the histopathologic examination.

T. Tests for rct/40 Marker and d Marker—Culture Vessels

FDA is proposing to amend § 630.16(b)(3) (i) and (ii) (redesignated in this proposed rule as § 630.16(b)(2) (i) and (ii)) by removing restrictions concerning what types of culture vessels may be used to culture poliovirus in the tests for the rct/40 Marker and the d Marker, respectively. With advances in laboratory technology, there are a number of types of vessels now available that are suitable for culturing poliovirus for these tests; therefore, the restrictions in § 630.16(b)(3) (i) and (ii) are no longer appropriate.

U. Exemption From Final Container Sterility Test

FDA is proposing to redesignate § 630.17(a) as § 630.16(c) and to redesignate the remaining paragraphs in § 630.17 to be consistent. Current § 630.17(a) provides an exemption for oral poliovirus vaccine from the final container sterility test required for certain biological products by § 610.12. Because the test for final container sterility is generally a safety test, FDA proposes that the exemption be included under § 630.16 *Tests for safety.*

V. Consistency of Manufacture

FDA is proposing to amend § 630.17(b) (redesignated in this proposed rule as § 630.17(a)) by removing the requirement that each monovalent virus pool contained in a trivalent vaccine be one of a series of five consecutive lots shown to meet the criteria of neurovirulence in monkeys (§ 630.16(b)(1)) and the criteria for in vitro markers (§ 630.16(b)(3)). When these additional standards were promulgated originally, FDA was concerned that the failure of a lot of poliovirus vaccine to meet the standards for acceptable neurovirulence could be related to a deficiency in the manufacturing process. Therefore, FDA required that each monovalent pool used in vaccine be one of five consecutive lots meeting neurovirulence requirements, as a demonstration of the manufacturer's ability to produce safe vaccine consistently. Each time a monovalent virus pool failed, the manufacturer was required to manufacture and test five additional monovalent virus pools before any vaccine could be released for distribution.

FDA has now determined that failure of the neurovirulence test in monkeys is a random event related to the genetic instability of the seed virus which may result in a slight increase in neurovirulence. Accordingly, FDA is proposing under § 630.10(c)(5) that the total history of neurovirulence test results for monovalent virus pools produced from the same seed virus be reviewed each time a new pool is tested and, if the rate of failure is higher than

VOL 51 ISS 86 MY 5 1986 UMI

predicted, that seed virus would be disqualified from further use in vaccine manufacture. FDA believes that § 600.10(c)(5) will assure the continued manufacture of safe vaccine and the consistency of manufacture requirements in § 600.17(b) are inappropriate and no longer necessary. FDA believes that the proposed rule will assure the continued low neurovirulence of oral poliovirus vaccine while not requiring interruption of trivalent vaccine production each time a single monovalent lot fails the neurovirulence test.

W. Submission of Protocols to FDA for all Monovalent Virus Pools

FDA is proposing to amend § 630.17(b) (redesignated in this proposed rule as § 630.17(a)) to require that protocols for all monovalent virus pools produced sequentially from the same seed virus be submitted to the Director, Office of Biologics Research and Review, FDA, regardless of whether the manufacturer is requesting release of the pool for further manufacturing into vaccine. Under current requirements, submission of a protocol for a monovalent virus pool is not required when the pool is not intended for further manufacture into oral poliovirus vaccine.

FDA believes that its review of the manufacturing history, including test results, of all monovalent virus pools grown from each seed virus is necessary for assuring the continued safety of oral poliovirus vaccine. For example, proposed requirements in § 630.10(c) (4) and (5) (see III. G. of this preamble) are predicated on FDA's ability to review the history of results of the neurovirulence test in monkeys for each monovalent pool. FDA can accomplish this review only if protocols containing the manufacturing history of all monovalent virus pools are made available to the agency. FDA expects that the proposed rule would not increase the regulatory burdens imposed upon the manufacturer. The information to be included in a protocol is described in § 630.17(e)(1) (redesignated in this proposed rule as § 630.17(c)(1)).

X. Sample Volumes Submitted to FDA for Lot Release

In § 630.17(e) (2) and (3) (redesignated in this proposed rule as § 630.17(c) (2) and (3)), FDA specifies the sample volumes of each monovalent virus pool or trivalent vaccine that shall be submitted to FDA so that the agency may conduct confirmatory testing of the vaccine. FDA is proposing to add § 630.17(c)(4), which would provide for the submission of sample volumes other than those specified in the regulations upon the request or with the agreement of FDA. Occasionally, FDA requires less sample volume for testing because of modifications in test methods or changing testing priorities. In rare cases, FDA may require greater volumes for special testing programs. Proposed § 630.17(c)(4) would permit FDA to change the sample volumes requested without necessitating amendment of the regulations.

Y. Proposed Effective Date

FDA is proposing that any final rule based on this proposal be effective 30 days after its date of publication in the Federal Register. Except as described below, FDA is proposing that any monovalent virus pool or seed virus manufactured on or after the effective date be manufactured in accordance with any final rule resulting from this proposed rule. Because FDA believes that the current regulations provide adequate assurances of the safety and effectiveness of vaccine and in order to ensure that there is no period of time in which there might be a shortage of vaccine, the agency is proposing that the current regulations also remain in effect for 180 days after publication of the final rule amending those regulations. Therefore, during a transitional period of 150 days following the effective date of the amended regulations, a seed virus or monovalent virus pool could be manufactured in accordance with the provisions of either the current regulations or the amended regulations.

As discussed above, under new § 630.10(c)(6) FDA would permit the use for an indefinite period of time of any seed virus manufactured and tested in accordance with current requirements prior to 150 days after the effective date of the final rule.

Similarly, FDA is proposing in revised § 630.17(a) to permit the use of monovalent virus pools manufactured and tested in accordance with current requirements prior to 150 days after this effective date. Monovalent virus pools may be used over a period of several years to produce trivalent vaccines. Requiring manufacturers to retest these monovalent pools would be unnecessarily wasteful of animals, expensive, and time-consuming. Because the current regulations provide adequate assurances of the safety of the monovalent pools, the agency believes that it is most appropriate not to require retesting of the existing monovalent pools that have been properly manufactured and tested under current requirements.

IV. Environmental, Economic and Information Collection Considerations

The agency has determined under 21 CFR 25.24(c)(10) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

The agency has examined the economic consequences of this proposed rulemaking and has determined that it does not require either a regulatory impact analysis, as specified in Executive Order 12291, or a regulatory flexibility analysis, as defined in the Regulatory Flexibility Act (Pub. L. 96-354). Many of the amendments in the proposed rule would relieve minor burdens or increase the flexibility of the regulations, resulting in minor economic benefits for the manufacturer of oral poliovirus vaccine. FDA believes the proposed rule would promote the licensure of alternative sources of oral poliovirus vaccine. The availability of alternative sources of vaccine would benefit the public by assuring a continual supply of this necessary vaccine. FDA estimates that the proposed revised test for neurovirulence would reduce the number of primates required for the test by an average of 40 percent. Based on information from an international manufacturer of oral poliovirus vaccine, the proposed rule would result in savings related to the purchase and care of primates of $750,000 per year.

The agency concludes that the proposed rule is not a major rule as defined by Executive Order 12291. Further, the agency certifies that the proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act.

Section 630.17 of this proposed rule contains collection of information requirements already reviewed and approved by the Office of Management and Budget (OMB) under section 3507 of the Paperwork Reduction Act of 1980. OMB assigned these collection of information requirements approval number 0910-0206. In this proposal, FDA is continuing these collection of information requirements.

Interested persons may, on or before July 7, 1986, submit to the Dockets Management Branch (address above) written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy.

Comments are to be identified with the docket number in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 630

Biologics.

Therefore, under the Public Health Service Act and under authority delegated to the Commissioner of Food and Drugs, it is proposed that Part 630 be amended as follows:

PART 630—ADDITIONAL STANDARDS FOR VIRAL VACCINES

1. The authority citation for Part 630 continues to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

2. Subpart B of Part 630 is revised to read as follows:

Subpart B—Poliovirus Vaccine Live Oral Trivalent

Sec.

630.10 Poliovirus Vaccine Live Oral Trivalent.
630.11 Clinical trials to qualify for license.
630.12 Animal source and quarantine; personnel.
630.13 Manufacture of Poliovirus Vaccine Live Oral Trivalent.
630.14 Reference virus preparations.
630.15 Potency test.
630.16 Tests for safety.
630.17 General requirements.

Subpart B—Poliovirus Vaccine Live Oral Trivalent

§ 630.10 Poliovirus Vaccine Live Oral Trivalent.

(a) *Proper name and definition.* The proper name of this product shall be "Poliovirus Vaccine Live Oral Trivalent." The vaccine shall be a preparation containing the three types of live, attenuated polioviruses grown in monkey kidney cell cultures, or in a cell line found by the Director, Office of Biologics Research and Review, to meet the requirements of § 610.18(c) of this chapter. The vaccine shall be prepared in a form suitable for oral administration.

(b) *Criteria for acceptable strains.* (1) The Sabin strains of attenuated poliovirus, Type 1 (LS-c, 2ab/KP_3), Type 2 (P712, Ch, 2ab/KP_3), and Type 3 (Leon $12a_1b/KP_3$), or derivatives from them, may be used in the manufacture of vaccine. These strains shall be identified by historical records including (i) origin, (ii) techniques of attenuation, (iii) antigenic properties, (iv) neurovirulence for monkeys, (v) pathogenicity for tissue cultures of various cell types, and (vi) established virus markers, including rct/40, and d.

(2) Other poliovirus strains may be used in the manufacture of Poliovirus Vaccine Live Oral Trivalent provided that (i) data specified in paragraph (b)(1) of this section are submitted to the Director, Office of Biologics Research and Review, along with other data that establish that each such strain is at least as safe as the Sabin strain of the corresponding type and (ii) that each such strain has been used to produce vaccines meeting the safety and potency requirements of §§ 630.11, 630.15, and 630.16.

(3) The Director, Office of Biologics Research and Review, may prohibit the use of a specified strain whenever the Director finds that it is practicable to use another strain of the same type that will produce a vaccine of greater safety and of at least equivalent potency.

(c) *Criteria for qualification of the seed virus.* (1) Each seed virus used in vaccine manufacture shall be prepared from an acceptable strain in monkey kidney cell cultures, derived from animals which have met all of the requirements of § 630.12(a), and demonstrated to be free of extraneous microbial agents except for unavoidable bacteriophage.

(2) Seed virus used for the manufacture of oral poliovirus vaccine shall meet the requirements of §§ 630.13 and 630.16, including the intraspinal test for neurovirulence prescribed in § 630.16(b)(1). In addition, the neurovirulence of the first five consecutive monovalent virus pools prepared from the seed virus when tested by intraspinal inoculation in Macaca monkeys shall be no greater than that of the Reference Attenuated Poliovirus of the corresponding type available under § 630.14(b).

(3) A new seed virus may be used for production provided data are submitted in the form of a product license amendment that show the new seed virus and the first five consecutive monovalent virus pools prepared from it meet the safety requirements of §§ 630.13 and 630.16 and approval for the use of the seed virus is received in writing from the Director, Office of Biologics Research and Review.

(4) Seed virus in vaccine manufacture shall be prepared in a seed lot system from a master virus seed lot at a passage level consistent with § 630.13(a).

(5) The use of the seed virus may continue provided that the frequency of monovalent virus pools produced with it which fail to meet the criteria of neurovirulence for monkeys prescribed in § 630.16(b)(1)(ii) is not greater than predicted on the basis of comparison with the corresponding reference preparation. If the frequency of monovalent virus pools produced with the same seed virus which fail to meet the criteria of neurovirulence for monkeys prescribed in § 630.16(b)(1)(ii) is greater than the predicted 1 percent on the basis of the 99 percent fiduciary one-sided upper limit, that seed virus shall be disqualified for further use in vaccine production.

(6) Seed virus prepared and tested prior to [180 days after date of publication of revised rule] in accordance with the regulations applicable at that time may continue to be used for the manufacture of oral poliovirus vaccine without retesting to meet the revised specifications of this subsection. However, such seed virus shall be disqualified for vaccine use if it fails to meet the criteria of § 630.10(c)(5).

§ 630.11 Clinical trials to qualify for license.

To qualify for license, the antigenicity of the vaccine shall have been determined by clinical trials of adequate statistical design conducted in compliance with Part 56 of this chapter, unless exempted under § 56.104 or granted a waiver under § 56.105, and with Part 50 of this chapter. Such clinical trials shall be conducted with five lots of oral poliovirus vaccine that have been manufactured by the same methods. Type specific neutralizing antibody for each type of poliovirus in the vaccine shall be induced in 90 percent or more of susceptibles after a series of doses.

§ 630.12 Animal source and quarantine; personnel.

(a) *Monkeys*—(1) *Species permissible as source of kidney tissue.* Only Macaca monkeys, Cercopithecus monkeys, or other species found by the Director, Office of Biologics Research and Review, to be equally suitable, which meet the requirements of § 600.11(f) (2) and (8) of this chapter, shall be used as the source of kidney tissue for the manufacture of Poliovirus Vaccine Live Oral Trivalent.

(2) *Experimental and test monkeys.* Monkeys that have been used previously for experimental or test purposes shall not be used as a source of kidney tissue in the processing of vaccine.

(3) *Quarantine; additional requirements.* Excluding deaths from accidents or causes not due to infectious diseases, if the death rate of any group of monkeys being conditioned in

VOL 51 ISS 86 MY 5 1986 UMI

accordance with § 600.11(f)(2) of this chapter exceeds 5 percent per month, the remaining monkeys may be used for the manufacture of Poliovirus Vaccine Live Oral Trivalent only if all of the monkeys survive a new quarantine period.

(b) *Personnel.* All reasonably possible steps shall be taken to ensure that personnel involved in processing the vaccine are immune to all three types of poliovirus and do not excrete poliovirus.

§ 630.13 Manufacture of Poliovirus Vaccine Live Oral Trivalent.

(a) *Virus passages.* Virus in the final vaccine shall represent no more than five tissue culture passages from the original strain or no more than five passages from a virus clone derived from one of the first five passages.

(b) *Virus propagated in monkey kidney cell cultures*—(1) *Continuous cell lines.* When primary monkey kidney cell cultures are used in the manufacture of poliovirus vaccine, continuous cell lines shall not be introduced or propagated in vaccine manufacturing areas.

(2) *Identification of processed kidneys.* The kidneys from each monkey shall be processed separately. The resulting viral fluid shall be identified as a separate monovalent harvest and kept separately from other monovalent harvests until all samples for the tests prescribed in paragraph (b) (3) and (4) relating to that pair of kidneys have been withdrawn from the harvest.

(3) *Monkey kidney tissue production vessels prior to virus inoculation.* Prior to inoculation with the seed virus and at least 3 days after complete formation of the tissue sheet, the tissue culture growth in vessels derived from each pair of kidneys shall be examined microscopically for evidence of cell degeneration. If such evidence is observed, the tissue cultures from that pair of kidneys shall not be used for poliovirus vaccine manufacture. To test the tissue found free of cell degeneration for further evidence of freedom from demonstrable viable microbial agents, the fluid shall be removed from the cell cultures immediately prior to virus inoculation and tested in each of four culture systems:

(i) Macaca monkey kidney cells,

(ii) Cercopithecus monkey kidney cells,

(iii) Primary rabbit kidney cells, and

(iv) Human cells from one of the systems described in § 630.16(a)(6).

The fluid shall be tested in the following manner: Aliquots of fluid from each vessel shall be pooled and at least 10 milliliters of the pool inoculated into each system. The dilution of the pool with medium shall be no greater than 1:4 and the area of surface growth of cells shall be at least 3 square centimeters per milliliter of test inoculum. The cultures shall be observed for at least 14 days. At the end of the observation period, at least one subculture of fluid from the Cercopithecus monkey kidney cell cultures shall be made in the same tissue culture system and the subculture shall be observed for at least 14 days. If these tests indicate the presence in the monkey kidney tissue culture production vessels of any viable microbial agent, the viral harvest from these tissue cultures so implicated shall not be used for poliovirus vaccine manufacture.

(4) *Control vessels.* At least 25 percent of the cell suspension from each pair of kidneys shall be set aside and used to establish control cultures. The control cultures shall be examined microscopically for cell degeneration for an additional 14 days after the time of viral harvest. The culture fluids from such control cells shall be tested, both at the time of virus harvest and at the end of the additional observation period, by the method described for testing of fluids in paragraph (b)(3) of this section. In addition, the control cell sheet shall be examined for presence of hemadsorption viruses by the addition of guinea pig red blood cells.

(5) *Interpretation of test results.* At least 80 percent of the control vessels shall be free of cell degeneration at the end of the observation period to qualify the kidneys for poliovirus vaccine manufacture. If the test results of the control cells indicate the presence of any extraneous agent at the time of virus harvest, the virus harvest from that tissue culture preparation shall not be used for poliovirus vaccine manufacture. If any of the tests or observations described in paragraph (b) (3) or (4) of this section demonstrate the presence in the tissue culture preparation of any microbial agent known to be capable of producing human disease, the virus grown in each tissue culture preparation shall not be used for poliovirus vaccine manufacture.

(6) *Temperature of kidney tissue production vessels after virus inoculation.* After virus inoculation, production vessels shall be maintained at 33.9 to 35.0 °C during the course of virus propagation.

(7) *Kidney tissue virus harvests.* Virus shall be harvested not later than 72 hours after virus inoculation. Virus harvested from vessels containing the kidney tissue from one monkey may be tested separately, or samples of viral harvests from more than one pair of kidneys may be combined, identified, and tested as a monovalent virus pool. Each pool shall be mixed thoroughly and samples withdrawn for testing as prescribed in § 630.16(a). The samples shall be withdrawn immediately after harvesting and prior to further processing, except that samples of test materials frozen immediately after harvesting and maintained at −60 °C or below, may be tested upon thawing, provided no more than one freeze-thaw cycle is employed.

(8) *Filtration.* After harvesting and removal of samples for the safety tests prescribed in § 630.16(a), the pool shall be passed through sterile filters having a sufficiently small porosity to assure bacteriologically sterile filtrates.

§ 630.14 Reference virus preparations.

(a) *Titration test controls.* The following reference viruses may be obtained from the Office of Biologics Research and Review:

(1) Reference Poliovirus, Live, Attenuated, Type 1, as a control for correlation of virus titers in tissue cultures.

(2) Reference Poliovirus, Live, Attenuated, Type 2, as a control for correlation of virus titers in tissue cultures.

(3) Reference Poliovirus, Live, Attenuated, Type 3, as a control for correlation of virus titers in tissue cultures.

(4) Reference Poliovirus, Live, Attenuated, Trivalent, as a control for correlation of virus titers in tissue cultures.

(b) *Neurovirulence test controls.* Except as provided in paragraph (b)(2) of this section, the following reference virus shall be obtained from the Office of Biologics Research and Review:

(i) Reference Attenuated Poliovirus, Type 1, as a control for evaluation of monkey neurovirulence tests.

(ii) Reference Attenuated Poliovirus, Type 2, as a control for evaluation of monkey neurovirulence tests.

(iii) Reference Attenuated Poliovirus, Type 3, as a control for evaluation of monkey neurovirulence tests.

(2) Alternatively, WHO reference standards of the corresponding type, WHO/I, WHO/II, and WHO/III, may be used as controls for evaluation of monkey neurovirulence tests.

§ 630.15 Potency test.

(a) *Test for virus titer.* The concentration of living virus in each monovalent virus pool and in each trivalent vaccine, expressed as infectivity titer per milliliter for cell cultures, shall be determined using the Reference Poliovirus, Live, Attenuated of the same type as a control or using another reference preparation of the same type that has been calibrated against the appropriate reference preparation listed in § 630.14(a). A titration of the monovalent virus pool or the trivalent vaccine shall not constitute a valid test unless the titration of the reference virus when tested in parallel is within ± 0.5 $\log_{10}$ of its established titer. The titration of the parallel reference is intended to validate the test system and shall not be used to adjust the titer of the pool or lot under test.

(b) *Dose.* The human dose of trivalent vaccines shall be constituted to have infectivity titers in the final container material of $10^{5.6}$ to $10^{6.6}$ for Type 1, $10^{4.5}$ to $10^{5.5}$ for Type 2, and $10^{5.2}$ to $10^{6.2}$ for Type 3, or the equivalent.

§ 630.16 Tests for Safety.

(a) *Tests prior to filtration.* Monovalent virus pools shall contain no demonstrable viable microbial agent, except for unavoidable bacteriophage and the intended attenuated live poliovirus. The vaccine shall be tested for the absence of other infectious agents, including polioviruses of other types or strains. Testing of each monovalent pool shall include the following procedures:

(1) *Inoculation of rabbits.* A minimum of 100 milliliters of each monovalent virus pool shall be tested by inoculation into at least 10 healthy rabbits, each weighing 1,500 to 2,500 grams. Each rabbit shall be injected with a total of 1.0 milliliter intradermally in multiple sites, and subcutaneously with 9.0 milliliters, of the monovalent virus pool and the animals observed for at least 3 weeks. Each rabbit that dies after the first 24 hours of the test, or is sacrificed because of illness, shall be necropsied and the brain and organs removed and examined. The monovalent virus pool may be used for poliovirus vaccine only if at least 80 percent of the rabbits remain healthy and survive the entire period and if all the rabbits used in the test fail to show lesions of any kind at the sites of inoculation and fail to show evidence of cercopithecid herpesvirus 1 or any other viral infection.

(2) *Inoculation of adult mice.* Each of at least 20 adult mice, each weighing 15 to 20 grams, shall be inoculated intraperitoneally with 0.5 milliliter and intracerebrally with 0.03 milliliter of each monovalent virus pool. The mice shall be observed for 21 days. Each mouse that dies after the first 24 hours of the test, or is sacrificed because of illness, shall be necropsied and examined for evidence of viral infection by direct observation and subinoculation of appropriate tissue into at least five additional mice which shall be observed for 21 days. The monovalent virus pool may be used for poliovirus vaccine only if at least 80 percent of the mice remain healthy and survive the entire period and if all the mice used in the test fail to show evidence of lymphocytic choriomeningitis virus or other viral infection.

(3) *Inoculation of suckling mice.* Each of at least 20 suckling mice less than 24 hours old shall be inoculated intracerebrally with 0.01 milliliter and intraperitoneally with 0.1 milliliter of the monovalent virus pool. The mice shall be observed daily for at least 14 days. Each mouse that dies after the first 24 hours of the test, or is sacrificed because of illness, shall be necropsied and examined for evidence of viral infection. Such examination shall include subinoculation of appropriate tissue suspensions into an additional group of at least five suckling mice by the intracerebral and intraperitoneal routes and observed daily for 14 days. In addition, a blind passage shall be made of a single pool of the emulsified tissue (minus skin and viscera) of all mice surviving the original 14-day test. The monovalent virus pool may be used for poliovirus vaccine only if at least 80 percent of the mice remain healthy and survive the entire period and if all the mice used in the test fail to show evidence of Coxsackie or other viral infection.

(4) *Inoculation of guinea pigs.* Each of at least five guinea pigs, each weighing 350 to 450 grams, shall be inoculated intracerebrally with 0.1 milliliter and intraperitoneally with 5.0 milliliters of the monovalent virus pool to be tested. The animals shall be observed for at least 42 days and rectal temperatures recorded daily for the last 3 weeks of the test. Each animal that dies after the first 24 hours of the test, or is sacrificed because of illness, shall be necropsied and its tissues shall be examined both microscopically and culturally for evidence of tubercle bacilli, and by passage of tissue suspensions into at least three other guinea pigs by the intracerebral and intraperitoneal routes of inoculation for evidence of viral infection. If clinical signs suggest infection with lymphocytic choriomeningitis virus, serological tests shall be performed on blood samples of the test guinea pigs to confirm the clinical observations. Animals that die or are sacrificed during the first 3 weeks after inoculation with the monovalent virus pool shall be examined for infection with lymphocytic choriomeningitis virus. Animals that die in the final 3 weeks shall be examined both microscopically and culturally for *Mycobacterium tuberculosis*. The monovalent virus pool may be used for poliovirus vaccine only if at least 80 percent of all animals remain healthy and survive the observation period and if all the animals used in the test fail to show evidence of infection with *Mycobacterium tuberculosis* or any viral infection.

(5) *Inoculation of monkey kidney tissue cultures.* At least 500 doses or 50 milliliters, whichever is a greater volume of virus, taken either from each undiluted monovalent virus pool or, in equal proportions from individual harvests or subpools, shall be tested for simian viruses in Macaca monkey kidney tissue cultures and, in the same volume, in Cercopithecus monkey kidney tissue cultures. A dilution of the virus pool in medium not to exceed 1:4 shall be used. The area of surface growth of the cells shall be at least 3 square centimeters per milliliter of test inoculum. The test poliovirus shall be neutralized by high-titer specific antiserum of nonprimate origin. The immunizing antigens used for the preparation of antisera shall be grown in a cell line other than the cell line used for testing the vaccine. The cultures shall be observed for at least 14 days. At the end of the observation period at least one subculture of fluid from the Cercopithecus kidney cell culture shall be made in the same tissue culture system and the subculture shall be observed for at least 14 days. The monovalent virus pool may be used for poliovirus vaccine only if all the tissue cultures fail to show evidence of the presence of simian viruses or any other viral infection.

(6) *Inoculation of human cell cultures.* At least 500 doses or 50 milliliters, whichever represents a greater volume of virus, taken from either a single monovalent pool or, in equal proportions from individual harvests or subpools, shall be tested for the presence of measles virus in either (i) primary human amnion cells, (ii) primary human kidney cells, or (iii) any other human or nonhuman cell system of comparable susceptibility to unmodified measles virus. The virus pool shall be diluted with medium not to exceed 1:4. The area of surface growth of cells shall be at least 3 square centimeters per milliliter of test inoculum. The test material shall be neutralized with poliovirus antiserum of other than primate origin if the tissue culture cell system used is susceptible to poliovirus. The immunizing antigens used for the preparation of antiserum shall be grown in a cell line other than the cell line used for testing the vaccine. The culture shall be observed for at least 14 days. The monovalent virus

VOL 51 ISS 86 MY 5 1986 UMI

pool may be used for poliovirus vaccine only if all tissue cultures fail to show evidence of the presence of measles virus or any other viral infection.

(7) *Inoculation of a rabbit kidney tissue culture.* At least 500 milliliters of virus pool taken from either a single monovalent pool or, in equal proportions from individual harvests or subpools, shall be tested in primary rabbit kidney tissue culture preparations for evidence of cercopithecid herpesvirus 1. The virus pool shall be diluted with medium not to exceed 1:4. The area of surface growth of cells shall be at least 3 square centimeters per milliliter of test inoculum. The culture shall be observed for at least 14 days. The monovalent virus pool may be used for poliovirus vaccine only if all tissue cultures fail to show evidence of the presence of herpesvirus.

(b) *Tests after filtration.* The following tests relating to safety shall be performed on each monovalent virus pool after the filtration process:

(1) *Neurovirulence in monkeys.* Each monovalent virus pool shall be tested concurrently, if possible, with the corresponding type Reference Attenuated Poliovirus for neurovirulence by the intraspinal route of injection in Macaca monkeys. Whenever possible the monkeys should be from the same quarantine group and distributed randomly between the two test groups. If the number of monkeys included in both groups precludes completion during a single workday, equal numbers of monkeys shall be inoculated with the monovalent virus pool and the reference preparation during each of the testing days. A preinjection serum sample obtained from each monkey shall be shown to contain no neutralizing antibody in a dilution of 1:4 when tested against no more than 1,000 $TCID_{50}$ of each of the three types of poliovirus. The neurovirulence test is not valid unless the inoculation sample contains $10^{6.5}$ to $10^{7.5}$ $TCID_{50}$ per milliliter when titrated in comparison with the Reference Poliovirus, Live, Attenuated of the appropriate type. All monkeys shall be observed for 17 to 21 days and any evidence of physical abnormalities indicative of poliomyelitis or other viral infections shall be recorded.

(i) *Intraspinal inoculation.* For tests with Type 1 and Type 2 monovalent virus pools and the Reference Attenuated Poliovirus of the corresponding types, each of a group of at least 12 monkeys after being suitable anesthetized shall be injected intraspinally into the enlargement of the lumbar cord with 0.1 milliliter of the inoculation sample. For tests with Type 3 poliovirus materials groups of at least 20 monkeys shall be used after being suitably anesthetized. A test of a virus pool shall include at least one group of monkeys, and no more than three groups shall be inoculated. If on examination there is no evidence of correct inoculation, additional animals may be inoculated in order to restablish the minimum number of 11 positive monkeys for tests of Types 1 and 2 virus pools and the minimum number of 16 positive monkeys for tests of Type 3 virus pools. A positive monkey is an animal which either survives for 11 or more days or succumbs or is sacrificed due to a severe poliovirus infection at any time before the 11th day of the observation period and in which neural lesions specific for poliovirus are seen in the central nervous system. If at least 60 percent of the animals of a group survive 48 hours after inoculation, those animals that did not survive may be replaced by additional animals. If less than 60 percent of the animals in a group survive 48 hours after inoculation, the test shall be considered invalid and shall be repeated.

(ii) *Determination of neurovirulence.* At the conclusion of the observation period, a comparable evaluation shall be made of the evidence of neurovirulence of the monovalent virus pool under test and the Reference Attenuated Poliovirus of the corresponding type with respect to the histopathology of lesions caused by poliovirus, except that for animals dying or sacrificed when severely paralyzed or moribund during the test period, these examinations shall be made immediately after death. Histopathological examinations by a qualified pathologist shall be made of at least the lumbar and cervical enlargements, the medulla, the mescencephalon, the thalamus, and motor cortex of each monkey in the groups injected with the monovalent virus pool or with the reference under test. The magnitude of the neuropathology exhibited in the lumbar and cervical areas, the medulla, and mesencephalon of all positive monkeys inoculated with the monovalent virus pool shall be quantified and compared to the magnitude of the neuropathology exhibited in the same anatomical areas of monkeys in the current test and all previous tests of the Reference Attenuated Poliovirus of the corresponding type. If, in the current test, monkeys were not inoculated with the Reference Attenuated Poliovirus of the corresponding type because of a shortage of monkeys, the magnitude of the neuropathology of the monovalent virus pool shall be compared to the magnitude of the neuropathology exhibited in all previous tests of the corresponding Reference Attenuated Poliovirus. The monovalent virus pool may be used for poliovirus vaccine if a comparative analysis of the test results demonstrates that the numerical value assigned for neurovirulence of the monovalent virus pool is equal to or less than that of the Reference Attenuated Poliovirus of the corresponding type. If the numerical value assigned for neurovirulence of the monovalent virus pool is greater than that of the Reference Attenuated Poliovirus, the monovalent virus pool is acceptable if the difference is not greater than that calculated by a mathematical method that is expected to reject vaccines with neurovirulence identical to the reference at a frequency of not less than 1 in 100 when 1 group of monkeys is inoculated. If 2 groups are injected with the same monovalent virus pool under test, the frequency or rejection shall be not less than 5 in 100 and for 3 groups, not less than 10 in 100. If the difference in numerical values is greater than that calculated, irrespective of which reference preparation was used in the test, the monovalent virus pool shall be considered unacceptable and shall not be used for vaccine manufacture.

(iii) *Test with Reference Attenuated Poliovirus.* The Reference Attenuated Poliovirus of the appropriate type shall be tested as prescribed in paragraph (b)(1)(i) of this section concurrently with the monovalent virus pool, unless such testing is not possible because of insufficient numbers of monkeys. More than one monovalent virus pool of the same type may be tested with the same corresponding Reference Attenuated Poliovirus. A minimum of four tests by the testing laboratory of each Reference Attenuated Poliovirus is required to provide sufficient experience to define its performance and establish the variability of the assay. Each test of the Reference Attenuated Poliovirus shall be considered acceptable and added to the previous testing experience only if the magnitude of its poliovirus neuropathology is statistically compatible with the results of all previous tests with the same reference preparations of the same type performed by the test laboratory.

(2) *Tests for in vitro markers.* A test shall be performed on each monovalent virus pool using the rct/40 Marker or another marker method shown to be of value in identification of the attenuated strain. A second test shall be performed using the d Marker. The test results shall demonstrate that the monovalent virus pool under test and the seed virus have

substantially the same marker characteristics.

(i) *rct/40 Marker.* Attenuated strains which grow readily at 40 °C (±0.5 °C) are classified as rct/40 positive (+) in contrast to the rct/40 negative (−) strains, which show an increased growth of at least 100,000 fold at 36 °C over that obtained at 40 °C. Comparative determination shall be made in suitable culture vessels.

(ii) *d Marker.* Attenuated strains which grow readily at low concentrations of bicarbonate under agar are classified as d positive (+) in contrast to the d negative (−) strains, which exhibit delayed growth under the same conditions. The cultures shall be grown in a 36 °C incubator, in suitable culture vessels in an environment of 5 percent CO_2 in air.

(c) *Final container sterility test.* The final container sterility test need not be performed provided aseptic techniques are used in the filling process.

§ 630.17 General requirements.

(a) *Vaccine release.* No lot of trivalent vaccine shall be released unless each monovalent virus pool contained therein:

(1) Has been manufactured by the same procedures;

(2) Has met the criteria of neurovirulence for monkeys prescribed in § 630.16(b)(1);

(3) Has met the criteria of in vitro markers prescribed in § 630.16(b)(2); and

(4) Has been released for further manufacturing by the Director, Office of Biologics Research and Review.

However, monovalent virus pools manufactured and tested prior to [180 days after date of publication of revised rule] in accordance with regulations applicable at that time may continue to be used to produce trivalent vaccine without additional testing of the monovalent virus pools by the manufacturer. The protocols for all monovalent virus pools produced sequentially from the same seed shall be submitted to the Director, Office of Biologics Research and Review, whether or not release of the pool for futher manufacturing is requested.

(b) *Labeling.* In addition to the items required by other applicable labeling provisions of this chapter, the final container label shall bear a statement indicating that liquid vaccine may not be used for more than 7 days after opening the container. Labeling may include a statement indicating that, for frozen vaccine, a maximum of 10 freeze-thaw cycles is permissible provided the total cumulative duration of thaw does not exceed 24 hours, and provided the temperature does not exceed 6 °C during the periods of thaw.

(c) *Samples and protocols.* For each trivalent lot of vaccine and for each monovalent virus pool, the following materials shall be submitted in accordance with instructions received from the Director, Office of Biologics Research and Review, Center for Drugs and Biologics, 8800 Rockville Pike, Bethesda, MD 20892:

(1) A protocol that consists of a summary of the history of manufacture of each trivalent lot or monovalent virus pool, including any test results requested by the Director, Office of Biologics Research and Review.

(2) A 200-milliliter bulk sample of each final monovalent virus pool having a virus titer of no less than $10^{7.5}$ $TCID_{50}$ per milliliter; if the titer is greater, a correspondingly smaller volume may be submitted.

(3) A total of at least 200 doses or 6 final containers of the trivalent vaccine, whichever is the larger amount.

(4) When deemed appropriate, the Director, Office of Biologics Research and Review, may require submission of sample volumes other than those specified in paragraphs (c)(2) and (3) of this section.

Dated: April 28, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

Natural Resource Damage Assessments; Proposed Rule

VOL 51 ISS 86 MY 5 1986 UMI

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 11

Natural Resource Damage Assessments

AGENCY: Office of the Secretary, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The proposed rule establishes simplified procedures for assessing damages to natural resources from a discharge of oil or release of a hazardous substance and compensable under either the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), 42 U.S.C. 9601 *et seq.*, or under the Clean Water Act (CWA), 33 U.S.C. 1251 *et seq.* (also known as the Federal Water Pollution Control Act). Responsibility for preparation of this proposed rule was delegated by the President to the Department of the Interior in Executive Order 12316, August 14, 1981, 46 FR 42237. The proposed rule supplements the procedures for performing assessments published at 50 FR 52126 (December 20, 1985) referred to as the "type B" procedures. The proposed rule is applicable only to the assessment of damages in coastal and marine environments.

DATE: Comments should be submitted by June 18, 1986. Comments received on or before the above date will be considered in the decisionmaking process on the final rulemaking. The short comment period is required because of the court-ordered deadline that requires publication of the final rule by October 7, 1986.

ADDRESS: Comments should be sent to Keith Eastin, Deputy Under Secretary, CERCLA 301 Project Director, Room 4354, Department of the Interior, 1801 "C" St. NW, Washington, DC 20240. Comments will be available for review at the above address during regular business hours (7:45 a.m. to 4:15 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT:
Keith Eastin, (202) 343–5183
Alison Ling, (202) 343–1301

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory Background

Section 301(c) of CERCLA requires the promulgation of rules for the assessment of damages for injury to, destruction of, or loss of natural resources resulting from a discharge of oil or a release of a hazardous substance for the purposes of CERCLA and of section 311(f) (4) and (5) of the CWA. Section 301(c) states:

(c)(1) The President, acting through Federal officials designated by the National Contingency Plan published under section 105 of this Act, shall study and, not later than two years after the enactment of this Act, shall promulgate regulations for the assessment of damages for injury to, destruction of, or loss of natural resources resulting from a release of oil or a hazardous substance for the purpose of this Act and section 311(f) (4) and (5) of the Federal Water Pollution Control Act.

(2) Such regulations shall specify: (A) Standard procedures for simplified assessments requiring minimal field observation, including establishing measures of damages based on units of discharge or release or units of affected area, and (B) alternative protocols for conducting assessments in individual cases to determine the type and extent of short- and long-term injury, destruction, or loss. Such regulations shall identify the best available procedures to determine such damages, including both direct and indirect injury, destruction, or loss and shall take into consideration factors, including, but not limited to, replacement value, use value, and ability of the ecosystem or resource to recover.

(3) Such regulations shall be reviewed and revised as appropriate every two years.

The proposed rule, when final, will be used by Federal and State authorized officials acting as trustees of natural resources to assess damages to natural resources for purposes of section 107(a) and 111 (a) and (d) of CERCLA and section 311(f) (4) and (5) of the CWA. The results of assessments performed by a Federal official according to these procedures shall be accorded the evidentiary status of a rebuttable presumption as provided in 111(h) of CERCLA.

Section 301(c) of CERCLA specifies two types of procedures to be developed. The type A procedures are to be standard procedures for simplified assessments requiring minimal field observation. The type B procedures are to include alternative methodologies for conducting assessments in individual cases.

B. Regulatory Background

On December 20, 1985, the Department of the Interior proposed the alternative methodologies for conducting assessments in individual cases, otherwise known as the "type B" procedures. The proposed rule was published at 50 FR 52126. The rationale set forth in that proposed rule and explained in the preamble is also applicable to this proposed rule, which is a more specific application of the concepts expressed in the type B proposal. This proposed rule comprises the "type A" procedures, or the standard procedures for simplified assessments requiring minimal field observation.

The December 20, 1985, proposed rulemaking explained that the type A and type B proposed rules were being promulgated under court-imposed deadlines in a consent order entered in *State of New Jersey et al.* v. *Ruckelshaus et al.*, (now Thomas), Civ. No. 84–1668 (D.N.J.). On February 3, 1986, Judge Rodriguez entered an order modifying the previously established deadlines. The modified schedule is as follows:

1. The Secretary will promulgate and submit to the Federal Register the final type B regulations on or before June 23, 1986.

2. The Secretary will propose for public comment the type A regulations on or before May 5, 1986, and promulgate final type A regulations and submit them to the Federal Register for publication by October 7, 1986.

This change in deadlines resulted largely from numerous requests for extension of time to provide public comment on the type B proposed rule and was agreed to by the parties to the litigation. Because of the court mandated deadline, the comment period for this proposed rule is limited to 45 days.

C. Concepts Embodied in the Proposed Rule

1. The Model

The type A procedure described in this proposed rule uses a computer model to perform the numerous mathematical computations required for the simplified assessment of damages in coastal and marine environments. Accordingly, this assessment model is referred to as the Natural Resource Damage Assessment Model for Coastal and Marine Environments (NRDAM/CME). The model incorporates the concepts enunciated in the type B proposal. The computer program is designed so that it can be run on widely available microcomputers.

This proposed rule is the first type A procedure being developed by the Department of the Interior. At some future date this system may be expanded or new systems developed to cover other ecosystems, natural resources and different types of discharges or releases. Coastal and marine environments were chosen as the subject of the first type A procedure because much more extensive information was available on the fate and effects of discharges or releases of oil or hazardous substances in these environments than for other ecosystems and natural resources.

The NRDAM/CME, which represents the state-of-the-art in computer modeling and techniques, was developed with contractor assistance provided by Economic Analysis, Inc., of Wakefield, Rhode Island, and Applied Science Associates, Inc., of Narragansett, Rhode Island. The contractor's work was reviewed by a number of experts in ocean and marine biology, computer modeling, natural resources economics, and toxicology. Prior to the drafting of this proposed rule, a draft of the contractor's technical report and the NRDAM/CME was circulated to the Department of the Interior bureaus and offices and to Federal agencies represented on the National Response Team for review and comment. The contractor's technical report is entitled: Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant for CERCLA Type A Damage Assessments.

The report and the NRDAM/CME are available from the CERCLA 301 Project at the address listed at the beginning of this document. The report contains a detailed discussion of the model, its documentation, and its limitations.

2. Selecting Between a Type A or Type B Assessment

Whenever a discharge or release occurs in the coastal or marine environment a type A assessment should be performed unless the limtations of the model make it inappropriate to a given incident. The NRDAM/CME cannot be applied universally. It is applicable only to selected types of discharges or releases. Fundamentally, before the NRDAM/CME may be used, the discharge or release must occur in a coastal or marine environment. Certain other conditions also apply. The substance discharged or released must be contained in the data base of the model. Special resources, as that term is defined in the type B proposed rule, are not addressed in the biological data base and therefore cannot be assessed using the NRDAM/CME. If estimates of the natural resources potentially injured would differ significantly from the averages listed within the NRDAM/CME for the area in which the discharge or release occurred, the model may not be appropriate for assessing damages. The discharge or release must be a relatively minor, single event of short duration occurring at the water surface or in the intertidal zone. The injury to biological resources must be primarily due to direct or indirect mortality, or damage must occur due to closure of a fishing area or closure of a bench. In addition, mortality to biological resources must be due primarily to the direct and indirect effects of the discharge or release rather than the effects of any chemical agents or other clean up activities.

Whether or not certain of these conditions exist will necessarily be a subjective decision in some incidents. It may be clear in the case of a barge spill or the rupture of a vessel hull by grounding that the incident is a "single event" which occurred over a "short duration of time." However, it is impossible to formulate a uniform definition of the term "relatively minor" that will be able to cover all types of discharges and releases. There is no clear definition in CERCLA concerning the threshold amount of a discharge or release or the perceived extent of natural resource damages that will separate a type A from a type B assessment. In fact, the consequences of seemingly similar incidents can vary greatly, depending upon such factors as the amount and characteristics of the discharge or release and the location and season of the events. For example, a release of a hazardous substance in a highly productive estuary will likely cause greater biological injuries and economic damages than an identical discharge in other less productive areas. Potential natural resources damages will depend upon the location and season of the incident as well as the quantity and toxicity of oil and hazardous substances discharged or released.

If the conditions under which the NRDAM/CME can be used do not exist, the authorized official performing the assessment should use a type B procedure. Future models or other procedures may be developed that will allow for type A assessments involving other ecosystems or other types of discharges or releases.

Use of the NRDAM/CME requires little or no field observation of the pathway of contamination or of the biological resources injured. The model and its supporting data bases are based upon averaged values and may not necessarily reflect the actual events of any specific incident. Accordingly, there may be times when the authorized official performing the assessment or the potentially responsible party may conclude that a type B assessment that examines actual occurrences would be a more accurate measure of damages. For this reason, the following discretion is allowed as to selection of assessment procedures.

If the authorized official determines that one of the conditions listed above is not satisfied, the authorized official may make a determination that the NRDAM/CME is not applicable to the discharge or release, and that a type B assessment will be performed. Conversely, it may be the potentially responsible party that prefers that a type B assessment be performed for a particular incident. The proposed rule allows the potentially responsible party to request that a type B assessment be conducted even if the NRDAM/CME is applicable to the discharge or release, on the condition that the potentially responsible party agrees to advance and ultimately bear responsibility for all reasonable costs of the assessment regardless of the outcome. In this case, the authorized official performing the assessment must then perform a type B. As stated in § 11.32(d) of the type B proposed rule, the authorized official may allow the potentially responsible party to perform all or any part of the Assessment Plan under the direction and guidance of the authorized official.

The potentially responsible party will be offered the opportunity to exercise the option to request that a type B assessment be performed even if the NRDAM/CME is applicable to the discharge or release after: (1) The preassessment screen has been completed, including the identification of resources potentially at risk; and (2) the authorized official has determined that a type A assessment will be performed. The Assessment Plan will include documentation setting forth the fact that such an opportunity was offered to the potentially responsible party, and that party's decision as to whether (1) the type B assessment will be performed upon its advancement of costs, or (2) type A procedures will be used. Should the potentially responsible party select type B procedures, the Assessment Plan will be completed on that basis and all requirements for a type B assessment must be fulfilled, including confirmation of exposure and determination of injury.

I. Overview of the Proposed Rule

A. The type A assessment

1. Preassessment Screen

A type A assessment includes the same preliminary steps as the type B assessment. The authorized official must perform a preassessment screen to determine that a CERCLA or CWA covered incident has occurred and that resources for which a Federal or State agency may act as trustee have been affected. Multiple trusteeship issues will require resolution in accordance with

VOL 51 ISS 86 MY 5 1986 UMI

the provisions proposed in the type B procedures.

2. Assessment Plan

An Assessment Plan as described in § 11.30 through §11.33 of the type B proposed rule is required before a type A assessment may be performed. Specifically, the authorized official must comply with the development requirements of § 11.32 including coordination with co-trustees, identification and involvement of the potentially responsible party, and public involvement in the Assessment Plan. Unlike the plan for a type B assessment, the type A Assessment Plan need not contain a plan for field testing and sampling, nor is a confirmation of exposure required. An Economic Methodology Determination is also unnecessary since the NRDAM/CME incorporates the use value methodology. What is required for the type A Assessment Plan is a list of the specific data inputs described in § 11.41(c) of this Part that will be used to apply the NRDAM/CME. The Assessment Plan shall document how the specific data inputs were derived or obtained.

Some of these data inputs are required for each incident that is assessed. For other data inputs the model will supply default values if estimates of site-specific information are not available. The default values pertain to environmental characteristics of the site such as the air temperature, surface currents and water depth. Site-specific information or estimates of this information should be used whenever it is reasonably available.

Basic information such as the type, amount, location, and date for each discharge or release should be available from the On-Scene Coordinator (OSC), normally the U.S. Coast Guard in coastal and marine areas. The OSC may often have available pertinent supplemental information, such as the mean ocean surface current and the mean wind speed and direction at the approximate time of the discharge or release.

Additional information on data input parameters that were not specifically measured at the time of the discharge or release is available from a number of sources. Surface currents can be obtained from the *Surface Currents* atlas series published by the Department of Navy, Naval Oceanographic Office, Bay St. Louis, NSTL Station, MS 39522, and available from the National Technical Information Service, 5285 Port Royal Rd., Springfield, VA 22161. Tidal velocities can be obtained or calculated from data values available in the *Tide Tables* or *Tidal Current Tables* published annually by the National Oceanographic and Atmospheric Administration (NOAA) National Ocean Service. More detailed information on tides for some locations can be found in *Tidal Current Charts* or *Tidal Current Diagrams*, also published by NOAA. Information on distance to land boundaries and bottom types can be found in *Standard Nautical Charts*. All of these NOAA documents are published by geographic regions and may be ordered from: U.S. Department of Commerce, Distribution Branch, NCG 22, Riverdale, MD 20737–1199; (301) 436–6194. Another source of information on bottom types or sediment characteristics is the National Geophysical Data Center, which has data files that can be searched by location. The address is: National Geophysical Data Center, NOAA/NESDIS, Mail Code E/GC, 325 Broadway, Boulder, CO 80303; (303) 497–6487.

The National Oceanographic Data Center collects historical survey data for a large number of variables, including suface current, upper and lower water column depth and density, water temperature, suspended sediment concentration, and wind speed and direction, though not all information may be available for a specific location or time period. They can be contacted for an inventory of the data available for a particular location at: National Oceanographic Data Center, NOAA/NESID, NODE/OC21, Page Bldg. 1, Rm. 406, 2001 Wisconsin Ave., NW, Washington, DC 20235; (202) 634–7500. A User's Guide to their data files can also be obtained at that address.

Similar information on weather related parameters at the approximate time of the discharge or release, including air temperature, wind speed, and wind direction is available from the National Climatic Data Center. Their address is: National Climatic Data Center, NOAA/NESDIS, Federal Building, Asheville, NC 28801; (704) 259–0682.

B. Overview of the NRDAM/CME

The NRDAM/CME contains all of the chemical, biological, and economic data required to determine injury, quantify that injury, and determine damages for natural resources in the coastal and marine environments of the United States, and its territories and possessions. The NRDAM/CME is comprised of physical fates, biological effects, and economic damages submodels.

The model defines injury as a result of the discharge or release, as: (1) direct mortality to adult and larval fish, shellfish, waterfowl, shorebirds, fur seals, and lower trophic organisms due to toxic concentrations of the spilled substance, and (2) indirect mortality to fish and shellfish due to a loss of foodstuff from the food chain. The model also calculates damages due to the closure of a fishing area, or the closure of a public beach. The model does not consider possible injuries to air resources or species using the air resources that could occur due to the evaporation or volatization of the spilled substance, as there is a lack of reliable data on these effects.

The areal extent of a fishing area subject to closure is a data input made by the user based upon the authorized official's determination of the actual area closed, not a fact developed from the NRDAM/CME. The length of beach closed, if any, is also an input made by the user. Data on the length of beach closed is required rather than the area closed. This is because most of the State-supplied visitation data was in the form of trips made to, and footage of, public beaches. Use of this data allowed calculation of trips made per foot of public beach. In addition, total visits forgone and the value of each visit are adjusted [without further user input) for the time of year that the closure of the beach took place.

The physical fates submodel determines the transport of the substance in the water pathway. The user supplies information on the type of substance spilled, weather conditions, the physical conditions of the coastal or marine environment in which the discharge or release occurred, and whether the discharge or release occurred in the intertidal or subtidal area. With this information the submodel calculates the expected concentration, transport, and dispersion of the substance over time.

The quantification of the loss to biological resources injured by the substance is determined by the interaction of the physical fates and biological effects submodels. The user supplies information on ecosystem province type, predominant bottom type, whether the spill occurred in the marine or estuarine environment, and the extent of beach or fishing area that was closed. With this information the model calculates the loss of biomass due to direct and indirect mortality. In the case of fishing closures, the model also determines the lost catch attributable to the closure. The biological data base for this submodel contains information on the average density of biomass for over 150 commercially and recreationally important species, grouped by species category and by season and location; primary and secondary productivity estimates for the phytoplankton, zooplankton, and benthic populations of food chains in each of the ecosystem province types; and selected population parameter measures, such as growth rates, mortality rates, and fishing mortality rates for each ecosystem province type.

The NRDAM/CME incorporates the use value methodology of § 11.83 of the type B procedures instead of balancing restoration costs against lost use values. Restoration costs were not used because the number of circumstances addressed by the physical fates and biological effects submodels made calculation of average restoration costs technically infeasible. The economic data base contains province specific ex-vessel prices for the value of commercially harvested fish and all shellfish not caught due to the discharge or release. These prices are three year averages for 1982–84. The data base also contains information on visitor days and length of stays for National Seashores and other public beaches. Beach days lost are valued using average non-market prices obtained from existing studies of recreational beach use. The data base contains non-market marginal prices for the value of waterfowl, recreational fishing, and shorebirds. All non-market prices come from a review of the economic literature in their respective areas.

To apply the model, the authorized official need only supply the necessary site-specific data. Little or no actual field observation is necessary if the chemical and quantity discharged or released are known. The NRDAM/CME data bases contain the information required to determine injury, specify the pathway through which injury occurred, quantify the effects of injury, and determine damages, based on the scientific knowledge and the concepts developed in the type B proposed rule. This level of detail allows the NRDAM/CME to be presumptive.

C. Post-Assessment Phase

The proposed rule for type B assessments requires that the responsible party establish a fund when the damage award is made. Restoration actions are to be planned, and the fund is to pay for actions taken pursuant to the Restoration Plan. For type A assessments it may not always be feasible to prepare a separate full scale Restoration Plan for each award, since amounts recovered may be less than amounts recovered as a result of a type B assessment. These smaller recoveries will result since the type A assessments are generally designed for relatively smaller and simpler incidents than type B assessments.

Accordingly, the proposed rule now provides that when recoveries occur from type A assessments the agency acting as trustee may apply several type A recoveries to one Restoration Plan. One or more type A recoveries can be added to any existing restoration effort if a plan has been developed that incorporates similar requirements to those in § 11.82. The requirements of § 11.82 are that the plan incorporate: (1) cost-effectiveness; (2) public participation; (3) a no-action alternative; (4) the use of interdisciplinary techniques; and (5) a thorough examination of alternatives, as appropriate to the amount of the monies available and the extent of the existing restoration effort. The Restoration Plan must describe how sums from more than one recovery will be used for restoration, replacement, or acquisition of equivalent resources.

For example, discharges or releases may occur in the X Bay. State Y could develop a Restoration Plan for X Bay. Whenever a type A incident occurred in X Bay, damages for that particular incident would be used to fund actions under the X Bay Restoration Plan. Alternatively, if a "Restoration Plan" which is similar to that required in § 11.82 is in effect for X Bay, monies recovered from a type A assessment may be included in that Restoration Plan.

III. Summary and Analysis of Major Issues Included in the Comments Received from the Advance Notices of Proposed Rulemaking

A. Introduction

Three Advance Notices of Proposed Rulemaking (ANPRM's) were issued by the Department during the course of the development of the rules required under § 301(c) of CERCLA. These ANPRM's were issued on January 10, 1983, August 1, 1983, and January 11, 1985. Most of the comments received in response to the three Notices were either on the overall principles that should govern the development of both type A and type B assessments, or on type B assessments in particular. All of these comments were addressed at length in the preamble to the proposed rule for type B assessments. Since the type A assessments are based on the underlying concepts in the type B proposed rule, these basic issues are not discussed again here.

Comments specifically directed toward type A assessments fell into two general categories. The first centers on the appropriate criteria for selecting between a type A or type B assessment. The second includes suggestions and recommendations on the format and design of the type A assessments.

B. Comments on the Selection of a Type A or Type B Assessment Procedure

Comments on deciding between an A and a B assessment covered both the issue of how the decision should be made and of who should make the decision.

Some comments assumed that an A or a B assessment would be selected on the basis of the size of a discharge or release. Others suggested taking into consideration such factors as the duration of the discharge or release, the units or degree of resources damaged, the kinds of ecosystems affected, or the amount of remedial action required. Some recommended statistical analyses of these factors or others to reveal patterns of characteristics indicative of major and minor events. One comment said that most hazardous substance releases should require a type B assessment, another said that a type B should be mandated when endangered or threatened species were involved, and another stated that a type A should only be used for brief, discrete spills to surface waterways. Some comments recommended an economic criteria, such as allowing a type B only when the parties involved refused to accept type A damage results, or requiring a type A if the cost of doing a type B would be equal to or exceed the amount of damage determined by a type B assessment. One comment suggested that a type B only be done in special cases, and that the cost of type B assessments be split between the discharger and the trustee as an incentive to reach agreement based on a type A assessment. Many comments requested flexibility in the decision of whether to do a type A or a type B rather than the imposition of a hard and fast rule.

A few comments expressed the opinion that a "de minimus" level for spill amounts should be set, and that discharges or releases under this amount should be automatically excluded from either a type A or a type B assessment. About half of the comments on the type A's maintained that the official authorized to act as trustee should be the one to decide between a type A or a type B assessment. An equal number of comments held that the decision should either have input from the responsible party, be left entirely up to the responsible party, or be made by the responsible party and the On-Scene

BEST COPY AVAILABLE

VOL 51 ISS 86 MY 5 1986 UMI

Coordinator. One comment suggested that the decision be made entirely by the On-Scene Coordinator and the Regional Response Team.

The criteria set forth in the proposed rule for selecting between a type A or a type B assessment incorporate many of the ideas expressed in the comments. These criteria are discussed in detail in part (I)(c)(2) of this preamble. The information necessary for the decision includes the type, size, impact, duration and location of the discharge or release, and whether special resources or significantly above-average amounts of natural resources are affected. Both the authorized official and the responsible party are given some discretion in the choice of assessment type. Allowing flexibility in the decision to select an A or a B assessment, providing some incentive to use the less elaborate A assessment when appropriate, and limiting type A's to certain situations, should act to ensure that all assessments performed exhibit both reasonable cost and an appropriate assessment of damage.

No de minimus levels prohibiting assessments for discharges or releases below a certain amount have been set in the proposed rule. Since the degree of injury potentially caused by a discharge or release varies according to many factors in addition to the amount spilled, including aquatic toxicity, solubility, and geography, it would be unrealistic to attempt to set any one level or even several levels as a cut-off point for an assessment. Type A assessments using the NRDAM/CME yield a damage amount that is functionally related to the injury to natural resources from any particular discharge or release. The fact that many relatively small spills result in insignificant damage amounts guards against the performance of unnecessary assessments. In these cases the costs of pursuing an assessment would not be reasonable in comparison with any possible awards.

C. Comments on the Format and Design of Type A Assessments

Almost all comments received opposed the use of simple tables or charts of organism prices for type A assessments. A number of comments insisted that injury always be directly linked with a discharge or release. Some comments suggested that "formula-type" procedures using statistical analyses of existing data along with the best current technology and techniques would be appropriate.

The Department investigated statistical procedures to correlate existing information on actual injuries, damages, or restoration costs to amounts discharged or released. There were three major problems that made this type of analysis unproductive. First, most previously reported damage amounts are the result of negotiated settlements. This means the damage award may have little, if any, relationship to the injury to natural resources. Because of this it is difficult, if not impossible, to determine the value of the injured resource or even a "correct" restoration cost in most cases.

Second, only a few actual damage assessments or restorations have been performed under CERCLA or the CWA, giving an insufficient number of data points necessary for a high degree of statistical confidence. Moreover, these assessments have been done, quite logically, mainly for relatively large discharges or releases. An extensive literature search did not reveal any damage assessments done under CERCLA or the CWA in coastal or marine environments for the more common relatively small discharge or release. For example, according to the preliminary 1983 figures published by the U.S. Coast Guard ("Pollution Incidents In and Around U.S. Waters," COMDTINST, M16450.2F) the average discharge of oil per incident in marine and estuarine areas in the Pacific and Atlantic Oceans and the Gulf of Mexico was about 12 barrels. The Department is not aware of any damage assessments performed for discharges this small in coastal or marine environments. Casual empiricism suggests, and is borne out by the results of the NRDAM/CME, that the relationship between "large" and "small" discharges or releases is not necessarily linear. Therefore, even if there were sufficient information on large discharges or releases, we would not expect to be able to extrapolate this information for application to relatively small discharges or releases.

Third, while some information is available for large discharges of oil, CERCLA is too new to have generated many natural resource damage assessments even for large releases of hazardous substances. Therefore, even less information exists for natural resource damages associated with releases of hazardous substances than those associated with discharges of oil. These problems prompted the Department to investigate other ways to estimate injury and damages in a simplified manner. This investigation led to the development of the NRDAM/CME.

The computer model described in this proposed rule uses statistical averages to estimate injuries caused by specific oils or hazardous substances under specific ecological, environmental, and physical conditions. This method allows a more technically accurate and realistic assessment of damages than those obtainable from any kind of simplistic table or chart. At the same time, the model retains the advantage of a simplified procedure by not requiring the extensive field testing necessary to establish a causal connection between injury and a discharge or release.

General comments on the content of type A procedures included a variety of suggestions. It was recommended that the assessments should: recognize fate and effect differences; incorporate information on toxicity, persistence, amount spilled, area affected, natural resources, ecosystems, and habitats; require minimum field observation; be concerned with effects on marinas and beaches; or concentrate on areas and resources where spills have occurred in the past and might be expected in the future. A number of comments maintained that separate procedures be established for oil and hazardous substances.

The decision by the Department to develop a coastal and marine model as the initial type A procedure reflects an awareness of the magnitude of previous discharges and releases in these environments. The model incorporates detailed information on oil and hazardous substances and resources as suggested by the comments, but requires minimum field observation. Since the model takes into account differences in fate, effect, toxicity, etc., between oils and hazardous substances, it is able to handle both without the need for separate sets of procedures.

A number of comments addressed the economic methodology to be used for determining damage amounts in type A assessments. Many maintained that the law indicated compensation for injuries rather than the imposition of penalties. Comments variously suggested that damages be limited to economically measurable amounts as measured using sound economic evaluation techniques, that only consumptive losses be included unless data is available on non-consumptive losses, or that damages include all lost use values and thus be a disincentive to possible polluters. Most comments expressed a concern about restoration, and many recommended that restoration costs, taking into account the ability of the resource to recover naturally, be used as the basis for determining damage. An additional concern was that parties causing the discharge or release not be charged with damages caused by negligent response activities performed by other parties.

AJAVA Y700 T225

The NRDAM/CME calculates damages based on the reduction in consumptive and non-consumptive value of the in situ use of the affected resource during the period of natural recovery. The model uses an ecological food chain approach for assessing value to lower trophic organisms and bases damage to fisheries and beaches on regional market prices, recreational values, and lost days of use due to closure. Amounts of oil or hazardous substances removed during response actions can be accounted for by the model, but additional injury caused by cleanup activities are not.

Due to a lack of available data, it was not possible to design an economically sound model using restoration costs as the basis for damage calculation. Two points should be emphasized in this regard. First, as is discussed in section (I)(C)(2) of this preamble, the potentially responsible party has the option to have a type B assessment performed, upon that party's agreement to advance and bear responsibility for its costs. The determination of damages in a type B assessment will always include an evaluation of restoration costs as compared with diminution of use values. Second, the use of all awards resulting from type A assessments must be used for restoration purposes as mandated in §§ 11.92 and 11.93 of the type B proposed rule. This is in keeping with the overall mandate of CERCLA that natural resource damages be used to benefit the resource that was injured, lost, or destroyed.

Authorship

The primary authors of this proposed rulemaking are Keith Eastin, Deputy Under Secretary, Alison Ling, Office of the Solicitor, David Rosenberger, U.S. Fish and Wildlife Service, and Willie Taylor, Office of Policy Analysis, all with the Department of the Interior, Sheryl Katz, formerly with the Office of the Solicitor, and Richard Aiken, formerly with the Bureau of Land Management, Department of the Interior.

National Environmental Policy Act, Executive Order 12291, Regulatory Flexibility Act, and Paperwork Reduction Act

The Department of the Interior has determined that this rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, no further analysis pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (43 U.S.C. 4332(2)(C)) has been prepared.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and certifies that this document will not have significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The proposed rule provides technical procedural guidance for the assessment of damages to natural resources. It does not directly impose any additional cost. In addition, estimates of the potential economic effects of this proposed rule are well below $100 million annually. As the proposed rule applies to Federal and State agencies acting as trustees for natural resources, it is not expected to have an effect on a substantial number of small entities. It has been determined that these amendments to 43 CFR Part 11 do not contain any information collection requirements which require approval by the Office of Management and Budget under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 43 CFR Part 11

Coastal zone, Continental shelf, Environmental protection, Fish, Hazardous substances, Marine resources, National parks, Natural resources, Oil pollution, Public lands, Recreation areas, Sea shores, Wildlife, Wildlife refuges.

For the reasons set out in the preamble, and under the authority of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 it is proposed to amend proposed 43 CFR Part 11 (50 FR 52128) as set forth below.

Dated: April 29, 1986.

Joseph J. Martyak,

Deputy Under Secretary.

PART 11—NATURAL RESOURCE DAMAGE ASSESSMENTS

1. The authority citation for 43 CFR Part 11 continues to read as follows:

Authority: 42 U.S.C. 9651(c).

Subpart A—Introduction

2. It is proposed to amend § 11.15 by adding paragraph (a)(1)(iii), by revising paragraph (b) to read as follows:

§ 11.15 Actions against the responsible party for damages.

(a) * * *

(1) * * *

(iii) The determination of the damage amount under this Part shall be based entirely on either a type A or type B assessment and may not constitute any combination thereof.

* * * * *

(b)(1) In a claim filed pursuant to section 311(f) (4) and (5) of the CWA, a Federal or State agency acting as trustee may only claim damages for restoration or replacement.

(2) The measure of damages as determined in accordance with the requirements and guidance of § 11.40 shall be considered damages for restoration or replacement in an action against a responsible party under section 311(f)(4) and (5) of the CWA, except where § 11.33(a)(2)(i) or (ii) applies.

* * * * *

Subpart B—Preassessment Phase

3. It is proposed to amend § 11.24 by adding paragraph (c) to read as follows:

§ 11.24 Preassessment screen—information on the site.

* * * * *

(c) *Damages excluded from liability under the CWA.* (1) The authorized official shall determine whether the discharge meets one or more of the exclusions provided in sections 311(a)(2) or (b)(3) of the CWA.

(2) An assessment under this Part shall not be continued for potential injuries from discharges meeting one or more of the CWA exclusions described in paragraph (c)(1) of this section.

Subpart C—Assessment Plan Phase

4. It is proposed to amend § 11.31 by adding paragraph (d) to read as follows:

§ 11.31 Assessment Plan—content.

* * * * *

(d) *Specific requirements for type A assessments.* When a type A natural resource damage assessment is performed, the assessment shall contain the information specified in § 11.40 of this Part.

5. It is proposed to add § 11.33 to read as follows:

§ 11.33 Assessment Plan—deciding between a type A or type B assessment.

(a) *Coastal and marine environments.* (1) When a discharge or release occurs in a coastal or marine environment, the authorized official shall determine whether the following conditions apply to the discharge or release:

(i) The substance discharged or released is included within the list provided in Appendix C of U.S. Department of the Interior, "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant

VOL 51 ISS 86 MY 5 1986 UMI

to CERCLA Type A Damage Assessments," Economics Analysis, Inc., Wakefield, RI, and Applied Sciences Associates, Narragansett, RI, DOI 14-01-0001-85-C-20, April 1986, available from CERCLA 301 Project, Room 4354, Department of the Interior, 1801 "C" St., NW, Washington, DC 20240;

(ii) Special resources are not included in the assessment;

(iii) The estimated quantity and type of resources potentially injured are not expected to differ significantly from the average biomass listed in Appendix B of U.S. Department of the Interior, "Measuring Damages to Coastal and Marine Natural Resources: Concepts and Data Relevant to CERCLA Type A Damage Assessments," Economics Analysis, Inc., Wakefield, RI, and Applied Sciences Associates, Narragansett, RI, DOI 14-01-0001-85-C-20, April 1986, available from CERCLA 301 Project, Room 4354, Department of the Interior, 1801 "C" St., NW, Washington, DC 20240, for the province and bottom type in which the discharge or release occurred;

(iv) The discharge or release was of a short duration;

(v) The discharge or release was relatively minor;

(vi) The discharge or release was a single event;

(vii) The estimated injury to biological resources is expected to be primarily due to mortality or to closure of a fishing area;

(viii) The use of chemical dispersants or other agents used in a cleanup, if one takes place, are not estimated to have caused significant injury to natural resources; and

(ix) The discharge or release occurred at the water surface or in the intertidal zone.

(2) The authorized official must select the NRDAM/CME procedure if the discharge or release occurred in a coastal or marine environment unless:

(i) The potentially responsible party requests that a type B assessment be performed and agrees to advance and bear responsibility for all reasonable assessment costs; or

(ii) The authorized official makes a determination that one or more of the conditions listed in (a)(1) are not satisfied. This determination shall be included in the Assessment Plan. If the authorized official cannot confirm exposure when using the type B procedures, he may not then re-select the type A procedure.

(b)–(e) [Reserved]

6. It is proposed to add Subpart D consisting of §§ 11.40 and 11.41 to read as follows:

Subpart D—Type A Assessments.

11.40 Type A assessments—general.
11.41 Coastal and marine environments.

§ 11.40 Type A assessments—general.

(a) The procedures in § 11.41 of this subpart may be used to assess damages in coastal and marine environments. The procedures require the use of a model referred to as the Natural Resource Damage Assessment Model for Coastal and Marine Environments (NRDAM/CME). The NRDAM/CME and the procedures in § 11.41 provide a simplified assessment process involving minimal field observation to determine injury, quantify that injury, and determine damages in coastal and marine environments resulting from a discharge or release.

(b)–(e) [Reserved]

§ 11.41 Coastal and marine environments.

(a) *NRDAM/CME—general.* (1) *Purpose.* The purpose of the NRDAM/CME is to provide a standard assessment methodology for conducting simplified natural resource damage assessments when a discharge or release occurs in a coastal or marine environment.

(2) *Availability.* Requests for a copy of the NRDAM/CME should be sent to: CERCLA 301 Project, Room 4354, Department of the Interior, 1801 "C" St., NW, Washington, DC 20240.

(3) *Steps in the NRDAM/CME.* The NRDAM/CME assessment methodology consists of four phases: § 11.41(c) Coastal and marine environments—Assessment Plan; § 11.41(d) Coastal and marine environments—injury determination; § 11.41(e) Coastal and marine environments—qualification; § 11.41(f) Coastal and marine environments—damage determination.

(4) *Completion of type A assessment.* After completion of the type A assessment, a Report of Assessment as described in § 11.90 of this Part shall be prepared. The Report of Assessment shall include the determinations made in each phase. The determinations shall consist of the printed output from the model runs, the determinations made in Subpart B of this Part, and the determinations of site-specific data inputs required in paragraph (c) of this section.

(b) *Definitions.* As used in this Subpart the phrase:

"Area affected" means the number of square meters of an intertidal area affected by a release of a hazardous substance where a minimum of 90 percent mortality of individuals of at least 90 percent of the resident species is observed using standard and widely accepted methods for estimating populations.

"Biomass" means the weight of living organisms per unit of prescribed area or volume.

"Bottom type" means one of the sediment types used by the NRDAM/CME.[1] These bottom types are: rock, rocky shore, cobble, cobbled beach, sand, sand beach, mud, mud flat, saltmarsh, seagrass, macroalgal bed (kelp), mangrove swamp, coral reef, mollusk reef, and worm reef.

"CAS number" means the Chemical Abstract Service Registry Number assigned to a hazardous substance by the American Chemical Society, Chemical Abstract Service, or the number assigned to oils by the NRDAM/CME.

"Closure of a beach" means the prohibition of recreational or other uses in a specified length of a beach by an appropriate Federal or State agency, due to a discharge or release in a coastal or marine environment.

"Closure of a fishing area" means the prohibition of commercial and recreational fishing in a specified area by an appropriate Federal or State health agency, due to a discharge or release in a coastal or marine environment.

"Coastal environment" means the area incorporating: (1) The splash zone, which lies above the extreme high water level of spring tide; (2) the upper shore, which lies between the average high tide level and the extreme high water level of spring tides; (3) the midshore, which lies between the average low tide level and the average high tide level; (4) the lower shore, which lies between the extreme low water level of spring tides to the average spring tide level; and (5) the sublittoral fringe, which lies below the extreme low water level of spring tides.

"Default parameter(s)" means the value assigned by the NRDAM/CME to any parameter listed in § 11.41(c)(3) of this Part for which the authorized official does not have an estimate of a site-specific value.

"Estuarine environment" means deepwater tidal habitats that are usually semi-enclosed by land but have an open, partially obstructed, or sporadic access to the open ocean and in which ocean water is at least occasionally diluted by freshwater runoff from the land. The estuarine environment extends upstream and landward to where ocean-driven salts measure less than 0.5 parts per thousand during the period of average annual low flow; and (1) seaward to an imaginary straight line closing the mouth of a river, bay, or sound; or (2) to the seaward limit of wetland emergents, shrubs, or trees where not included in number (1) of this definition. The estuarine environment also includes offshore areas of continuous upwellings of freshwater containing typical estuarine plants and animals.

"Intertidal" means a coastal or marine environment in which the substrate is exposed and flooded by tides, including the associated splash zone.

"Marine environment" means the open ocean extending landward from the seaward limit of the fishery conservation zone established by the Magnuson Fishery Conservation and Management Act of 1976, to one of the following: (1) The seaward limit of the coastal environment; or (2) the seaward limit of the estuarine environment. The marine environment does not include offshore areas of continuous upwellings of freshwater containing typical estuarine plants and animals.

"NRDAM/CME" means the Natural Resource Damage Assessment Model for Coastal and Marine Environments, which is an integrated physical fates, biological effects, and economic damages model.

"Predominant bottom type" means the prevailing bottom type in the area of the discharge or release.

"Province" means one of the ten geographical areas used by the NRDAM/CME.[2] These provinces and their respective boundaries are:

(1) Arcadian (Northeast: Canadian border to Cape Cod, MA);

(2) Virginian (Mid-Atlantic: Cape Cod, MA, to Cape Hatteras, NC);

(3) Carolinian (South-Atlantic: Cape Hatteras, NC, to Cape Canaveral, FL);

(4) Louisiannian (Gulf Coast: Cedar Key, FL, to Aransas, TX);

(5) West Indian (South Florida: Cape Canaveral, FL, to Cedar Key, FL; all Caribbean Islands; and Aransas, TX, to the Mexican border);

(6) Californian (California: Mexican border to Cape Mendocino, CA);

(7) Columbian (Pacific Northwest: Cape Mendocino, CA, to Canadian border);

(8) Fjord (Gulf of Alaska: Canadian border to Aleutian chain);

(9) Arctic (Alaska: Alaska north of the Aleutian chain); and

(10) Pacific Insular (Hawaii and other Pacific islands).

"Pycnocline" means a region in the ocean or in an estuary where a marked change in the density of the water column occurs. The change in density acts as a partial barrier between the upper and lower water columns.

"Species category" means one of the twelve groupings of biological resources used by the NRDAM/CME to aggregate the biomass of similar species in coastal and marine environments.

"Study area" means the geographical area included in the boundaries required to run the NRDAM/CME. Boundaries are established based on the direction of the mean ocean surface current, called the +X direction; 180 degrees from the direction of the mean ocean surface current, called the −X direction; 90 degrees counterclockwise from the direction of the mean ocean surface current, called the +Y direction; and 270 degrees counterclockwise from the direction of the mean ocean surface current, called the −Y direction.

"Subtidal" means a coastal or marine environment in which the substrate is continuously submerged.

(c) *Coastal and marine environments—Assessment Plan.* (1) *Required information.* When the NRDAM/CME is used, the Assessment Plan shall incorporate:

(i) The chemical CAS number of the substance discharged or released, derived from the NRDAM/CME;

(ii) The estimated total mass discharged or released stated in metric tons;

(iii) The date and the year of the discharge or release;

(iv) The province in which the discharge or release occurred;

(v) Whether the discharge or release occurred in the marine or estuarine environment;

(vi) Whether the discharge or release occurred in a subtidal or intertidal area; and

(vii) The predominant bottom type.

(2) *Supplemental information.* The following information on the discharge or release shall be incorporated into the Assessment Plan and used as a data input for the NRDAM/CME:

(i) Whether a cleanup activity has been conducted and the approximate amount of material removed, stated in metric tons;

(ii) The distance, in kilometers, to the study area boundaries including, as appropriate, the presence of a land boundary;

(iii) Whether a fishing area was closed and, if so, the area closed expressed in square meters, and the number of days or fractions of days of closure; and

(iv) Whether a recreational beach was closed and, if so, the length closed expressed in meters, and the number of days or fractions of days of closure.

(3) *Environmental parameters.* The following information on the characteristics of the environment at the approximate time and site of the discharge or release shall be incorporated into the Assessment Plan and used as a data input for the NRDAM/CME if site-specific information is available. Efforts expended in the collection data should be consistent with the reasonable cost of performing the assessment. If no site-specific information is supplied the NRDAM/CME will automatically provide default parameters:

(i) The mean ocean surface current and the direction of mean flow expressed in meters per second;

(ii) The tidal velocities expressed both in the direction of, and perpendicular to, the mean ocean current expressed in meters per second;

(iii) The wind speed expressed in meters per second;

(iv) The wind direction expressed in degrees measured counterclockwise to the mean ocean current;

(v) The upper water depth expressed in meters;

(vi) The lower water depth expressed in meters;

(vii) The air temperature expressed in degrees Celsius;

(viii) The surface water temperature expressed in degrees Celsius;

(ix) The presence or absence of a pycnocline;

(x) The density of the upper and lower water columns expressed in kilograms per liter;

(xi) The total suspended sediment concentration expressed in milligrams per liter; and

(xii) The mean settling velocity of suspended solids expressed in meters per day.

(4) *Discharges or releases of multiple substances and mixtures.* (i) The NRDAM/CME may be used only in accordance with the requirements of this paragraph in assessing incidents involving the simultaneous discharge or release of two or more oils or hazardous substances, or when a mixture of one or more oils or hazardous substances has

[1] These sediment types are derived from the descriptions in "Classification of Wetlands and Deepwater Habitats of the United States." Cowardin, Carter, Golet, and LaRoe, Department of the Interior/Fish and Wildlife Service, FWS/OBS–79/31, 1979; available from the National Technical Information Service: 5285 Port Royal Road; Springfield, VA 22161; PB 80-168784/LP.

[2] These geographical areas are derived from the descriptions in "Classification of Wetlands and Deepwater Habitats of the United States." Cowardin, Carter, Golet, and LaRoe, Department of the Interior/Fish and Wildlife Service, FEW/OBS—79/31, 1979; available from the National Technical Information Service: 5285 Port Royal Road; Springfield, VA 22161; PB 80-168784/LP.

VOL 51 ISS 86 MAY 5 1986 UMI

been discharged or released in a single incident.

(ii) The authorized official shall select one of the oils or hazardous substances present in the simultaneous discharge or release, or in the mixture. The selected substance shall be identified in the Assessment Plan, and the NRDAM/CME shall be applied only to the quantity of that substance selected that was discharged or released.

(d) *Coastal and marine environments—injury determination.* (1) *General.* Unless otherwise provided for in this Subpart, all injury determinations for coastal and marine environments shall be established through the use of the physical fates and biological effects submodels of the NRDAM/CME.

(2) *Pathway of contamination.* (i) The methodology for determining the pathway of contamination is the physical fates submodel.

(ii) The chemical parameter values of the oil or hazardous substance discharged or released are provided in the chemical data base contained within the NRDAM/CME.

(iii) The environmental parameters are listed in paragraph (c)(3) of this section and shall be provided by either the authorized official or by the default parameters contained in the NRDAM/CME.

(3) *Confirmation of exposure.* When the NRDAM/CME is used no sampling is required to confirm exposure, as described in § 11.34 of this Part. The interaction and results of the physical fates and biological effects submodels establish a presumption of exposure.

(4) *Determination of injury.* The methodology for determining that injury has occured to natural resources is provided by the biological effects submodel. The biological parameter values of acute toxicity of the oil or hazardous substances discharged or released are provided in the data base contained within the NRDAM/CME.

(5) *Time and location.* The time and location of the discharge or release shall be established consistent with 40 CFR 300.63 of the NCP for the discovery and notification of a discharge or release.

(6) *Discharged or released substance.* Discharges of oil shall be identified consistent with 40 CFR 110. Released hazardous substances shall be identified consistent with 40 CFR Part 302.

(7) *Results of cleanup actions.* (i) The results of cleanup actions that have been performed as part of response actions authorized in 40 CFR Part 300 shall be included within the NRDAM/CME procedures.

(ii) Cleanup actions include such actions as the physical removal of the oil or hazardous substance from the coastal or marine environment and the application of chemical agents, dispersants, surface collecting agents, burning agents, or other such agents authorized in 40 CFR Part 300 Subpart H for use on oil discharges. The use of chemical agents, burning agents, or other such agents shall not be considered a discharge or release for the purposes of this Subpart.

(iii) The authorized official shall determine the quantity of oil or hazardous substance cleaned up by the response action based on information or data obtained from the OSC.

(e) *Coastal and marine environments—quantification.* (1) *General.* Unless otherwise provided for in this Subpart, all quantification of injury for coastal and marine environments shall be established through the use of the biological effects submodel of the NRDAM/CME.

(i) The NRDAM/CME includes a biological data base for each province and bottom type. The results of the injury determination are quantified by the biological effects submodel of the NRDAM/CME to provide an estimate of biomass killed.

(ii) Based upon the results of the physical fates submodel and biological effects portion of the injury determination the authorized official shall make the determinations required in paragraphs (A) and (B) of this section.

(A) The authorized official shall determine whether any intertidal areas are affected. If any intertidal areas are determined to be affected, the authorized official shall follow the procedures provided in paragraph (e)(3) of this section.

(B) The authorized official shall determine whether any toxic threshold concentrations that migrated across the province boundary are to be included in the assessment. If any inter-provincial migration is to be included, the authorized official shall follow the procedures provided in paragraph (e)(4) of this section.

(C) The authorized official shall determine whether any toxic threshold concentrations that migrated across the boundary of an estuarine/marine area are to be included in the assessment. If estuarine/marine migration is to be included, the authorized official shall follow the procedures provided in paragraph (e)(5) of this section.

(2) *Study area boundaries.* (i) When the discharge or release migrates outside of the original study area, the user may redefine the study area boundaries, and reapply the NRDAM/CME. The boundaries of the new study area should be redefined such that, to the extent practicable, the new boundaries encompass all the area in which the toxic threshold concentrations have been exceeded in the upper or lower water columns or in which the discharge or release exists as a surface slick, except as specified in paragraphs (e) (3), (4), or (5) of this section.

(ii) The damages determined through multiple applications of the NRDAM/CME to adjust study boundaries or any other parameter values, specified in paragraph (e)(2) of this section, are not additive, except as described in paragraphs (e) (3), (4), or (5) of this section.

(3) *Estimating the intertidal area affected.* (i) When the release of a hazardous substance occurs in an intertidal area, the authorized official shall estimate the area affected, as that phrase is used in this Subpart, and the number of days the area remains affected.

(ii) When the discharge of oil occurs in an intertidal area, no further information is required to apply the NRDAM/CME.

(iii) When the NRDAM/CME indicates that a subtidal discharge or release migrates onshore, the NRDAM/CME should be applied a second time to the intertidal area affected. The mass of substance that is specified by the NRDAM/CME to have come ashore is the quantity discharged or released in an intertidal area for the second application.

(4) *Inter-province effects.* (i) As appropriate, the boundary of a province shall be included as one or more of the boundaries of the study area.

(ii) When the NRDAM/CME indicates that the oil or hazardous substance has migrated from one province into another province, the NRDAM/CME may be also applied in that second province, provided that when inter-provincial migration occurred, the oil or hazardous substance exceeded toxic threshold concentrations in either the upper or lower water columns or existed as a surface slick.

(iii) The quantity of the substance to be used in the second application of the NRDAM/CME shall be calculated as the sum of the percentages of the mass in the surface, upper water column, and lower water column at the time the substance migrated outside the study area multiplied by the mass of the original discharge or release.

(5) *Estuarine/marine.* (i) As appropriate, a boundary between the estuarine and marine environments shall be included as one, or more, of the boundaries of the study area.

(ii) When the NRDAM/CME indicates that the oil or hazardous substance has migrated across a boundary between estuarine and marine environments, the NRDAM/CME may be applied in the second environment, provided that the oil or hazardous substance exceeded toxic threshold concentrations in either the upper or lower water column at the boundary or existed as a surface slick at the boundary. The mass discharged or released for the second application shall be calculated in accordance with paragraph (e)(4)(iii) of this section.

(f) *Coastal and marine environments—damage determination.* (1) *General.* Unless otherwise provided for in this Subpart, all damage determinations for coastal and marine environments shall be established through the use of the economic damages submodel of the NRDAM/CME.

(i) Damages, as determined by the NRDAM/CME, are the average diminution in in situ use values due to the discharge of oil or release of a hazardous substance.

(ii) Damages are calculated for direct, short-term lethal effects on lower trophic biota, fur seals, ducks, geese and shorebirds; direct and indirect lethal effects on fish and shellfish, the reduction in catch from the closure of a fishing area; and the direct loss of use of a public beach due to closure.

(2) *Estimating damages for fishery closures.* To determine damages for the closure of a fishing area the authorized official shall specify, as a data input for the NRDAM/CME, the amount of area closed to fishing and the length of time the area is closed to fishing due solely to the discharge or release.

(3) *Estimating damages for beach closure.* To determine damages for loss of beach use the authorized official shall estimate the length of the area closed and the amount of time this area is closed due solely to the discharge or release.

(4) *Estimating other damages.* Only those damages determined by the NRDAM/CME may be claimed as damages in a type A damage assessment for coastal and marine environments.

(g) *Coastal and marine environments—NRDAM/CME availability, security, and verification.* (1) *General.* (i) The NRDAM/CME that may be used for assessment of damages to coastal and marine environments is that which is published or made available concurrent with this rulemaking, or which is published or made available as a result of modification in accordance with § 11.12 of this Part.

(ii) No alterations, substitutions, additions, or deletions may be made to the logic structure, to any of the mathematical equations, including their numerical coefficients and rate functions, or to any other program element of the NRDAM/CME.

(iii) No alterations, substitutions, additions, or deletions may be made to any of the data bases that accompany and are interactive with the NRDAM/CME unless such alterations, substitutions, additions, or deletions have been specifically authorized and allowed for elsewhere in this Subpart.

(2) *Official Reference Documentation.* (i) The Department of the Interior shall maintain and hold secure the Official Reference Documentation of the NRDAM/CME. The Official Reference Documentation shall include a printed copy of the NRDAM/CME computer program, written documentation of the NRDAM/CME, printed copies of the data bases, and the three computer disks, which shall be referenced as:

(A) Disk #1 (FATES) and contains the physical/biological model system files;

(B) Disk #2 (PHYSCHEM) and contains the chemicals and chemical parameters for the model; and

(C) Disk #3 (ECON) and contains the economic model and data files for the model.

(ii) The Department of the Interior shall make available upon request copies of such information as may be contained in the Official Reference Documentation.

(3) *Model verification.* (i) In such instances as may arise where verification of the NRDAM/CME is needed, the responsible party or the authorized official may obtain such information as may be needed from the Official Reference Documentation.

(ii) Verification may be accomplished by one of the following:

(A) Comparison of any given application of the model output from the copy of the NRDAM/CME and model output from the verified copy, when the same data input parameters are used. The outputs must be identical.

(B) Comparison of the computer program and data base files on the verified disks and the disks used, using a file comparison program. All program and data base input files must be identical.

(iii) The Department of the Interior may charge an appropriate fee for providing such verification, as provided for in 31 U.S.C. 9701.

Subpart F—Post-Assessment Phase

7. It is proposed to amend § 11.91 by revising paragraph (a) to read as follows:

§ 11.91 Post-assessment phase—demand.

(a) *Requirement and content.* At the conclusion of the assessment the authorized official shall present to the responsible party a demand in writing for a sum certain, representing the damages determined in accordance with the requirements and guidance of § 11.40 or § 11.80 and including the reasonable cost of the assessment, delivered in such a manner as will establish the date of receipt. The demand shall adequately identify the Federal or State agency asserting the claim, the general location and description of the injured resource, identification of the type of discharge or release determined to have resulted in the injuries, and the damages sought from that party.

* * * * *

8. It is proposed to amend § 11.93 by adding paragraph (c) to read as follows:

§ 11.93 Post-assessment phase—Restoration Plan.

* * * * *

(c) If the measure of damages was determined in accordance with Subpart D, the Restoration Plan may describe actions to be taken that are to be financed from more than one trust fund established pursuant to § 11.92(a) of this Part.

Department of Health and Human Services

Food and Drug Administration

21 CFR Part 884

Obstetrical-Gynecological Devices; Effective Date of Requirement for Premarket Approval; Contraceptive Intrauterine Device (IUD) and Introducer; Final Rule

VOL 51 ISS 86 MY 5 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 884

[Docket No. 84N-0375]

Obstetrical-Gynecological Devices; Effective Date of Requirement for Premarket Approval; Contraceptive Intrauterine Device (IUD) and Introducer

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to require the filing of a premarket approval application or a notice of completion of a product development protocol for the contraceptive intrauterine device (IUD) and introducer, a medical device. This action is being taken under the Medical Device Amendments of 1976.

EFFECTIVE DATE: August 4, 1986.

FOR FURTHER INFORMATION CONTACT: Raju G. Kammula, Center for Devices and Radiological Health (HFZ-470), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7555.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of February 28, 1980 (45 FR 12711), FDA published a final rule (21 CFR 884.5360) classifying into class III (premarket approval) the IUD and introducer, a medical device. Section 884.5360 of FDA's regulations setting forth the classification of obstetrical and gynecological devices intended for medical use applies to (1) any IUD and introducer that was in commercial distribution before May 28, 1976, and (2) any device that FDA has found to be substantially equivalent to an IUD and introducer described in (1) and that has been marketed on or after May 28, 1976.

In the **Federal Register** of August 19, 1985 (50 FR 33500), FDA published a proposed rule to require the filing under section 515(b) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 360e(b)) of a premarket approval application (PMA) or a notice of completion of a product development protocol (PDP) for the IUD and introducer. In accordance with section 515(b)(2)(A) of the act, FDA included in the preamble to the proposal the agency's proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the device to meet the premarket approval requirements of the act, and on the benefits to the public from use of the device (50 FR 33501). The preamble to the proposal also provided an opportunity for interested persons to submit comments on the proposed rule and the agency's proposed findings, and, under section 515(b)(2)(B) of the act, provided an opportunity for interested persons to request a change in the classification of the device based on new information relevant to its classification. Any petition requesting a change in the classification of the IUD and introducer was required to be submitted by September 3, 1985. The comment period closed on October 16, 1985.

Although FDA did not receive any petitions requesting a change in the classification of the IUD and introducer, the agency received one comment in response to the August 19, 1985, proposal. The comment, from a former manufacturer of the device, disagreed with the factual basis for "many" of FDA's "asserted risks of the device," and alleged that FDA's decision to initiate a proceeding to require premarket approval for the IUD and introducer is "not justified by sound scientific principles." The comment did not provide any rationale for its objections or any data to support the objections.

FDA has reexamined its proposed findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the IUD and introducer to meet the statute's approval requirements. The agency concludes that its proposed findings and its conclusions discussed in the preamble to the proposed rule are appropriate. Accordingly, FDA is promulgating a final rule requiring premarket approval for the IUD and introducer under section 515(b)(3) of the act and is summarizing its findings with respect to the degree of risk of illness or injury designed to be eliminated or reduced by requiring the IUD and introducer to have an approved PMA or declared completed PDP, and the benefits to the public from the use of the device.

Findings With Respect to Risks and Benefits

Degree of Risk

1. *Pelvic inflammatory disease (PID).* The incidence of infection of the internal female reproductive organs, commonly described by the term "pelvic inflammatory diseases" (PID), is higher for IUD users than for nonusers. Among the sequelae of PID are loss of reproductive functions, increased incidence of ectopic pregnancy, and even death.

2. *Tubal infertility.* Use of an IUD increases the risk of acute PID leading to tubal infertility.

3. *Perforation.* Uterine perforation is the most serious complication associated with IUD insertion. Most instances of complete uterine perforation are believed to occur at the time of insertion. Partial perforation, which may also occur at the time of insertion, can allow the IUD to pass completely outside the confines of the uterus causing foreign body reactions, peritonitis, adhesions, and intestinal obstructions. A number of factors are related to the causation and frequency of perforation. Primary among these is the skill of the individual performing the insertion.

4. *Pregnancy.* Pregnancy may occur either after an unnoticed expulsion of an IUD or with the device still in place. New data suggest that the use of an IUD is associated with an increased incidence of ectopic pregnancy. Data also demonstrate that the risk of midtrimester fetal loss increases tenfold when the pregnancy occurs with an IUD in situ. Also, pregnancy with an IUD in situ increases the risk of septic midtrimester abortion endangering the life of the user.

5. *Bleeding and pain.* The bleeding associated with the IUD may be intermenstrual but more often occurs as an increase in menstrual flow. Bleeding and pain are believed to be due to direct erosion into the endometrium by the device or to a generalized increase in vascularity of the entire endometrium which leads to localized hemorrhage. Indeed, bleeding and pain associated with the IUD may be due to both conditions.

6. *Expulsion.* Explusion of an IUD can be complete or partial. If complete expulsion of the IUD goes unnoticed, it places the woman at risk of pregnancy. Partial displacement or expulsion of the device into the lower uterine segment also presents the risk of pregnancy. Partial displacement may also result in an increased risk of ascending uterine infection from the vagina.

FDA concludes that these risks could be eliminated or reduced by requiring the IUD and introducer to undergo premarket approval.

Benefits of the Device

The most recent study of contraceptive effectiveness of the IUD showed an IUD failure rate of 4.2 per 100 married women aged 15 to 44 (50 FR 33503). The failure rate was much lower among women who were in their 30's and who were careful in checking for expulsion. The primary advantage of IUD's is that the effectiveness of the device does not entirely depend upon specific actions of the user such as taking an oral contraceptive every morning or using a barrier method of contraception at each act of intercourse.

In terms of mortality, IUD's are about twice as safe as oral contraceptives used by young women without conditions predisposing them to circulatory disease and three to five times safer than oral contraceptives used by older women (50 FR 33503).

Final Rule

Under section 515(b)(3) of the act, FDA is adopting the proposed findings as published in the preamble to the proposed rule and is issuing a final rule to require premarket approval of the generic type of device, the IUD and introducer.

Under the final rule, a PMA or a notice of completion of a PDP is required to be filed on or before August 4, 1986, for any IUD and introducer that was in commercial distribution before May 28, 1976, or that has been found by FDA to be substantially equivalent to such a device on or before August 4, 1986. An approved PMA or a declared completed PDP is required to be in effect for any such device on or before January 30, 1987. (If FDA finds that continued availability of an IUD and introducer for which a PMA has been timely filed is necessary for the public health, FDA may, under section 515(d)(1)(B)(i) of the act, extend the 180-day period for taking action on the PMA.) Any IUD and introducer that was not in commercial distribution before May 28, 1976 or that has not on or before August 4, 1986, been found by FDA to be substantially equivalent to an IUD and introducer that was in commercial distribution before May 28, 1976, is required to have an approved PMA or a declared completed PDP in effect before it may be marketed.

If a PMA or a notice of completion of a PDP for an IUD and introducer is not filed on or before August 4, 1986, that device will be deemed adulterated under section 501(f)(1)(A) of the act (21 U.S.C. 351(f)(1)(A)), and commercial distribution of the device will be required to cease. The device may, however, be distributed for investigational use, if the requirements of the investigational device exemption (IDF) regulations (21 CFR Part 812) are met.

Under § 812.2(d) of the IDE regulations, FDA hereby stipulates that the exemptions from the IDE requirements in § 812.2(c)(1) and (2) will no longer apply to clinical investigations of the IUD and introducer. Further, FDA concludes that investigational IUD's and introducers are significant risk devices as defined in § 812.3(m), and advises that as of the effective date of § 884.5360(d) the requirements of the IDE regulations regarding significant risk devices will apply to any clinical investigation of an IUD and introducer. For any such device, therefore, an IDE submitted to FDA, under § 812.20, is required to be in effect under § 812.30 before an investigation is initiated or continued on or after August 4, 1986. FDA advises all persons who intend to sponsor any clinical investigation involving the IUD and introducer to submit an IDE application to FDA no later than July 7, 1986, to avoid the interruption of ongoing investigations.

Environmental Impact

The agency has determined under 21 CFR 25.24(a)(8) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Economic Impact

FDA has examined the economic consequences of this final rule in accordance with the criteria in section 1(b) of Executive Order 12291 and found that the rule will not be a major rule as specified in the Order. The agency believes that only one or two firms will be affected by this rule. Therefore, the agency certifies under the Regulatory Flexibility Act (Pub. L. 96-354) that the rule will not have a significant economic impact on a substantial number of small entities. An assessment of the economic impact of this final rule has been placed on file in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 884

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Part 884 is amended as follows:

PART 884—OBSTETRICAL AND GYNECOLOGICAL DEVICES

1. The authority citation for 21 CFR Part 884 is revised to read as follows:

Authority: Secs. 513, 701(a), 52 Stat. 1055, 90 Stat. 540-546 (21 U.S.C. 360c, 371(a)); 21 CFR 5.10; § 884.5360(d) also is issued under secs. 501, 515, and 520(g), 52 Stat. 1049-1050 as amended, 90 Stat. 552-559, 569-571 (21 U.S.C. 351, 360e, 360j(g)).

2. In § 884.5360 by adding new paragraph (d), to read as follows:

§ 884.5360 Contraceptive intrauterine device (IUD) and introducer.

* * * * *

(d) *Date premarket approval application (PMA) or notice of completion of a product development protocol (PDP) is required.* A PMA or a notice of completion of a PDP is required to be filed with the Food and Drug Administration on or before August 4, 1986, for any IUD and introducer that was in commercial distribution before May 28, 1976, or that has on or before August 4, 1986, been found to be substantially equivalent to an IUD and introducer that was in commercial distribution before May 28, 1976. Any other IUD and introducer shall have an approved PMA or a declared completed PDP in effect before being placed in commercial distribution.

Dated: April 3, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

Department of Justice

Bureau of Justice Assistance

State Reimbursement Program for Incarcerated Mariel-Cubans; Notice

VOL 51 ISS 86 MY 5 1986 UMI

DEPARTMENT OF JUSTICE

Bureau of Justice Assistance

State Reimbursement Program for Incarcerated Mariel-Cubans

AGENCY: Bureau of Justice Assistance, Justice.

ACTION: Notice of issuance of solicitation for applications to reimburse states for the expenses incurred by the incarceration of Mariel-Cubans.

SUMMARY: The Bureau of Justice Assistance (BJA) is administering a program to reimburse states for expenses incurred by the incarceration of certain Mariel-Cubans in state facilities.

ADDRESS: Henry T. Tubbs, Bureau of Justice Assistance, 633 Indiana Avenue NW., Washington, D.C. 20531.

FOR FURTHER INFORMATION CONTACT: Kim C. Rendelson, (202) 272-4605. (This is not a toll free number).

SUPPLEMENTARY INFORMATION: The Bureau of Justice Assistance (BJA) is publishing a notice of issuance of solicitation to implement a State Reimbursement Program for Incarcerated Mariel-Cubans. The Department of Justice Appropriation Act for 1986 (Pub. L. 99-180) allocates up to $5 million (reduced by Gramm-Rudman-Hollings sequester to $4,785,000) for the purpose of making grants to states for their expenses for the incarceration of Mariel-Cubans in state facilities.

I. General Provisions

Statutory authority: The statutory authority is the Department of Justice Appropriation Act for 1986 (Pub. L. 99-180).

Submission date: The submission date for state applications is no later than 30 days after publication of the Program Guidelines in the Federal Register.

Eligible applicants: All states are eligible to apply for and receive grants. *States*, means any state of the United States and includes the District of Columbia and the Commonwealth of Puerto Rico.

Participating states: It is expected that the sixteen states that participated last year will participate again this year, specifically, Alaska, California, Florida, Georgia, Illinois, Michigan, Minnesota, Nevada, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Texas, Washington, and Wisconsin. There may be the possibility of a few additional states participating also.

II. Allocations and Uses of Funds

Fund availability: The Act provides a total of $5 million (reduced by Gramm-Rudman-Hollings sequester to $4,785,000) for the purpose of making grants to states. The total amount of funds awarded will be on the basis that the certified number of incarcerated persons in a state bears to the total certified number of such incarcerated persons. The amount of reimbursement per prisoner per annum will not exceed $12,000.

Fund use: The intent of the public law is to reimburse the States for their expenses by reason of Mariel-Cubans having to be incarcerated in state facilities. A budget or expenditure plan is not required as the award will be solely for reimbursement. No match funds are required.

III. Application Content

(a) All state applicants must submit Standard Form 424, (Application for Federal Assistance), and a *certified listing* of incarcerated Mariel-Cuban prisoners. This listing will include the following information in the suggested sequence:

(1) Name (last name first),
(2) AKA (also known as),
(3) Alien Identification Number (e.g., A24456788),
(4) Date of birth,
(5) Last known address,
(6) Conviction date,
(7) Conviction offense,
(8) Probable earliest release date,
(9) State facility housing the prisoner,
(10) State facility address,
(11) Dates of incarceration of the prisoner,
(12) I-247 Form-Immigration Detainer Notice (If INS has filed a Detainer on this prisoner, submit a copy)
(13) Fingerprint card.

(b) The certified listing must be signed by the Governor or his authorized representatives.

(c) The period of incarceration for reimbursement purposes is October 1, 1985 to September 30, 1986. The computation of funds will be based on an aggregate total of certified prisoners incarcerated for a twelve month period (e.g., if two prisoners are incarcerated for six months during the period the state will be reimbursed the full amount for one year).

(d) The Act is specific in that the prisoner must have been paroled into the United States by the Attorney General during the 1980 influx of Mariel-Cubans. This means those Cubans who *Entered Without Inspection* (EWI), earlier arrivals (pre-boatlift), and/or later arrivals (post-boatlift) cannot be included and, thus, no expense will be reimbursed.

(e) State law will prevail when a determination is required as to what constitutes a state facility and/or a state prisoner.

IV. Review of State Applications

State applications must be submitted in the form and at the time prescribed.

(a) The application and certified listing will be reviewed by BJA and a cross-check verification of prisoners will be made by the Immigration and Naturalization Service of the U.S. Department of Justice. This review will be accomplished not later than 90 days after publication of program guidelines in the Federal Register and grants will be immediately made to States.

(b) Compliance with Executive Order 12372, "Intergovernmental Review of Federal Programs." This program is covered by Executive Order 12372 and Department of Justice implementing regulations 28 CFR Part 30. States must submit grant applications to the State's *Single Point of Contact*, if there is a *Single Point of Contact*, and if this program has been selected for coverage by the State process, at the same time applications are submitted to the Federal agency. State processes have 60 days starting from the application deadline to comment on applications. Applicants should contact their state "Single Point of Contact" as soon as possible to alert them of the prospective applications and receive instructions regarding the process.

(c) The BJA will notify the applicant in writing of the specific reasons for the disapproval of the application or amendment, in whole or in part.

V. Civil Rights Assurances

The applicant State must specifically assure that it will comply, and that subgrantees and contractors will comply, with all applicable Federal non-discrimination laws and regulations, including the following:

(a) Title VI of the Civil Rights Act of 1964,
(b) Section 809(C) of Justice Assistance Act of 1984,
(c) Section 504 of the Rehabilitation Act of 1973, as amended,
(d) Title IX of the Education Amendments of 1972,
(e) The Age Discrimination Act of 1975, and,
(f) The Department of Justice Non-Discrimination Regulations, 28 CFR Part 42, Subparts, C, D, E, and G.

Any application for $500,000 or more shall be accompanied by a copy of the current Equal Employment Opportunity Program of the corrections department in accordance with the provisions of 28 CFR 42.301 *et seq.* State applicants that previously applied for and received

funding under this initiative and had an Office of Justice Programs' approval of their Equal Employment Opportunity Program need only submit a statistical update of the previously approved program.

VI. Non-Discrimination

The state assures that it will comply, and that subgrantees and contractors will comply, with all applicable Federal non-discrimination requirements, including:

(a) Title VI of the Civil Rights Act of 1964,
(b) Section 504 of the Rehabilitation Act of 1973, as amended;
(c) Title IX of the Education Amendments of 1972,
(d) The Age Discrimination Act of 1975; and,
(e) The Department of Justice Non-Discrimination Regulations, 28 CFR Part 42, Subparts, C, D, E, and G.

Mack M. Vines,
Director, Bureau of Justice Assistance.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's List of Public Laws.

Last List April 28, 1986.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

New units issued during the week are announced on the back cover of the daily **Federal Register** as they become available.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $595.00 domestic, $148.75 additional for foreign mailing.

Order from Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Charge orders (VISA, MasterCard, or GPO Deposit Account) may be telephoned to the GPO order desk at (202) 783–3238 from 8:00 a.m. to 4:00 p.m. eastern time, Monday—Friday (except holidays).

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

Administration of Ronald Reagan

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published periodically. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

Presidential Documents

Title 3—

The President

Proclamation 5470 of April 30, 1986

Fair Housing Month, 1986

By the President of the United States of America

A Proclamation

The year 1986 marks the eighteenth anniversary of the passage of title VIII of the Civil Rights Act of 1968, commonly referred to as the "Fair Housing Act," declaring it a national policy that housing throughout the United States should be made available to all citizens on the basis of equality and fairness.

The Federal Fair Housing Act prohibits discrimination in housing on the basis of race, color, religion, sex, or national origin.

Fairness is the foundation of our way of life and reflects the best of our traditional American values. Invidious discriminatory housing practices are abhorrent to the American sense of fair play.

In this eighteenth year since the passage of the Fair Housing Act, Americans should continue to work together to uphold the Fair Housing Act and the principle of equal opportunity on which it is based.

The Congress, by Senate Joint Resolution 303, has authorized and requested the President to issue a proclamation designating the month of April 1986 as "Fair Housing Month."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim April 1986 as Fair Housing Month.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Presidential Documents

Proclamation 5471 of May 1, 1986

Loyalty Day, 1986

By the President of the United States of America

A Proclamation

The freedom of thought and action we Americans enjoy today seems as natural as the air we breathe. But there is a danger we may take this freedom for granted. We must never forget it was bought for us at a great price. The brave and resourceful Americans whose sacrifices gained our Independence and preserved it for more than 200 years against formidable foes have set an example of unflinching loyalty to the ideal of liberty and justice for all.

Our great Nation is at peace, but peace demands of us a commitment to defend the system of government that has so effectively ensured our freedoms. To encourage our vigilance and so that we may rededicate ourselves to sustaining the great American ideals, the Congress, by joint resolution approved July 18, 1958 (72 Stat. 369, 36 U.S.C. 162), has designated May 1 of each year as "Loyalty Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim May 1, 1986, as Loyalty Day and call upon all Americans and all patriotic, civic, fraternal, and educational organizations to observe that day with appropriate ceremonies. I also call upon government officials to display the flag of the United States on all government buildings and grounds on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this first day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 87
Tuesday, May 6, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

1 CFR Part 315

Model Rules for Implementation of the Equal Access to Justice Act

AGENCY: Administrative Conference of the United States.

ACTION: Issuance of Final Revised Model Rules.

SUMMARY: The Chairman, Administrative Conference of the United States, issues final revised model rules to implement the Equal Access to Justice Act, Pub. L. 96-481, 94 Stat. 2325, as amended by Pub. L. 99-80, 99 Stat. 183. The Act provides for the award of attorney fees and other expenses to parties who prevail over the Federal government in certain administrative and court proceedings. These revised model rules, which reflect the changes in the law made by Pub. L. 99-80, are designed to assist agencies in adopting or amending their own regulations for implementation of the Equal Access to Justice Act. Where appropriate, alternative provisions suitable for use by contract appeals boards are included; they are displayed in smaller type.

FOR FURTHER INFORMATION CONTACT: Mary Candace Fowler, Staff Attorney, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. 20037; (202) 254-7065.

SUPPLEMENTARY INFORMATION: On November 6, 1985, the Chairman of the Administrative Conference of the United States published draft revised model rules for implementation of the Equal Access to Justice Act in Federal agency proceedings. [50 FR 46250 (November 6, 1985)]. The Act provides for the award of attorney fees and other expenses to certain parties who prevail over Federal government in court cases and adversary administrative proceedings. Prevailing parties may receive awards if they meet the Act's eligibility standards (which set ceilings on the net worth and number of employees of parties) and if the government's position was not substantially justified.

After considering comments received on the draft, the Chairman is now issuing final revised model rules. These rules are intended to help fulfill the Chairman's responsibility, assigned by Congress under the Equal Access to Justice Act, to consult with agencies establishing uniform procedures for handling applications for fee awards in their own proceedings. 5 U.S.C. 504(c)(1), Pub. L. 96-481, 94 Stat. 2325, as amended by Pub. L. 99-80, 99 Stat. 183. The Chairman first issued model procedural rules for agencies in 1981. 46 FR 32900 (June 25, 1981), reprinted in Administrative Conference of the U.S., *Federal Administrative Procedure Sourcebook* (Office of the Chairman, 1985), at 353-84.

Pub. L. 99-80, enacted August 5, 1985, reauthorized the Act, which had expired on September 30, 1984. It also made several amendments, including the following:

1. Net worth ceilings for eligible parties have been raised to $2,000,000 for individuals and $7,000,000 for partnerships, corporations, and other entities;

2. Units of local government that fall within the ceilings on net worth and number of employees have been made eligible for fee awards;

3. The position of the government that must be substantially justified has been specifically defined to include the underlying action or failure to act on which the proceedings is based as well as the position in litigation; and

4. Contract dispute proceedings before agency contract appeals boards have been included in the proceedings covered by the Act.

The draft revised model rules were prepared with two purposes in mind: to assist agencies in amending their Equal Access to Justice Act procedures to reflect these statutory changes, and to adapt the existing rules as necessary for use by agency contract appeals boards. The draft revised model rules noted that application of the Act to contract appeals proceedings raises some problems that may require specialized treatment. These issues are discussed in the section-by-section analysis below, and the model rules contain italicized alternative contract appeals board provisions where appropriate.

The Office of the Chairman received twelve comments on the draft rules, most from federal agencies and most concerning various issues related to implementation of the Act by contract appeals boards. We have made some changes to the draft in response to the comments; both these and our decisions not to adopt other suggestions are discussed below.

One commenter, James McQuiston, of McQuiston Associates, submitted an entirely redrafted set of rules. Significant substantive issues raised by these rules are discussed in connection with the relevant rule provisions. To the extent that the changes made by this alternative set of rules are organizational or stylistic, we will not address them individually. Agencies have worked with their existing rules, most of which are closely based on the ACUS model rules, for over three years. To propose a wholesale redrafting and reorganization at this time would be unnecessarily burdensome and confusing.

As a preliminary matter, we would like to set forth our expectations of how agencies can fulfill the statutory requirement of consultation with the ACUS Chairman. Agencies that publish proposed rules for comment may simply notify us of the publication of their proposals; the Chairman will then provide any suggestions by filing comments. Agencies that intend to publish final rules without providing a notice and comment period should send a draft to the Office of Chairman for review and comment before publication if their rules depart significantly from the model; we will expedite this review to the extent possible.

Of course, as with the original model rules, agencies will not be bound to follow either the model rules or the suggestions made by the Chairman, whose authority is consultative only. However, to promote the uniformity of agency procedure contemplated by the Equal Access to Justice Act and to conserve their own time and resources, we strongly encourage agencies to follow the model to the greatest extent possible.

VOL 51 ISS 87 MY 6 1986 UMI

Section-by-Section Analysis

Subpart A—General Provisions

The basic changes recommended in this subpart to conform the model rules to the provisions of the amended Equal Access to Justice Act (such as deletion of references to the agency's position "as a party" and revision of the net worth ceilings on eligibility) were not controversial, and we have adopted them. However, some sections of the subpart provoked extensive comment.

Applicability: Comments from the Civil Division of the Department of Justice raised substantial questions about the draft rules' discussion of applicability and retroactivity of the new provisions of the Act. We proposed that all cases in which fee applications were pending on August 5, 1985 be treated as "pending" on the date of enactment of Pub. L. 99–80, and thus covered by the amended Act rather than by the old Act (under its savings clause for cases pending on September 30, 1984). The Civil Division, however, has pointed out legislative history that casts doubt on our interpretation. During debate in the House of Representatives before passage of the Act, Representative Kastenmeier stated:

> I would like to clarify the effective date provisions of H.R. 2378 and the relationship of these provisions with the original Act. Cases which were pending on October 1, 1984, including fee application proceedings would be governed by the original act, provided that the time to file the fee application expired before the date of enactment of this bill. This bill would apply to any case pending on October 1, 1984, and finally disposed of before the date of enactment of this bill, if the time for filing an application for fees and other expenses had not expired as of such date of enactment. 131 Cong. Rec. H4782 (June 24, 1985).

Relevant language also appears in the House Report on H.R. 2378: "The changes which are made by H.R. 2378 which merely clarify existing law are retroactive, and apply to matters which were pending on, or commenced on or after October 1, 1981. However, changes which are made by H.R. 2378 and which expand or otherwise change existing law shall take effect on the date of enactment and shall apply to matters pending on or commenced after that date." H.R. Rep. 99–120, 99th Cong., 1st Sess. 11 (1985). See also *Id.* at 21. This distinction, the Civil Division comments argue, would be meaningless if all provisions of the new act applied retroactively to cases in which only the fee application remained pending on the date of enactment. *Bradley* v. *School Board* 416 U.S. 696 (1974), which stands for the proposition that a court will apply the law in effect at the time it makes its decision (and itself involved application of an attorneys' fee statute to a case in which only the fee application was pending), makes an explicit exception for situations in which legislative history indicates that Congress did not intend a retroactive application.

We are persuaded that the provisions of the new Act (and the amended rules) as a whole should not apply to cases in which only fee applications remained pending on August 5, 1985. Instead, as envisioned by the House Report, those provisions that expand or change existing law (such as the expanded eligibility ceilings) should apply to cases on which the substantive portion of the case was still pending on the date of enactment, or the time for filing a fee application has not expired on that date, and to those other classes of cases explicitly mentioned in Pub. L. 99–80. We do not believe it is necessary to revise § 315.102 of the draft model rules, which tracks the language of Pub. L. 99–80, to accommodate this change in interpretation. Most agencies had few, if any, fee applications pending on August 5; these agencies will surely find it easier to inform affected parties directly that the old rules will continue to apply than to adopt a special rule covering the cases. Even agencies with a larger application volume, such as the NLRB, may prefer to follow this course. If not, such agencies can simply retain their old rules for as long as necessary while also adopting new rules for newer cases.

We note, in this connection, that the definition of "position of the agency" to include the underlying position as well as the litigation position is explicitly described in the House Report as a clarifying amendment:

> Part of the problem in implementing the Act has been that agencies and courts are misconstruing the Act. Some courts have construed the "position of the United States" which must be "substantially justified" in a narrow fashion which has helped the Federal Government escape liability for awards. H.R. 2378 clarifies both of those points. When the escape clause was originally written, it was understood that "position of the United States" was not limited to the government's litigation position but included the action—including agency action—which led to the litigation. However, courts have been divided on the meaning of "position of the United States." H.R. 2378 clarifies that the broader meaning applies.

H.R. Rep. 99–120, at 9 (footnotes omitted). In *Russell* v. *National Mediation Board*, 775 F.2d 1284 (5th Cir. 1985), the Fifth Circuit agreed that the definition of "position of the agency" clarified the original Act and thus should apply even to cases in which only a fee application remained pending. While we do not propose to treat this issue explicitly in the rules, we recommend that agencies with a backlog of fee applications pending on August 5, 1985, give careful consideration to the distinction between clarifying amendments and modifying amendments in disposing of these applications.

The Agriculture Board of Contract Appeals has raised a question as to what constitutes a timely filed application dismissed for lack of jurisdiction under the special retroactive applicability clause for contract appeals. Would a general request for fees in the initial pleading, denied by the Board in its substantive order in the case, qualify? This is a difficult question. A potential applicant that stated its intent to file for fees and was explicitly informed (by denial in an agency order) that such an application would not be entertained would in all probability not have bothered to file such an application. However, Pub. L. 99–80 contemplate that an "application" within the terms of the Act must have been filed: "[The Act] shall apply to any adversary adjudication pending on or commenced on or after October 1, 1981, in which applications for fees and other expenses were timely filed. . . ." Pub. L. 99–80, sec. 7(c). We suggest that the boards require that a formal application have been filed. An applicant who feels unfairly disadvantaged by this interpretation may wish to file under the new law and take the issue before the appellate court.

Proceedings Covered: The Agriculture Board of Contract Appeals has also suggested a clarifying change to § 315.103, identifying the proceedings to which the Act applies. For contract appeals, the Board suggests the rules refer to "final decisions of contracting officers" rather than simply "decisions" made under the relevant statutory provisions. We have added the words "of contracting officers," which we agree are helpful. However, we have not added the word "final," since the Contract Disputes Act refers only to "decisions." Thus the term "final" could be more confusing than clarifying.

Eligibility: Two commenters made suggestions on the eligibility provisions of § 315.104. The Armed Services Board of Contract Appeals said the definition of "party" should follow existing Board rules; however, since the EAJA explicitly defines a party and the rules follow this definition, we cannot adopt this suggestion. The Postal Service Board of Contract Appeals noted that the word "proceeding" may be ambiguous for contract appeals, and that in these cases eligibility should be determined as of the time the appeal was filed, rather than the claim. We agree with this interpretation, which parallels that for other proceedings, in which the commencement of the formal litigation stage is the point at which eligibility is measured. We have included appropriate alternate language for contract appeals boards in the rules.

We received no comments or suggestions on how to determine the net worth of units of local government (other than an informal comment to the effect that housing authorities, mentioned in our discussion of this issue, are virtually always independent of individual local municipalities). This difficult issue will have to be resolved on a case-by-case basis, in the context of concrete fact situations. We will monitor developments in this area in order to circulate any useful information that becomes available.

Standards for Awards: Comments on § 315.105, standards for awards, concerned two points. Some Boards of Contract Appeals suggested elimination of the "burden of proof" sentence in this rule, suggesting it is unnecessary, confusing, and unwarranted by amendments to the Act. This language appeared in the original model rules, and we see no reason to eliminate it now. However, we agree that the sentence may be ambiguous without its original ending explicitly linking it to the substantial justification determination rather than other issues, and we have revised the sentence to resolve this problem. One commenter objected to the term "agency counsel"; as explained in our original model rules, we selected this term to distinguish between the agency as a party to the proceeding and the agency as a decisionmaking body. If a clearer term will be workable in the context of contract appeals, the boards are invited to use it.

A larger issue concerns our decision to delete the phrase "reasonable in law and fact" from our rules. The Civil Division of the Justice Department and the General Counsel of the Securities and Exchange Commission have expressed doubts about whether the standard to be applied in determining substantial justification must be, as the House Report on H.R. 2378 suggests, "more than reasonable." The SEC General Counsel specifically suggests that we retain the previous language.

It is true that statements on the floor of the House of Representatives question the accuracy of certain parts of the discussion of the substantial justification standard in the House Report, particularly its suggestion that administrative actions found to be arbitrary and capricious or unsupported by substantial evidence can virtually never be substantially justified. These statements, however, do not directly question the report's assertion that the correct test, as applied in several cited court cases, is "more than mere reasonableness." And the fact that the statutory language itself was not changed is not dispositive, for the House report language makes clear that it is intended to clarify the committee's preference for one of two interpretations of the existing language.

One the other hand, the floor statements inevitably raise some questions about Congress' endorsement of the substantial justification section of the report, and the case law remains unsettled. In *Russell* v. *National Mediation Board*, the fullest treatment of the issue since passage of the new law, the Fifth Circuit decided to continue applying the "reasonable in fact and law" standard in the face of what it saw as irreconcilable inconsistencies in the legislative history of Pub. L. 99–80. On the other hand, the D.C. Circuit has continued to apply its standard of "more than mere reasonableness." *Massachusetts Fair Share* v. *LEAA*, 776 F.2d 1066 (D.C. Cir. 1985). And the SEC General Counsel notes that, in any event, "reasonable in fact and law" may itself be "more than mere reasonableness."

The underlying difficulty is that all the definitions of "substantially justified" are themselves no more concrete and specific than the term itself. Inevitably, the determination of what is substantially justified must be made in the context of the individual case. We are not certain that the "reasonable in fact and law" formulation reflects Congressional intent, nor can we predict whether a consensus test will emerge from consideration of this question by additional circuits. We suggest that, in making individual determinations, agencies and their adjudicative officers should ensure that they are looking closely at the government's position, while looking to the courts (as we will) for further guidance.

In one other point related to this section, the Civil Division of the Justice Department said that fee awards should be apportioned to cover only the amount of time litigating against unjustified positions. While we agree with the spirit of this proposition, we think it must be applied on a case-by-case basis, and thus does not lend itself to an unambiguous and helpful model rule. For example, courts and agencies might reach very different conclusions about what fees are awardable and what are not when the "justified" and "unjustified" positions are related to two separate claims combined in the same case, to technical and substantive defenses, or to alternative substantive legal theories arising out of the same facts. See *Hensley* v. *Eckerhart*, 461 U.S. 424 (1983). We are not aware that agencies have had any significant problems in dealing with such cases as they arise, and we would prefer to avoid adding a rule that may create more confusion than clarity in this area.

Fees and Expenses: Three commenters suggested changes to § 315.106, on allowable fees and expenses, which we had not proposed to amend. The Department of Transportation Board of Contract Appeals suggests that fees should be limited to reimbursement of actual fees incurred, and should not be determined by reference to customary fees. We do not agree, as we explained in adopting our original model rules, and we believe the law is clear that fee awards are not limited to reimbursement. 5 U.S.C. 504(b)(1)(A); 28 U.S.C. 2412(d)(2)(A).

The Armed Services Board of Contract Appeals suggests addition of a sentence stating that *pro se* litigants may not recover attorney fees. However, we believe this sentence might imply, inaccurately, that such litigants may not recover expert witness fees and other expenses. Moreover, we continue to believe, as discussed in our original model rules, that the eligiblity of *pro se* litigants should be determined on a case-by-case basis; in any event, this issue has not often arisen in agency proceedings.

James McQuiston suggests listing in this rule twelve factors for evaluating attorney fee requests, first formulated in *Johnson* v. *Georgia Highway Express*, 488 F. 2d 714 (5th Cir. 1974), and widely applied in civil rights and other fee cases. The rule would require discussion of each relevant factor by agencies making awards. The 11th Circuit requires courts determining EAJA petitions to apply these factors, even though the Act includes its own standards for determining an appropriate fee, and some other courts have referred to *Johnson* in evaluating EAJA fee requests. *Florida Suncoast Villa* v. *United States*, 776 F. 2d 974 (11th Cir. 1985); *see* also, *e.g.*, *Kennedy* v. *Heckler*, 598 F. Supp. 124 (D. Md. 1984); *Belton* v. *Commissioner of Internal Revenue*, 595 F. Supp. 494 (D.D.C. 1984). However, judicial understanding of the *Johnson* factors and of other approaches to calculating fees (such as the lodestar concept applied in the D.C. Circuit, see *Copeland* v. *Marshall*, 641 F. 2d 880 (D.C. Cir. 1980)) is continually evolving,

VOL 51 ISS 87 MY 6 1986 UMI

and incorporation of the exact formulation of *Johnson* into the model rules will fail to take these developments into account. For example, the Supreme Court has recently said that the starting point for fee determinations should be a reasonable number of hours worked times a reasonable fee, with other factors considered after this basic calculation. *Hensley* v. *Eckerhart*, 461 U.S. 424 (1983). This starting determination is very close to the standard articulated by Congress in the Act: "[t]he amount of fees . . . shall be based upon prevailing market rates for the kind and quality of the services furnished" up to the limit of $75 per hour. 5 U.S.C. 504(b)(1)(A); 28 U.S.C. 2412(d)(2)(A).

The existing model rule requires consideration of the factors clearly relevant to the determination and permits consideration when relevant of other, unspecified factors, such as those identified in *Johnson*. Agency adjudicative officers have had no apparent problems with applying existing law on the calculation of attorney fees in an informal way, considering the difficulty of the issues, the skill of the attorney, and similar factors in determining the appropriateness of the hours billed and the hourly rate requested. We believe the *Johnson* factors will continue to inform the work of the adjudicative officers (and agency reviewers), as will other developments in attorney fee case law, without the need for detailed rules that would probably require frequent amendment.

Subpart B—Information Required from Applicants

Two significant—and related—issues in this subpart provoked comment: the proper handling of bifurcated contract appeals board proceedings, in which government liability is determined first and only then (assuming there is liability) are damages assessed, and the meaning of "final disposition."

Bifurcated Proceedings: As to this issue, commenters generally favored concluding both the liability and damages portions of a case before deciding fee applications; the Civil Division of the Justice Department pointed out that the government's position cannot always be accurately evaluated when only liability has been determined. The Veterans' Administration Board of Contract Appeals, on the other hand, suggested that it would generally work better to decide applications at the end of the liability phase; however, the Board believed the decision should be made on a case-by-case basis.

We believe that the bifurcation problem does not require a special amendment to § 315.204 of the rules. We agree with most of the commenters that in the ordinary case, fee applications can be more appropriately handled after the determination of damages (whether this determination is made by settlement or litigated). But we also agree with the VA Board that the issue should be determined on a case-by-case basis. The legislative history of the original Act clearly contemplates that there may be cases in which a court or agency may entertain an application before conclusion of the entire case. H.R. Rep. 96-1434, 96th Cong., 2d Sess. 21-22 (1981). While these cases are likely to be rare (particularly in light of the new statutory provision prohibiting agencies from finally deciding applications in cases where a government court appeal of the merits is pending), we think that agencies, like the courts, should have discretion to decide such applications when they believe the circumstances warrant it, but should not bind themselves to do so (or not to do so) by a categorical rule.

Final Disposition: Two commenters—the Transportation and Armed Services Boards of Contract Appeals—said that final disposition, in the context of contract appeals, should occur when the time for appealing the decision has expired. This approach parallels the new language in the court provisions of the Act. The commenters noted that either the contractor or the government has 120 days to appeal the final decision of a board of contract appeals. This period is longer than that for appeal from most administrative agency decisions, and the situation is complicated by the fact that the government as well as the contractor may appeal. (In most administrative proceedings covered by EAJA, of course, there is no agency appeal because the agency would be appealing its own decision.)

The point is well taken. While the contractor would be free to file its application earlier in any event, realistically, the board is unlikely to take final action on a fee application when the government might still appeal the substantive decision. (Anticipating this problem, Pub. L. 99-80 added a provision to the Act prohibiting agencies from deciding fee applications in proceedings where the government has appealed.) There is no point in requiring the applicant to meet an arbitrary filing deadline of 30 days after issuance of the decision if the agency will not consider the application for an additional 90 days.

While the same considerations will not apply in most other agency proceedings, where the government will not appeal, we believe the best approach is to modify the definition of "final disposition" for all proceedings. This will provide consistency among agency proceedings as well as with court cases, and will avoid the confusion that sometimes arises as to whether an application must be filed with an agency to preserve rights even though some portion of a case is being appealed to the courts.

Other Issues: Commenters raised a few smaller points about this subpart. The Agriculture Board of Contract Appeals suggested that the applicant "certify" its net worth in § 315.201(b). We believe the verification requirement of § 315.201(e), which applies to every portion of the application, is adequate. The DOT Board of Contract Appeals said that applicants should be permitted to file EAJA applications with their initial contract appeals, so that relevant testimony may be taken at the trial on the merits. It would be possible for a contractor to include a generalized statement of intent to seek fees, along with a statement of net worth and an allegation that the government's underlying position is not substantially justified, in its initial contract appeal. Realistically, however, this will not save much time or effort. As to substantial justification, the testimony on the merits will be the relevant testimony. As to the appropriate amount of any award (the item which, according to the Civil Division of the Justice Department, is most likely to prompt a dispute requiring further exploration of facts), the necessary information will not be available until after the trial on the merits. So the only thing that could be accomplished would be to take testimony on the eligibility of a potential applicant who may not even prevail in the underlying proceeding.

We have revised § 315.203, concerning documentation of fees and expenses, in response to a suggestion from the General Counsel's Office of the Department of Transportation that the existing language could be read to imply that adjudicative officers may only require further substantiation of expenses and not of attorney fees. This is not the intent of the rule.

Subpart C—Procedures for Considering Applications

Comments on this subpart of the rules focused largely on their suitability for use by contract appeals boards. One general comment, filed by the DOT Board of Contract Appeals, noted that the boards already have general rules on filing and service of pleadings and do not need separate EAJA rules. We believe there may be some benefit in having separate rules clearly stating EAJA procedure. To the extent, however, that existing board rules clearly cover the necessary procedures, they can be incorporated by reference in lieu of separate rules.

James McQuiston proposed a complete restructuring of the procedure for handling fee applications. He believes Congress' provision that the final decision be made by the agency, coupled with its direction that the substantial justification determination be made on the existing record, describes something other than a quasi-judicial procedure. Instead, he proposes that agency adjudicative officers function more like agency contracting officers, determining fee applications based on an informal review of the file and, where appropriate, negotiating a settlement with the applicant on the agency's behalf. The adjudicative officer's decision would then be subject to approval by an agency supervisor. Under this system, there would be no need for responsive pleadings (although the agency litigators could submit comments on the application if they chose to), nor would the applicant be required to serve copies of its application on agency litigators or any other parties to the proceeding. Similarly, no agency review process, other than the approval of the supervisor mentioned above, is provided for.

Mr. McQuiston contends that the award of fees ("negotiating a fee for services" in his words) is essentially an executive act, very similar to awarding a contract, rather than a judicial one. He argues that this approach will be much faster and will avoid the unfairness of having an agency adjudicate a dispute to which it is a party.

We do not believe this to be a better approach. The role of an agency official deciding what is a reasonable price to pay for goods or services provided directly to the agency by contractors is not clearly analogous to the role of the adjudicative officer in determining the agency's potential liability for services provided by a private attorney to a third party, particularly when a concept of agency fault enters into the decision. While an adjudicative officer might possibly function in such an "executive" capacity, this would be a very unaccustomed and probably difficult role for such an officer. Moreover, Pub. L. 99-80 and its legislative history reveal no Congressional intent to eliminate pleadings and adversary proceedings as a method of focussing the issues for the adjudicative officer, though Congress was certainly aware that this is the procedure in common use.

It seems more rational to keep the process for determining fee applications in administrative proceedings as parallel as possible to the procedure in court cases, and to preserve fee proceedings as an integral part of the proceeding in which they arose, rather than to create an entirely new procedure. While we agree that the proposed approach might save time, if administered with that goal in mind, we don't think that is the most important consideration. And we don't agree that changing the decision-making process from a quasi-judicial to an administrative one will remove a taint of unfairness. If anything, it exacerbates this problem, since the adjudicative officer as contracting officer would be explicitly charged with representing and advancing the interests of the agency in a way that the adjudicative officer as quasi-neutral arbiter is not. Accordingly, we have retained the basic approach of the original model rules.

Settlements: Two commenters objected to the requirement of § 315.305 that parties who reach settlement on attorney fees before an application is filed file their application with the proposed settlement. We have two reasons for retaining this provision, which we continue to think is a good one. First, Congress has explicitly instructed ACUS to report annually on fee awards in administrative proceedings under the Act. Information about the applicant and the proceeding, as well as the amount of the settlement, are necessary to provide a complete report. Second, this filing permits at least brief consideration by the adjudicative officer of information on the eligibility of the applicant, an extra step that seems appropriate where a waiver of sovereign immunity is involved. In many administrative proceedings, the adjudicative officer and/or the agency must approve settlements in any event, so the submission of information on matters such as eligibility would be a logical part of this process. If this is not the case in contract appeals, and the boards believe the filing of an application would be too cumbersome, we would still suggest that the boards request the settling parties to file some basic information including a statement of eligibility and the amount of the settlement on fees, if for no other reasons than to keep Congress informed.

Further Proceedings: Several commenters made suggestions about § 315.306. The DOT Board of Contract Appeals urged that the rule preserve a full opportunity for discovery by the government as well as the availability of full open hearings on all issues rather than confinement to the written record. The General Counsels of DOT and NASA also suggested amending the rule to clarify that discovery and even evidentiary hearings are still permissible as to issues such as eligibility and the amount of fees.

We believe the statute is clear that substantial justification determinations must be made on the written record. We also feel, in the interest of avoiding delay and expense, that it is appropriate to encourage proceedings on the written record whenever possible as to other issues. Accordingly, we have not adopted the suggestion of the DOT Board of Contract Appeals. We agree, however, that the rule could be clearer on the extent to which discovery and hearings are still permissible, and we have modified the rule accordingly.

The Agriculture Board of Contract Appeals suggested an amendment to indicate that the determination of when further proceedings are necessary is a judgement within the discretion of the adjudicative officer. We are not aware of any problems that have arisen over this issue under the existing regulation, nor of any disputes over the extent of further proceedings provided; thus we have not revised the rule. We agree, however, that this is essentially a discretionary determination, and would not object if an agency feels the need to say so explicitly.

Decision: This section raises the question of who is the "adjudicative officer" in contract appeals proceedings. The two comments we received addressing this point generally agreed with our original formulation, that whatever unit of the board made the first decision on the merits should be considered the "adjudicative officer." The Postal Service Board of Contract Appeals, however, went on to suggest that the "adjudicative officer" should not be limited to the particular presiding officer or panel that made the original decision, because this would unnecessarily limit flexibility in work allocation. We believe that agencies can properly assign EAJA petitions to new board members or panels where illness, retirement or other specific circumstances would prevent assignment to the original member or panel, and we have revised the rule to reflect this. However, the statute defines the "adjudicative officer" as "the

VOL 51 ISS 87 MY 6 1986 UMI

deciding official. ... who presided at the adversary adjudication;" thus the decisionmakers should be the same for the merits and the fee application whenever possible. Similiarly, where boards have relied on hearing examiners to take evidence, but not to make decisions, in contract disputes, the boards may wish to have these examiners recommend EAJA decisions; the examiners should not, however, actually *make* the EAJA decisions, since they were not the "deciding officials" on the merits. We repeat here our earlier suggestion, endorsed by the Armed Services Board of Contract Appeals, that boards may wish to use the term "presiding officer" to distinguish between officials authorized to make procedural rulings and those who must make the ultimate decisions.

Two other contract appeals boards oppose § 315.307's provision of a time limit (to be specified by the agency) for EAJA decisions, which they regard as unnecessary and not legally required. It is the position of the Administrative Conference that agency-established time limits or guidelines can be an effective way to reduce administrative delay. ACUS Recommendation 78-3, *Time Limits on Agency Actions*, 1 CFR 305.78-3. This provision of the model rules reflects that position.

Commenters from the Civil Division of the Department of Justice anticipated problems in determining which agency should pay when two or more are involved and recommended that the model rules resolve this question. For example, a contractor might file a claim under the Contract Disputes Act because it was required to pay wages higher than the contract rate, but the contracting officer may have been bound to impose the higher rate by a ruling or regulation of the Department of Labor. This particular example seems like one where the contracting officer could demonstate substantial justification, or at least special circumstances that would make an award unjust, so the issue might never arise. In any event, it is impossitlbe to predict and resolve every possible two-agency situation in advance. We believe these problems must be dealt with on a case-by-case basis, as they arise.

Agency Review: We received extensive comment on the question of who should be the "agency" which makes the final EAJA decisions in contract appeals board proceedings. Most of the commenters (including the Boards of Contract Appeals of the Department of Transportation, Postal Service, and Veterans Administration and Attorney Robert J. Robertory) strongly urged us to maintain the independence of the boards of contract appeals, noting the importance of that independence in the statutory scheme of the Contract Disputes Act. Comments submitted by Ronald Kienlen, Deputy Chief Trial Attorney with the Department of the Army, took the contrary position. He argued that the boards exercise authority delegated by agency heads, as circumscribed by the Contract Disputes Act. Authority to award fees under EAJA must also be delegated by the head of the agency *conducting* the proceeding (the litigating agency), and this authority is not subject to the Contract Disputes Act limitations. Congress could have authorized the boards explicitly to make awards, but instead merely stated that Contract Disputes Act proceedings were covered by the Act. Finally, the comments noted that, if Board decisions are final, the agency will have no right of appeal, even though the final decision is not its own.

These comments raise serious concerns. After careful consideration of them, of the statute, and of the legislative history, however, we have decided to stay with our original approach. Pub. L. 99-80 provides that the Act applies to "any appeal of a decision made pursuant to section 6 of the Contract Disputes Act of 1978 . . . before an agency board of contract appeals. . . ." The House Report on the legislation elaborates:

> Subsection (c) adds new language expressly making proceedings before agency boards of contract appeals covered by the Act, as are adversary adjudications. . . . The expansion of coverage in this provision is necessary to preserve the balance of alternative remedies for government contractors found in the Contract Disputes Act of 1978 (CDA), 41 U.S.C. 601-613. Under the CDA, the contractor may either bring his contract dispute before an agency board or file suit directly in the Claims Court. However, if eligible prevailing contractors can recover attorney fees only in the latter forum, there will be a disincentive to bring cases before the agency boards. Thus, unless a statutory modification occurs, the complete remedy for contract cases will be frustrated.

In *Fidelity Construction Co. v. United States*, 700 F.2d 1379 (Fed. Cir. 1983), the court held that agency boards of contract appeals are without jurisdiction to award fees against the government under the Act. The *Fidelity* court reasoned that Congress must explicitly authorize an award of fees against the United States with specific statutory language. H.R. 2378 would legislatively overrule the result in *Fidelity* by providing statutory authority for attorneys fees.

Congress' intent to authorize the contract appeals boards themselves to award fees seems clear from this language. Moreover, Congress' obvious concern with maintaining the equivalence of contract appeals board and Claims Court remedies under the Contract Disputes Act argues strongly in favor of making contract appeals board decisions on EAJA applications the final agency decisions. The contracting agency does not review other decisions by the boards or by the Claims Court. Moreover, it would be neither efficient nor logical for the decision on whether the government's position in litigation was substantially justified to be made by an official (or body) that had no authority to decide (or review the decision in) the substantive case.

It is true that only the non-governmental party may appeal agency fee determinations under the Equal Access to Justice Act to the courts. In the usual agency situation, the agency would not need appeal rights since it would effectively be appealing its own decision—an obviously illogical outcome. By contrast, the contract appeals boards' decisions are ordinarily not reviewable by the litigating agency; instead, their decisions on the merits may be appealed to the Court of Appeals for the Federal Circuit (with the concurrence of the Attorney General). But the contract appeal situation is not unprecedented. Since passage of the original Act, the National Transportation Safety Board has made awards against the Federal Aviation Administration, and the Occupational Safety and Health Review Commission and the Federal Mine Safety and Health Review Commission have made awards against the Department of Labor. These awards were also unappealable, even though the litigating agency had no power of review over the decisions (the original Act provided for appeals by "parties," defined to exclude agencies). When it passed Public Law 99-80, Congress made no effort either to create court appeal rights or to give final authority for fee awards to the litigating rather than the deciding agencies in these cases.

We recommend, therefore, that the contract appeals boards' EAJA decisions be unreviewable by agencies, and alternate § 315.308 reflects this view. We note that the government will be able to raise this issue in court if it chooses to, since it can defend against a contractor's appeal of an EAJA decision by arguing failure to exhaust administrative remedies.

Other Issues: James McQuiston recommends amendment of § 315.309, on judicial review, to provide that parties who wish to appeal fee determinations may file a notice of appeal with the agency, which will then transmit it to the court. Under the statute (as in other agency appeals), it is the responsibility of the dissatisfied party to appeal the decision; this responsibility extends, of course, to the filing of a notice of appeal with the proper court within the statutory time limit.

The DOT Board of Contract Appeals raised questions about § 315.310, concerning payment of awards. First, the Board states, section 13(a) of the Contract Disputes Act provides for payment of damages in substantive contract proceedings through 31 U.S.C. 724a, upon certification by a contract appeals board to the Comptroller General. EAJA awards should be handled the same way. Moreover, the agency should not be required to pay within 60 days, since it has 120 days to appeal the decision.

In each of these cases, the Equal Access to Justice Act provides explicitly for different treatment than the standard procedure in contract appeals. Under 5 U.S.C. 504(d), as amended by Pub. L. 99-80, "[f]ees and other expenses awarded under this subsection shall be paid by any agency over which the party prevails from any funds made available to the agency by appropriation or otherwise." The new law specifically eliminated previous language permitting the payment of awards out of general funds for the payment of judgments against the United States. (Because of another provision of the original Act, Equal Access to Justice Act awards could not actually be paid out of these funds even before the passage of Pub. L. 99-80.) Similarly, awards made in contract appeals proceedings should be payable by the agency over which the applicant prevailed.

Likewise, the 120-day appeal provision of the Contract Disputes Act does not affect the suitability of § 315.310 for contract appeals. The Equal Access to Justice Act expressly provides that appeals from decisions on fee applications must be made within 30 days, not 120. And if a government appeal of the substantive decision is pending, under 5 U.S.C. 504(a)(2), the contract appeals board may not reach a final decision on an EAJA application in any event.

James McQuiston has suggested that the rules contain provisions directly related to the Administrative Conference's EAJA data collection effort. He would require applicants for awards to submit a partially-completed Administrative Conference report form, including data from their applications as to eligibility, fees claimed, and the proceeding involved, with their applications. He also suggests provisions identifying the agency personnel responsible for gathering EAJA data and the procedures they are to follow in collecting and submitting the data to the Conference.

We appreciate this concern for the effectiveness of our data-collection efforts. However, we are not certain whether the rules proposed would significantly aid those efforts. Requiring applicants to submit an ACUS form with their fee applications may be an efficient way of initiating the data collection process for some agencies and unnecessarily burdensome for others. (For example, it might be difficult for agencies holding hearings in many locations around the country to make the forms readily available to applicants.) Although we are not including this proposal in our model rules, we suggest that individual agencies consider it, reaching their own conclusions as to whether it would be helpful.

The other suggested rules on data collection relate to internal agency procedures rather than to matters that directly affect the public. The agencies are already bound by statute to provide the Conference with necessary data, and an agency rule will not add anything to this statutory requirement. Thus we don't see any clear purpose in detailing the procedures in regulations. However, if individual agencies believe that the adoption of a rule describing their data collection procedures will help to strengthen those procedures, they may wish to consider this suggestion further.

List of Subjects in 1 CFR Part 315

Administrative practice and procedure, Equal access to justice.

Chapter III of Title 1, CFR is amended to add Part 315 to read as follows:

PART 315—MODEL RULES FOR IMPLEMENTATION OF THE EQUAL ACCESS TO JUSTICE ACT IN AGENCY PROCEEDINGS

Subpart A—General Provisions

Sec.

315.101 Purpose of these rules.
315.102 When the Act applies.
315.103 Proceedings covered.
315.104 Eligibility of applicants.
315.105 Standards for awards.
315.106 Allowable fees and expenses.
315.107 Rulemaking on maximum rates for attorney fees.
315.108 Awards against other agencies.
315.109 Delegations of authority.

Subpart B—Information Required From Applicants

315.201 Contents of application.
315.202 Net worth exhibit.
315.203 Documentation of fees and expenses.
315.204 When the application may be filed.

Subpart C—Procedures for Considering Applications

315.301 Filing and service of documents.
315.302 Answer to application.
315.303 Reply.
315.304 Comments by other parties.
315.305 Settlement.
315.306 Further proceedings.
315.307 Decision.
315.308 Agency review.
315.309 Judicial review.
315.310 Payment of award.

Authority: Sec. 203(a)(1), Pub. L. 98-461, 94 Stat. 2325 [5 U.S.C. 504(c)(1)]; Pub. L. 99-80, 99 Stat. 183.

Subpart A—General Provisions

§ 315.101 Purpose of these rules.

The Equal Access to Justice Act, 5 U.S.C. 504 (called "the Act" in this part), provides for the award of attorney fees and other expenses to eligible individuals and entities who are parties to certain administrative proceedings (called "adversary adjudications") before this agency. An eligible party may receive an award when it prevails over an agency, unless the agency's position was substantially justified or special circumstances make an award unjust. The rules in this part describe the parties eligible for awards and the proceedings that are covered. They also explain how to apply for awards, and the procedures and standards that this agency will use to make them.

§ 315.102 When the Act applies.

The Act applies to any adversary adjudication pending or commenced before this agency on or after August 5, 1985. It also applies to any adversary adjudication commenced on or after October 1, 1984, and finally disposed of before August 5, 1985, provided that an application for fees and expenses, as described in subpart B of these rules, has been filed with the agency within 30 days after August 5, 1985, and to any adversary adjudication pending on or commenced on or after October 1, 1981, in which an application for fees and other expenses was timely filed and was dismissed for lack of jurisdiction.

§ 315.103 Proceedings covered.

(a) The Act applies to adversary adjudications conducted by this agency. These are (i) adjudications under 5 U.S.C. 554 in which the position of this or any other agency of the United States, or any component of an agency, is presented by an attorney or other representative who enters an appearance and participates in the proceeding, and (ii) appeals of decisions of contracting officers made pursuant to

VOL 51 ISS 87 MY 6 1986 UMI

section 8 of the Contract Disputes Act of 1978 (41 U.S.C. 606) before agency boards of contract appeals as provided in section 8 of that Act (41 U.S.C. 607). Any proceeding in which this agency may prescribe a lawful present or future rate is not covered by the Act. Proceedings to grant or renew licenses are also excluded, but proceedings to modify, suspend, or revoke licenses are covered if they are otherwise "adversary adjudications." For this agency, the types of proceedings generally covered include: [to be supplied by the agency]

Alt. 315.103(a): [for use by contract appeals boards] The Act applies to appeals of decisions of contracting officers made pursuant to section 6 of the Contract Disputes Act of 1978 (41 U.S.C. 605) before this board as provided in section 8 of that Act (41 U.S.C. 607).

(b) This agency's failure to identify a type of proceeding as an adversary adjudication shall not preclude the filing of an application by a party who believes the proceeding is covered by the Act; whether the proceeding is covered will then be an issue for resolution in proceedings on the application.

(c) If a proceeding includes both matters covered by the Act and matters specifically excluded from coverage, any award made will include only fees and expenses related to covered issues.

§ 315.104 Eligibility of applicants.

(a) To be eligible for an award of attorney fees and other expenses under the Act, the applicant must be a party to the adversary adjudication for which it seeks an award. The term "party" is defined in 5 U.S.C. 551(3). The applicant must show that it meets all conditions of eligibility set out in this subpart and in subpart B.

(b) The types of eligible applicants are as follows:

(1) An individual with a net worth of not more than $2 million;

(2) The sole owner of an unincorporated business who has a net worth of not more than $7 million, including both personal and business interests, and not more than 500 employees;

(3) A charitable or other tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) with not more than 500 employees;

(4) A cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)) with not more than 500 employees; and

(5) Any other partnership, corporation, association, unit of local government, or organization with a net worth of not more than $7 million and not more than 500 employees.

(c) For the purpose of eligibility, the net worth and number of employees of an applicant shall be determined as of the date the proceeding was initiated.

Alt. 315.104(c): [for use by contract appeals boards] For the purpose of eligibility, the net worth and number of employees of an applicant shall be determined as of the date the applicant filed its appeal under 41 U.S.C. 606.

(d) An applicant who owns an unincorporated business will be considered as an "individual" rather than a "sole owner of an unincorporated business" if the issues on which the applicant prevails are related primarily to personal interests rather than to business interests.

(e) The employees of an applicant include all persons who regularly perform services for renumeration for the applicant, under the applicant's direction and control. Part-time employees shall be included on a proportional basis.

(f) The net worth and number of employees of the applicant and all of its affiliates shall be aggregated to determine eligibility. Any individual, corporation or other entity that directly or indirectly controls or owns a majority of the voting shares or other interests of the applicant, or any corporation or other entity of which the applicant directly or indirectly owns or controls a majority of the voting shares or other interest, will be considered an affiliate for purposes of this part, unless the adjudicative officer determines that such treatment would be unjust and contrary to the purposes of the Act in light of the actual relationship between the affiliated entities. In addition, the adjudicative officer may determine that financial relationships of the applicant other than those described in this paragraph constitute special circumstances that would make an award unjust.

(g) An applicant that participates in a proceeding primarily on behalf of one or more other persons or entities that would be ineligible is not itself eligible for an award.

§ 315.105 Standards for awards.

(a) A prevailing applicant may receive an award for fees and expenses incurred in connection with a proceeding or in a significant and discrete substantive portion of the proceeding, unless the position of the agency over which the applicant has prevailed was substantially justified. The position of the agency includes, in addition to the position taken by the agency in the adversary adjudication, the action or failure to act by the agency upon which the adversary adjudication is based. The burden of proof that an award should not be made to an ineligible prevailing applicant because the agency's position was substantially justified is on the agency counsel.

(b) An award will be reduced or denied if the applicant has unduly or unreasonably protracted the proceeding or if special circumstances make the award sought unjust.

§ 315.105 Allowable fees and expenses.

(a) Awards will be based on rates customarily charged by persons engaged in the business of acting as attorneys, agents and expert witnesses, even if the services were made available without charge or at reduced rate to the applicant.

(b) No award for the fee of an attorney or agent under these rules may exceed $75.00 per hour. No award to compensate an expert witness may exceed the highest rate at which this agency pays expert witnesses, which is [to be supplied by the agency]. However, an award may also include the reasonable expenses of the attorney, agent, or witness as a separate item, if the attorney, agent or witness ordinarily charges clients separately for such expenses.

(c) In determining the reasonableness of the fee sought for an attorney, agent or expert witness, the adjudicative officer shall consider the following:

(1) If the attorney, agent or witness is in private practice, his or her customary fees for similar services, or, if an employee of the applicant, the fully allocated costs of the services;

(2) The prevailing rate for similar services in the community in which the attorney, agent or witness ordinarily performs services;

(3) The time actually spent in the representation of the applicant;

(4) The time reasonably spent in light of the difficulty or complexity of the issues in the proceeding; and

(5) Such other factors as may bear on the value of the services provided.

(d) The reasonable cost of any study, analysis, engineering report, test, project or similar matter prepared on behalf of a party may be awarded, to the extent that the charge for the services does not exceed the prevailing rate for similar services, and the study or other matter was necessary for preparation of applicant's case.

§ 315.107 Rulemaking on maximum rates for attorney fees.

(a) If warranted by an increase in the cost of living or by special circumstances (such as limited availability of attorneys qualified to handle certain types of proceedings), this agency may adopt regulations providing that attorney fees may be awarded at a rate higher than $75 per hour in some or all of the types of proceedings covered by this part. This agency will conduct any rulemaking proceedings for this purpose under the informal rulemaking procedures of the Administrative Procedure Act.

(b) Any person may file with this agency a petition for rulemaking to increase the maximum rate for attorney fees, in accordance with [cross-reference to, or description of, standard agency procedure for rulemaking petitions.] The petition should identify the rate the petitioner believes this agency should establish and the types of proceedings in which the rate should be used. It should also explain fully the reasons why the higher rate is warranted. This agency will respond to the petition within 60 days after it is filed, by initiating a rulemaking proceeding, denying the petition, or taking other appropriate action.

§ 315.108 Awards against other agencies.

If an applicant is entitled to an award because it prevails over another agency of the United States that participates in a proceeding before this agency and takes a position that is not substantially justified, the award or an appropriate portion of the award shall be made against that agency.

§ 315.109 Delegations of authority.

This agency delegates to [identify appropriate agency unit or officer] authority to take final action on matters pertaining to the Equal Access to Justice Act, 5 U.S.C. 504, in actions arising under [list statutes or types of proceedings.] This agency may by order delegate authority to take final action on matters pertaining to the Equal Access to Justice Act in particular cases to other subordinate officials or bodies.

Alt. 315.109: [Contract appeals boards may omit this section.]

Subpart B—Information Required From Applicants

§ 315.201 Contents of application.

(a) An application for an award of fees and expenses under the Act shall identify the applicant and the proceeding for which an award is sought. The application shall show that the applicant has prevailed and identify the position of an agency or agencies that the applicant alleges was not substantially justified. Unless the applicant is an individual, the application shall also state the number of employees of the applicant and describe briefly the type and purpose of its organization or business.

(b) The application shall also include a statement that the applicant's net worth does not exceed $2 million (if an individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if:

(1) It attaches a copy of a ruling by the Internal Revenue Service that it qualifies as an organization described in section 501(c)(3) of the Internal Revenue Code (26 U.S.C. 501(c)(3)) or, in the case of a tax-exempt organization not required to obtain a ruling from the Internal Revenue Service on its exempt status, a statement that describes the basis for the applicant's belief that it qualifies under such section; or

(2) It states that it is a cooperative association as defined in section 15(a) of the Agricultural Marketing Act (12 U.S.C. 1141j(a)).

(c) The application shall state the amount of fees and expenses for which an award is sought.

(d) The application may also include any other matters that the applicant wishes this agency to consider in determining whether and in what amount an award should be made.

(e) The application shall be signed by the applicant or an authorized officer or attorney of the applicant. It shall also contain or be accompanied by a written verification under oath or under penalty of perjury that the information provided in the application is true and correct.

§ 315.202 Net worth exhibit.

(a) Each applicant except a qualified tax-exempt organization or cooperative association must provide with its application a detailed exhibit showing the new worth of the applicant and any affiliates (as defined in § 315.104(f) of this part) when the proceeding was initiated. The exhibit may be in any form convenient to the applicant that provides full disclosure of the applicant's and its affiliates' assets and liabilities and is sufficient to determine whether the applicant qualifies under the standards in this part. The adjudicative officer may require an applicant to file additional information to determine its eligibility for an award.

(b) Ordinarily, the net worth exhibit will be included in the public record of the proceeding. However, an applicant that objects to public disclosure of information in any portion of the exhibit and believes there are legal grounds for withholding it from disclosure may submit that portion of the exhibit directly to the adjudicative offices in a sealed envelope labeled "Confidential Financial Information," accompanied by a motion to withhold the information from public disclosure. The motion shall describe the information sought to be withheld and explain, in detail, why it falls within one or more of the specific exemptions from mandatory disclosure under the Freedom of Information Act, 5 U.S.C. 552(b) (1)–(9), why public disclosure of the information would adversely affect the applicant, and why disclosure is not required in the public interest. The material in question shall be served on counsel representing the agency against which the applicant seeks an award, but need not be served on any other party to the proceeding. If the adjudicative officer finds that the information should not be withheld from disclosure, it shall be placed in the public record of the proceeding. Otherwise, any request to inspect or copy the exhibit shall be disposed of in accordance with this agency's established procedures under the Freedom of Information Act [insert cross reference to agency FOIA rules].

§ 315.203 Documentation of fees and expenses.

The application shall be accompanied by full documentation of the fees and expenses, including the cost of any study, analysis, engineering report, test, project or similar matter, for which an award is sought. A separate itemized statement shall be submitted for each professional firm or individual whose services are covered by the application, showing the hours spent in connection with the proceeding by each individual, a description of the specific services performed, the rates at which each fee has been computed, any expenses for which reimbursement is sought, the total amount claimed, and the total amount paid or payable by the applicant or by any other person or entity for the services provided. The adjudicative officer may require the applicant to provide vouchers, receipts, logs, or other substantiation for any fees or expenses claimed, pursuant to § 315.306 of these rules.

§ 315.204 When an application may be filed.

(a) An application may be filed whenever the applicant has prevailed in the proceeding or in a significant and discrete substantive portion of the proceeding, but in no case later than 30

VOL 51 ISS 87 MY 6 1986 UMI

days after this agency's final disposition of the proceeding.

(b) For purposes of this rule, final disposition means the date on which a decision or order disposing of the merits of the proceeding or any other complete resolution of the proceeding, such as a settlement or voluntary dismissal, become a final and unappealable, both within the agency and to the courts.

(c) If review or reconsideration is sought or taken of a decision as to which an applicant believes it has prevailed, proceedings for the award of fees shall be stayed pending final disposition of the underlying controversy. When the United States appeals the underlying merits of an adversary adjudication to a court, no decision on an application for fees and other expenses in connection with that adversary adjudication shall be made until a final and unreviewable decision is rendered by the court on the appeal or until the underlying merits of the case have been finally determined pursuant to the appeal.

Subpart C—Procedures for Considering Applications

§ 315.301 Filing and service of documents.

Any application for an award or other pleading or document related to an application shall be filed and served on all parties to the proceeding in the same manner as other pleadings in the proceeding, except as provided in § 315.202(b) for confidential financial information.

§ 315.302 Answer to application.

(a) Within 30 days after service of an application, counsel representing the agency against which an award is sought may file an answer to the application. Unless agency counsel requests an extension of time for filing or files a statement of intent to negotiate under paragraph (b) of this section, failure to file an answer within the 30-day period may be treated as a consent to the award requested.

(b) If agency counsel and the applicant believe that the issues in the fee application can be settled, they may jointly file a statement of their intent to negotiate a settlement. The filing of this statement shall extend the time for filing an answer for an additional 30 days, and further extensions may be granted by the adjudicative officer upon request by agency counsel and the applicant.

(c) The answer shall explain in detail any objections to the award requested and identify the facts relied on in support of agency counsel's position. If the answer is based on any alleged facts not already in the record of the proceeding, agency counsel shall include with the answer either supporting affidavits or a request for further proceedings under § 315.306.

§ 315.303 Reply.

Within 15 days after service of an answer, the applicant may file a reply. If the reply is based on any alleged facts not already in the record of the proceeding, the applicant shall include with the reply either supporting affidavits or a request for further proceedings under §315.306.

§ 315.304 Comments by other parties.

Any party to a proceeding other than the applicant and agency counsel may file comments on an application within 30 days after it is served or on an answer within 15 days after it is served. A commenting party may not participate further in proceedings on the application unless the adjudicative officer determines that the public interest requires such participation in order to permit full exploration of matters raised in the comments.

§ 315.305 Settlement.

The application and agency counsel may agree on a proposed settlement of the award before final action on the application, either in connection with a settlement of the underlying proceeding, or after the underlying proceeding has been concluded, in accordance with the agency's standard settlement procedure. If a prevailing party and agency counsel agree on a proposed settlement of an award before an application has been filed, the application shall be filed with the proposed settlement.

§ 315.306 Further proceedings.

(a) Ordinarily, the determination of an award will be made on the basis of the written record. However, on request of either the applicant or agency counsel, or on his or her own initiative, the adjudicative officer may order further proceedings, such as an informal conference, oral argument, additional written submissions or, as to issues other than substantial justification (such as the applicant's eligibility or substantiation of fees and expenses), pertinent discovery or an evidentiary hearing. Such further proceedings shall be held only when necessary for full and fair resolution of the issues arising from the application, and shall be conducted as promptly as possible. Whether or not the position of the agency was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought.

(b) A request that the adjudicative officer order further proceedings under this section shall specifically identify the information sought or the disputed issues and shall explain why the additional proceedings are necessary to resolve the issues.

§ 315.307 Decision.

The adjudicative officer shall issue an initial decision on the application within [to be supplied by the agency] days after completion of proceedings on the application. The decision shall include written findings and conclusions on the applicant's eligibility and status as a prevailing party, and an explanation of the reasons for any difference between the amount requested and the amount awarded. The decision shall also include, if at issue, findings on whether the agency's position was substantially justified, whether the applicant unduly protracted the proceedings, or whether special circumstances make an award unjust. If the applicant has sought an award against more than one agency, the decision shall allocate responsibility for payment of any award made among the agencies, and shall explain the reasons for the allocation made.

Alt. 315.307 [for use by contract appeals boards] The Board shall issue its decision on the application within [to be supplied by the agency] days after completion of proceedings on the application. Whenever possible, the decision shall be made by the same administrative judge or panel that decided the contract appeal for which fees are sought. The decision shall include written findings . . . . [Continue as in 315.307, from the second sentence to the end.]

§ 315.308 Agency review.

Either the applicant or agency counsel may seek review of the initial decision on the fee application, or the agency may decide to review the decision on its own initiative, in accordance with [cross-reference to agency's regular review procedures.] If neither the applicant nor agency counsel seeks review and the agency does not take review on its own initiative, the initial decision on the application shall become a final decision of the agency [30] days after it is issued. Whether to review a decision is a matter within the discretion of the agency. If review is taken, the agency will issue a final decision on the application or remand the application to the adjudicative officer for further proceedings.

Alt. 315.308: (for use by contract appeals board) Reconsideration. Either party may seak reconsideration of the decision on the fee application in accordance with [cross-reference to rule on reconsideration of contract appeals board decisions].

§ 315.309 Judicial review.

Judicial review of final agency decisions on awards may be sought as provided in 5 U.S.C. 504(c)(2).

§ 315.310 Payment of award.

An applicant seeking payment of an award shall submit to the [comptroller or other disbursing official] of the paying agency a copy of the agency's final decision granting the award, accompanied by a certification that the applicant will not seek review of the decision in the United States courts. [Include here address for submissions at specific agency.] The agency will pay the amount awarded to the applicant within 60 days.

Dated: April 28, 1986.

Marshall J. Breger,

Chairman.

BILLING CODE 6110-01-M

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 550

Pay Administration (General)

AGENCY: Office of Personnel Management.

ACTION: Final regulations.

SUMMARY: The Office of Personnel Management (OPM) is revising its regulations on offsetting debts due the United States from the current pay of a Federal employee. These revisions are necessary (1) to make the definition of "agency" reflect the full range of governmental entities authorized to use the provisions of 5 U.S.C. 5514; and (2) to establish a system through which Federal agencies can obtain an official to conduct salary offset hearings when they cannot make adequate arrangements by some other means.

EFFECTIVE DATE: June 5, 1986.

FOR FURTHER INFORMATION CONTACT: Patricia A. Rochester, (202) 632-1285.

SUPPLEMENTARY INFORMATION: These final regulations incorporate two regulations previously published separately. On October 31, 1984, OPM published interim regulations (49 FR 43619) to establish an emergency system so creditor agencies could arrange for a Federal employee to serve as a hearing official for salary offsets. On April 30, 1985, OPM published proposed regulations (50 FR 18287) revising the definition of "agency" and deleting some extraneous material inadvertently included in 5 CFR 550.1106(b)(3). Both regulations provided a 60-day comment period. A summary of the comments received and an explanation of any resulting changes to the regulatory text follows.

1. The Definition of Agency

We received three comments on our proposed regulations—two from Federal agencies and one from a labor organization.

The two agencies recommended changes to the proposed amendment of the definition. Both recommendations were incorporated. The final regulations expand the description of the judicial branch and add a new category for Government entities not directly classifiable in any of the three branches, such as the Smithsonian Institution.

The labor organization questioned whether the scope of 5 U.S.C. 5514 could be extended to include the legislative and judicial branches. The General Accounting Office (GAO) believes that it can and we agree. (See GAO decision B-217402 dated June 10, 1985). The original legislation (Pub. L. 83-497, 68 Stat. 482 (1954)) authorized administrative offset of current pay for erroneous payments made to or on behalf of civilian or military personnel of the Government. No qualifications were mentioned that would have restricted the authority to any particular branch of the Government. It does not appear that either the recodification of title 5 in 1966 (Pub. L. 89-554, 80 Stat. 477) or the subsequent amendments by the Debt Collection Act of 1982 (Pub. L. 97-365, 96 Stat. 1749) made any substantive change in the scope of the original statute.

2. A System for Obtaining Hearing Officers

We received eight comments on the interim regulations—six from Federal agencies and two from labor organizations. The labor organizations did not object to the regulations.

a. *Burden on agency personnel.* Five of the six agencies commented on the potential burden on the debtor's employing agency if a significant number of employees were subjected to a salary offset at the same time. They believe the 60-day turnaround requirement may handicap agencies in performing their own missions.

We appreciate the concern expressed in these comments. We would like to stress, however, that this procedure for obtaining hearing officials applies in the event that "the creditor agency cannot provide a prompt and appropriate hearing before an administrative law judge or before a hearing official furnished pursuant to another lawful arrangement . . . ." [Emphasis added.] Agencies are free to establish a system that will meet their particular needs. These regulations establish an emergency procedure that was never intended to be the sole or primary system for obtaining hearing officials.

b. *Cost and reimbursement.* Four agencies were concerned about reimbursement for costs associated with the hearings. Some agencies believe that a requirement to provide hearing officials must be accompanied by a clear requirement for reimbursement.

Although the final salary offset regulations state that the arrangements for a salary offset hearing official are to be made by the creditor agency, the factors to be considered in determining which party bears the financial responsibility for salary offset hearings may vary from case to case. Therefore, agencies are free to arrive at any mutually satisfactory arrangements consistent with any applicable limitations on the expenditure of their appropriated funds.

c. *Competency of hearing officials and consistency of decisions.* Two agencies noted that the method of selecting hearing officials can affect consistency in the hearings and decisions. One agency believed that specific qualifications criteria provided by OPM would produce consistency in selecting individuals for hearing officials. This would in turn produce some consistency in the quality of hearings given Government-wide. Another agency believed that a plan requiring the creditor agency to obtain a hearing official from the debtor's employing agency would not permit the creditor agency to select specific hearing officers by name. The agency believed that if it could select an individual by name, repeated use of the same individual would permit him or her to become familar with the statutory basis of the debts under review, thus producing consistency in the decisions.

Both creditor and employing agencies should be aware of the importance of reliable and consistent debt collection procedures. However, the salary offset hearing is primarily a fact-finding proceeding. The primary plan established by an agency for requiring hearing officials, should be designed to ensure that each employee obtains a fair hearing and that the Government's

BEST COPY AVAILABLE

VOL 51 ISS 87 MY 6 1986 UMI

interest in collecting the debt is well represented.

d. *Requests for assignments of hearing officials.* Two agencies questioned the method we proposed for contracting Federal agencies to obtain the appointment of a hearing official. These agencies believed that using the officials designated to receive garnishment orders in the appendix to 5 CFR Part 581, might delay getting the request to the appropriate agency contact for appointing hearing officials.

We realize that agency contacts for garnishments may not be the contacts designated to assign available hearing officers. However, because this is an emergency procedure and will not be used routinely, we suggest that agencies keep their garnishment contacts advised of the appropriate hearing officer contact so that a timely referral may be made.

e. *Transmitting confidential material.* One agency commented on the fact that some hearings will require the transfer of confidential material from one agency to another—a matter we do not address in these regulations. We do not believe it is necessary to include this discussion in the regulations. Any necessary guidance will be included in our FPM letter.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because the regulations are on administrative practices that affect only the Federal Government.

List of Subjects in 5 CFR Part 550

Administrative practice and procedures, Government employees, Wages.

U.S. Office of Personnel Management.

Constance Horner,

Director.

Accordingly, OPM is amending 5 CFR Part 550 as follows:

PART 550—PAY ADMINISTRATION (GENERAL)

* * * * *

Subpart K—Collection by Offset From Indebted Government Employee

1. The authority citation for Subpart K of Part 550 continues to read as follows:

Authority: 5 U.S.C. 5514; sec. 6(1), E.O. 11609, 3 CFR, 1971–1975 Comp., 586; redesignated in sec. 2–2, E.O. 12107, 3 CFR, 1978 Comp., 264.

2. In § 550.1103, the definition of "agency" is revised to read as follows:

§ 550.1103 Definitions.

* * * * *

"Agency" means (a) an Executive agency as defined in Section 105 of title 5, United States Code, including the U.S. Postal Service and the U.S. Postal Rate Commission; (b) a military department as defined in Section 102 of title 5, United States Code; (c) an agency or court in the judicial branch, including a court as defined in Section 610 of title 28, United States Code, the District Court for the Northern Mariana Islands, and the Judicial Panel on Multidistrict Litigation; (d) an agency of the legislative branch, including the U.S. Senate and the U.S. House of Representatives; and (e) other independent establishments that are entities of the Federal Government.

* * * * *

§ 550.1106 [Amended]

3. In § 550.1100, paragraph (b)(3) is amended by removing the last three sentences in the paragraph, commencing with the sentence—"Ordinarily, hearings may consist of informal conferences . . . ."

4. A new § 550.1107 is revised to read as follows:

§ 550.1107 Obtaining the services of a hearing official.

(a) When the debtor does not work for the creditor agency and the creditor agency cannot provide a prompt and appropriate hearing before an administrative law judge or before a hearing official furnished pursuant to another lawful arrangement, the creditor agency may contact an agent of the paying agency designated in Appendix A of Part 581 of this chapter to arrange for a hearing official, and the paying agency must then cooperate as provided by 4 CFR 102.1 and provide a hearing official.

(b) When the debtor works for the creditor agency, the creditor agency may contact any agent (of another agency) designated in Appendix A of Part 581 of this chapter to arrange for a hearing official. Agencies must then cooperate as required by 4 CFR 102.1 and provide a hearing official.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 917

[Plum Regs. 17 and 19; Amdt. 3 and 8]

Pears, Plums and Peaches Grown in California; Amendment of Container and Pack Requirements; Amendment of Grade and Size Requirements for Plums

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends container and pack requirements and grade and size requirements for shipments of fresh plums grown in California. These amendments are designed to provide uniformity of sizes of the plums in containers and assure adequate quality of plum pack during the 1986 season.

EFFECTIVE DATE: April 30, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250 (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through the group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 606 handlers will be subject to regulation under the Marketing Order for California pears, peaches, and plums (7 CFR Part 917) during the course of the current season and the great majority of this group may be classified as small entities. While the final rule may impose some costs on affected handlers, and that the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

This final rule is issued under the marketing agreement, as amended, and Marketing Order 917, as amended (7 CFR Part 917), regulating the handling of pears, plums, and peaches grown in California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). Shipment of these California plums are regulated by container and pack under Plum Regulation 17 (7 CFR Part 917.454) and by grade and size under Plum Regulation 19 (7 CFR Part 917.460). Because these regulations do not change substantially from season to season, they are issued on a continuing basis subject to amendment, modification or suspension as may be recommended by the applicable committee and approved by the Secretary.

Notice of the proposed amendment of the respective requirements was published in the Federal Register (51 FR 9827) on March 21, 1986. It invited interested persons to file comments on the proposal through April 7, 1986. No comments were received.

This final rule is based upon the recommendation and information submitted by the Plum Commodity Committee, the information contained in the notice, and other available information.

With respect to container and pack requirements, the final rule allows a size variance between the smallest and largest plums of ⅝ inch for plums 2¼ inch in diameter and larger when packed in volume-filled containers. Previously, the maximum variation permitted was ½ inch (or ⅝ inch) regardless of the diameter of the plums and the type of container. The size variation requirement should allow handlers additional flexibility in packing larger size plums in volume-filled containers, whereas for any size plums packed in tray packs the ⅝ inch size variance continues to apply. In addition, because the ⅝ inch size variance is greater than the ⅝ inch size variance permitted in the standard pack requirements in the United States Standards for Grades of Fresh Plums and Prunes (7 CFR 51.1520 to 51.1538), the requirement that shipments of plums meet all standard pack requirements is deleted. Instead, the final rule lists the specified pack requirements for shipments of plums.

With respect to size requirements, the final rule requires that all plums regulated by size be subject to a two-pound subsample of the smallest plums taken from each eight-pound sample used in checking compliance with size requirements. The volume-filled container is the most frequently used container in the California plum industry (it comprised more than 89 percent of total 1985 shipments). However, the nature of such packs allows for significant diameter variation. The additional two-pound subsample should limit such variation and help assure that the individual plums in each pack are uniformly sized.

Another size requirement change establishes minimum size requirements for three varieties of plums and removes minimum size requirements for six plum varieties. This change brings the variety-specific size regulation established for plums into conformity with a long-standing industry practice of applying such regulation to varieties produced in commercially significant quantities. Shipments of the varieties that are regulated exceeded 10,000 packages per variety during the 1985 season. Shipments of the varieties that have been removed from the variety-specific size regulation fell below 5,000 packages per variety during the season.

A final size requirement change requires all varieties not subject to the variety-specific regulations to be subject to a minimum size requirement. This size requirement will subject these varities of plums to the eight-pound sample and two-pound subsample tests. The eight-pound sample cannot contain more than 130 plums, and the two-pound subsample of the smallest plums in each eight-pound sample cannot contain more than 38 plums. This change should help to improve the size and maturity of the varieties not specifically regulated by size and thereby promote the availability of suitable quality fruit in the interest of producers and consumers.

After considering the recommendations submitted by the Plum Commodity Committee, the information contained in the notice, and other available information, the Department has determined that the action hereinafter set forth tends to effectuate the declared policy of the act and should be issued.

In addition, it is found that it is impracticable, unnecessary, and contrary to the public interest to postpone the effective date of this final rule until 30 days after publication in the Federal Register (5 U.S.C. 553). The harvest and shipment of these plums is expected to begin soon. Hence, this action must be effective promptly to minimize any inequity among producers or handlers due to different requirements for different parts of the 1986 shipping season. Moreover, the provisions in the final rule are the same as those contained in the proposal which was published in the Federal Register on March 21, 1986. Growers and handlers have been preparing to conduct their operations in light of the proposed changes and do not require any additional time for preparation. No useful purpose would be served by delaying the effective date of these actions.

This final rule amends Subpart—Container and Pack Regulation (7 CFR §§ 917.454; 50 FR 39073) by revising § 917.454(a)(1), (a)(2), and (d) and Subpart—Grade and Size Regulation (7 CFR §§ 917.460; 50 FR 27813) by revising § 917.460(a), (b), and (c).

List of Subjects in 7 CFR Part 917

Marketing agreements and orders, Pears, Plums, and Peaches from California.

1. The authority citation for 7 CFR Part 917 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

2. Section 917.454(a)(1), (a)(2), and (d) is revised to read as follows:

Subpart—Container and Pack Regulation

§ 917.454 Plum Regulation 17.

(a) * * *

(1) Such plums, when shipped in closed packages or containers, except master containers of consumer packages and individual consumer packages therein, shall meet the following pack requirements as set forth below.

(i) All packages shall be tightly packed or well filled, according to the approved and recognized methods.

(ii) The plums in the top layer of any package shall be reasonably representative in quality and size of those in the remainder of the package.

(iii) Four-basket crates shall not be more than three layers deep. The arrangement of the bottom layer shall be one row less one way, and may be one row less each way than the arrangement of the top layer; the arrangement of the middle layer may be the same as the top layer, or may be one row less one way than the arrangement of the top layer. In the 3½—4x5 and 3½—4x4 packs the face of each half of the crate shall be packed as a unit, with no shim between the two baskets.

(2) The diameter of the smallest and largest plums in any individual pack or container shall not vary more than one-fourth (¼) inch, except that plums which

VOL 51 ISS 87 MY 6 1986 UMI

are placed in volume-fill or tight-fill type containers and have a diameter of two and one-fourth (2¼) inches or larger shall not vary more than three-eighths (⅜) inch. A total of not more than five (5) percent, by count, of the plums in any package or container may fail to meet this requirement.

* * * * *

(d) When used herein "diameter" shall have the same meaning as set forth in the U.S. Standards for Grades of Fresh Plums and Prunes (7 CFR 51.1520 to 51.1538) and all other terms shall have the same meaning as when used in the amended marketing agreement and order. "No. 12B standard fruit box" measures 2⅝ to 7⅛ x 11½ x 16½ inches, "No. 22D standard lug box" measures 2⅞ to 7⅛ x 13¼ x 16⅝ inches, "No. 22G standard lug box" measures 7⅝ to 7⅛ x 13¼ x 15⅝ inches. All dimensions are given in depth (inside dimensions) by width by length (outside dimensions).

3. Section 917.460 is revised to read as follows:

§ 917.460 Plum Regulation 18.

(a) No handler shall ship any lot of packages or containers of any plums unless such plums grade at least U.S. No. 1, except that maturity shall be determined by the application of color standards by variety or such other tests as determined to be proper by the Federal or Federal-State Inspection Service. Internal discoloration not considered serious damage and healed growth cracks emanating from the stem end which do not cause serious damage shall be permitted. In addition to the above, any lot of Tragedy or Kelsey plums shall be permitted an additional 10 percent tolerance for defects not considered serious damage.

(b) No handler shall ship any package or other container of any variety of plums listed in Column A of the following Table I unless such plums are of a size that an eight-pound sample, representative of the sizes of the plums in the package or container, contains not more than the number of plums listed for the variety in Column B of said table, and that a two pound subsample of the smallest plums in each eight-pound sample contains not more than the number of plums listed for the variety in Column C of said table.

(c) No handler shall ship any package or container of any variety of plums not specifically named in paragraph (b) of this section, unless such plums are of a size that an eight-pound sample representative of the sizes of the plums in the package or container contains not more than 139 plums, and that a two-pound subsample of the smallest plums in each eight-pound sample contains not more than 36 plums.

(d) As used herein, "U.S. No. 1" and "serious damage" mean the same as defined in the United States Standards for Grades of Fresh Plums and Prunes (7 CFR 51.1529 through 51.1538).

Dated: April 30, 1986.

Joseph A. Gribbin,

Director, Fruit and Vegetable Division.

[FR Doc. 86-10071 Filed 5-5-86; 8:45 am]

BILLING CODE 3410-02-M

FEDERAL RESERVE SYSTEM

12 CFR Part 201

[Regulation A]

Extensions of Credit by Federal Reserve Banks; Changes in Discount Rates

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors has amended its Regulation A, "Extensions of Credit by Federal Reserve Banks," for the purpose of reducing discount rates. The discount rate action was taken in the context of similar action by other important industrial countries and sizable declines in most market interest rates in recent weeks. More broadly, growth in the various monetary aggregates has been more limited this year, prospects for sustaining impoved price performance and continuing restraint on costs have been further enhanced by the recent sharp declines in oil prices, and the economic expansion appears to be proceeding within the nation's growth potential.

EFFECTIVE DATES: The changes were effective on the dates specified below.

FOR FURTHER INFORMATION CONTACT: William W. Wiles, Secretary of the Board (202/452-3257), or Earnestine Hill or Dorothea Thompson, Telecommunications Device for the Deaf (TDD) (202/452-3544), Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of sections 10(b), 13, 14, 19, et al., of the Federal Reserve Act, the Board has amended its Regulation A to incorporate changes in discount rates on Reserve Bank extensions of credit. Further, under the authority of 5 U.S.C. 553(b)(3)(B) and (d)(3), these amendments are being published without prior general notice of proposed rulemaking, public participation, or deferred effective date. The Board has for good cause found that current economic and financial considerations require that these amendments be adopted immediately.

List of Subjects in 12 CFR Part 201

Banks, banking; Credit; Federal Reserve System.

For the reasons outlined above, the Board of Governors amends Part 201 as set forth below:

1. The authority citation for 12 CFR Part 201 is revised to read as follows:

Authority: Secs. 10(a), 10(b), 13, 13a, 14(d) and 19 of the Federal Reserve Act (12 U.S.C. 347a, 347b, 343 et seq., 347c, 348 et seq., 357, 374, 374a, and 461); and sec. 7(b) of the International Bank Act of 1978 (12 U.S.C. 347d), unless otherwise noted.

2. Section 201.51 is revised to read as follows:

§ 201.51 Short-term adjustment credit for depository institutions.

The rates for short-term adjustment credit provided to depository institutions under § 201.3(a) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	6½	Apr. 21, 1986.
New York	6½	Do.
Philadelphia	6½	Apr. 23, 1986.
Cleveland	6½	Apr. 21, 1986.
Richmond	6½	Do.
Atlanta	6½	Apr. 22, 1986.
Chicago	6½	Apr. 21, 1986.
St. Louis	6½	Apr. 22, 1986.
Minneapolis	6½	Apr. 21, 1986.
Kansas City	6½	Do.
Dallas	6½	Do.
San Francisco	6½	Do.

3. Section 201.52 is revised to read as follows:

§ 201.52 Extended credit for depository institutions.

(a) *Seasonal credit.* The rates for regular seasonal credit extended to depository institutions under § 201.3(b)(1) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	6½	Apr. 21, 1986.
New York	6½	Do.
Philadelphia	6½	Apr. 23, 1986.
Cleveland	6½	Apr. 21, 1986.
Richmond	6½	Do.
Atlanta	6½	Apr. 22, 1986.
Chicago	6½	Apr. 21, 1986.
St. Louis	6½	Apr. 22, 1986.
Minneapolis	6½	Apr. 21, 1986.
Kansas City	6½	Do.
Dallas	6½	Do.
San Francisco	6½	Do.

(b) *Temporary seasonal credit program.* At the option of the borrower, interest on credit advanced under the temporary simplified seasonal credit program as revised on February 18, 1986, can be either at the basic discount rate (see § 201.51) or at a rate that is one-half percentage point above the basic rate and that will remain fixed during the time the credit is outstanding. The fixed rate for new loans may be changed as the basic discount rate and extended credit rates are changed. In no case should such borrowing, including renewals, be outstanding beyond February 1987.

(c) *Other extended credit.* The rates for other extended credit provided to depository institutions under sustained liquidity pressures or where there are exceptional circumstances or practices involving a particular institution under § 201.3(b)(2) of Regulation A are:

Federal Reserve Bank	Rate	Effective
Boston	6½	Apr. 21, 1986.
New York	6½	Do.
Philadelphia	6½	Apr. 23, 1986.
Cleveland	6½	Apr. 21, 1986.
Richmond	6½	Do.
Atlanta	6½	Apr. 22, 1986.
Chicago	6½	Apr. 21, 1986.
St. Louis	6½	Apr. 22, 1986.
Minneapolis	6½	Apr. 21, 1986.
Kansas City	6½	Do.
Dallas	6½	Do.
San Francisco	6½	Do.

These rates apply for the first 60 days of borrowing. A one percentage point surcharge applies for borrowing during the next 90 days, and a two percentage point surcharge applies for borrowing thereafter. Where credit provided to a particular depository institution is anticipated to be outstanding for an unusually prolonged period and in relatively large amounts, the time period in which each rate under the structure is applied may be shortened, and the rate may be established on a more flexible basis, taking into account rates on market sources of funds.

By order of the Board of Governors of the Federal Reserve System, April 29, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86-ASO-12]

Alteration of Certain Control Zones and Transition Areas in Florida and Georgia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment updates the names and geographical coordinates of various airports which have been changed but which have not yet been included in the individual airport control zone and/or transition area descriptions. No significant change in airspace designation will result from this action.

DATES: Effective date: 0901 UTC, July 3, 1986.

Comments must be received on or before June 15, 1986.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, ASO-530, Manager, Airspace and Procedures Branch, Docket No. 86-ASO-12, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves editorial corrections to certain control zones and transition areas, and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to correctly list the names and geographical coordinates of airports specified in certain airspace designations. Various political bodies have officially changed the names of certain airports and past airport alterations have resulted in changes in geographical coordinates. It, therefore, is necessary to alter the control zone and transition area descriptions to reflect these changes. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in FAA Handbook 7400.6B dated January 2, 1986.

Under the circumstances presented, the FAA concludes that there is a need

VOL 51 ISS 87 MY 6 1986 UMI

to alter the various control zone and transition area descriptions to reflect the changes in airport names and geographical coordinates. The changes are so minor and nonsubstantive I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Control zone, Transition area.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Public Law 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.171 is amended as follows:

Titusville, FL—[Amended]

By removing the words "Titusville-Cocoa Airport (lat. 28°30'45" N., long. 80°45'11" W.);" and replacing them with the words "Space Center Executive Airport (lat. 28°30'49" N., long. 80°47'50" W.);".

Valdosta Municipal Airport, GA—[Amended]

By removing the word "Municipal" from the title and replacing it with the word "Regional" and by removing from the description the following words "Valdosta Municipal Airport (lat. 30°46'56" N., long. 83°16'44" W.);" and replacing them with the words "Valdosta Regional Airport (lat. 30°46'56" N., long. 83°16'37" W.).".

3. Section 71.181 is amended as follows:

Marathon, FL—[Amended]

By removing the words "Flight Strip" and replacing them with the word "Airport".

Titusville, FL—[Amended]

By removing the words "Titusville-Cocoa Airport (lat. 28°30'45" N., long. 80°45'11" W.);" and replacing them with the words "Space Center Executive Airport (lat. 28°30'49" N., long. 80°47'50" W.);".

Valdosta, GA—[Amended]

By removing the words "Valdosta Municipal Airport (lat. 30°46'56" N., long. 83°16'44" W.);" and replacing them with the words "Valdosta Regional Airport (lat. 30°46'56" N., long. 80°16'37" W.);".

Issued in East Point, Georgia, on April 15, 1986.

James L. Wright,

Acting Manager, Air Traffic Division, Southern Region.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 376

[Docket No. 60460-6060]

Information Collection Control Numbers

AGENCY: Export Administration, Commerce.

ACTION: Final rule; notice of OMB approval.

SUMMARY: The Export Administration Regulations (EAR) contain provisions relating to the licensing for export or reexport of numerical control units, numerically controlled machine tools, and dimensional inspection machines. The final rule containing these provisions was published in the Federal Register on September 11, 1985 (50 FR 37112) and became effective on October 23, 1985. This document adds the Office of Management and Budget (OMB) control number 0625-0152 to the information collection requirements of the rule.

DATE: The regulation became effective on October 23, 1985.

FOR FURTHER INFORMATION CONTACT: Richard Usrey, Regulations Branch, Export Administration, Telephone (202) 377-4479.

SUPPLEMENTARY INFORMATION: OMB control number 0625-0152.

As required by the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., Export Administration submitted this regulation on reporting of certain information for export or reexport of numerical control units, numerically controlled machine tools, and dimensional inspection machines, to proscribed destinations. As stated in the final rule, the approval of this reporting requirement was pending with OMB. On October 23, 1985, OMB approved this collection of information and assigned control number 0625-0152.

List of Subjects in 15 CFR Part 376

Exports.

Accordingly, Part 376 of the Export Administration Regulations (15 CFR Parts 368-399) is amended as follows:

1. The authority for 15 CFR Part 376 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; and E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985).

2. OMB control number 0625-0152 is added to the end of § 376.11 to read as follows:

§ 376.11 Numerical control units, numerically controlled machine tools, dimensional inspection machines, direct numerical control systems, specially designed assemblies, and specially designed software.

* * * * *

(Approved by the Office of Management and Budget under control number 0625-0152)

Dated: April 30, 1986.

Walter J. Olson,

Deputy Assistant Secretary for Export Administration.

Food and Drug Administration

21 CFR Parts 74, 81, and 82

[Docket Nos. 84N-0319 and 76N-0366]

FD&C Yellow No. 5 and its Lakes; Postponement of Closing Date, Provisional Listing, and Continued Stay of Effectiveness

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of FD&C Yellow No. 5 for use in coloring cosmetics generally and externally applied drugs and of its lakes for use in coloring food and ingested drugs. FDA is establishing a new closing date for FD&C Yellow No. 5 to give the agency time to complete its evaluation of the objections that it received in response to the final rule on the use of FD&C Yellow No. 5 that FDA published in the Federal Register of September 4, 1985 (50 FR 35774). The regulations that permanently list FD&C Yellow No. 5 and that remove it from the provisional list are stayed until July 7, 1986.

DATES: Effective May 6, 1986, the new closing date for FD&C Yellow No. 5 will be July 7, 1986. The effective date of the final rule published September 4, 1985, is stayed pending final FDA action on the objections that it received.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Center for Food Safety and Applied Nutrition (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: FDA established the current closing date of May 6, 1986, for the provisional listing of FD&C Yellow No. 5 in a regulation published in the Federal Register of March 7, 1986 (51 FR 7933). The agency established the May 6, 1986, closing date for FD&C Yellow No. 5 to provide time for its evaluation of three objections to the final rule on the use of this color additive, which FDA published on September 4, 1985.

Previously, after review and evaluation of the data relevant to the petition to list FD&C Yellow No. 5 for use in externally applied drugs and in cosmetics generally, the agency had concluded that FD&C Yellow No. 5 is safe for these uses. Therefore, FDA issued a final rule in the Federal Register of September 4, 1985 (50 FR 35774), that would permanently list FD&C Yellow No. 5 for those uses and would remove the stay on the use of FD&C Yellow No. 5 in external cosmetics. FDA stated that the final rule would become effective on October 7, 1985, unless stayed by the filing of proper objections.

FDA received three letters stating objections to this final rule. Because of the objections, under section 701(e)(2) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 371(e)(2)], the effect of this final rule is stayed until the agency can rule upon the objections. FDA expects that it will need only a small amount of additional time to complete its evaluation of the objections. Therefore, FDA concludes that only a brief postponement is necessary at this time. The regulation set forth below will postpone the May 6, 1986, closing date for the provisional listing of FD&C Yellow No. 5 until July 7, 1986.

Because the current closing date expires on May 6, 1986, FDA has concluded that the use of notice and public procedure on this regulation is impracticable. Thus, good cause exists for issuing the postponement as a final rule. Moreover, this action is consistent with the protection of the public health because the agency has previously concluded that FD&C Yellow No. 5 is safe for its intended use under the Color Additive Amendments of 1960. This regulation will permit the uninterrupted use of the color additive until July 7, 1986. To prevent any interruption in the provisional listing of FD&C Yellow No. 5 and in accordance with 5 U.S.C. 553(d)(1) and (3), this regulation is being made effective on May 6, 1986. Any person who wishes to comment on the regulation may do so in accordance with 21 CFR 10.40(e)(1).

List of Subjects

21 CFR Part 74

Color additives, Cosmetics, Drugs, Medical devices.

21 CFR Part 81

Color additives, Cosmetics, Drugs.

21 CFR Part 82

Color additives, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, Parts 74, 81, and 82 are amended as follows:

PART 74—LISTING OF COLOR ADDITIVES SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 74 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055-1056 as amended, 74 Stat. 399-407 as amended (21 U.S.C. 371, 376); 21 CFR 5.10.

§ 74.1705 [Stayed]

2. The modifications of § 74.1705 *FD&C Yellow No. 5* included in the September 4, 1985, final rule continue to be stayed.

§ 74.2705 [Stayed]

3. Section 74.2705 *FD&C Yellow No. 5* continues to be stayed.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

4. The authority citation for 21 CFR Part 81 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055-1056 as amended, 74 Stat. 399-407 as amended (21 U.S.C. 371, 376); Title II, Pub. L. 96-618; sec. 203, 74 Stat. 404-407 (21 U.S.C. 376, note); 21 CFR 5.10.

§ 81.1 [Amended]

5. Section 81.1 *Provisional list of color additives* is amended in paragraph (a) by revising the closing date for "FD&C Yellow No. 5" to read "July 7, 1986."

§ 81.27 [Amended]

6. Section 81.27 *Conditions of provisional listing* is amended in paragraph (d) by revising the closing date for "FD&C Yellow No. 5" to read "July 7, 1986."

PART 82—LISTING OF CERTIFIED PROVISIONALLY LISTED COLORS AND SPECIFICATIONS

7. The authority citation for 21 CFR Part 82 continues to read as follows:

Authority: Secs. 701, 706, 52 Stat. 1055-1056 as amended, 74 Stat. 399-407 as amended (21 U.S.C. 371, 376); 21 CFR 5.10.

§ 82.705 [Stayed]

8. The modifications of § 82.705 *FD&C Yellow No. 5* included in the September 4, 1985 final rule continue to be stayed.

Dated: April 25, 1986.

Joseph P. Hile,

Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

21 CFR Part 558

New Animal Drugs For Use in Animal Feeds; Oxytetracycline With Monensin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Pfizer, Inc., providing for safe and effective use of certain Type C broiler feeds made by combining separately approved oxytetracycline and monensin Type A articles. The Type C broiler feed is used as an aid in the reduction of mortality due to air-sacculitis (air-sac infection) caused by *E. coli* sensitive to oxytetracycline, and as an aid in the prevention of coccidiosis caused by *E. necatrix, E. tenella, E. acervulina, E. brunetti, E. mivati,* and *E. maxima.*

EFFECTIVE DATE: May 6, 1986.

FOR FURTHER INFORMATION CONTACT: Adriano R. Gabuten, Center for Veterinary Medicine (HFV-135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4913.

SUPPLEMENTARY INFORMATION: Pfizer, Inc., 235 East 42d Street, New York, NY 10017, has filed a supplement of NADA 99-006 providing for combining separately approved oxytetracycline and monensin Type A articles to make Type C broiler feeds containing 500

VOL 51 ISS 87 MY 6 1986 UMI

grams of oxytetracycline and 90 to 110 grams of monensin per ton as an aid in the reduction of mortality due to air-sacculitis (air-sac infection) caused by *Escherichia coli* sensitive to oxytetracycline, and as an aid in the prevention of coccidiosis caused by *Eimeria necatrix, E. tenella, E. acervulina, E. brunetti, E. mivati,* and *E. maxima.* Based on the data and information submitted, the supplement is approved and the regulations are amended accordingly. The basis of approval is discussed in the freedom of information summary.

In addition, the regulations in 21 CFR 558.450 for use of oxytetracycline (200 grams per ton) with monensin (90 to 110 grams per ton) and for oxytetracycline (500 grams per ton) had been approved for the mono-alkyl (C_8–C_{18}) trimethylammonium salt. The regulations had inadvertently failed to identify the approved salt. The regulations are further amended to specify the approved oxytetracycline salt.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Room 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(ii) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs; Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. Section 558.355 is amended by adding new paragraphs (b)(12) and (f)(1)(xxii) to read as follows:

§ 558.355 Monensin.

* * * * *

(b) * * *

(12) To 000069: paragraph (f)(1)(xxii) of this section.

* * * * *

(f) * * *

(1) * * *

(xxii) *Amount per ton.* Monensin, 90 to 110 grams plus oxytetracycline, 500 grams.

(*a*) *Indications for use.* As an aid in the prevention of coccidiosis caused by *Eimeria necatrix, E. tenella, E. acervulina, E. brunetti, E. Mivati,* and *E. maxima;* as an aid in the reduction of mortality due to air-sacculities (air-sac infection) caused by *Escherichia coli* sensitive to oxytetracycline.

(*b*) *Limitations.* Feed for 5 days as sole ration. Do not feed to laying chickens. Withdraw 24 hours before slaughter. As monensin sodium provided by No. 000986 in § 510.600(c) of this chapter. As mono-alkyl (C_8-C_{18}) trimethylammonium oxytetracycline provided by No. 000069 in § 510.600(c) of this chapter.

* * * * *

3. Section 558.450 is amended in paragraph (d)(1), Table 1, in item (iv) by adding an additional limitation for oxytetracycline with monensin and in item (v) by adding an additional limitation and a new entry; and in paragraph (d)(2) by adding (ii) [Reserved] to read as follows:

§ 558.450 Oxytetracycline.

* * * * *

(d) * * *

(1) * * *

BILLING CODE 4160–01–M

DEPARTMENT OF JUSTICE

28 CFR Part 16

[Order No. 1134–86]

Fees for the Federal Bureau of Investigation Identification Record

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: Final rule.

SUMMARY: This final rule permits the FBI Identification Division to increase the fee for the production of identification records to the subjects of such records set forth in § 16.33 of Title 28 of the Code of Federal Regulations (CFR). It also revises certain sections to reflect the FBI Identification Division's new nine-digit ZIP Code.

EFFECTIVE DATE: May 1, 1986.

FOR FURTHER INFORMATION CONTACT: Melvin D. Mercer, Jr., Chief of the Recording and Posting Sections, Identification Division, FBI, Washington, D.C. 20537–9700, telephone number (202) 324–5454.

SUPPLEMENTARY INFORMATION: A proposed rule to increase the fee for the production of identification records to the subjects of such records was published in the **Federal Register** on February 6, 1986 (51 FR 4614, 4615). Interested persons were allowed 30 days to submit comments on the proposal. No comments were received.

Departmental Order 556–73 (38 FR 32806, November 28, 1973) directed that the FBI publish rules for the dissemination of arrest and conviction records upon request. This order resulted from a determination that section 534 of Title 28 of the United States Code (U.S.C.) does not prohibit the subjects of arrest and conviction records from having access to those records. In accordance with the Attorney General's order, the FBI will release to the subjects of identification records copies of such records upon submission of a written request, a set of rolled-inked fingerprint impressions and the appropriate processing fee. Based on current cost analysis, the cost for production of an FBI identification record has increased from $11.00 to $14.00.

This final rule also revises the five-digit ZIP Code appearing in 28 CFR 16.32 and 16.34 to reflect the FBI Identification Division's new nine-digit ZIP Code, 20537–9700.

List of Subjects in 28 CFR Part 16

Archives and records, Freedom of Information, Privacy, Sunshine Act.

PART 16—[AMENDED]

By virtue of the authority vested in me as Attorney General, including 28 U.S.C. 509, 510, and 5 U.S.C. 301, Part 16, Subpart C of Title 28 of the CFR is amended as follows:

1. The authority citation for Part 16 is revised to read as follows:

Authority: 5 U.S.C. 301, 552, 552a, 552b(g), 553; 18 U.S.C. 4203(a)(1); 28 U.S.C. 509, 510; 28 U.S.C. 534; 31 U.S.C. 9701.

2. All other authority citations are removed from this Part.

3. Section 16.32 is revised to read as follows:

§ 16.32 Procedure to obtain an identification record.

The subject of an identification record may obtain a copy thereof by submitting a written request via the U.S. mails directly to the FBI, Identification Division, Washington, D.C. 20537–9700, or may present his/her written request in person during regular business hours to the FBI Identification Division, Room 11262, J. Edgar Hoover F.B.I. Building, Tenth Street and Pennsylvania Avenue, NW., Washington, D.C. Such request must be accompanied by satisfactory proof of identity, which shall consist of name, date and place of birth and a set of rolled-inked fingerprint impressions placed upon fingerprint cards or forms commonly utilized for applicant or law enforcement purposes by law enforcement agencies.

4. Section 16.33 is revised to read as follows:

§ 16.33 Fee for production of identification record.

Each written request for production of an identification record must be accompanied by a fee of $14.00 in the form of a certified check or money order, payable to the Treasury of the United States. This fee is established pursuant to the provisions of 31 U.S.C. 9701 and is based upon the clerical time beyond the first quarter hour to be spent in searching for, identifying, and reproducing each identification record requested as specified in § 16.10 of this part. Any request for waiver of the fee shall accompany the original request for the identification record and shall include a claim and proof of indigency.

5. Section 16.34 is revised to read as follows:

§ 16.34 Procedure to obtain change, correction or updating of identification records.

If, after reviewing his/her identification record, the subject thereof believes that it is incorrect or incomplete in any respect and wishes changes, corrections or updating of the alleged deficiency, he/she should make application directly to the agency which contributed the questioned information. The subject of a record may also direct his/her challenge as to the accuracy or completeness of any entry on his/her record to the Assistant Director of the FBI Identification Division, Washington, D.C. 20537–9700. The FBI will then forward the challenge to the agency which submitted the data requesting that agency to verify or correct the challenged entry. Upon the receipt of an official communication directly from the agency which contributed the original information, the FBI Identification Division will make any changes necessary in accordance with the information supplied by that agency.

Dated: April 29, 1986.

Edwin Meese III,

Attorney General.

BILLING CODE 1505–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 935

Approval of Permanent Program Amendments for the State of Ohio, Under the Surface Mining Control Land Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval, with certain exceptions, of certain amendments to the Ohio permanent regulatory program (hereinafter referred to as the Ohio program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

By a letter dated January 15, 1986, the Ohio Department of Natural Resources (ODNR) submitted amendments to the rules of procedures for the Reclamation Board of Review (RBR, the Board). OSMRE published a notice in the **Federal Register** on February 26, 1986, inviting public comment on the adequacy of the proposed amendments (51 FR 6752).

By a letter dated March 7, 1986, ODNR resubmitted the RBR rules as they were promulgated as final rules. The final RBR rules contained some differences from the rules announced in the February 26 **Federal Register** and from the proposed RBR rules approved by OSMRE on May 23, 1985 and September 18, 1985 (50 FR 21258, 50 FR 37848). As a result, OSMRE reopened and extended the public comment period on April 1, 1986 (51 FR 11055).

After providing an opportunity for public comment and conducting a thorough review of the program amendments, the Director of OSMRE has determined that all but one of the amendments meet the requirements of SMCRA and the Federal regulations. Accordingly, the Director is approving these program amendments and requiring the ODNR to amend the one rule. The Federal rules at 30 CFR Part 935 which codify decisions on the Ohio program are being amended to implement this decision.

VOL 51 ISS 87 MY 6 1986 UMI

This final rule is being made effective immediately to expedite the State program amendment process and encourage States to bring their programs into conformity with the Federal standards without delay. Consistency of State and Federal standards is required by SMCRA.

EFFECTIVE DATE: May 6, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Nina Rose Hatfield, Director, Columbus Field Office, Office of Surface Mining Reclamation and Enforcement, Room 202, 2242 Hamilton Road, Columbus, Ohio 43232; Telephone: (614) 866-0578.

SUPPLEMENTARY INFORMATION:

I. Background

The Ohio program was approved effective August 16, 1982, by the notice published in the August 10, 1982 Federal Register. Information pertinent to the general background, revisions, modifications, and amendments to the Ohio program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Ohio program can be found in the August 10, 1982 Federal Register (47 FR 34688). Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 935.11 and 935.15.

II. Discussion of Amendments

By letter dated January 15, 1986, the Ohio Department of Natural Resources submitted proposed amendments to the Reclamation Board of Review rules at 1513-3-01, 1513-3-02, 1513-3-03, 1513-3-04, 1513-3-16, 1513-3-17, and 1513-3-21. The proposed amendments consist of the following:

(1) Revisions to 1513-3-01 *Definitions*, "burden of pursuasion" and "proffer";

(2) Revision to 1513-3-02 *Internal regulations*, rules for a quorum, deciding tie votes, keeping records of the RBR's actions, issuance of subpoenas, and governing proceedings following amendment of the RBR's rules;

(3) Revisions to 1513-3-03 *Appearance and practice before the board*, concerning ethical standards of persons appearing before the board and representation before the RBR;

(4) Revisions to 1513-3-04 *Appeals to the RBR*, concerning identification of counsel, if counsel is used, contents of an appeal, and grounds for dismissing an appeal;

(5) Revisions to 1513-3-16 *Conduct of evidentiary hearings*, rules concerning evidence, stipulation, written testimony, witnesses, post-hearing briefs, and additional oral arguments;

(6) Revisions to 1513-3-17 *Voluntary dismissal and settlement* setting forth rules for a settlement prior to a final order by the RBR; and

(7) Revisions to 1513-3-21 *Award of costs and expenses*.

On February 28, 1986, OSMRE published an announcement of the receipt of the amendments and inviting public comment on the adequacy of the proposed amendments (51 FR 6752). The notice stated that a public hearing would be held only if requested. Since there were no requests for hearing, a hearing was not held. The comment period closed on March 28, 1986.

During the comment period, the State resubmitted to OSMRE a set of the RBR rules as they were promulgated in final form (by letter dated March 7, 1986). These final rules contained some differences from the RBR rules dated January 15, 1986, and announced in the Federal Register on February 28, 1986, and the proposed RBR rules previously approved by OSMRE on May 23, 1985, and September 18, 1985 (50 FR 21256, 50 FR 37846). Accordingly, OSMRE reopened and extended the comment period to allow consideration of the final version of the RBR rules. The reopening was announced in the Federal Register on April 1, 1986 (51 FR 11065). The comment period closed on April 16, 1986. No comments were received.

III. Director's Findings

The Director finds, in accordance with SMCRA and 30 CFR 732.17 and 732.15, that the program amendments submitted by Ohio on January 15, 1986, and resubmitted on March 7, 1986, meet the requirements of SMCRA and 30 CFR Chapter VII, with one exception as discussed below.

Ohio has previously submitted its RBR regulations to OSMRE for approval. The regulations were approved by OSMRE before they were promulgated by ODNR in final form in the May 23, and September 18, 1985 Federal Register (50 FR 21256, 50 FR 37846). The revisions submitted to OSMRE on January 15, 1986, are incorporated into the final rules submitted on March 7, 1986 with the exception of 1513-3-21 which now contains language which the Director finds less effective than the Federal regulations.

Ohio Administrative Code Regulation—Reclamation Board of Review Rules of Procedure

1513-3-01—Definitions. Ohio has added a definition of "burden of persuasion". It is defined as proof by a preponderance of evidence. The definition of "proffer" was amended to include the offer or tender of "testimony or documents or other tangible objects" into evidence. The Director finds the definitions to be in accordance with the requirements of SMCRA and no less effective than the Federal regulations at 43 CFR Part 4.

1513-3-02—Internal regulations. Ohio has amended this section to set forth the procedures for obtaining concurrence on Board decisions if at least four Board members do not concur. It further sets forth procedures for deciding a tied vote. It also establishes that the papers and files of the Board may not be removed from the secretary's custody without the secretary's consent; the records and files of the Board are available for inspection during regular business hours; Board proceedings shall be recorded by audio electronic devices and other means if requested, and proceedings transcripts will be available for reproduction. Section (I) establishes the procedures used for the issuance of subpoenas and section (K) states how Board proceedings will be handled following amendment of any RBR rules. The RBR regulations are in accordance with SMCRA and no less effective than the Federal regulations at 43 CFR Part 4.

1513-3-03—Appearance and practice before the Board. This amendment requires all persons appearing before the Board to conform to the standards of ethical conduct required in appearances before the State courts. The Board may bar participation in a particular proceeding for good cause. The rule also sets forth who may represent whom in the absence of an attorney. The Director finds the amendment to be in accordance with SMCRA and no less effective than the Federal regulations at 43 CFR Part 4.

1513-3-04—Appeals to the RBR. This regulation requires an appellant to supply the name, address and telephone number of his/her counsel, if used, in an appeal. The regulation also adds to the information that the appellant must supply if a review is sought. Specifically, the appellant must identify the manner in which he/she is aggrieved and the relief sought. Finally, the regulation states that failure to comply with the provisions of 1513.13 of the Revised Code is grounds for dismissing the appeal and confirming the action of the Board or Chief of the Division of Reclamation. The Director finds the amendment to be in accordance with SMCRA and no less effective than Federal regulations at 43 CFR Part 4.

1513-3-16—Conduct of evidentiary hearings. This regulation contains minor editorial changes; it also allows objections to evidence and cross-examinations with a brief statement of the grounds for the objection and allows the record to include argument on the objection. The regulation also establishes that an exception at any stage of the hearing is unnecessary to lay a foundation for review whenever a matter has been called to the attention of the Board. The regulation sets forth the manner and circumstances in which a proffer may be made. The regulation specifies that public documents entered as part of the record must be held by the Board. If the documents are necessary for the Chief, Division of Reclamation to use in preparing the case, the Chief may keep the documents pending recall by the Board. The regulation states that stipulations concerning issues of facts or authenticity of documents before the Board must have concurrences from all of the parties to an appeal. A new section has been added that sets forth the procedures for the use of written testimony and adds procedures for the use of witnesses and the issues on which the Board may request post hearing briefs. The regulation also allows the Board to order additional oral arguments. The Director finds the amendment to be in accordance with SMCRA and no less effective than 43 CFR Part 4.

1513-3-17—Voluntary dismissal and settlement. A new section has been added to allow a settlement prior to a final order if all parties agree. The terms of the settlement must be submitted to the Board for final action. The Director finds the amendment to be in accordance with SMCRA and no less effective than 30 CFR Part 4.

1513-3-21—Award of costs and expenses. This regulation allows the award of costs and expenses to a permittee from any person or the State if the permittee participates in any proceeding under Chapter 1513 of the Revised Code upon a finding that the permittee made a substantial contribution to a full and fair determination of the issues. It also allows the award of costs and expenses to the State upon a finding that it made a substantial contribution to a full and fair determination of the issues. This is less effective than the Federal regulations at 43 CFR 4.1294. The Federal regulations establish a different more stringent test for the awarding of costs and expenses to permittees and the State. The higher standard set forth in 43 CFR 4.1294 allows the awarding of costs or expenses only if the permittee or State can prove that the proceeding was initiated in bad faith for the purpose of harassing or embarrassing the permittee or State. The Director finds that OAC 1513-3-21 is less effective than 43 CFR 4.1294, and he is not approving it.

IV. Public Comments

No public comments were received.

V. Director's Decision

The Director, based on the above findings, is approving the RBR final rules of procedures as submitted to OSMRE on March 7, 1986, with the exception of OAC 1513-3-21. The Director is amending Part 935 of 30 CFR Chapter VII to reflect approval of the State program amendments, except OAC 1513-3-21 which he is not approving. Part 935 will also be amended to require an amendment to OAC 1513-3-21.

VI. Procedural Matters

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

List of Subjects in 30 CFR Part 935

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Dated: April 30, 1986.

Brent Wahlquist,

Acting Deputy Director, Operations and Technical Services, Office of Surface Mining Reclamation and Enforcement.

PART 935—OHIO

30 CFR Part 935 is amended as follows:

1. The authority citation for Part 935 continues to read as follows:

Authority: Pub. L. 95-87, Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.).

2. 30 CFR Part 935, is being amended to add a new § 935.12 to read as follows:

§ 935.12 State program provisions disapproved.

The following provision of the Ohio permanent regulatory program submission is hereby disapproved:

(a) Section 1513-3-21 of the Ohio Administrative Code is not approved to the extent that it states: "(3) To a permittee from any person or the State of Ohio, if the permittee initiates or participates in any proceeding under Chapter 1513 of the Revised Code upon a finding that the permittee made a substantial contribution to a full and fair determination of the issues and (4) To the Division of Reclamation where it participates in any proceeding under Chapter 1513 of the Revised Code upon a finding that the Division made a substantial contribution to a full and fair determination of the issues."

(b) [Reserved]

3. In part 935, § 935.15 is amended by adding a new paragraph (t) as follows:

§ 935.15 Approval of regulatory program amendments.

* * * * *

(t) The following amendments submitted to OSMRE on January 15, 1986, as modified on March 7, 1986, are approved effective May 6, 1986: Ohio Administrative Code, Sections 1513-3-01, 1513-3-02, 1513-3-03, 1513-3-04, 1513-3-16, and 1513-3-17.

4. 30 CFR Part 935 is being amended to add a new § 935.16 to read as follows:

§ 935.16 Required program amendments.

Pursuant to 30 CFR 732.17, Ohio is required to submit for OSMRE's approval the following proposed amendment by the date specified.

(a) By January 30, 1987, Ohio shall amend its program at OAC 1513-3-21 to be no less effective than 43 CFR Part 4 concerning the award of costs and expenses.

(b) [Reserved]

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment, USS Fort McHenry

AGENCY: Department of the Navy, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Secretary of the Navy has determined that USS FORT McHENRY (LSD 43) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with certain provisions of the 72 COLREGS without interfering with its special function as a naval dock landing ship. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, U.S. Navy Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332-2400, Telephone number: (202) 325-9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS FORT McHENRY (LSD 43) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS, Annex I, section 3(a), pertaining to the placement of the after masthead light and the horizontal distance between the forward and after masthead lights, without interfering with its special function as a dock landing ship. The Secretary of the Navy has also certified that the aforementioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the ship's ability to perform its military functions.

PART 706—[AMENDED]

Accordingly, 32 CFR Part 706 is amended as follows:

1. The authority citation for 32 CFR Part 706 continues to read:

Authority: 33 U.S.C. 1605.

§ 706.2 [Amended]

1. Table Five of § 706.2 is amended by adding the following vessel:

Vessel	Number	Forward masthead light less than the required height above hull. Annex I, sec. 2(a)(i)	AR masthead light less than 4.5 meters above forward masthead light. Annex I, sec. 2(a)(ii)	Masthead lights not over all other lights and obstructions. Annex I, sec. 2(f)	Vertical separation of masthead lights used when tawing less than required by Annex I, sec. 2(a)(ii)	AR masthead lights not visible over forward light 1,000 meters ahead of ship in all normal degrees of trim. Annex I, sec. 2(b)	Forward masthead light not in forward quarter of ship. Annex I, sec. 3(a)	After masthead light less than 1/2 ship's length aft of forward masthead light. Annex I, sec. (3)(a)	Percentage horizontal separation attained

BILLING CODE 3810-AE-M

32 CFR Part 706

Certifications and Exemptions Under the International Regulations for Preventing Collisions at Sea, 1972; Amendment; USS Truxtun

AGENCY: Department of the Navy, DoD.

ACTION: Final rule.

SUMMARY: The Department of the Navy is amending its certifications and exemptions under the International Regulations for Preventing Collisions at Sea, 1972 (72 COLREGS), to reflect that the Secretary of the Navy has determined that USS TRUXTUN (CGN 35) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS without interfering with its special function as a naval cruiser. The intended effect of this rule is to warn mariners in waters where 72 COLREGS apply.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Captain Richard J. McCarthy, JAGC, U.S. Navy, Admiralty Counsel, Office of the Judge Advocate General, Navy Department, 200 Stovall Street, Alexandria, VA 22332-2400, Telephone number: (202) 325-9744.

SUPPLEMENTARY INFORMATION: Pursuant to the authority granted in 33 U.S.C. 1605, the Department of the Navy amends 32 CFR Part 706. This amendment provides notice that the Secretary of the Navy has certified that USS TRUXTUN (CGN 35) is a vessel of the Navy which, due to its special construction and purpose, cannot comply fully with 72 COLREGS: Annex I, section 3(a), pertaining to the location of the forward masthead light in the forward quarter of the ship, and Annex I, section 3(a), pertaining to the horizontal distance between the forward and aft masthead lights. Full compliance with the above-mentioned 72 COLREGS provisions would interfere with the special functions and purposes of the vessel. The Secretary of the Navy has also certified that the above-mentioned lights are located in closest possible compliance with the applicable 72 COLREGS requirements.

Moreover, it has been determined, in accordance with 32 CFR Parts 296 and 701, that publication of this amendment for public comment prior to adoption is impracticable, unnecessary, and contrary to public interest since it is based on technical findings that the placement of lights on this vessel in a manner differently from that prescribed herein will adversely affect the vessel's ability to perform its military functions.

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 251

Special Uses and Rental Fees; Mark Twain National Forest

AGENCY: Forest Service, USDA.

ACTION: Interim rule; request for public comment.

SUMMARY: As part of a pilot program to study methods of improved management of National Forest System lands, the Forest Service is waiving, under limited conditions and for a limited duration, the required payment of rental fees for special use authorizations on the Mark Twain National Forest. The objective is to see if this method will save money when compared to the current practice, particularly for those minor uses where it is impractical to set a fee high enough to cover costs.

EFFECTIVE DATE: This rule is effective upon publication in the **Federal Register**. A final rule will be published following public comment. Comments must be received by June 5, 1986.

ADDRESS: Send written comments to R. Max Peterson, Chief (2720), Forest Service, USDA, P.O. Box 2417, Washington, DC 20013.

The public may inspect comments received on this interim rule in the office of the Director, Lands Staff, Room 1011B, Rosslyn Plaza E Building, 1621 North Kent Street, Rosslyn, Virginia, between the hours of 8:30 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Paul M. Stockinger, Land Specialist, Lands Staff, Forest Service, USDA, P. O. Box 2417, Washington, DC 20013, (703) 235-2410.

SUPPLEMENTARY INFORMATION:

Background

The Forest Service has begun a pilot management improvement program involving three National Forests. Under the pilot program, these National Forests test a variety of new management strategies and techniques in order to determine whether or not the proposals could result in improved operational efficiency if applied agencywide. One pilot forest, the Mark Twain National Forest, headquartered in Rolla, Missouri, plans to waive certain special use rental fees on a trial basis, under limited conditions.

Current Forest Service regulations at 36 CFR 251.57 do not permit waivers of fees for management improvement, even on a trial basis; therefore, the Forest Service is amending 36 CFR 251.57 to allow the Mark Twain National Forest to waive the rental fees for special uses, but only if the administrative costs of collection are greater than the annual fee or, where applicable, the 5-year advance payment of the annual fee. The waiver is authorized until 1990, unless it is modified or removed before that time. The objective is to save the Federal Government money.

The Mark Twain National Forest will observe whether or not applications increase as a result of the lack of fees for various uses, will analyze the actual administrative collection costs involved, and will determine if any decrease in administrative collection costs causes an increase in another administrative cost area or areas. Finally, the Forest will determine whether or not such a program can be effectively administered. Upon completion of the test, the procedure will either be discontinued, or a general regulatory change will be proposed to make this waiver applicable to the entire Forest Service.

Regulatory Impact

This interim rule has been reviewed under USDA procedures and Executive Order 12291, and it has been determined that this regulation is not a major rule. The regulation will have little or no effect on the economy since only one activity on one National Forest is involved. The Forest Service anticipates that the fees initially waived under this interim rule may approximate $1,000 on an annual basis.

Small Business Entity and Information Collection Requirement Statement

The Assistant Secretary of Agriculture for Natural Resources and the Environment has determined that this rule does not have a significant economic impact on a substantial number of small entities because of its limited scope and application.

List of Subjects in 36 CFR Part 251

Recreation uses, Electric power, Mineral Resources, Rights-of-way, Water uses.

Therefore, for the reasons set forth in the preamble, Part 251 of Title 36 of the code of Federal Regulations is hereby amended as follows:

PART 251—[AMENDED]

1. Revise the authority citation for Part 251 to read as follows:

Authority: 16 U.S.C. 472; 16 U.S.C. 551; 30 U.S.C. 185; 43 U.S.C. 1761–1771.

2. In § 251.57, add a new paragraph (g) to read as follows:

251.57 Rental Fees

* * * * *

(g) In addition to the fee waiver provisions of paragraph (b) of this section, the Forest Supervisor of the Mark Twain National Forest may, until December 31, 1990, waive rental fees for special use permits when all of the following conditions are met:

(1) The rental fee established for the use reflects the current market value for the use;

(2) The cost of collecting the rental fee would exceed either the amount of the rental fee itself, or the amount of any advance lump sum payment of the rental fee as specified in paragraph (a) of this section, and

(3) The Forest Supervisor has exhausted all other reasonable alternatives, such as consolidated billing or similar cost saving measures.

BILLING CODE 3410-11-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 147

[OW-10-FRL-3007-3]

Alaska Oil and Gas Conservation Commission Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State program.

SUMMARY: The State of Alaska has submitted an application under section 1425 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Class II injection wells. After careful review of the application, the Agency had determined that the State's injection well program meets the requirements of the Act and, therefore, approves it.

EFFECTIVE DATE: This approval shall be promulgated for purposes of judicial review at 1:00 p.m. eastern time on May 20, 1986. This approval shall become effective on June 19, 1986.

FOR FURTHER INFORMATION CONTACT: Harold Scott, MS 409, Environmental Protection Agency, Region X, 120 Sixth Avenue, Seattle, Washington 98101 PH: (206) 442-1846, (FTS) 399-1846.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which, in his judgment, a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. Section 1425 provides that for oil and gas related injection control programs the State may in lieu of the showing required under section 1422(b)(1)(A) demonstrate that the State program meets the requirements of section 1421(b)(1)(A)–(D) and represents an effective program to prevent underground injection which endangers drinking water sources. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The State of Alaska was listed as needing a UIC program on March 19, 1980 (45 FR 17832). The State submitted an application under section 1425 on October 15, 1985, for a UIC program to regulate Class II injection wells to be administered by the Alaska Oil and Gas Conservation Commission (AOGCC).

On November 20, 1985, (50 FR 47761) EPA published notice of receipt of the application, requested public comments, and offered a public hearing on the UIC program submitted by the AOGCC. A public hearing was held on December 19, 1985, in Anchorage.

After careful review of the application, I have determined that the

VOL 51 ISS 87 MY 6 1986 UMI

portion of the Alaska program submitted by the AOGCC to regulate Class II injection well applicable on all lands in the State other than Indian lands meets the requirements of Section 1425 of the SDWA and, hereby, approve it. The effect of this approval is to establish this program as the applicable underground injection control program under the SDWA for all Class II wells on all non-Indian lands in the State of Alaska.

This program replaces the existing EPA-administered program for all Class II wells (except on Indian lands). EPA promulgated a UIC program for Alaska on May 11, 1984, (49 FR 20200) in order to comply with the requirement of the SDWA to promulgate a Federally-administered program if a State-administered program cannot be approved within a certain time. Now that EPA has determined that the State-administered program meets all applicable Federal requirements, the Agency is withdrawing the EPA-administered program for Class II wells (except on Indian lands) and establishing the State-administered program as the applicable UIC program in the State, because of the preference in the SDWA for State Administration of UIC programs.

This approval will be codified in 40 CFR section 147.100. State statutes and regulations that contain standards, requirements, and procedures applicable to owners or operators are incorporated by reference. These provisions incorporated by reference, as well as all permit conditions or permit denials issued pursuant to such provisions, are enforceable by EPA pursuant to section 1423 of the SDWA.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 147, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 147

Indian lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water Supply, and Incorporation by reference.

OMB Review

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. § 605(b), I certify that approval by EPA under section 1425 of the Safe Drinking Water Act of the application by the Alaska Oil and Gas Conservation Commission will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

Dated: April 29, 1986.

Lee M. Thomas,

Administrator.

As set forth in the preamble, Part 147 of Title 40 of the Code of Federal Regulations is amended as follows:

PART 147—STATE UNDERGROUND INJECTION CONTROL PROGRAMS

Subpart C—Alaska

1. The authority for Part 147 continues to read as follows:

Authority: 42 U.S.C. 300h, 300h–1, 300–h–2, 300i, 300j–4, 300j–6, 300j–9, 6912 and 6921 to 6939e

2. Section 147.100 is revised to read as follows:

§ 147.100 State-administered program—Class II wells.

The UIC program for Class II wells in the State of Alaska, other than those on Indian lands, is the program administered by the Alaska Oil and Gas Conservation Commission approved by EPA pursuant to Section 1425 of the SDWA. Notice of this approval was published in the **Federal Register** [May 6, 1986]; the effective date of this program is June 19, 1986. This program consists of the following elements, as submitted to EPA in the State's program application.

(a) *Incorporation by reference.* The requirements set forth in the State statutes and regulations cited in this paragraph are hereby incorporated by reference and made a part of the applicable UIC program under the SDWA for the State of Alaska. This incorporation by reference was approved by the Director of the **Federal Register** effective June 19, 1986.

(1) Alaska Statutes, Alaska Oil and Gas Conservation Act, Title 31, §§ 31.05.005 through 31.30.010 (1979 and Cum. Supp. 1984);

(2) Alaska Statutes, Administrative Procedures Act, Title 44; §§ 44.62.010 through 44.62.650 (1984);

(3) Alaska Administrative Code, Alaska Oil and Gas Conservation Commission, 20 AAC 25.005 through 20 AAC 25.570 (Supp. 1986).

(b) The Memorandum of Agreement between EPA Region 10, and the Alaska Oil and Gas Conservation Commission, signed by the EPA Regional Administrator on January 29, 1986.

(c) *Statement of Legal Authority.* Statement from the Attorney General of the State of Alaska, signed by the Assistant Attorney General on December 10, 1985.

(d) The Program Description and any other materials submitted as part of the original application or as supplements thereto.

[FR Doc. 86–10100 Filed 5–5–86; 8:45 am]

BILLING CODE 6560–50–M

---

40 CFR Part 721

[OPTS–50518A; FRL–2926–9]

Benzoic Acid, 3, 3'-Methylenebis [6-Amino-, Di–2–Propenyl Ester; Significant New Uses

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is issuing a significant new use rule (SNUR) under section 5(a)(2) of the Toxic Substances Control Act (TSCA) for a chemical substance which was the subject of premanufacture notice (PMN) P–82–438. The Agency believes that this substance may be hazardous to human health and the environment and that the uses described in this rule may result in significant human or environmental exposure.

DATES: In accordance with 40 CFR 23.5 (50 FR 7271), this rule shall be promulgated for purposes of judicial review at 1 p.m. eastern standard time on May 20, 1986 14 days. This rule shall become effective July 21, 1986.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS–799), Office of Toxic Substances, Environmental Protection Agency, Room 543, 401 M St., SW., Washington, D.C. 20460. Toll free: (800–424–9065). In Washington, D.C.: (554–1404), Outside the USA: (Operator-202–554–1404).

SUPPLEMENTARY INFORMATION: OMB Control Number 2070–0012.

I. Authority

Section 5(a)(2) of TSCA authorizes EPA to determine that a use of a chemical substanee is a "significant new use." EPA must make this determination by rule, after considering all relevant factors, including those listed in section 5(a)(2). Once a use is determined to be a significant new use, persons must, under section 5(a)(1)(B) of TSCA, submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use. Such a notice is subject generally to the same requirements and procedures as a PMN submitted under section 5(a)(1)(A) of TSCA which are interpreted at 40 CFR Part 720 published in the **Federal Register** of May 13, 1983 (48 FR 21722). In particular, these include the information submission requirements of section 5(b) and (d)(1) of TSCA. In addition, such notices are subject to the regulatory authorities of section 5(e) and (f) of TSCA. If EPA does not take regulatory action under section 5, 6, or 7 to control activities on which it has received a SNUR notice, section 5(g) requires the Agency to explain in the **Federal Register** its reasons for not taking action.

Persons who intend to export a substance indentified in a proposed or final SNUR are subject to the export reporting provisions of TSCA section 12(b). The regulations that interpret section 12(b) requirements appear at 40 CFR Part 707. Persons who intend to import a substance identified in a final SNUR are subject to TSCA section 13 import certification requirements, which are codified at 19 CFR 12.118 through 12.127 and 127.28. The EPA policy in support of the import certification requirements appears at 40 CFR Part 707.

II. Applicability of General Provisions

In the **Federal Register** of September 5, 1984, (49 FR 35011), EPA promulgated general provisions applicable to SNURS (40 CFR Part 721, Subpart A). The general provisions are discussed there in detail and interested persons should refer to that document for further information. These general provisions apply to this SNUR. On April 22, 1986, EPA proposed revisions to the general provisions (51 FR 15104), some of which would apply to this SNUR.

III. Summary of this Rule

The chemical substance which is the subject of this rule is identified as benzoic acid, 3,3'-methylenebis [6-amino-, di-2-propenyl ester, CAS No. 61386–02–5. It was the subject of PMN number P–82–438. EPA is designating the following as significant new uses of the substance: (1) Any use other than the use described in PMN P–82–438 and (2) any manner or method of manufacturing or processing the substance for the use described in PMN P–82–438 different than the manner or method described in PMN P–82–438.

IV. Background

The chemical substance which is the subject of this rule was the subject of a PMN designated P–82–438. The notice submitter claimed the following as confidential business information (CBI): Company name, the specific chemical name, the intended use, the production volume, and information concerning processing. The Agency, believing that the proposed generic chemical name would not provide adequate specificity for this proposed rulemaking, requested that the PMN submitter relinquish its CBI claim with regard to the specific chemical identity. The PMN submitter agreed, but retained its claim for all other items of information. For purposes of clarity, the substance is referred to in this preamble by its chemical name and PMN number.

The Agency proposed a SNUR for this substance which was published in the **Federal Register** of January 2, 1985 (50 FR 127). The background of the PMN and the reasons for proposing the SNUR are set forth in the preamble to the proposed rule.

V. Designation of Significant New Uses

To determine what would constitute significant new uses of this chemical substance, EPA considered relevant information about the toxicity of the substance and likely exposures and releases associated with possible uses, and the four factors listed in section 5(a)(2) of TSCA. Based on these considerations, EPA is defining the significant new uses of P–82–438 as set forth in paragraph (a)(2) of § 721.205.

Given EPA's concerns about P–82–438, EPA believes the potential levels of exposure and release could result in significant risks to workers and/or the environment. Based on data available on structural analogues, primarily benzoic acid, 3,3'—methylenebis[6-amino-, dimethyl ester (MBMA) and 4,4' methylenedianiline, the Agency believes that any significant exposure would present a carcinogenic, hepatotoxic, teratogenic, reproductive, and neurotoxic risk to workers and toxic effects in aquatic organisms.

The Agency believes that the data described in this preamble and in the preamble to the proposed rule are sufficient to substantiate the contention that the significant new uses of P–82–438 present a potentially significant increase in the magnitude and type of exposure and release. Section 5(a)(2) of TSCA does not require the Agency to make either a "may present" or a "will present" risk finding with regard to satisfying the requirements for a significant new use. The statute imposes the requirement that the Agency provide for a "consideration of all relevant factors" in specifying a significant new use, including the four exposure related factors in section 5(a)(2). The Agency believes that a reasonable qualitative assessment of these factors was incorporated in the preamble of the proposed rule published in the **Federal Register** of January 2, 1985 (50 FR 127).

VI. Alternatives

In the proposed SNUR, EPA considered other possible approaches. These alternatives included the promulgation of a section 8(a) reporting rule, and/or a regulation under section 6. In the absence of comments and for the reasons discussed in the preamble to the proposed rule, the Agency has elected to proceed with the promulgation of a SNUR covering significant new uses of P–82–438.

VII. Exemptions to Reporting Requirements

The Agency has codified, in § 721.19, general exemption provisions covering SNUR reporting. In the case of P–82–438, the terms of § 721.19 apply without change.

On April 22, 1986, EPA issued amendments to 40 CFR Part 720, the premanufacture notification rule (51 FR 15098), including revisions of §§ 720.36 and 720.78(b) which contain detailed rules for the section 5(h)(3) exemption for chemical substances manufactured or imported in "small quantities solely for research and development" in § 720.3(cc) and section 5(h)(3) of TSCA to determine whether activities by manufacturers, importers, and processors of substances identified in SNURs qualify under this exemption. On April 22, 1986, EPA proposed amendments to 40 CFR Part 721 which would redesignate § 721.19 as § 721.18 and which would contain a new § 721.19 establishing detailed rules for the section 5(h)(3) exemption for SNURs and which would ultimately apply to this SNUR. The proposed new § 721.19 is similar to the revised §§ 720.36 and 720.78(b). Until the SNUR amendments

VOL 51 ISS 87 MY 6 1986 UMI

are promulgated, manufacturers, importers, and processors of chemical substances identified in SNURs may look to §§ 720.38 and 720.78(b) and the proposed new § 721.10 for guidance in complying with the section 5(b)(3) exemption.

Section 721.10(g) of the general SNUR provisions exempts persons from SNUR reporting when they manufacture (the term manufacture includes import) or process the substance solely for export and label the substance in accordance with section 12(a)(1)(B) of TSCA. While EPA is concerned about worker exposure and/or environmental release during manufacture and processing of the substance, section 21(a) of TSCA prohibits EPA from requiring reporting of such manufacture or processing for a significant new use. However, such persons would be required to notify EPA of such export under section 12(b) of TSCA (see § 721.7 of the general SNUR provisions). Such notification will allow EPA to monitor manufacture and processing activities which are not subject to significant new use reporting.

The term "manufacture solely for export" is defined in § 720.3(s) of the PMN rule; an amendment clarifying this definition was issued on April 22, 1986 (51 FR 15096). The term "process solely for export" is defined in § 721.3 of the general SNUR provisions in a similar fashion. Thus, persons would be exempt from reporting under this SNUR if they manufacture or process the substance solely for export from the U.S. under the following restrictions: (1) There is no use of the substance in the U.S. except in small quantities solely for research and development; (2) processing is restricted to sites under the control of the manufacturer or processor; and (3) distribution in commerce is limited to purposes of export or processing solely for export. If a person manufactured or processed the substance both for export and for use in the U.S., the manufacturing or processing activity would not be "solely for export" because the manufacture and processing would be for use in the U.S.

VIII. Applicability To Uses Which May Have Occurred Before Promulgation of Final Rule

To establish a significant new use rule, the Agency must, among other things, determine that the use is not ongoing. In this case, the chemical substance in question has undergone premanufacture review. The Agency received no information that the significant new uses are ongoing. Therefore, at this time, the Agency believes that these uses are significant new uses.

As indicated in the proposal, EPA has found that the intent of section 5(a)(1)(B) is best served by determining whether a use is a significant new use as of the proposal date of the SNUR. If uses begun during the proposal period were not considered to be significant new uses, it would be almost impossible for the Agency to establish SNUR notice requirements, since any person could defeat the SNUR by initiating a proposed significant new use before the rule became final. This is contrary to the general intent of section 5(a)(1)(B).

Thus, even if the substance was manufactured, imported, or processed for the significant new uses between proposal and promulgation of this rule, such activities may not continue after the effective date of this rule. Any such person must cease such activity pending compliance with all SNUR notice requirements.

IX. Determining When Use Is Subject to this Rule

The Agency has designated two significant new uses of P-82-438 which include CBI. The first is any use other than the use described in the PMN, and the second is any manner or method of manufacturing or processing P-82-438 for the use described in the PMN different than the manner or method described in the PMN. EPA has concluded that it is appropriate to keep the significant new uses confidential to protect the claims of the original PMN submitter. Therefore, EPA will only reveal one of the significant new uses to a manufacturer, importer, or processor who has shown a *bona fide* intent to manufacture, import, or process the substance under the procedure described in § 721.205(b)(1). This will enable the manufacturer, importer, or processor to determine whether a SNUR notice will be necessary.

To determine whether its intended use of the substance is a significant new use, a manufacturer, importer, or processor of the substance, in addition to complying with the requirements of 40 CFR 721.6, would have to describe its intended use of the substance in its *bona fide* submission under § 721.25(b)(1). If the use described in the *bona fide* submission would be a significant new use under § 721.25(a)(2)(i), EPA would so inform the submitter but would not reveal the use described in P-82-436. If the use described in the *bona fide* submission were the use described in P-82-438, EPA would so inform the submitter and would also reveal the manner of manufacturing the processing described in P-82-438 for that use. Thus the *bona fide* submitter could determine whether a significant new use notice would be necessary under § 721.205(a)(2)(ii). In this way, EPA will minimize the disclosure of CBI about the use and manufacturing and processing methods described in P-82-438 to the extent necessary to implement the SNUR.

X. Test Data and Other Information

EPA recognizes that, under TSCA section 5, persons are not required to develop any particular test data before submitting a notice. Rather, persons are required only to submit test data in their possession or control and to describe any other data known to or reasonably ascertainable by them. However, in view of the potential health and environmental risks that may be posed by a significant new use of this substance, EPA encourages possible SNUR notice submitters to test the substance's potential for carcinogenic, hepatotoxic, teratogenic, reproductive, and neurotoxic effects in humans and toxic effects in aquatic organisms. The Agency believes that the results of a 2-year rodent bioassay would adequately characterize possible carcinogenic effects of the substance. A more reasoned evaluation of hepatotoxic and neurotoxic effects could be made using data generated in a 90-day subchronic study in the rodent. Similarly, rodent tetratology and 2-generation reproduction studies with P-82-438 would allow a more reasoned evaluation of those risks. A 96-hour LC_{50} study conducted on daphnia would permit a more reasoned evaluation of risks to aquatic species. These studies may not be the only means of addressing the potential risks.

If a SNUR notice is submitted for a use involving significant human exposure or environmental release without adequate test data, EPA is likely to take action under section 5(e). As an alternative to testing the substance, potential notice submitters may want to consider the use of engineering controls and/or personal protective equipment to reduce exposure to or release of the substance.

EPA encourages persons to consult with the Agency before selecting a protocol for testing the substance. As part of this premotice consultation, EPA will discuss the test data it believes necessary to evaluate significant new uses of the substance. Data should be developed and submitted in accordance with the TSCA good laboratory practices regulations at 40 CFR Part 792.

EPA urges SNUR notice submitters to provide detailed information on human exposure that will result from the significant new uses. In addition, EPA urges persons to submit information on potential benefits of the substance and information on risks posed by the substance compared to risks posed by substitutes.

XI. Economic Analysis

The Agency has evaluated the potential costs of establishing significant new use reporting requirements for this substance. This evaluation is summarized in the preamble to the proposed rule published in the Federal Register of January 2, 1985 (50 FR 127).

The Agency's complete economic analysis is available to the public file.

XII. Rulemaking Record

EPA has established a record for this rulemaking (docket control number OPTS-50518A). A public version of this record from which CBI has been deleted is available to the public from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays, in the OTS Reading Room, Rm. E-107, 401 M Street SW., Washington, D.C.

The record includes basic information considered by the Agency in developing this rule. The record now includes the following:

1. The PMN for the substance.
2. The Federal Register notice of receipt of the PMN.
3. The proposed SNUR.
4. The toxicity support document.
5. The economic analysis of this SNUR.

XIII. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "Major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this rule is not a "Major Rule" because it will not have an effect on the economy of $100 million or more and it will not have a significant effect on competition, costs, or prices. While there is no precise way to calculate the annual cost of this rule, for the reason explained in the preamble to the proposal for this rule, EPA believes that the cost will be low. In addition, because of the nature of the rule and the substance subject to it, EPA believes that there will be few significant new use notices submitted. Further, while the expense of a notice and the suggested testing and the uncertainty of possible EPA regulation may discourage certain innovation, that impact may be limited because such factors are unlikely to discourage innovation of high potential value. Finally, this SNUR may encourage innovation in safe chemical substances or highly beneficial uses.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 605(b), EPA certifies that this rule will not have a significant economic impact on a substantial number of small businesses. The Agency cannot determine whether parties affected by this rule are likely to be small businesses. However, EPA believes that the number of small businesses affected by this rule would not be substantial even if all the potential significant new uses were developed by small companies. EPA expects to receive few SNUR notices for the substance.

C. Paperwork Reduction Act

Information collection requirements contained in this rule have been approved by the OMB under the provisions of the Paperwork Reduction Act of 1980, U.S.C. 3501 *et seq.* and have been assigned OMB control number 2070-0012.

List of Subjects in 40 CFR Part 721

Environmental protection, Chemicals, Hazardous substances, Recordkeeping and reporting requirements, Significant new uses.

Dated: April 28, 1986.

John A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

PART 721—[AMENDED]

Therefore, 40 CFR Part 721 is amended as follows:

1. The authority citation for Part 721 continues to read as follows:

Authority: 15 U.S.C. 2604 and 2607.

2. By adding a new § 721.205 to read as follows:

§ 721.205 Benzoic acid, 3,3'-methylenebis [6 amino-, di-2-propenyl ester.

(a) *Chemical substance and significant new uses subject to reporting.* (1) The following chemical substance, referred to by its CAS Number and chemical name, is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section: 61386-02-5, Benzoic acid, 3,3'-methylenebis [6 amino-, di-2-propenyl ester.

(2) The significant new uses are: (i) Any use other than the use described in Premanufacture Notice P-82-438.

(ii) Any manner or method of manufacturing or processing the substance for the use described in Premanufacture Notice P-82-438 different than the manner or method described in Premanufacture Notice P-82-438.

(b) *Special provisions.* The provisions of Subpart A of this Part apply to this section except as modified by this paragraph.

(1) *Determining whether a specific use is subject to this rule.* (i) A person who intends to manufacture, import, or process the chemical substance identified in paragraph (a)(1) of this section may ask EPA whether the use for which the person intends to manufacture, import, or process the substance is a significant new use under paragraph (a)(2)(i) of this section. EPA will answer such an inquiry only if EPA determines that the person has a *bona fide* intent to manufacture, import, or process the chemical substance.

(ii) To establish a *bona fide* intent to manufacture, import, or process the chemical substance, the person must submit to EPA:

(A) All materials and statements required under § 721.6.

(B) The specific use for which the person intends to manufacture, import, or process the chemical substance.

(iii) EPA will review the information submitted by the person under this paragraph to determine whether the person has a *bona fide* intent to manufacture, import, or process the chemical substance.

(iv) If EPA determines that the person has a *bona fide* intent to manufacture, import, or process the chemical substance, EPA will tell the person whether the use for which the person intends to manufacture, import, or process the substance is a significant new use under paragraph (a)(2)(i) of this section. If EPA tells the person that the intended use is not a significant new use under paragraph (a)(2)(i) of this section, EPA will tell the person what activities would constitute a significant new use under paragraph (a)(2)(ii) of this section.

(v) A disclosure to a person with a *bona fide* intent to manufacture, import, or process the chemical substance of the significant new uses subject to this section will not be considered public disclosure of confidential business information under section 14 of the Act.

(vi) EPA will answer an inquiry on whether a particular use is subject to this section within 30 days after receipt of a complete submission under paragraph (b)(1) of this section.

(2) [Reserved].

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 78-374; FCC 86-133]

Deregulation of Domestic Receive-Only Satellite Earth Stations

AGENCY: Federal Communications Commission.

ACTION: Report and Order; Procedural changes.

SUMMARY: In 1979, the Commission initiated a proceeding to improve the efficacy of the receive-only earth station licensing program through the elimination of unnecessary regulatory policies. The docket was left open to consider additional improvements to the program. The purpose of this *Second Report and Order* is to close the docket and to further streamline the processing of receive-only earth station applications by adopting certain improvements to the licensing program. Pursuant to this Commission action, applicants no longer need submit small antenna performance or interference analyses with their receive-only earth station applications. The Commission has also decided to discontinue the unnecessary practice of putting applications for assignment of license and transfer of control of receive-only earth station facilities on public notice. Instead, the Commission will only issue notice of their grant. Finally, the Commission will not require or accept any applications for any receive-only facility in the 12 GHz band. Instead, operators are encouraged to provide notification directly to the secondary operators of the band.

EFFECTIVE DATE: March 25, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Wilbert E. Nixon, Jr., Domestic Facilities Division, Common Carrier Bureau, (202) 634-1624.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Second Report and Order, CC Docket 78-374, adopted March 25, 1986, and released April 10, 1986.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC dockets branch (room 230), 1919 M Street, Northwest, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, Northwest, Suite 140, Washington, DC 20037.

Summary of Second Report and Order

1. In the Notice of Inquiry (*Notice*), CC Docket No. 78-374, 70 FCC 2d 1460 (1979), the Commission initiated this proceeding to improve the efficacy of the receive-only earth station licensing program through the elimination of unnecessary regulatory policies. The Commission described the workings of the receive-only licensing program at that time and solicited public comment on the benefits and detriments of that mandatory licensing program through the elimination of unnecessary regulatory policies. The Commission described the workings of the receive-only licensing programs at the time and solicited public comment on the benefits and detriments of that mandatory licensing program. In the Deregulation of Receive-Only Earth Stations, 74 FCC 2d 205 (1979), the Commission addressed those issues raised in the *Notice*, eliminated the mandatory aspects of the program and adopted: (1) Immediate implementation of a voluntary licensing program for receive-only earth stations; (2) complete deregulation under Title III of the Act of the receive-only earth stations; and (3) streamlining of the licensing procedures for those who decide to obtain a receive-only earth station license to secure protection from interference. This docket was left open to consider additional improvements to the program. The purpose of the *Second Report and Order* is to announce those additional improvements and to close the docket.

2. The Commission, in resolving other broader issues, has made several decisions affecting receive-only earth station licensing regulations. The *Second Report and Order* compiles and reiterates earlier Commission decisions which have an impact on receive-only earth station licensing. In light of its experience and its decisions in other proceedings, the Commission decided to eliminate certain application requirements and further simplify the receive-only earth station licensing program. The following is a categorical breakdown of the compilation of current Commission decisions and policies with regard to receive-only earth station regulation.

3. In *American Broadcasting Companies, Inc.*, 62 FCC 2d 901 (1977) (*ABC*), the Commission required applicants, in the form of a supplemental analysis, to demonstrate the acceptability of television receive-only earth station facilities with antennas between 4.5 and 9.0 meters in diameter on the basis of signal quality regulations for cable television use. Since *ABC*, the Commission has revised its rules to specify signal-to-noise criteria for cable television systems only for guideline purposes. For that reason, the Commission no longer requires the filing of the small antenna performance analysis with the receive-only earth station application.

4. In *ABC*, the Commission determined that small diameter antennas could be routinely licensed if a showing were made that their use was consistent with desirable orbital spacings between domestic satellites. In Licensing of Space Stations in the Domestic Fixed-Satellite Service 54 Rad. Reg. 577 (1983), the Commission adopted a reduction in orbital separation to 2° in both the 4/6 GHz and 12/14 GHz bands for the domestic fixed-satellite service. This decision was based on the new earth station antenna performance standard of §25.209 of the rules. Operators may choose the type of antenna performance they desire by the type of earth station equipment they purchase. Therefore, the Commission will no longer perform case-by-case reviews pursuant to *ABC*. The supplemental interference analysis currently being filed with receive-only earth station applications will no longer be required.

5. To date, the Commission has required assignors and transferors of receive-only licenses to file FCC Forms 702 and 704, respectively. Applications are put on public notice for 30 days and routinely granted a few days after the close of the public notice period as long as grant of the application is not opposed. There is no provision in the Commissions Act requiring the public notice be given of the filing of these applications. Therefore, the Commission will discontinue this unnecessary and resource-consuming practice. Instead, the Commission will only issue notice of their grant.

6. In the frequency band 11.7-12.2 GHz (12 GHz), the only radio service given primary frequency allocation status is the fixed-satellite service downlink. All other services are secondary in relation to the fixed-satellite receiving facility. Because receive-only facilities are licensed only to protect the facilities from harmful interference, there is no reason to require a formal application and licensing procedure to protect them from harmful interference caused by the transmitters licensed on a secondary basis. Therefore, the Commission will not require or accept any applications for any receive-only facility in the 12 GHz band. Instead, operators are encouraged to provide notification directly to the secondary operators of this band.

7. A separate public notice will be released in accordance with this *Second Report and Order* describing the Commission's policy regarding receive-only earth station licensing. The public notice will also detail filing requirements for receive-only earth station applications. No new information is being requested from applicants. In fact, less information is now required. The purpose of the public notice is to compile and restate the simplified filing requirements and to encourage applicants to submit their applications in a format that will aid the Commission's staff in processing.

8. Because the benefits of these procedural rule changes would be made available to the public immediately, and these changes in policy relieve certain restrictions, the *Second Report and Order* shall be effective within less than thirty days from the time its summary is published in the Federal Register. 5 U.S.C. 553(d)(1).

9. The action contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to impose a new or modified requirement will be subject to approval by the Office of Management and Budget as prescribed by the Act.

10. Accordingly, It is ordered that the requirements of receive-only earth station applicants specified in paragraphs 6 and 8 are eliminated and the application procedures specified in paragraphs 11, 12 and 16 above are adopted.

11. It is further ordered that these procedures are effective March 25, 1986.

12. It is further ordered that the proceedings in CC Docket No. 78-374 are terminated.

Federal Communications Commission.
William J. Tricarico,
Secretary.

In the matter of corrections to part 68 of the Commission's Rules (47 CFR Part 68); CC Docket No. 81-216, CC Docket No. 84-490.

Erratum

Released: April 24, 1986.

1. The following corrections are made in the Appendix of the Report and Order in the captioned proceeding released November 4, 1985. (*See*, 51 FR 929, January 9, 1986). The corrections are underscored.

§ 68.2 [Corrected]

2. Section 68.2(a)(7): Should read in part ". . . ringdown *or* inband . . ." instead of ". . . ringdown on inband . . .".

Section 68.2(h)(1): Should read in part ". . . voiceband private . . ." rather than ". . . voiceband *and* private . . .": and ". . . connected to *that* private line . . ." line . . ." rather than ". . . connected to hat private line . . .".

§ 68.302 [Corrected]

3. Section 68.302(f): Should read in part ". . . § 68.310, and *for* terminal equipment . . ." instead of § 68.310, and or terminal equipment . . .".

§ 68.306 [Corrected]

4. Section 68.306(a)(8): Should read "voiceband" instead of "viocband".

§ 68.308 [Corrected]

5. Section 68.308(b)(1)(i): Should read in part ". . . when *averaged over* . . ." instead of "when average over . . .".

6. Section 68.308(b)(5)(i)(A): Should read in part ". . . terminating *set* losses" instead of "terminating losses . . .".

7. Section 68.308(d): Insert missing asterisk: "The weighted root-mean-squared voltage* . . ." The associated footnote should be added: "* Note: Average magnitudes may be used for signals that have peak-to-RMS ratios of 20 dB and less. RMS limitations must be used instead of average values if the peak-to-RMS ratio of the interfering signal exceeds this value."

8. Section 68.308 (g)(1), (g)(2), and (g)(3) are corrected as follows:

§ 68.308 Signal power limitations.

* * * * *

(g) * * *

(1) All registered terminal equipment, except equipment to be used on LADC, and all registered protective circuitry must comply with the limitations when connected to as termination equivalent to the circuit depicted in Figure 68.308(b) and *when placed in all operating states of the equipment except* during network control signaling. For message registration in the ground return mode, a termination equivalent to Figure 68.308(c) is required, and metallic voltage limitations dc not apply. LADC registered terminal equipment must comply with the matallic voltage limitations when connected to the circuits of Figure 68.3(k) and must comply with the longitudinal limitations when connected to the circuits of Figure 68.308(b), as indicated.

BEST COPY AVAILABLE

VOL 51 ISS 87 MY 6 1986 UMI

(2) All registered terminal equipment and registered protective circuitry must comply with the limitations in the offhook state over the range of loop current that would flow with the equipment *connected* to an appropriate loop simulator circuit.

(3) Registered terminal equipment and registered protective circuitry with provision for through-transmission from other equipments shall comply with the limitations with a 1000 Hz tone applied *from a 600-ohm source (or, if appropriate, a source which reflects a 600-ohm impedance across tip and ring) at the maximum level that would be applied* during normal operation. Registered protective circuitary for data shall also comply with the tone level 10 dB higher than that expected during normal operation.

* * * * *

§ 68.310 [Corrected]

9. Section 68.310(e)(i)(1): Should read in part ". . . transmit and receive *pairs* of the 4-wire . . ." instead of ". . . transmit and receive parts of the 4-wire. . .."; also Figure 68.130(j) should read *Figure 68.310(j).*

10. Section 68.314(d) is corrected as follows:

§ 68.314 Billing protection.

* * * * *

(d) *Signaling interference requirements*

(1) Terminal equipment connected to the Public Switched Network or private lines identified in § 68.2(a) (2) and (3). Registered terminal equipment and registered protective circuitry shall not deliver signals into a 2-wire loop simulator circuit or the transmit and receive pairs of a 4-wire loop simulator circuit or a 600-ohm termination (where appropriate) from sources internal to the registered equipment or circuitry, with energy in the 2450 to 2750 Hertz band unless an equal amount of energy is presented in the 800 to 2450 Hertz band.

(2) Registered terminal equipment for connection to subrate or 1.544 Mbps digital services shall not deliver digital signals to the telephone network with encoded analog content energy in the 2450 to 2750 Hertz band unless at least an equal amount of encoded analog energy is present in the 800 to 2450 Hertz band.

GENERAL SERVICES ADMINISTRATION

48 CFR Parts 501, 504, 514, 515, and 553

[APD 2800.12 CHGE 25]

General Services Administration Acquisition Regulation; Miscellaneous Changes

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR), Chapter 5, is amended to revise Part 501 to modify the requirements for training under the contracting officer warrant program; to revise Part 504 to clarify the requirements for use of the uniform procurement instrument identification system; to add Section 514.408-1 to provide for the use of a new GSA Form 3577, Notification of Contract Award, to notify an unsuccessful bidder that its bid was not accepted; to revise Parts 514 and 515 to emphasize the need for limiting access to Government coat estimates, to provide guidance on the use of estimates in negotiating fair and reasonable prices; and to revise Part 553 to illustrate the new GSA Form 3577, Notification of Contract Award, and the revised GSA Form 3501, Solicitation Provisions (Sealed bid) and GSA Form 3502, Solicitation Provisions (Negotiated).

EFFECTIVE DATE: April 17, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Ida M. Ustad, Office of GSA Acquisition Policy and Regulations (VP) on (202) 566-1224.

SUPPLEMENTARY INFORMATION:

Background

On December 17, 1985, the General Services Administration published in the **Federal Register** (50 FR 51435) GSAR Notice No. 5-127 inviting comments from interested parties on proposed changes to the regulation and provided a 30-day comment period. Comments from various GSA offices were received, reconciled, and incorporated, when appropriate, in this final rule.

Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exception applies to this rule. The General Services Administration certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et. seq.). The rule primarily relates to the internal operations of the agency and will not have a significant impact on contractors and offerors. Therefore, no regulatory flexibility analysis has been prepared. This rule does not contain any information collection requirements which are subject to OMB approval under the Paperwork Reduction Act 44 U.S.C. 3501 et. seq.).

List of Subjects in 48 CFR Parts 501, 504, 514, 515, and 553

Government procurement.

1. The authority citation for 48 CFR Parts 501, 504, 514, 515, and 553 continues to read as follows:

Authority: 40 U.S.C. 486(c).

2. Section 501.603-2 is amended to revise paragraphs (c)(1) and the introductory paragraph of (c)(3); to revise paragraph (c)(3)(ii)(E); by redesignating and revising subparagraphs (F) thru (K) as (G) thru (L) and adding a new subparagraph (F); to revise paragraph (c)(3)(v)(C) and adding a new subparagraph (D); to revise paragraph (c)(4) and the introductory paragraph of (c)(5); to redesignate paragraph (c)(6) as (c)(7) and to add a new paragraph (c)(6) to read as follows:

501.603-2 Selection.

(c) * * *

(1) *Knowledge and skill.* Written statements of fact must be presented by supervisors of CO candidates to the warrant board, covering the knowledge and abilities of candidates and their specific level of skill which are appropriate to the activity in the following areas:

* * * * *

(3) *Mandatory training requirements for contracting officer candidates.* A candidate must complete the minimum core training required for the warrant levels described below. To qualify for a intermediate level warrant, a candidate must complete the basic, intermediate, and senior level training in order to qualify for a senior level warrant. Supervisors are responsible for providing their employees with advice and assistance necessary to complete this required training. Mandatory training includes the following general topics as a minimum:

* * * * *

(ii) *Intermediate level* (Does not apply to realty leasing and sales personnel.)

* * * * *

(E) Cost and Price Analysis or Cost Analysis—40 hours,

(F) GSA Price Analysis—40 hours,

(G) Government ADP Resource Acquisition—40 hours (Applicable to ADP acquisition personnel only.)

(H) Termination Settlements—40 hours,

(I) Services Contracting—40 hours,

(J) Public Utility Contracts—40 hours (Applicable to personnel handling public utility procurements.)

(K) Architect-Engineer Contracting—40 hours (Applicable to personnel handling Architect-Engineer service procurements.)

(L) Construction Contracts—40 hours. (Applicable to personnel handling procurement of construction.)

* * * * *

(v) *Realty Leasing Personnel.*

* * * * *

(C) Cost and Price Analysis or Pricing of Lease Proposals—40 hours, and

(D) GSA Price Analysis—40 hours.

* * * * *

(4) *Substitution of experience for training.* Individuals currently serving and classified in 1102 positions for an uninterrupted period of three years will not be required to take the basic level courses under the COWP if they are proposed for intermediate or senior level warrants.

(5) *Substitute courses.* Training courses of equivalent content will be allowable substitutes. Personnel involved in motor pool operations may substitute the GSA Fleet Management Procurement course for the requirement for 40 hours of training in small purchases and Federal supply schedules. Courses from the following sources are considered to be equivalent provided the training meets the minimum hours required in (c) of this subsection:

* * * * *

(6) *Refresher training.* Contracting officers in the Federal Supply Service are encouraged to attend the Contract Quality Assurance course (40 hours) in fulfilling the continuing education requirements of § 501.603-3(c).

(7) *Tests.* Tests administered either by the GSA Office of Civil Rights, Organization, and Training or by DOD training facilities may be taken as an alternative to training, to demonstrate career knowledge. The GSA training office may be contacted for referral to DOD testing facilities such as Fort Lee, VA. Other tests may be considered on a case by case basis.

3. Section 501.603-3 is amended to revise paragraph (a) to read as follows:

501.603-3 Appointment.

(a) The recommending official may nominate candidates for contracting officer warrants to the designating official subject to the approval of the warrant board. Only the Administrator or the Associate Administrator for Acquisition Policy is authorized to sign the Standard Form 1402, Certificate of Appointment.

* * * * *

4. Section 504.7001 is revised to read as follows:

504.7001 Uniform procurement instrument identification.

This section prescribes procedures for the identification of GSA contracts, orders, and other procurement instruments regardless of dollar threshold and applies to all GSA contracting activities except those within the Federal Supply Service.

5. Section 504.7001-1 is amended to revise paragraph (b) to read as follows:

504.7001-1 Policy.

(a) * * *

(b) Identification should be placed in the contract number block provided on the applicable forms. If a space is not reserved for the prescribed number, it should be placed in the upper right-hand corner of the form.

* * * * *

6. Section 504.7001-2 is amended by deleting from paragraph (c) items A and N and revising items F, H, and K and paragraph (f) is amended by revising items C and D as follows:

504.7001-2 Basic procurement instrument identification number.

* * * * *

(c) The fifth character shall be a capital letter assigned to the service/office preparing the instrument as follows:

A Office of Acquisition Policy and Management Systems [Deleted]

* * * * *

F Federal Supply Service

* * * * *

H Office of Associate Administrator for Administration

* * * * *

K Information Resources Management Service

* * * * *

N National Archives and Records Service [Deleted]

(f) The tenth character shall be a capital letter assigned to indicate the type of procurement instrument code as follows:

* * * * *

C Contracts, including letter contracts, contracts referencing basic agreements, or basic ordering agreements, excluding indefinite delivery type contracts.

D Indefinite delivery contracts, including definite quantity, requirements contracts and indefinite quantity contracts.

* * * * *

7. Section 504.7001-3 is amended by revising the introductory paragraph, paragraph (a) and the introductory text of paragraph (e) to read as follows:

504.7001-3 Order and call instrument identification number.

Delivery orders under indefinite delivery contracts (orders), and orders under schedule contracts must be identified by an "11" character alphanumeric identification number placed in the order number block of the order form. The basic indefinite delivery or schedule contract number must be placed in the contract number block of the order form.

(a) The first character shall be a capital letter assigned to the service/office issuing the order. This code will be identical to those assigned in paragraph (c) of GSAR 504.7001-2.

* * * * *

(e) The eighth through the eleventh characters shall be the serial number of the order. Each contracting office shall maintain its own serial number. Alphanumeric numbers shall be used when more than 9999 numbers are required. Alphanumeric numbers shall be serially assigned with an alpha in the first position followed by the numeric serial number. The following sequences, excluding alpha I or O shall be used:

* * * * *

8. The Table of Contents for Part 514 is amended to add new entries for Sections 514.211 and 514.408-1 as set forth below.

PART 514—SEALED BIDDING

Sec.

Subpart 514.2—Solicitation of Bids

* * * * *

514.211 Release of acquisition information.

* * * * *

Subpart 514.4—Opening of Bids and Award of Contract

* * * * *

514.408-1 Award of unclassified contracts.

Authority: 40 U.S.C. 486(c).

9. Section 514.205-1 is amended by revising paragraph (a) to read as follows:

514.205-1 Establishment of lists.

(a) Solicitation mailing lists shall be established in accordance with FAR

VOL 51 ISS 87 MY 6 1986 UMI

14.205. Contracting officers within FSS shall use the computerized central solicitation mailing list maintained by Region 8 for supplies and services for all procurements expected to exceed the small purchase limitations. Other GSA services/offices may maintain local lists. Services/offices that maintain local mailing lists shall inform the GSA Business Service Center of the list and provide related information regarding the list.

* * * * *

10. Section 514.211 is added to read as follows:

514.211 Release of acquisition information.

Access to information concerning the Government cost estimate must be limited to Government personnel whose official duties require knowledge of the estimate. After award, the total amount of the Government estimate may be revealed, upon request, to those firms or individuals who submitted bids. Information on the basis for calculation of the estimate may not be released at any time.

11. Section 514.408–1 is added to read as follows:

514.408–1 Award of unclassified contracts.

The GSA Form 3577, Notification of Contract Award, may be used on an optional basis to notify unsuccessful bidders, as required by FAR 14.408–1, that their bids were not accepted. When award is made to other than an apparent low bidder(s), the form should not be used to notify the unsuccessful low bidder(s). Such bidder(s) must be notified of the reasons for rejection of their bids.

12. Section 515.803 is revised to read as follows:

515.803 General.

Access to information concerning the Government cost estimate must be limited to Government personnel whose official duties require knowledge of the estimate. An exception to this rule may be made during contract negotiations to allow the contracting officer to identify a specialized task and disclose the associated cost breakdown figures in the Government estimate, but only to the extent necessary to arrive at a fair and reasonable price. After award, the total amount of the independent Government estimate may be revealed, upon written request, to those firms or individuals who submitted proposals.

13. Section 515.805–5 is revised to read as follows:

515.805–5 Field pricing support.

(a) Within GSA, "field pricing support" is provided by the Assistant Inspector General-Auditing, or the Regional Inspector General-Auditing, as appropriate.

(b) When applying the threshold at FAR 15.805–5 for requesting field pricing support, the value of the proposal (including any priced options) must be used.

14. The Table of Contents for Part 553 is amended to add a new entry for Section 553.370–3577 as set forth below:

PART 553—FORMS

Sec.

Subpart 553.3—Illustration of Forms

* * * * *

553.370–3577 GSA Form 3577, Notification of Contracting Award.

* * * * *

Authority: 40 U.S.C. 486(c).

Editorial Note: The forms listed above are illustrated in and made a part of the regulation. However, the forms are not illustrated in the **Federal Register** or the Code of Federal Regulations. Individual copies may be obtained from any GSA contracting activity or the Director of the Office of GSA Acquisition Policy and Regulations (VP), 18th and F Streets, NW., Washington, DC 20405.

16. Section 553.173 is amended to revise paragraph (c) to add GSA Form 3577 to read as follows:

553.173 Responsibility for maintenance of forms.

(c) * * *

GSA Form Number	Responsible office
3577	V

Dated: April 17, 1986.

Richard H. Hopf, III,

Acting Associate Administrator for Acquisition Policy.

[FR Doc. 86–10083 Filed 5–5–86; 8:45 am]

BILLING CODE 6820–61–M

48 CFR Parts 525 and 552

[GSAR AC–86–5]

Restrictions on Procurement of Hand or Measuring Tools

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Temporary regulation.

SUMMARY: This Acquisition Circular temporarily amends sections §§525.105 and 552.225 of the General Services Administraton Acquisition Regulation (GSAR), 48 CFR Ch. 5 (APD 2800.12), to reflect procurement restrictions in the current GSA and DOD Appropriation Act on the acquisition of hand or measuring tools. The intended effect is to implement the appropriation restrictions and provide procedures and guidance to GSA contracting activities.

DATES: *Effective:* April 18, 1986.

Expiration: October 17, 1986, unless cancelled earlier.

Comment: Comments must be submitted on or before June 5, 1986.

ADDRESS: Comments may be submitted to Mrs. Marjorie Ashby, Office of GSA Acquisition Policy and Regulations, 18 and F Sts., NW, Washington, DC 20405, (202) 523–3822.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph DeStefano, Office of GSA Acquisition Policy and Regulations, (202) 523–4763.

SUPPLEMENTARY INFORMATION: Pursuant to Section 22(d) of the Office of Federal Procurement Policy Act, as amended, a determination has been made to waive the requirement for publication of procurement procedures for public comment before the regulation takes effect. The need to comply with the FY 1986 Appropriation Act creates an urgent and compelling circumstance which makes advance publication impracticable. The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain agency procurement regulations from Executive Order 12291. The exemption applies to this rule. The General Services Administration (GSA) certifies that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et. seq.) because it represents a continuation of existing policy. Therefore, no regulatory flexibility analysis has been prepared. This circular does not contain information collection requirements which require the approval of OMB under 44 U.S.C. 3501 et. seq.

List of Subjects in 48 CFR Parts 525 and 552

Government procurement.

PARTS 525 AND 552—[AMENDED]

1. The authority citation for 48 CFR Parts 525 and 552 continue to read as follows:

Authority: 40 U.S.C. 486(c).

2. 48 CFR Parts 525 and 552 are amended by the following Acquisition Circular:

General Services Administration Acquisition Regulation Acquisition Circular AC–86–5

To: All contracting activities
Subject: Restrictions on Procurements of Hand or Measuring Tools

1. *Purpose.* This Acquisition Circular temporarily amends Sections 525.105 and 552.225 of the General Services Administration Acquisition Regulation (GSAR), 48 CFR Ch. 5 (APD 2800.12), to reflect procurement restrictions in the current GSA and DOD Appropriation Acts on the acquisition of hand or measuring tools.

2. *Cancellation.* AC–85–3 and supplement 1 are cancelled.

3. *Background.* The FY 1986 GSA Appropriation Act continues the procurement restrictions on the acquisition of hand or measuring tools and stainless steel flatware from the FY 1985 GSA Appropriation Act. Also, the FY 1986 DOD Appropriation Act continues the FY 1985 DOD Appropriation Act restrictions for acquisitions of electric and air-motor driven hand tools. All other procurement restrictions on the acquisition of hand or measuring tools in support of DOD requirements that were in the FY 1985 DOD Appropriation Act are continued in the FY 1986 DOD Appropriation Act. The procurement restrictions in the FY 1986 DOD Appropriation Act shall be applied in GSA procurements where such procurements satisfy requirements that are predominantly DOD requirements.

4. *Effective date.* April 18, 1986.

5. *Expiration date.* This circular expires October 17, 1986, unless cancelled earlier.

6. *Reference to regulation.* Sections 525.105–70(c), 525.105–71, and 552.225–71 of the GSAR.

7. *Explanation of change.*

a. Section 525.105–70(c) is amended as follows to cite the FY 1986 GSA Appropriation Act:

525.105–70 Evaluating offers—Hand or measuring tools for other than the Department of Defense.

(a) * * *

(b) * * *

(c) *GSA Appropriation Act restrictions.* Section 101(h) of Pub. L. 99–190 [H.J. Res. 465] December 19, 1985, makes GSA appropriations subject to H.R. 3036 to the extent and in the manner provided for in the conference report and joint explanatory statement of the committee of conference (House Report 99–349) as passed by the House of Representatives and the Senate on November 7, 1985, as if enacted into law. Section 506 of H.R. 3036 continues the Congressional policy contained in previous GSA Appropriation Acts that require GSA purchases of hand or measuring tools be from domestic sources or be made in accordance with procedures prescribed by section 6–104.4(b) of the Armed Services Procurement Regulation (ASPR) (now the Defense Acquisition Regulation) as such regulation existed on June 15, 1970, and further provides that a factor of 75 percent in lieu of 50 percent shall be used for evaluating foreign source end products in § 6–104.4(b).

* * * * *

b. Section 525.105–71 is retitled and amended as follows to cite the FY 1986 DOD Appropriation Act, codify GSA's determination to apply the current DOD Appropriation Act restrictions in GSA procurements for requirements that are predominantly DOD requirements, and provide policy guidance on the requirements for full and open competition in acquisitions where the current DOD Appropriation Act restrictions are to be applied:

525.105–71 Acquisition of hand or measuring tools for the Department of Defense (DOD).

(a) *DOD Appropriation Act restrictions.*

(1) Congressional policy on DOD's acquisition of hand or measuring tools is expressed in Section 101(a) of Pub. L. 99–190 [H.J. Res. 465], December 19, 1985, which contains the DOD Appropriation Act of 1986, and the House of Representatives Report No. 99–1086 on the DOD Appropriation Bill for FY 1985. The following restrictions applicable to DOD's acquisition of hand or measuring tools are set forth in the current DOD Appropriation Act:

(i) Except for electric or air-motor driven hand tools, DOD is prohibited from acquiring hand or measuring tools that are not wholly produced or manufactured in the United States.

(ii) Electric or air-motor driven hand tools shall be considered of domestic origin if the cost of components produced or manufactured in the United States exceeds 75 percent of the cost of all components in the end product.

(2) Pursuant to subsection 6–104.4(d)(3)(ii) of the Armed Services Procurement Regulation (now the Defense Acquisition Regulation) as it existed on June 15, 1970, GSA has determined that accepting offers from firms offering foreign products is not in the national interest when DOD is the predominant user of the items being procured. As a result, the current DOD Appropriation Act restrictions shall apply in GSA procurements rather than the current GSA Appropriation Act restrictions where such procurements satisfy requirements that are predominantly DOD requirements. The basis for this determination are:

(i) The current DOD Appropriation Act prohibits DOD's acquisition of foreign hand or measuring tools. This restriction also applies when DOD requisitions such items through the GSA stock program.

(ii) It is not feasible for GSA to maintain separate supply systems to satisfy the requirements of civilian and military agencies.

(iii) The current GSA Appropriation Act prescribes the use of the procedures in the ASPR 6–104.4, dated June 15, 1970. These procedures provide that offers may be rejected when it is considered necessary for reasons of national interest.

(3) Acquisitions of hand or measuring tools, pursuant to the current DOD Appropriation Act restrictions, meet the requirements for full and open competition in FAR Subpart 6.1 if all responsible sources offering domestic end products, as defined by the current DOD Appropriation Act restrictions, are permitted to submit offers.

(4) Acquisitions of hand or measuring tools pursuant to the DOD Appropriation Act restrictions without full and open competition (i.e., all otherwise responsible sources are not permitted to submit offers) shall be made under the authorities in FAR Subpart 6.2 or 6.3 and comply with the respective requirements of these FAR subparts for determinations and findings or approved justifications.

(b) *Solicitation provision.* The contracting officer shall insert the provision at § 552.225–71, Procurement Restriction—Hand or Measuring Tools, in solicitations for the acquisition of hand or measuring tools for the Department of Defense.

c. Section 552.225–71 is retitled and amended as follows to incorporate the procurement restrictions in the FY 1986 DOD Appropriation Act:

552.225–71 Procurement Restriction—Hand or Measuring Tools.

As prescribed in § 525.105–71(b), insert the following provision in solicitations and contracts for the acquisition of hand or measuring tools for the Department of Defense.

Procurement Restriction—Hand or Measuring Tools (Apr 1985)

(a) The current Department of Defense (DOD) Appropriation Act prohibits DOD from directly or indirectly acquiring hand or measuring tools classified under Federal Supply Classification (FSC) Group 51, Hand

VOL 51 ISS 87 MY 6 1986 UMI

Tools, or FSC Group 52, Measuring Tools, that are not domestic end products.

"Domestic end product," as used in this provision, means—

(1) Any hand or measuring tool, except for any electric or air-motor driven hand tool, wholly produced or manufactured, including all components, in the United States or its possessions; or,

(2) Any electric or air-motor driven hand tool if the cost of its components produced or manufactured in the United States exceeds 75 percent of the cost of all its components.

"Components," as used in this provision, means those articles, materials, and supplies incorporated directly into the hand or measuring tools.

(b) Awards under this solicitation will only be made to offerors that will furnish hand or measuring tools that are domestic end products.

(c) Tools kits or sets, being procured under this solicitation, will not be considered domestic end products if any individual tool classified in FSC Group 51 or 52 and included in a tool kit or set is not a domestic end product as defined in paragraph (a) of this provision. The restrictions of this clause do not apply to individual hand or measuring tools that are contained in the tool kit or set but are not classified in FSC Group 51 or 52.

(d) Offers of hand or measuring tools that are not domestic end products are unacceptable and will not be considered for award under this solicitation.

(End of Clause)

Richard H. Hopf III,

Acting Associate Administrator for Acquisition Policy.

BILLING CODE 6820-61-M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 85-02, Notice 02]

Federal Motor Vehicle Safety Standards for Brake Fluids and Brake Hoses

AGENCY: National Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: The purpose of this notice is to amend Federal Motor Vehicle Safety Standard (FMVSS) No. 116, *Motor Vehicle Brake Fluids*, and FMVSS No. 106, *Brake Hoses*, to revise the referee materials and test procedures referenced in portions of those standards. FMVSS No. 116 and FMVSS No. 106 currently reference the referee material (RM) identified as RM–1 fluid by the Society of Automotive Engineers (SAE). However, RM–1 fluid is now commercially unavailable, and is less representative of brake fluids used in vehicles on the road today. The SAE in its January 1980 revision of Standard J1703, "Motor Vehicle Brake Fluid," substituted a new referee material, RM–66–03, in place of RM–1 for use in the J1703 compatibility test. This final rule adopts this revision and references RM–66–03 for use in the compatibility test of Standard No. 106, and the compatibility and fluid chemical stability tests of Standard No. 116 This notice also references a new referee material, TEGME, in the humidification procedure of Standard No. 116, adjusts the water content level and test temperature referenced in the test procedures, and amends the number of sets of stroking test materials in the stroking test procedures. This notice also makes procedural modifications to Standard No. 116's humidification procedure adopted from the SAE, and corrects the description of test procedures used to evaluate brake fluid stroking properties.

EFFECTIVE DATES: Due to the commercial unavailability of RM–1 fluid, this rule is effective May 6, 1986. However, because the agency is concerned that manufacturers who might still be using RM–1 fluid to test their products should be able to use their existing supplies, use of RM–1 fluid may continue until November 3, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Vernon Bloom, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590 (202–426–2153).

SUPPLEMENTARY INFORMATION: Federal Motor Vehicle Safety Standard (FMVSS) No. 116, *Motor Vehicle Brake Fluids*, and FMVSS No. 106 *Brake Hoses*, specify performance requirements for motor vehicle brake fluids and brake hoses. Included in the performance requirements of Standard No. 106, is a brake fluid compatibility test, and included in Standard No. 116 are compatibility, chemical stability, and humidification tests. Referee materials are used to test specimens of brake hose and brake fluid for compliance with the standards' requirements. These materials provide a basis of comparison between the results of the tests and the specifications of the standards. The procedures for the compatibility, chemical stability, and humidification tests currently reference the referee material brake fluid specified by the Society of Automotive Engineers (SAE) in the April 1966 version of SAE Standard J1703b. Standard J1703b, in turn, references a referee material (RM) identified as RM–1. (Standard No. 116's description of SAE Standard J1703b, "Motor Vehicle Brake Fluid," April 1966, is incorrect in that the correct reference should be to J1703b, July 1970. In 1970, the agency proposed to reference test procedures of J1703a, April 1966, in Standard No. 116. Subsequently, NHTSA changed reference from J1703a to J1703b. The effort to make this change inadvertently resulted in showing April 1966, the date of J1703a, as the date of J1703b. This notice corrects the error by referencing J1703b, July 1970.)

This rule amends FMVSS Nos. 116 and 106 to revise the referee materials and test procedures referenced in portions of those standards. The SAE, in its January 1980 and November 1983 revisions of Standard J1703, "Motor Vehicle Brake Fluid," substituted a new referee material, RM–66–03, in place of RM–1 for use in the J1703 compatibility test. This notice adopts this revision and references RM–66–03 for use in the compatibility test of Standard No. 106, and the compatibility and fluid chemical stability tests of Standard No. 116. This notice also references a new referee material, TEGME, in the humidification procedures of Standard No. 116, adjusts the water content level and test temperature referenced in the test procedures, and amends the number of sets of stroking test materials in the stroking test of Standard No. 116. This notice also adopts SAE revisions to FMVSS No. 116's humidification test which had been inadvertently omitted from the amendatory language of the proposed rule, and corrects the description of test procedures used to evaluate brake fluid stroking properties.

Testing Brake Hose/Fluid Characteristics

Brake fluid compatibility is an important factor in establishing brake hose life and strength characteristics. The compatibility test of FMVSS No. 106 measures hydraulic brake hose compatibility with brake fluid. The brake hose test specimen is filled with the SAE Compatibility Fluid for a required number of hours at specified temperatures, and is then subjected to constriction and burst strength tests. Currently, RM–1 fluid is referenced in the test procedures for the standard's brake fluid compatibility test.

Under the compatibility requirements of FMVSS No. 116, the compatibility of a brake fluid with a RM fluid is determined. The compatibility fluid that is used in these tests as a referee material should be representative of the fluids found in a braking system in service. The tests measure the compatibility of fluids of different chemical bases by checking whether there are undesirable chemical interactions resulting from the mixture of fluids. Paragraph S6.10 sets out the procedures for evaluating the compatibility of a brake fluid with other liquids used in a hydraulic brake system (i.e., other brake fluids). This section currently references RM–1 fluid as the referee material used in that test procedure.

The humidification tests of FMVSS No. 116 measure the amount of water absorbed by a brake fluid as compared to a reference fluid. The presence of water in a brake system degrades braking performance and safety by lowering the boiling point of brake fluid, increasing the possibility of vapor lock and the corroding of system components, and the deposition of sediment in wheel cylinders that could cause a system malfunction.

Standard No. 116 establishes minimum wet equilibrium reflux boiling points (ERBP's) for different grades of brake fluid, and the test procedures of S6.2 determine the water content and wet ERBP of brake fluid specimens. The current test procedure specifies that sample fluids of RM–1 and the test specimen are to be humidified simultaneously under controlled conditions. The SAE RM–1 fluid is used as the reference fluid that establishes the "endpoint" for humidification. When the water content of the RM–1 fluid is measured to be 3.50±0.05 percent by weight, the test fluid sample is removed from the humidification apparatus. After humidification, the water content and ERBP of the sample are determined.

Section 7.2 of FMVSS No. 116 also refers to RM–1 fluid as a reference for measuring the water content of brake fluids.

RM–66–03 Fluid

A notice of proposed rulemaking (NPRM) on this rulemaking action was published on March 7, 1985 (50 FR 9294). The NPRM explained that FMVSS Nos. 106 and 116 currently reference SAE RM–1 Compatibility Fluid in their test procedures. In that notice, the agency announced its tentative finding that the inclusion of RM–1 fluid is no longer desirable for the following reasons.

The agency stated its belief that reference to RM–1 fluid should be changed because manufacture of the fluid has ceased. A new fluid, identified as RM–66–03 Compatibility Fluid, has replaced the RM–1 fluid in test procedures described in the January 1980 and November 1983 revisions of SAE Standard J1703. This new fluid is described by the SAE as a blend of four proprietary polyglycol brake fluids of fixed composition, in equal parts by volume. The four fluids selected comprise three factory-fill and one after market fluid as follows: DOW HD50–4, DOW 455, Delco Supreme II, and Olin HDS–79.

While RM–1 fluid is not readily available, RM–66–03 fluid is available from the SAE in the blend and formulation developed by the SAE for J1703. The individual manufacturers of the four proprietary fluids have indicatd to the SAE Brake Fluids Subcommittee and Reference Materials Subcommittee that the proprietary formulation might be changed in the commercial market, but that the formulations developed for the RM–66–03 fluid would be guaranteed to be available for a minimum five-year period commencing May 1983, i.e., at least until May 1988.

The updated reference to RM–66–03 fluid by the SAE is a result of the termination of the manufacturing of the RM–1 fluid. Several of the ingredients contained in the RM–1 fluid are not available to fluid manufacturers since the materials are no longer used in today's fluids, or have become prohibitively costly to obtain. As a result, manufacturers are unwilling to produce more RM–1 fluid.

In addition, RM–1 fluid is not representative of fluids in service today. The agency stated its belief that revising the referee material used in the compatibility test is warranted since the purposes of that test would be better served by a referee material more representative of today's fluids. Inclusion of RM–1 fluid in FMVSS Nos. 116 and 106 is also undesirable because RM–1 fluid contains toxic materials which require elaborate protective procedures and special handling and manufacturing processes.

In consideration of the foregoing, NHTSA proposed an amendment to FMVSS Nos. 106 and 116 to substitute new referee materials for the compatibility and humidification tests. For Standard No. 106's compatibility requirement and test procedures (S5.3.9 and S6.7), and Standard No. 116's compatibility (6.10), fluid chemical stability (6.5), and water content (7.2) tests, the new referee material was proposed to be RM–66–03 fluid as described in the January 1980 version of SAE Standard J1703.

Seven commenters responded to the NPRM. Each commenter agreed with the proposal to reference RM–66–03 fluid in FMVSS Nos. 106 and 116. General Motors Corporation (GM) and Chrysler Corporation agreed with the agency's tentative conclusion that the new referee material would be more available and compatible with current brake fluids than RM–1 fluid. Other commenters believed that the change would be practical and reasonable.

NHTSA has considered the comments to the NPRM and has decided to amend FMVSS Nos. 106 and 116 to reference RM–66–03 compatibility fluid. One slight change has been made to the NPRM's proposal. The NPRM proposed to reference the RM–66–03 fluid as described in the January 1980 revision of SAE Standard J1703. This rule will reference RM–66–03 fluid as described in the November 1983 revision of J1703. The two SAE revisions of J1703 are identical in their descriptions of RM–66–03; the agency is making this change in order to keep FMVSS Nos. 106 and 116 current by referencing the more recent SAE standard.

Use of the RM–66–03 fluid in the test procedures of Standards Nos. 116 and 106 should have a beneficial impact on safety. Since the RM–1 compatibility fluid currently referenced in FMVSS Nos. 106 and 116 is not commercially available, ascertaining whether hoses and fluids comply with certain requirements related to compatibility and boiling points is difficult. Amending the standards to allow the use of RM–66–03 fluid in place of RM–1 provides a readily available compatibility fluid for the compliance tests which is more representative of fluids used in today's vehicles.

TEGME, Brake Fluid Grade

In humidification test procedures under FMVSS No. 116, the referee material fluid is used as a reference to determine when to terminate the humidification procedure. Currently RM–1 fluid is used as this referee material. NHTSA proposed to amend Standard No. 116 to reference a new referee fluid, triethylene glycol monomethyl ether (TEGME), brake fluid grade, as the referee material noted in Standard No. 116's procedures for a brake fluid's wet equilibrium reflux boiling point (S6.2). TEGME has been referenced by the SAE in J1703 Jan 80 and J1703 Nov 83 as the referee material used in the humidification test procedure.

In addition to referencing the TEGME material, the agency also proposed to amend S6.2 of FMVSS No. 116 to adjust the final water content of the referee material fluid to 3.70% water (instead of the current requirement of 3.5%), change the test temperature to 50 °C. (from 23 °C.), and add a cooling period for the sealed jar sample. As explained in the NPRM, those changes (use of TEGME fluid, change in water pickup and test temperature, and the cool-down to room

VOL 51 ISS 87 MY 6 1986 UMI

temperature) were proposed as part of the overall changes adopted from SAE J1703 procedures.

All but one of the commenters to the notice supported the changes to the TEGME fluid. Commenters believed that the changes would simplify the test procedures and make them more cost effective.

In its comment on the NPRM, Union Carbide questioned whether there are adequate data to show that the new humidification test procedure will produce comparable test results when applied to DOT–4 and DOT–5 brake fluids. That commenter suggested that NHTSA reconsider adopting the SAE J1703 Jan 80 humidification test method or adopt it as an alternative to the current method that uses RM–1 fluid until complete comparative testing could be performed.

The agency does not agree with Union Carbide that the humidification test method of SAE J1703 Jan 80 should not be adopted as the new Standard No. 116 test procedure. The TEGME fluid is capable of absorbing a measurable amount of water in a given time and is only used as a reference to determine when to terminate the humidification process. Under the humidification test procedure, samples of brake fluid and TEGME are humidified simultaneously until a measured quantity of fluid is picked up in the TEGME. When the water content of the TEGME fluid reaches 3.7 percent, the brake fluid test specimens are removed from the test apparatus and their water contents and ERBP's are measured. TEGME, the referee material used in the humidification procedure, thus serves only to establish the end point of a test procedure.

The 3.7 percent TEGME water pick up (at 50 °C) corresponds to the 3.5 percent water pickup (at 23 °C) of the referee fluid (RM–1) used previously to determine the end point of the humidification procedure. The agency has determined that DOT–3 fluid picks up the same amount of water when humidified under procedures which use TEGME as the referee material, as it does when humidified under procedures using RM–1. Therefore, the agency believes that the water pickup of test fluids, including DOT–4 and DOT–5 fluids, would not be affected by the change to TEGME. Accordingly, NHTSA is amending FMVSS No. 116 to reference the TEGME referee material.

The NPRM proposed to reference the TEGME fluid as described in the January 1980 revision of SAE Standard J1703. This rule will instead reference TEGME as described in the November 1983 revision of J1703. The two SAE revisions of J1703 are identical in their descriptions of TEGME; the agency is making this change in order to keep FMVSS No. 116 current by referencing the more recent SAE standard.

Humidification Test Procedures

All commenters supported the additional changes to the humidification procedure of S6.2 adopted from SAE Standard J1703. This rule adopts the proposed changes to S6.2 and adjusts the final water content of the referee material fluid to 3.70%, changes the test temperature to 50 °C, and adds a cooling period for the sealed jar sample.

Other changes to the humidification procedure were suggested in the comments to the NPRM. GM and Union Carbide Corporation pointed out that while NHTSA proposed to adopt the humidification test procedures from SAE J1703, the procedural modifications proposed in the amendatory language differed slightly from the SAE standard. GM suggested changing FMVSS No. 116's humidification procedure to agree with that of SAE J1703 Jan 80 in order to facilitate testing. The following changes were suggested: S6.2.1 should be revised to require 150 ml. samples of brake fluid and TEGME instead of the proposed 100 ml. samples; S6.2.3 should be revised to eliminate ammonium sulfate from the list of reagents and materials and to specify distilled water and TEGME; S6.2.4 should be revised to load the dessicators with 450 ml. of distilled water instead of the ammonium sulfate/distilled water slurry; and S6.2.5 should be revised to use 150 ml. samples of the brake fluid and TEGME instead of the proposed 100 ml. samples.

As evidenced by the GM and Union Carbide comments, it was clear that the agency intended to facilitate testing by adopting the overall changes to the humidification test from SAE J1703. Therefore, NHTSA agrees that those additional changes should be incorporated into this final rule. This rule amends S6.2.1, S6.2.3, S6.2.4. and S6.2.5 to correct the minor omissions noted above. Further, S6.2.2 is revised to clarify that distilled water would be substituted for the salt slurry in Figure 3 of FMVSS No. 116, *Humidification Apparatus*, when TEGME is used as the referee material.

Stroking Test

The stroking test in FMVSS No. 116 checks the lubricity effect of a brake fluid on rubber components. The NPRM explained that the SAE had determined, in its revision of J1703 Jan 80, that three sets of test material are sufficient to analyze the adequacy of test results. The notice announced that, based on NHTSA's tentative agreement with that SAE conclusion and its belief that compliance testing costs would be reduced by that change without an adverse effect on safety, the agency was proposing to amend the requirements of S5.1.13 and S6.13 to require testing of only three sets of test material (consisting of wheel cylinders, drums, shoe assemblies, etc.) instead of four sets, and eight new brake cups instead of 10. Since NHTSA proposed to reduce the number of cups tested, a reduction in the number of cups checked for unsatisfactory operating condition was also proposed.

All comments supported the agency's proposal to revise the stroking test procedures. The commenters believed that the changes proposed in the NPRM would simplify the test procedures and make them more cost effective. NHTSA agrees, and has revised S5.1.13 and S6.13 as proposed in the NPRM.

In addition, this rule makes several changes to the stroking test procedures in FMVSS No. 116 which directly relate to the agency's adoption of the SAE stroking test revision. Currently, S6.13.2 describes the apparatus and equipment used for the stroking test and refers to figures in SAE Standard J1703b which depict stroking apparatuses. Figure 1 of J1703b depicts four sets of drum and shoe assemblies. Since NHTSA has reduced the number of sets of test materials to three, the agency believes that the description of the test apparatuses and arrangement of test materials should also be revised to reflect this change. The description of the apparatuses used in the stroking test is changed only to clarify that three sets of materials are used, instead of four.

The following related revisions to the stroking test procedure are necessary to facilitate the change to three sets of materials. Paragraph S6.13.4(c) describes the preparation and assembly of test apparatuses. When a shoe and drum type apparatus is used, S6.13.4(c) specifies a 23 mm. stroke length, based on output piston movement of four sets of wheel cylinders. Stroke length refers to the distance traveled by the master cylinder piston to displace a certain volume of fluid in the test system which, in turn, forces the wheel cylinder pistons to travel a specified distance. Since the stroking test is revised to require only three sets of materials, the stroke length of the master cylinder would no longer be 23 mm.

This rule deletes reference in S6.13.4(c) to exact piston displacement measurements and a 23 mm. stroke length. The agency has determined that it is not necessary to specify master cylinder and wheel cylinder piston travel since those values are determined by the characteristics of the system which are specified in the standard (i.e., dimensions of the master cylinder and wheel cylinders, and pressure). The stroking test apparatus is a closed hydraulic system; pressure of 1,000 pounds per square inch (p.s.i.) is generated at the outlet port of the master cylinder, and all pistons have the same diameters of 1⅛ inch. Given the above, displacement of the wheel cylinders is directly proportional to the displacement of the master cylinder, and in the given test apparatus the stroke length of the master cylinder is dependent on system pressure. Stroke length would therefore be adjusted by the characteristics of the system from the former value of 23 mm. to a value proportioned for three wheel cylinders.

Since the agency is eliminating exact wheel cylinder piston travel measurements and is specifying that only three sets of test materials are required in the stroking test, this rule also deletes reference in S6.13.4(c) to Figure 4 of SAE Standard J1703b. That figure illustrated the approximate pressure buildup versus the master cylinder piston movement, and was based on the use of four sets of materials. S6.13.4(c) would continue, however, to specify that the pressure buildup is relatively low during the first part of the stroke, in order to avoid damage of the master cylinder's primary cup by ensuring that the primary cup passes the compensating port at a relatively low pressure.

Typographical Errors

This notice corrects the typographical errors in S5.1.9(a), S5.1.9(b) and S5.1.12 of Standard No. 116, as proposed in the NPRM.

Effective Date

This rule is effective upon publication in the **Federal Register**. As explained in the NPRM, the agency finds good cause for this expedited effective date because the RM–1 fluid used in the testing procedures of FMVSS Nos. 116 and 106 is commercially unavailable. Use of the RM–66–03 fluid will facilitate compliance testing by utilizing a referee material that is currently available and more representative of fluids in service. However, because the agency is concerned that manufacturers who might still be using RM–1 fluid to test their products should be able to use their existing supplies, use of RM–1 fluid may continue until November 3, 1986, i.e., 180 days after publication of this rule.

In accordance with the above provision permitting the use of RM–1 during the interim period, this rule describes separate test procedures appropriate for use with RM–1 and for the new referee materials (i.e., RM–66–03 and TEGME). Test procedures for RM–1 usage are specified for those manufacturers who choose to use that fluid during the 180-day period.

Environmental Effects

NHTSA has analyzed this final rule under the National Environmental Policy Act and has determined that it would not have a significant effect on the quality of the human environment.

Economic Effects

NHTSA has concluded that this final rule does not qualify as a "major rule" within the meaning of Executive Order 12291, and that it is not "significant" within the meaning of the Department of Transportation's regulatory procedures. Preparation of a regulatory impact analysis is not necessary for this rulemaking. The agency has determined further that the effects of this rulemaking are minor and that a full regulatory evaluation is not warranted. The rule references referee materials in Standards Nos. 116 and 106 that are readily available to manufacturers of brake fluids and brake hoses.

The agency believes that manufacturers will benefit by the change to RM–66–03 fluid and TEGME fluid in FMVSS No. 116 and RM–66–03 fluid in FMVSS No. 106. The fluids are readily available whereas RM–1 is not, and are more representative of fluids in service today. The agency knows of no problems resulting from tests conducted with the RM–66–03 and TEGME fluids.

Some cost savings would be realized with this amendment. The utilization of RM–66–03 fluid will reduce the costs of fluids used in compliance testing without sacrificing adequate test results. For example, as cited in the NPRM, when last available, RM–1 fluid cost approximately $27.00 per quart. The cost of RM–66–03 fluid is approximately $8.00 per quart.

Cost savings will be realized by the use of the TEGME fluid in the humidification tests of FMVSS No. 116. The TEGME fluid costs approximately $3.30 per quart. Further, using the TEGME fluid in compliance testing would conserve the more expensive supply of RM–66–03 brake fluid material.

The change in the stroking test procedures will also result in some cost savings. The costs related to the quantities of materials tested will be reduced about 25 percent.

Any changes to Standard Nos. 106 and 116 referencing the RM–66–03 and TEGME fluids and reducing the number of test materials used in the stroking test will not significantly affect manufacturers of brake hoses and referee materials. These manufacturers may benefit from some cost savings resulting from the changes to the standards, but will not otherwise be significantly affected by this amendment.

NHTSA has considered the impacts of this final rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of brake hoses and referee materials referenced in FMVSS Nos. 116 and 106 are generally not small businesses within the meaning of the Regulatory Flexibility Act. However, even if such manufacturers were considered small businesses within the Regulatory Flexibility Act, the potential costs of this rulemaking are minimal and are outweighed by the potential benefits.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

§ 571.106—[Amended]

In consideration of the foregoing, 49 CFR 571.106, *Brake Hoses*, is amended as follows:

1. The authority citation for Part 571 will continue to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

2. S5.3.9 is revised to read as follows:

S5.3.9 *Brake fluid compatibility, constriction, and burst strength.* Except for brake hose assemblies designed for use with mineral or petroleum-based brake fluids, a hydraulic brake hose assembly shall meet the constriction requirement of S5.3.1 after having been subjected to a temperature of 200 °F for 70 hours while filled with SAE RM–66–03 Compatibility Fluid, as described in Appendix A of SAE Standard J1703 Nov 83, "Motor Vehicle Brake Fluid," November 1983 (S6.7). It shall then withstand water pressure of 4,000 psi for 2 minutes and thereafter shall not rupture at less than 5,000 psi (S6.2). (SAE RM–1 Compatibility Fluid, as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970, may be used in place

VOL 51 ISS 87 MY 6 1986 UMI

of SAE RM–66–03 until November 3, 1986.

3. Paragraph S6.7.1(a) is revised to read as follows:

S6.7.1 *Preparation.*

(a) Attach a hose assembly below a 1-pint reservoir filled with 100 ml of SAE RM–66–03 Compatibility Fluid as shown in Figure 2. (SAE RM–1 Compatibility Fluid, as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970, may be used in place of SAE RM–66–03 until November 3, 1986.

* * * * *

§ 571.116—[Amended]

In consideration of the foregoing, 49 CFR 571.116, *Motor Vehicle Brake Fluids,* is amended as follows:

1. S5.1.9 (a) and (b) introductory texts are revised to read as follows:

S5.1.9 *Water Tolerance.*

(a) *At low temperature.* When brake fluid is tested according to S6.9.3(a)—

* * * * *

(b) *At 60 °C (140 °F).* When brake fluid is tested according to S6.9.3(b)—

* * * * *

2. S5.1.12 introductory text is revised to read as follows:

S5.1.12 *Effects on cups.* When brake cups are subjected to brake fluid in accordance with S6.12—

* * * * *

3. S5.1.13 (c), (d), (e), and (f) are revised to read as follows:

S5.1.13 *Stroking properties.* When brake fluid is tested according to S6.13—

* * * * *

(c) The average decrease in hardness of seven of the eight cups tested (six wheel cylinder and one master cylinder primary) shall not exceed 15 IRHD. Not more than one of the seven cups shall have a decrease in hardness greater than 17 IRHD;

(d) None of the eight cups shall be in an unsatisfactory operating condition as evidenced by stickiness, scuffing, blisters, cracking, chipping, or other change in shape from its original appearance;

(e) None of the eight cups shall show an increase in base diameter greater than 0.90 mm (0.035 inch);

(f) The average lip diameter set of the eight cups shall not be greater than 65 percent.

* * * * *

4. S6 is revised to read as follows:

S6. *Test procedures.* Until November 3, 1986, SAE RM–1 Compatibility Fluid, as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970, may be used in place of TEGME and SAE RM–66–03 in the humidification (S6.2), chemical stability (S6.5.4), and compatibility (S6.10) test procedures, and as a referee material in S7.2.

* * * * *

5. S6.2.1 is revised to read as follows:

S6.2.1 *Summary of the procedure.*

(a) *With TEGME:* Except as provided in paragraph S6.2.1(b), a 150 ml. sample of the brake fluid is humidified under controlled conditions; 150 ml. of SAE triethylene glycol monomethyl ether, brake fluid grade, referee material (TEGME) as described in Appendix E of SAE Standard J1703Nov83, "Motor Vehicle Brake Fluid," November 1983, is used to establish the end point for humidification. After humidification the water content and ERBP of the brake fluid are determined.

(b) *With RM–1:* Until November 3, 1986, SAE RM–1 Compatibility Fluid, as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970, may be used with the following procedures. See S6. A 100-ml sample of the brake fluid is humidified under controlled conditions; 100 ml. of SAE RM–1 Compatibility Fluid is used to establish the end point for humidification. After humidification the water content and ERBP of the brake fluid are determined.

6. S6.2.2. introductory text is revised to read as follows:

S6.2.2 *Apparatus for humidification.* (See Figure 3. November 3, 1986, a manufacturer may use either TEGME or RM–1 Compatibility Fluid. If TEGME is used, substitute 450 ml. of distilled water in place of the salt slurry and disregard the "45±7 mm." dimension.)

Test apparatus shall consist of—

* * * * *

7. S6.2.3 is revised to read as follows:

S6.2.3 *Reagents and Materials.*

(a) Distilled water, see S7.1.

(b) Except as provided in S6.2.3(c), SAE TEGME referee material.

(c) Until November 3, 1986, a manufacturer may use either TEGME or SAE RM–1 Compatibility Fluid. See S6.

(d) If RM–1 is used, also use ammonium sulfate $(NH_4)_2SO_4$, Reagent or A.C.S. grade.

8. S6.2.4 is revised to read as follows:

S6.2.4 *Preparation of Apparatus.*

(a) *With TEGME:* Except as provided in S6.2.4(b), lubricate the ground-glass joint of the desiccator. Pour 450±10 ml of distilled water into each desiccator and insert perforated porcelain desiccator plates. Place the desiccators in an oven with temperature controlled at 50±1 °C (122±1.8 °F) throughout the humidification procedure.

(b) *With RM–1:* Until November 3, 1986, a manufacturer may use either TEGME or SAE RM–1 Compatibility Fluid. See S6. Lubricate the ground-glass joint of the desiccator. Load each desiccator with 450±25 grams of the ammonium sulfate and add 125±10 ml. of distilled water. The surface of the salt slurry shall lie within 45±7 mm. of the top surface of the desiccator plate. Place the desiccators in an area with temperature controlled at 23±2 °C. (73.4±3.6 °F.) throughout the humidification procedure. Condition the loaded desiccator with the covers on the stoppers in place at least 12 hours before use. Use a fresh charge of salt slurry for each test.

9. S6.2.5 is revised to read as follows:

S6.2.5 *Procedure.*

(a) *With TEGME:* Except as provided by S6.2.5(b), pour 150±5 ml of the brake fluid into an open corrosion test jar. Place the jar into a desiccator. Prepare in the same manner a duplicate test fluid sample and two duplicate specimens of the SAE TEGME referee material (150±4 ml of TEGME in each jar). The water content of the SAE TEGME fluid is adjusted to 0.50±0.05 percent by weight at the start of the test in accordance with S7.2. Place these samples in the desiccators in the 50 °C (122°F) controlled oven and replace desiccator covers. At intervals, during oven humidification, remove the rubber stopper in the top of each desiccator containing SAE TEGME fluid. Using a long needled hypodermic syringe, take a sample of not more than 2 ml from each jar and determine its water content. Remove no more than 10 ml of fluid from each SAE TEGME sample during the humidification procedure. When the water content of the SAE fluid reaches 3.70±0.05 percent by weight (average of the duplicates), remove the two test fluid specimens from their desiccators and promptly cap each jar tightly. Allow the sealed jars to cool for 60–90 minutes at 23±5 °C (73.4±9 °F). Measure the water contents of the test fluid specimens in accordance with S7.2 and determine their ERBP's in accordance with S6.1. If the two ERBP's agree within 4 °C (8 °F), average them to determine the wet ERBP; otherwise repeat and average the four individual ERBP's as the wet ERBP of the brake fluid.

(b) *With RM–1:* Until November 3, 1986, a manufacturer may use either TEGME or SAE RM–1 Compatibility Fluid. See S6. Pour 100±1 ml of the brake fluid into a corrosion test jar. Promptly place the jar into a desiccator. Prepare duplicate test sample, and two duplicate specimens of the SAE RM–1 compatibility fluid. Adjust water content of the SAE RM–1 fluid to 0.50±0.05 percent by weight at the start of the test in accordance with S7.2. At intervals

remove the rubber stopper in the top of each desiccator containing SAE RM–1 fluid. Using a long needled hypodermic syringe, take a sample of not more than 2 ml from each jar and determine its water content. Remove no more than 10 ml of fluid from each SAE RM–1 sample during the humidification procedure. When the water content of the RM–1 fluid reaches 3.50±0.05 percent by weight (average of the duplicates), remove the two test fluid specimens from their desiccators and promptly cap each jar tightly. Measure the water contents of the test fluid specimens in accordance with S7.2 and determine their ERBP's in accordance with S6.1 through S6.1.5. If the two ERBP's agree within 4 °C. (8 °F.), average them to determine the wet ERBP; otherwise repeat and average the four individual ERBP's as the wet ERBP of the brake fluid.)

10. S6.5.4.1 is revised to read as follows:

S6.5.4.1 *Materials.*

(a) Except as provided in S6.5.4.1(b), SAE RM–66–03 Compatibility Fluid, as described in Appendix A of SAE Standard J1703Nov83, "Motor Vehicle Brake Fluid," November 1983.

(b) Until November 3, 1986, a manufacturer may use either SAE RM–66–03, or SAE RM–1 Compatibility Fluid as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970. See S6.

11. Paragraph S6.5.4.2 is revised to read as follows:

S6.5.4.2 *Procedure.*

(a) *With RM–66–03:* Except as provided in S6.5.4.2(b), mix 30±1 ml of the brake fluid with 30±1 ml of SAE RM–66–03 Compatibility Fluid in a boiling point flash (S6.1.2(a)). Determine the initial ERBP of the mixture by applying heat to the flask so that the fluid is refluxing in 10±2 minutes at a rate in excess of 1 drop per second, but not more than 5 drops per second. Note the maximum fluid temperature observed during the first minute after the fluid begins refluxing at a rate in excess of 1 drop per second. Over the next 15±1 minutes, adjust and maintain the reflux rate at 1 to 2 drops per second. Maintain this rate for an additional 2 minutes, recording the average value of four temperature readings taken at 30-second intervals as the final ERBP.

(b) *With RM–1:* Until November 3, 1986, a manufacturer may use either RM–66–03, or SAE RM–1 Compatibility Fluid as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970. See S6.

(c) Thermometer and barometic corrections are not required.

12. S6.10.1 is revised to read as follows:

S6.10.1 *Summary of the procedure.*

(a) *With RM–66–03:* Except as provided in S6.10.1(b), brake fluid is mixed with an equal volume of SAE RM–66–03 Compatibility Fluid, then tested in the same way as for water tolerance (S6.9) except that the bubble flow time is not measured. This test is an indication of the compatibility of the test fluid with other motor vehicle brake fluids at both high and low temperatures.

(b) *With RM–1:* Until November 3, 1986, a manufacturer may use either RM–66–03, or SAE RM–1 Compatibility Fluid as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970. See S6. This test is an indication of the compatibility of the test fluid with other motor vehicle brake fluids at both high and low temperatures.

13. Paragraph S6.10.2(e) is revised and (f) is added to read as follows:

S6.10.2 *Apparatus and materials.*

* * * * *

(e) Except as provided in S6.10(f), *SAE RM–66–03 Compatibility Fluid.* As described in Appendix A of SAE Standard J1703Nov83, "Motor Vehicle Brake Fluid," November 1983.

(f) Until November 3, 1986, a manufacturer may use either RM–66–03, or SAE RM–1 Compatibility Fluid as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970. See S6.

14. Paragraph S6.10.3(a) is revised to read as follows:

S6.10.3 *Procedure.*

(a) *At low temperature.*

(1) *With RM–66–03:* Except as provided in S6.10.3(a)(2), mix 50±0.5 ml. of brake fluid with 50±0.5 ml. of SAE RM–66–03 Compatibility Fluid. Pour this mixture into a centrifuge tube and stopper with a clean dry cork. Place tube in the cold chamber maintained at minus 40°±2 °C (minus 40°±3.6 °F). After 24±2 hours, remove tube, quickly wipe with a clean lint-free cloth saturated with ethanol (isopropanol when testing DOT 5 fluids) or acetone. Examine the test specimen for evidence of sludging, sedimentation, or crystallization. DOT 3 and DOT 4 test fluids shall also be examined for stratification.

(2) *With RM–1:* Until November 3, 1986, a manufacturer may use either RM–66–03, or SAE RM–1 Compatibility Fluid as described in Appendix A of SAE Standard J1703b, "Motor Vehicle Brake Fluid," July 1970. See S6.

* * * * *

15. S6.13.1 is revised to read as follows:

S6.13.1 *Summary of the procedure.* Brake fluid is stroked under controlled conditions at an elevated temperature in a simulated motor vehicle hydraulic braking system consisting of three slave wheel cylinders and an actuating master cylinder connected by steel tubing. Referee standard parts are used. All parts are carefully cleaned, examined, and certain measurements made immediately prior to assembly for test. During the test, temperature, rate of pressure rise, maximum pressure, and rate of stroking are specified and controlled. The system is examined periodically during stroking to assure that excessive leakage of fluid is not occurring. Afterwards, the system is torn down. Metal parts and SBR cups are examined and remeasured. The brake fluid and any resultant sludge and debris are collected, examined, and tested.

16. S6.13.2 introductory text, (a), (c), and (f) are revised to read as follows:

S6.13.2 *Apparatus and equipment.*

Either the drum and shoe type of stroking apparatus (see Figure 1 of SAE Standard J1703b) except using only three sets of drum and shoe assemblies, or the stroking fixture type apparatus as shown in Figure 2 of SAE J1703Nov83, with the components arranged as shown in Figure 1 of SAE J1703Nov83. The following components are required.

(a) *Brake assemblies.* With the drum and shoe apparatus: three drum and shoe assembly units (SAE RM–29a) consisting of three forward brake shoes and three reverse brake shoes with linings and three front wheel brake drum assemblies with assembly component parts. With stroking fixture type apparatus: three fixture units including appropriate adapter mounting plates to hold brake wheel cylinder assemblies.

* * * * *

(c) *Heated air bath cabinet.* An insulated cabinet or oven having sufficient capacity to house the three mounted brake assemblies or stroking fixture assemblies, master cylinder, and necessary connections. A thermostatically controlled heating system is required to maintain a temperature of 70°±5 °C (158°±9 °F) or 120°±5 °C (248°±9 °F). Heaters shall be shielded to prevent direct radiation to wheel or master cylinder.

* * * * *

(f) *Wheel cylinder (WC) assemblies (SAE RM–14a).* Three unused cast iron housing straight bore hydraulic brake WC assemblies having diameters of

VOL 51 ISS 87 MY 6 1986 UMI

approximately 28 mm (1⅛ inch) for each test. Pistons shall be made from unanodized SAE AA 2024 aluminum alloy.

* * * * *

17. Paragraph S6.13.3(a) is revised to read as follows:

S6.13.3 *Materials.*

(a) *Standard SBR brake cups.* Six standard SAE SBR wheel cylinder test cups, one primary MC test cup, and one secondary MC test cup, all as described in S7.6, for each test.

* * * * *

18. Paragraph S6.13.4(c) is revised to read as follows:

S6.13.4 *Preparation of test apparatus.*

* * * * *

(c) *Assembly and adjustment of test apparatus.*

(1) When using a shoe and drum type apparatus, adjust the brake shoe toe clearances to 1.0±0.1 mm. (0.040±0.004 inch). Fill the system with brake fluid, bleeding all wheel cylinders and the pressure gage to remove entrapped air. Operate the actuator manually to apply a pressure greater than the required operating pressure and inspect the system for leaks. Adjust the actuator and/or pressure relief valve to obtain a pressure of 70±3.5 kg./sq. cm. (1,000±50 p.s.i.). A smooth pressure-stroke pattern is required when using a shoe and drum type apparatus. The pressure is relatively low during the first part of the stroke and then builds up smoothly to the maximum stroking pressure at the end of the stroke, to permit the primary cup to pass the compensating hole at a relatively low pressure. Using stroking fixtures, adjust the actuator and/or pressure relief valve to obtain a pressure of 70±3.5 kg./sq. cm. (1,000±50 p.s.i.).

(2) Adjust the stroking rate to 1,000±100 strokes per hour. Record the fluid level in the master cylinder standpipe.

19. S6.13.6(b) and S6.13.6(c) are revised to read as follows:

S6.13.6 *Calculation.*

* * * * *

(b) Calculate the average decrease in hardness of the seven cups tested, as well as the individual values (see S5.1.13(c)).

(c) Calculate the increases in base diameters of the eight cups (see S5.1.13(e)).

* * * * *

20. The first sentence of Paragraph S6.13.6(d) is revised to read as follows:

* * * * *

(d) Calculate the lip diameter interference set for each of the eight cups by the following formula and average the eight values (see S5.1.13(f)).

* * * * *

21. S7.2 is revised to read as follows:

S7.2 *Water content of motor vehicle brake fluids.* (a) Use analytical methods based on ASTM D1123–59, "Standard Method of Test for Water in Concentrated Engine Antifreezes by the Iodine Reagent Method," for determining the water content of brake fluids, or other methods of analysis yielding comparable results. To be acceptable for use, such other method must measure the weight of water added to samples of the SAE RM–66–03 and TEGME Compatibility Fluids within ±15 percent of the water added for additions up to 0.8 percent by weight, and within ±5 percent of the water added for additions greater than 0.8 percent by weight. The SAE RM–66–03 Compatibility Fluid used to prepare the samples must have an original ERBP of not less than 205 °C (401 °F) when tested in accordance with S6.1. The SAE TEGME fluid used to prepare the samples must have an original ERBP of not less than 240 °C (464 °F) when tested in accordance with S6.1.

(b) Until November 3, 1986, a manufacturer may use either RM–66–03 and TEGME or SAE RM–1 Compatibility Fluid. See S6. To be acceptable for use, such other method must measure the weight of water added to samples of the SAE RM–1 Compatibility Fluid within ±15 percent of the water added for additions up to 0.8 percent by weight, and within ±5 percent of the water added for additions greater than 0.8 percent by weight. The SAE RM–1 Compatibility Fluid used to prepare the samples must have an original ERBP of not less than 182 °C. (360 °F.) when tested in accordance with S6.1.

Issued on April 29, 1986.

Diane K. Steed,

Administrator.

BILLING CODE 4910–59–M

Proposed Rules

Federal Register
Vol. 51, No. 87
Tuesday, May 6, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 831

Retirement

AGENCY: Office of Personnel Management.

ACTION: Proposed rulemaking.

SUMMARY: The Office of Personnel Management (OPM) is proposing to revise its civil service retirement regulations to formally establish an order of precedence for applying installments paid by individuals to cover past civilian service not currently covered by retirement deductions. These regulations would give the public notice of the order of precedence now applied by OPM.

DATE: Comments must be received on or before July 7, 1986.

ADDRESS: Send comments to Reginald M. Jones, Jr., Assistant Director for Pay and Benefits Policy, Compensation Group, Office of Personnel Management, P.O. Box 57, Washington, DC 20044, or deliver to OPM, Room 4351, 1900 E Street, NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mary Angel, (202) 632–1285.

SUPPLEMENTARY INFORMATION: The Civil Service Retirement (CSR) law (5 U.S.C. 8334 (c) and (d)) allows employees to make payments for periods of past civilian service not covered by retirement deductions. (Payments to cover military service are also permitted but are not pertinent here). In OPM regulations, the payments are termed "deposits" when they apply to periods when CSR deductions were not originally taken from pay. The basic amount due represents the amount of deductions that would have been taken if the period of service had been subject to CSR deductions. OPM uses the term "redeposits" when the payments apply to periods previously covered by deductions that were later refunded to the employee. The basic amount due is the amount of the refund paid.

The law requires OPM to add an interest charge on both deposits and redeposits. Interest rates are established under subsection (e) of section 8334 of title 5, United States Code. Beginning in 1985, the rate changed from 3 percent to an annually-variable rate reflecting the average yield on new interest-bearing securities purchased by the Civil Service Retirement Fund during the previous fiscal year. The 1985 rate is 13 percent, but that rate applies only to deposits for service performed after September 1982, and to redeposits of amounts paid on refund applications filed after September 1982. The 3 percent rate applies to all other deposits and redeposits, except that a 4 percent rate would still apply for interest computations before 1948.

Accordingly, there are now four kinds of civilian service that must be distinguished in computing interest on deposits and redeposits: (1) 13 percent redeposits; (2) 3 percent (or 4%) redeposits; (3) 13 percent deposits; and (4) 3 percent (or 4%) deposits. An employee may have any combination.

Because installment payments are permitted, OPM uses an order of precedence in deciding how to apply the installments as they are received. The order of precedence currently in use is the order numbered (1) through (4) above. OPM believes that this is the appropriate order of precedence since it automatically applies the payments first to reduce previous refunds of deductions and second to cover any nondeduction service.

Because the total amount paid by an individual depends on, among other things, the combination of types of service involved, the monetary impact of the order of precedence may vary from case to case. Moreover, the law allows individuals a choice of whether or not to pay into the Fund for any period of service. Therefore, the attached proposed regulations would permit a qualified employee to request OPM to use a different order of precedence when applying installment payments to the balance outstanding for more than one category of service.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that, within the scope of the Regulatory Flexibility Act, this regulation will not have a significant economic impact on a substantial number of small entities because it would affect Federal employees only.

List of Subjects in 5 CFR Part 831

Administrative practice and procedure, Claims, Disability benefits, Firefighters, Government employees, Income taxes, Intergovernmental relations, Law enforcement officers, Pensions, Retirement.

U.S. Office of Personnel Management.

Constance Horner,

Director.

Accordingly, OPM proposes to amend 5 CFR Part 831 as follows:

PART 831—RETIREMENT

1. The authority citation for Subpart A of Part 831 is added to read as follows:

Authority: 5 U.S.C. 8347; § 831.102 also issued under 5 U.S.C. 8334; § 831.106 also issued under 5 U.S.C. 552a; § 831.108 also issued under 5 U.S.C. 8336(d)(2).

2. Section 831.105 is amended by adding paragraph (h) to read as follows:

§ 831.105 Computation of interest.

* * * * *

(h) When an individual's civilian service involves several deposit and/or redeposit periods, OPM will normally use the following order of precedence in applying each installment payment against the full amount due: (1) Redeposits of refunds paid on applications received by the individual's employing agency or OPM on or after October 1, 1982; (2) Redeposits of refunds paid on applications received by the individual's employing agency or OPM before October 1, 1982; (3) Deposits for noncontributory civilian service performed on or after October 1, 1982; and (4) Deposits for noncontributory service performed before October 1, 1982.

However, if the individual specifically requests a different order of precedence, the request will be honored.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1240

[Docket No. HRPCIA-1]

Honey Research, Promotion, and Consumer Information Order; Decision and Referendum Order on Proposed Order

AGENCY: Agricultural Market Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision proposes a Honey Research, Promotion, and Consumer Information Order and provides honey producers and importers with the opportunity to vote in a referendum on the proposed order. The proposed order would authorize establishment of projects relating to research, consumer information, advertising, sales promotion, producer information, and market development to assist, improve, or promote the marketing, distribution, and utilization of honey and honey products.

DATE: The representative period for purposes of the referendum herein ordered is January 1, 1984 to December 31, 1984. The referendum shall be conducted between May 19 and May 31, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250, telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION:

Prior Documents in This Proceeding

Pre-notice press release issued May 29, 1985; Notice of Hearing—Issued June 25, 1985, and published June 28, 1985 (50 FR 26942). Correction of Docket Number, published July 12, 1985 (50 FR 28404). Recommended Decision—Issued January 23, 1986, and published January 29, 1986 (51 FR 3605).

Preliminary Statement

This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is not subject to the requirements of Executive Order 12291.

This notice is issued pursuant to the applicable rules of practice and procedure governing proceedings to formulate and amend an order (7 CFR Part 1200). Any order that may result from this proceeding would be effective pursuant to the provisions of the Honey Research, Promotion, and Consumer Information Act, hereafter referred to as the "Act" (7 U.S.C. 4601-4612).

The proposed order was formulated on the record of a public hearing with sessions in Washington, DC, on July 16, 1985, and Denver, Colorado, on July 30, 1985. Notice of the sessions was published in the June 28, 1985, issue of the Federal Register (50 FR 26942). That notice contained a proposed order submitted by the American Beekeeping Federation, Inc. (ABF).

The Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 et seq). As stated in the notice of hearing, interested persons were invited to present evidence at the hearing on the probable regulatory and informational impacts of the proposal on small business. Based on the record evidence, a sizeable majority of the honey producers and handlers could be considered small businesses for the purposes of the RFA. In that regard testimony was presented that the production, harvesting, and preparation of honey for market is relatively similar among all honey producers. No clear relationship could be drawn between the size of producers and corresponding costs. No testimony was presented on handler costs or variations of these costs.

Honey is produced and/or marketed in all fifty States including the District of Columbia and the Commonwealth of Puerto Rico. The top twenty honey producing States produce about 80 percent of the total domestic honey production. The record shows that substantial quantities of honey and honey products are imported into and exported from the United States. The record also indicates that there are numerous honey handlers who receive honey from producers, process it, and market it. At least one of these handlers has nationwide distribution.

Honey production in the United States approximates 200 million pounds annually, although there is some year-to-year fluctuation due to weather conditions. The 1981 value of U.S. production of honey was about $90.1 million. This was based on 4.2 million colonies of bees with an average honey yield per colony of 44 pounds.

The record evidence shows that the honey industry is made up of many small entities, and some larger entities, engaged in the production and marketing of honey. In general, there are three categories of honey producers; the hobbyist, the part-time beekeeper or sideliner, and commercial beekeepers. Because the order exempts persons who produce or import less than 6,000 pounds of honey per year, hobbyist beekeepers and a significant number of sideline beekeepers would not be required to pay assessments under this order. One witness cited a 1975 International Trade Commission study which estimated that there were about 10,000 sideline beekeepers and about 1,600 commercial beekeepers in the United States at that time.

The record indicates that the world market price of honey is now far below the cost of production in the U.S. This, coupled with the strength of the U.S. dollar relative to other currencies, has encouraged large quantities of honey to be imported into the United States. According to the record evidence, importations of honey have increased from 10.6 million pounds in 1973 to 128.6 million pounds in 1984. During this period, honey under government loan with the Commodity Credit Corporation increased from zero during the 1970's to almost 115 million pounds in 1984.

The record indicates that various organizations operate promotional activities. Most States have state beekeeping associations which represent a group of people with a common interest, namely to promote honey and beekeeping in that particular State. Some state associations collect an assessment for promotional purposes. The California Honey Advisory Board, which is funded through an assessment program, has been in operation since 1952. It has conducted several honey promotion campaigns and published a well-known honey cookbook. These efforts tend to be independent of one another and operate on a relatively small scale compared to the proposed national program.

At one time, the American Honey Institute conducted a national promotion effort, which was funded through a voluntary check-off plan. It published recipes and provided information on uses of honey through food service editors. After several years of operation, participation in the program fell to such a low level that the Institute ceased operations. Since then, the only national promotional effort has been by the American Beekeeping Federation (ABF), which devotes about one-third of its annual budget to promotion. Its promotional efforts include the American Honey Queen Program, printing and distribution of honey recipe leaflets, and development and distribution of bulk recipes to school food service personnel.

While the efforts of the ABF and others have been helpful, the record evidence is that much more must be done to increase domestic consumption. Statistics in the record indicate that the total per capita consumption of all sweeteners, including honey, in the U.S. is 128 pounds annually. Of that amount, slightly more than one pound is honey, which compares with over three pounds per person in other countries. The evidence of record is that the American honey industry needs and would benefit from a program to promote the domestic consumption of honey and honey products through promotion and advertising and market research to increase consumer awareness of honey and increase its consumption.

The evidence also is that funds to finance these activities must be obtained by the honey industry through a structure such as the proposed order to assure industry-wide participation and sufficient income on a regular basis to finance those activities. Various alternatives to this national program have been considered, and, in some cases previously tried, but without success. If adopted by producers, this national program would collect one cent per pound of honey, or less than two percent of the gross revenue generated by producers annually. The recordkeeping and report requirements of the order are minimal.

These requirements have been carefully evaluated against the potential benefits of the program. While the order imposes regulations on affected businesses, the added burden resulting from these requirements should not be significant when compared to the benefits which are expected to accrue to such businesses. All entities would be treated equally under the order. Furthermore, pursuant to the Act, the order provides for the exemption of all honey producers and importers who produce or import less than 6,000 pounds of honey annually. This exemption was included in the Act to reduce the burden on small business.

The record supports the view that additional promotion would benefit the honey industry by enabling it to reach more potential consumers. Also, the industry would benefit from an organization unifying those in the industry desiring to promote honey and honey products. This would be achieved by making the contribution of funds by producers and importers mandatory. However, these contributors will have the right to obtain a refund of their assessments if they choose not to support the program.

It has been determined that the program should be submitted to producers and importers for a referendum vote.

Rulings on Briefs of Interested Parties

At the conclusion of the hearing the Administrative Law Judge fixed August 30, 1985, as the final date for interested parties to file proposed findings, conclusions, and written arguments or briefs based upon the evidence received at the hearing. No briefs were filed.

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Agricultural Marketing Service, on January 23, 1986, filed with the Hearing Clerk, U.S. Department of Agriculture, the recommended decision containing the notice of the opportunity to file written exceptions thereto. Exceptions were received from Binford Weaver, Past President, American Beekeeping Federation, Inc.; E. Randall Johnson, President, American Beekeeping Federation, Inc., and President, Honeygold Corporation; Frank A. Robinson, Secretary/Treasurer, American Beekeeping Federation, Inc.; Troy H. Fore, Jr., Editor/Publisher *The Speedy Bee;* Harry Rodenburg, Chairman of the Board, Sioux Honey Association; Larry Gunther, Immediate Past-President, American Beekeeping Federation, Inc.; Joe Graham, Editor, *American Bee Journal;* Melaine A. Odlum, Extension Apiculturalist, Maryland Department of Agriculture; Mel Disselkoen, President, International Mating Nuc, Inc.; Reg Wilbanks, Wilbanks Apiaries, Inc.; Alan King, Executive Committee, American Beekeeping Federation, Inc.; Gary Becker, Becker's Busy Bee, Inc.; Morris Weaver, Howard Weaver and Sons, Inc.; William Waugh, Waugh Apiaries, Inc.; L. John Milham, Director, Sioux Honey Association; Loys O. Milham, Robert B. White, Owner/Manager, Sandwich Island Jams and Honey; Joann Manes Olstrom, Owner, Bees and Bylines; Frank Randall, Randall's Wax Works; Charlie G. Miller, Director, Sioux Honey Assn.; Donald R. Schmidt, Schmidt's Honey Farms; and Carol Miller, Secretary/Treaturer, Wyoming Beekeepers Assn. Comments were also received from 221 others representing honey associations, cooperatives, importers, and individuals, all of whom supported the general findings and conclusions of the recommended decision. In addition, there were three comments received opposing the order in general and three were received discussing the government price support program. Discussions and rulings included in the discussions of the material issues, findings and conclusions, rulings, and general findings of the recommended decision set forth in the January 29, 1986 issue of the Federal Register (51 FR 3605) are hereby approved and adopted subject to modifications as hereinafter set forth. On the basis of the exceptions filed by February 28, 1986, this decision grants two exceptions to the recommended decision and denies three exceptions. A minor change in Board voting requirements, a change in the definition of producer, and a number of other minor changes, which are incorporated into the decision, are added for clarity and to correct grammatical and typographical errors.

Findings and Conclusions

The material issues, findings and conclusions, rulings, general findings, and regulatory provisions of the recommended decision published in the January 29, 1986, issue of the Federal Register (51 FR 3605) are hereby incorporated herein and made a part thereof subject to the following modifications and corrections:

The findings and conclusions in material issue 3(a) of the recommended decision concerning the definition of producers are amended by adding a new paragraph after the sixth paragraph to read as follows:

"Messrs. Weaver and King filed exceptions stating that the discussion on the definition of producer was misconstrued and that testimony at the hearing was concerned only with the owners and operators of honey bee colonies and beekeeping equipment and about the various types of rental and lease arrangements that might be made among owners and operators. Both commentors suggested that "honey bee colonies and beekeeping equipment," rather than "land" and "farmland" would more accurately express the intent of testimony given at the hearing. Since the proposed order supports assessments on producers and importers and not persons who own land, this exception is granted and the decision is modified accordingly."

The findings and conclusions in material issue 3(b) of the recommended decision concerning quorums are amended by adding a new paragraph after the eighteenth paragraph to read as follows:

"Messrs. Weaver, King, and Fore filed exceptions which pointed out that § 1240.35 (a) of the order and the discussion on that section contained in the recommended decision (FR 3610) were inconsistent. A quorum is defined in the recommended order as a majority of the 13 member Board (seven members), and any action of the Board requires the concurring votes of a majority of those present and voting.

VOL 51 ISS 87 MY 6 1986 UMI

The discussion defined a quorum as nine members and stipulated that at least seven of the nine members voting would be necessary for an action of the Board to be recommended. The record evidence supports a determination that seven members should constitute a quorum, and that a majority of those present and voting must concur before any action of the Board can be recommended. In addition, the proposed order also provides that a majority of a seven member quorum be required for any action of the Board. The discussion is hereby modified to reflect the evidence of record."

The findings and conclusions in material issue 3(d) of the recommended decision concerning the one-cent assessment are amended by adding a new paragraph as the last paragraph to read as follows:

"Ms. Olstrom and Mr. Becker filed exceptions asking that the one-cent assessment be reduced. The Honey Research, Promotion, and Consumer Information Act stipulates that any order issued under it contains a minimum of one cent assessment. Therefore, the exception is denied."

The findings and conclusions in material issue 3(h) of the recommended decision concerning recordkeeping and reports are amended by deleting the third paragraph in its entirety and adding the following in lieu thereof:

"Any reports and records submitted for Board use by the first handler should remain confidential and be disclosed to no person other than the Secretary and persons authorized by the Secretary. Under certain circumstances, the release of information compiled from reports may be helpful to the Board and the industry generally in planning for operations under the order. Section 1240.52(c) of the proposal included in the notice of hearing stated that the names and addresses of those persons receiving refunds should not be considered confidential information."

"It has been and continues to be the policy of USDA not to publish nor to authorize administrative committees and boards responsible for the administration of research and promotion programs, involving voluntary assessment provisions, to make public the names of persons requesting refunds. It is the Department's view that publication of the names of producers and importers seeking refunds would adversely impact upon participation in the honey order program. Although several exceptions were filed objecting to the Department's determination to remove § 1240.52(c) from the proposal, it has been determined that for the reasons stated herein the proposed provision should be deleted."

The findings and conclusions in material issue 3(i) of the recommended decision concerning the use of funds generated by any patents, copyrights, publications, or inventions are amended by adding a new paragraph as the last paragraph to read as follows:

Mr. Disselkoen filed an exception to § 1240.67 stating the patents should be owned by beekeepers and packers under the trust of the Board. If assessments are used to develop patents, it is only proper that any funds generated as a result of patents, copyrights, publications, or inventions, after sufficient royalty is paid to the inventor of the patented invention, be the property of the Board and would be treated as assessments funds. Therefore, the exception is denied.

The following corrections implement the changes outlined above and correct any typographical and grammatical errors contained in the recommended decision:

Page	Column	Paragraph	Line	Correction
3608	1	3	13	"Farmland" to "honey bee colonies or beekeeping equipment."
3608	2	1	3	"Land" to "honey bee colonies or beekeeping equipment."
3608	2	1	3	"Farm" to "operate."
3608	2	1	9	"On land" to "honey bee colonies or beekeeping equipment."
3610	3	4	10	"Hire" to "serve".
3610	3	4	14	"Seven members" to "a majority of those present and voting."
3611	3	1	2	"And" to "any."
3615	3	(1)	2	Comma after "Promotion."
3610	2	4	5	"Produces" to "produces."
3610	1	2	1	"Iow" to "Iowa."
3610	1	2	8	"Operting" to "operating."
3619	1	2	14	"§ 1240.1" to "§ 1240.41."
3619	1	2	15	"Assessment" to "assessments."

[1] Heading.

Ruling on exceptions

In arriving at the findings and conclusions, and the regulatory provisions of this decision, the exceptions to the recommended decision were carefuly and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions and the regulatory provisions of this decision are at variance with the exceptions, such exceptions are hereby denied for the reasons previously stated in this decision.

General Findings

Upon the basis of the evidence introduced at such hearing, and the record thereof, it is found that:

(1) The order, and all of the items and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The said order regulates the marketing of honey and honey products in the "States" in the same manner as, and is applicable only to persons in the respective classes of commercial or industrial activity specified in, a proposed order upon which a hearing has been held;

(3) The said order is limited in its application to the only marketing area which is practicable consistent with carrying out the declared purposes of the Act; and

(4) The marketing of honey and honey products in the "States," as defined in said order, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce. *It is hereby ordered,* that this entire decision be published in the **Federal Register.**

Referendum Order

It is herby directed that a referendum be conducted for the Honey Order in accordance with the procedure for the conduct of referenda (7 CFR Part 1240.200) to determine whether the issuance of the Honey Order is approved or favored by the producers and importers as defined under the terms of the order, who during the representative period were engaged in the production or importation of honey or honey products within the States as defined in this order. The referendum ballot shall provide only for the approval or disapproval of the order. The representative period is hereby determined to be January 1, 1984 through December 31, 1984. The Agents of the Secretary to conduct the referenda are hereby designated to be Jerry W. Brooks and James B. Wendland, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250. The referendum shall be conducted between May 19 and May 31, 1986.

Signed this day at Washington, DC, May 2, 1986.

Alan T. Tracy,

Acting Assistant Secretary, Marketing and Inspection Service.

List of Subjects in 7 CFR Part 1240

Honey, Agricultural Research, Reporting and Recordkeeping Requirements, Market Development, and Consumer Information.

Final Order

The following order shall be the detailed means by which the foregoing conclusions may be carried out:

Chapter XI of Title 7 shall be amended by adding Part 1240 to read as follows:

PART 1240—HONEY RESEARCH, PROMOTION, AND CONSUMER INFORMATION ORDER

Definitions

Sec.
1240.1 Secretary.

Authority: Honey Research Promotion, and Consumers Information Act; 7 U.S.C. 4601, 4612.

Definitions

§ 1240.1 Secretary.

"Secretary" means the Secretary of Agriculture of the United States, or any other officer or employee of the Department of Agriculture to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his/her stead.

§ 1240.2 Act.

"Act" means the Honey Research, Promotion, and Consumer Information Act (P.L. 98–590) and any amendments thereto.

§ 1240.3 Person.

"Person" means any individual, group of individuals, partnership, corporation, association, cooperative, or any other entity.

§ 1240.4 Honey.

"Honey" means the nectar and saccharine exudations of plants which are gathered, modified, and stored in the comb by honey bees.

§ 1240.5 Honey products.

"Honey products" means products wherein honey is a principal ingredient.

§ 1240.6 Producer.

"Producer" means any person who produces honey in any State for sale in commerce.

§ 1240.7 Handle.

"Handle" means to process, package, sell, transport, purchase or in any other way place honey or honey products, or cause them to be placed, in the current of commerce. Such term shall include selling unprocessed honey that will be consumed without further processing or packaging. Such term shall not include the transportation of unprocessed honey by the producer to a handler or transportation by a commercial carrier of honey, whether processed or unprocessed for the account of the handler or producer.

§ 1240.8 Handler.

"Handler" means any person who handles honey or honey products.

§ 1240.9 Producer-packer.

"Producer-packer" means any person who is both a producer and handler of honey or honey products.

§ 1240.10 Importer.

"Importer" means any person who imports honey or honey products into the United States as principal or as an agent, broker, or consignee for any person who produces honey outside of the United States for sale in the United States.

§ 1240.11 Promotion.

"Promotion" means any action, including paid advertising and public relations, to present a favorable image for honey or honey products to the public with the express intent of improving the competitive position and stimulating sales of honey or honey products.

§ 1240.12 Research.

"Research" means any type of systematic study or investigation, and/or the evaluation of any study or investigation designed to advance the image, desirability, usage, marketability, production, or quality of honey or honey products.

§ 1240.13 Consumer education.

"Consumer education" means the act of providing information to the public on the usage and care of honey and honey products.

§ 1240.14 Marketing.

"Marketing" means the sale or other disposition in commerce of honey or honey products.

§ 1240.15 Committee.

"Committee" or the "National Honey Nominations Committee" means the Committee established pursuant to § 1240.32.

§ 1240.16 State association.

"State association" or "association" means that organization of beekeepers in a State which is generally recognized as representing the beekeepers of that State.

§ 1240.17 Honey Board.

"Honey Board" or the "Board" means the administrative body established pursuant to § 1240.30.

§ 1240.18 State.

"State" means any of the fifty States of the United States of America, the District of Columbia, and the Commonwealth of Puerto Rico.

§ 1240.19 Fiscal period and marketing year.

"Fiscal period" and "marketing year" means the 12-month period ending on December 31 or such other consecutive 12-month period as shall be recommended by the Board and approved by the Secretary.

VOL 51 ISS 87 MY 6 1986 UMI

§ 1240.29 Plans and projects.

"Plans" and "projects" means those research, promotion, and consumer education plans, studies, or projects established pursuant to §§ 1240.38 and 1240.39.

§ 1240.21 Part and Subpart.

"Part" means the Honey Research, Promotion, and Consumer Information Order and all rules, regulations, and supplemental orders issued thereunder, and the order shall be a "subpart" of such part.

Honey Board

§ 1240.30 Establishment and membership.

A Honey Board (hereinafter called the "Board") is hereby established to administer the terms and provisions of this part. The Board shall consist of thirteen (13) members, each of whom shall have an alternate. Seven members and seven alternates shall be honey producers, two members and two alternates shall be honey handlers, two members and two alternates shall be honey importers, one member and one alternate shall be an officer or employee of a honey marketing cooperative, and one member and one alternate shall be selected to represent the general public. The Board shall be appointed by the Secretary from nominations submitted by the National Honey Nominations Committee pursuant to § 1240.32.

§ 1240.31 Term of office.

The members of the Board and their alternatives shall serve for terms of three years, except the members of the initial Board shall be designated for, and shall serve terms as follows: Four members and alternates shall serve for one-year terms; four shall serve for two-year terms; and five shall serve for three-year terms. No member or alternate shall serve more than two consecutive terms: *Provided,* That those members and alternative serving the initial term of one year may serve two additional consecutive three-year terms. The term of office for the initial Board shall begin immediately on appointment by the Secretary. In subsequent years, the term of office shall begin on April 1. Each member and alternate member shall continue to serve until his/her successor is selected and has accepted.

§ 1240.32 Nominations.

All nominations to the Board authorized under § 1240.30 herein shall be made in the following manner.

(a) Establishment of National Honey Nominations Committee. (1) There is hereby established a National Honey Nominations Committee, hereinafter called the "Committee", which shall consist of not more than one member from each State, appointed by the Secretary from nominations submitted by each State Association. Whenever there is more than one eligible association within a State, the Secretary shall designate the association most representative of the honey producers, handlers, and importers not exempt under § 1240.42(a) to make nominations for that State.

(2) If a State Association does not submit a nomination for the Committee, the Secretary may select a member of the honey industry from that State to represent that State on the Committee. However, if a State which is not one of the top twenty honey producing States (as determined by the Secretary) does not submit a nomination, such State shall not be represented on the Committee.

(3) Members of the Committee shall serve for three-year terms, except members of the initial Committee shall serve for terms as follows: One-third of such members shall serve one-year terms; one-third shall serve two-year terms; and one-third shall serve three-year terms. No member shall serve more than two consecutive three-year terms: *Provided,* That those members serving the initial term of one year may serve two additional consecutive three-year terms. The term of office for the initial Committee shall begin immediately on appointment by the Secretary. In subsequent years, the term of office shall begin on January 1.

(4) The Committee shall select its Chairperson by a majority vote.

(5) The members of the Committee shall serve without compensation, but shall be reimbursed for necessary and reasonable expenses incurred in performing their duties as members of the Committee and approved by the Board. Such expenses shall be paid from funds collected by the Board pursuant to § 1240.41.

(b) Nominations to the Board. (1) Except for the member and alternate who represent the general public, the Committee shall nominate the members and alternate members of the Honey Board and submit such nominations promptly to the Secretary for approval. The Committee shall also submit a list of candidates to the Secretary for the public member and alternative public member position. The Secretary may choose from that list of names or, at his/her discretion, choose other candidates to fill the public member and alternate position.

(2) After the first meeting, the Committee shall meet annually to make such nominations, or at the determination of the Chairperson, the Committee may conduct its business by mail ballot in lieu of an annual meeting.

(3) A majority of the Committee shall constitute a quorum for voting at an annual meeting. In the event of a mail ballot, votes must be received from a majority of the Committee to constitute a quorum.

(4) At least 50 percent of the members from the twenty leading honey-producing states must vote in any nomination of members to the Board.

(5) For the purpose of nominating producer members to the Board, the Secretary shall establish seven regions on the basis of the production of honey.

For the purpose of facilitating initial nominations to the Honey Board, the following regions shall be the initial regions:

Region 1: Washington, Oregon, Idaho, California, Nevada, Utah, Alaska, and Hawaii.

Region 2: Montana, Wyoming, Nebraska, Kansas, Colorado, Arizona, and New Mexico.

Region 3: North Dakota and South Dakota.

Region 4: Minnesota, Iowa, Wisconsin, and Michigan.

Region 5: Texas, Oklahoma, Missouri, Arkansas, Tennessee, Louisiana, Mississippi, and Alabama.

Region 6: Florida, Georgia, and Puerto Rico.

Region 7: Illinois, Indiana, Ohio, Kentucky, Virginia, North Carolina, South Carolina, West Virginia, Maryland, District of Columbia, Delaware, New Jersey, New York, Pennsylvania, Connecticut, Rhode Island, Massachusetts, New Hampshire, Vermont, and Maine.

(6) Every five years, the Board shall review the regions to determine whether new regions should be established. In making such review, it shall give consideration to: (A) The average quantity of honey produced during the most recent three years; (B) shifts and trends in quantities of honey produced; (C) the equitable relationship of Board membership and districts; and (D) other relevant factors. As a result of this review, the Board may recommend for the Secretary's approval the reestablishment of such regions.

Any such reestablishment of regions shall be made at least six months prior to the date on which terms of office of the Board begin each year and shall become effective at least 30 days prior to such date.

(7) The initial Committee shall within 90 days of the announcement of issuance of this order, or such other period as prescribed by the Secretary, submit in a manner prescribed by the Secretary the following nominations:

One producer member and one alternate producer member from each of the seven regions established by the Secretary;

Two handler members and two alternate handler members from recommendations made by industry organizations representing handler interests;

Two importer members and two alternate importer members from recommendations made by industry organizations representing importer interests; and

One member and one alternate who are officers or employees of honey marketing cooperatives.

For subsequent years, the Committee shall submit its nominations to the Secretary one month before the new Board terms begin.

§ 1240.34 Vacancies.

(a) In the event any member of the Board ceases to be a member of the category of members from which the member was appointed to the Board, such position shall automatically become vacant.

(b) If a member of the Board consistently refuses to perform the duties of a member of the Board, or if a member of the Board engages in acts of dishonesty or willful misconduct, the Board may recommend to the Secretary that he/she be removed from office. If the Secretary finds the recommendation of the Board shows adequate cause, he/she shall remove such member from office.

(c) Should any member position become vacant, the alternate of that member shall automatically assume the position of said member. At its next meeting, the Honey Nominations Committee shall nominate a replacement for said alternate. Should the positions of both a member and such member's alternate become vacant, successors for the unexpired terms of such member and alternate shall be nominated and appointed in the manner specified in §§ 1240.30 and 1240.32, except that said nomination and replacement shall not be required if said unexpired terms are less than six months.

§ 1240.35 Procedure.

(a) Seven members, including alternates acting in place of members of the Board, shall constitute a quorum: *Provided,* That such alternates shall serve only whenever the member is absent from a meeting or is disqualified. Any action of the Board shall require the concurring votes of a majority of those present and voting. At assembled meetings, all votes shall be cast in person.

(b) In matters of an emergency nature when there is not enough time to call an assembled meeting of the Board, the Board may act upon the concurring votes of a majority of its members by mail, telephone, telegraph, or by other means of communication: *Provided,* That each proposition is explained accurately, fully, and substantially identically to each member. All telephone votes shall be promptly confirmed in writing and recorded in the Board minutes.

§ 1240.36 Attendance.

Members of the Board and the members of any special panels shall be reimbursed for reasonable out-of-pocket expenses incurred when performing Board business. The Board shall have the authority to request the attendance of alternates at any or all meetings, notwithstanding the expected or actual presence of the respective members.

§ 1240.37 Powers.

The Board shall have the following powers subject to § 1240.61:

(a) To administer this subpart in accordance with its terms and provisions of the Act;

(b) To make rules and regulations to effectuate the terms and conditions of this subpart;

(c) To require its employees to receive, investigate, and report to the Secretary complaints of violations of this part; and

(d) To recommend to the Secretary amendments to this part.

§ 1240.38 Duties.

The Board shall have, among other things, the following duties:

(a) To meet and organize and to select from among its members a chairperson and such other officers as may be necessary; to select committees and subcommittees from its membership and consultants; to adopt such rules, regulations, and by-laws for the conduct of its business as it may deem advisable.

(b) To employ such persons as it may deem necessary and to determine the compensation and define the duties of each; and to protect the handling of Board funds through fidelity bonds;

(c) To prepare and submit to the Secretary for his/her approval, a budget on a fiscal period basis of its anticipated expenses in the administration of this part including the probable costs of all programs or projects and to recommend a rate of assessment with respect thereto;

(d) To investigate violations of the order and report the results of such investigations to the Secretary for appropriate action to enforce the provisions of the order.

(e) To develop programs and projects and to enter into contracts or agreements with the approval of the Secretary for the development and carrying out of programs or projects of research, development, advertising, promotion, or education, and the payment of costs thereof with funds collected pursuant to this part;

(f) To maintain minutes, books, and records and prepare and submit to the Secretary such reports from time to time as may be required for appropriate accounting with respect to the receipt and disbursement of funds entrusted to it;

(g) To periodically prepare and make public and to make available to producers and importers, reports of its activities carried out, and at least once each fiscal period to make public an accounting of funds received and expended;

(h) To cause its books to be audited by a certified public accountant at the end of each fiscal year and to submit a copy of each audit to the Secretary;

(i) To give to the Secretary the same notice of meetings of the Board and subcommittees as is given to members in order that representatives of the Secretary may attend such meetings;

(j) To submit to the Secretary such information pertaining to this subpart as he/she may request;

(k) To notify honey producers, producer-packers, handlers, and importers of all Board meetings through press releases or other means;

(l) To appoint and convene, from time to time, working committees drawn from producers, honey handlers, importers, exporters, members of the wholesale or retail outlets for honey, or other members of the public to assist in the development of research, promotion, and consumer education programs for honey; and

(m) To develop and recommend such rules and regulations to the Secretary for approval as may be necessary for the development and execution of projects or activities to effectuate the declared purpose of the Act.

Research, Promotion, and Consumer Education

§ 1240.39 Research, promotion, and consumer education.

The Board shall develop and submit to the Secretary for approval any plans or projects authorized in this section. Such plans or projects shall provide for:

(a) The establishment, issuance, effectuation and administration of appropriate plans or projects for consumer education, advertising, and promotion of honey and honey products designed to strengthen the position of the honey industry in the marketplace and to maintain, develop, and expand markets for honey and honey products;

(b) The establishment and conduct of marketing research and development projects to the end that the acquisition

VOL 51 ISS 87 MY 6 1986 UMI

of knowledge pertaining to honey and honey products or their consumption and use may be encouraged or expanded, or to the end that the marketing and utilization of honey and honey products may be encouraged, expanded, improved or made more efficient: *Provided,* That quality control, grade standards, supply management programs, or other programs that would otherwise limit the right of the individual honey producer to produce honey shall not be conducted under, or as part of this subpart;

(c) The development and expansion of honey and honey product sales in foreign markets;

(d) A prohibition on advertising or other promotion programs that make any false or unwarranted claims on behalf of honey or its products or false or unwarranted statements with respect to the attributes or use of any competing product;

(e) Periodic evaluation by the Board of each plan or project authorized under this part to insure that each plan or project contributes to an effective and coordinated program of research, education, and promotion and submit such evaluation to the Secretary. If the Board or the Secretary finds that a plan or project does not further the purposes of the Act, then the Board shall terminate such plan or project; and

(f) The Board to enter into contracts or make agreements for the development and carrying out of research, promotion, and consumer education, and pay for the costs of such contracts or agreements with funds collected pursuant to § 1240.41.

Expenses and Assessments

§ 1240.40 Budget and expenses.

(a) At the beginning of each fiscal period, or as may be necessary thereafter, the Board shall prepare and recommend a budget on a fiscal period basis of its anticipated expenses and disbursements in the administration of the Order, including expenses of the Committee and probable costs of research, promotion, and consumer education.

(b) The Board is authorized to incur expenses for research, promotion, and consumer education, such other expenses for the administration, maintenance, and functioning of the Board and the Committee as may be authorized by the Secretary, any operating reserve established pursuant to §1240.44, and those administrative costs incurred by the Department specified in paragraph (c) of this section. The funds to cover such expenses shall be paid from assessments collected pursuant to § 1240.41, donations from any person not subject to assessments under this order and other funds available to the Board including those collected pursuant to § 1240.67 and subject to the limitations contained therein.

(c) The Board shall reimburse the Department from assessments for administrative costs incurred by the Department with respect to this order after its promulgation. The Department shall also be reimbursed for administrative expenses incurred by it for the conduct of referenda.

§ 1240.41 Assessments.

(a) Each producer and importer shall pay to the Board, upon demand, his/her pro rata share of such expenses as may be approved by the Secretary pursuant to § 1240.40. Such pro rata share shall be the amount established by the Secretary pursuant to paragraph (c) of this section.

(b) Except as provided in § 1240.42 and in paragraphs (e), (f), and (g) of this section, the first handler shall be responsible for the collection of such assessment from the producer and payment thereof to the Board. The first handler shall maintain separate records for each producer's honey handled, including honey produced by said handler.

(c) The assessment on honey shall be levied at a rate fixed by the Secretary which shall be $0.01 per pound of honey or honey used in honey products during the first fiscal period (or portion thereof) after this order is approved in referendum. After that first year, the Board may request the Secretary to increase the assessment rate not more than $0.005 per pound of honey per year: *Provided,* That the assessment never exceeds $0.04 per pound of honey per year. After the first year, the Board may request the Secretary to decrease the assessment rate by any amount it sees fit.

(d) Should a deficit occur during any fiscal period, funds to cover the deficit may be obtained by increasing the rate of assessment subject to the limitations in paragraph (c) of this section. The increased rate of assessment shall be applied to all honey and the honey used in products wherein honey is the primary ingredient sold in the States during that particular fiscal period so that the total payments by each person during each fiscal period will be proportional to the total value of the honey and honey products sold during that period.

(e) The importer of imported honey and honey products shall pay the assessment to the Board at the time of entry of such honey and honey products into any State.

(f) Producer-packers shall pay to the Board the assessment on the honey for which they act as first handler.

(g) Whenever a loan is made on honey under the Honey Loan-Price Support Program, the Secretary shall provide that the assessment be deducted from the proceeds of the loan, and that the amount of such assessment shall be forwarded to the Board, except that the assessment shall not be deducted by the Secretary in the case of a honey marketing cooperative that has already deducted the assessment. When such loan is redeemed, the Secretary shall provide the producer with proof of payment of the assessment.

(h) Assessments shall be paid to the Board at such time and in such manner as the Board, with the Secretary's approval, directs pursuant to regulations issued hereunder. Such regulations may provide for different handler, importer, or producer-packer payment schedules so as to recognize differences in marketing or purchasing practices and procedures.

(i) There shall be a late payment charge imposed on any handler, importer, or producer-packer who fails to remit to the Board the total amount for which any such handler, importer, or producer-packer is liable on or before the payment due rate established by the Board under paragraph (h) of this section. The amount of the late payment charge shall be set by the Board subject to approval by the Secretary.

(j) There shall also be imposed on any handler, importer, or producer-packer subject to late payment charge, an additional charge in the form of interest on the outstanding portion of any amount for which the handler, importer, or producer-packer is liable. The rate of such interest shall be prescribed by the Board subject to approval by the Secretary, but shall not exceed the maximum legal rate of interest, if any, as established by Congress.

(k) The Board is hereby authorized to accept advance payment of assessments by handlers, importers, or producer-packers that shall be credited toward any amount for which the handlers, importers or producer-packer may become liable. The Board is not obligated to pay interest on any advance payment.

(l) The Board is hereby authorized to borrow money for the payment of expenses subject to the same fiscal, budget, and audit controls as other funds of the Board.

§ 1240.42 Exemption from assessment.

(a) A producer who produces less than 6,000 pounds of honey per year, or a producer-packer who produces and handles less than 6,000 pounds of honey per year or an importer who imports less than 6,000 pounds of honey per year shall be exempt from the assessment.

(b) To claim such exemption, a producer, producer-packer, or importer shall submit an application to the Board stating that his/her production, handling or importation of honey shall not exceed 6,000 pounds for the year for which the exemption is claimed.

(c) The Board may recommend to the Secretary that honey exported from the States be exempted from the provisions of this order, and include procedures for the refund of assessments on such honey and such safeguards as may be necessary to prevent improper use of this exemption.

(d) The Board shall determine those States that are operating a program with objectives comparable to the objectives of the Act and recommend to the Secretary that they be exempted from a portion of the assessments collected by the Federal program. The amount of such assessments subject to exemption shall not exceed the amount authorized by the State plan on January 1, 1985, unless a State provides evidence that it was in the process of promulgating a different assessment level on January 1, 1985, then the new assessment level promulgated will be exempt upon approval of the honey producers in that State. Producers having an exemption from a portion of the assessments under this order, due to payment of assessments to a State plan, shall be required to furnish evidence to the Board that the assessments to the State plan have been paid.

§ 1240.43 Producer, importer, and State assessment plan refund.

(a) Any producer or importer who pays an assessment under the authority of this part shall have the right to demand and receive from the Board a refund of such assessment upon submission of proof to the staff of the Board that the producer or importer paid the assessment for which refund is sought, except that producers who have honey pledged as collateral for a loan under the Honey Loan-Price Support Program and therefore have paid the assessment, shall not be eligible for a refund until the loan has been repaid, or the honey has been turned over to the Commodity Credit Corporation. The amount of refunds during any year made to importers, as a percentage of total assessments collected from all importers shall not exceed the amount of refunds made to domestic producers, as a percentage of total assessments collected from such producers. Any demand for refund shall be made by the producer or importer within the time and in the manner prescribed by the Board and approved by the Secretary. Refunds made in accordance with this section shall be paid by the Board in June and December of each year.

(b) Any State authority operating pursuant to a State assessment plan satisfying the conditions of paragraph (b)(1) of this section may obtain a refund of assessments collected by the Board on honey and/or honey products produced in that State except as provided in paragraph (b)(2) of this section.

(1) Refunds shall be paid only if the Secretary certifies that the State assessment plan: (i) Is comparable to the program established under the Act and this part; and (ii) was in existence and in operation on January 1, 1985.

(2) Refunds shall be made directly to States, except that any refunds due directly to producers under this part shall take precedence over State programs and in no event exceed the amount collected by the Board on honey produced in the requesting State, and the amount of any refund shall be limited in accordance with the provisions of this subpart.

(3) Refunds made to a State authority pursuant to this paragraph shall not be included in the formula pertaining to importer refunds as set forth in paragraph (a) of this section.

§ 1240.44 Operating reserve.

The Board may establish an operating monetary reserve and may carry over to subsequent fiscal periods excess funds in any reserve so established: *Provided,* That the funds in the reserve shall not exceed one fiscal period's budget. Subject to approval by the Secretary, such reserve funds may be used to defray any expenses authorized under this part.

Reports, Books, and Records

§ 1240.50 Reports.

Each handler, importer, and producer-packer who is subject to this part shall be required to report to the employees of the Board, at such times and in such manner as it may prescribe, such information as may be necessary for the Board to perform its duties. Such reports shall include, but shall not be limited to the following:

(a) For handlers and producer-packers; total quantity of honey acquired during the reporting period; total quantity handled during period; amount of honey acquired from each producer, giving name and address of each producer, including those producers who claim exemption from assessment; copy of statement claiming exemption from assessment from those who claim such exemption; assessments collected or collectable during the reporting period; quantity of honey processed for sale from producer-packer's own production; and record of each transaction for honey on which assessment had already been paid, including statement from seller that assessment had been paid.

(b) For importers; total quantity of honey imported during the reporting period and a record of each importation of honey during such period, giving quantity, date, and port of entry.

§ 1240.51 Books and records.

Each handler, importer, and producer-packer shall maintain and during normal business hours make available for inspection by employees of the Board or the Secretary, such books and records as are necessary to carry out the provisions of this subpart and the regulations issued thereunder, including such records as are necessary to verify any required reports. Such records shall be maintained for two years beyond the fiscal period of their applicability.

§ 1240.52 Confidential treatment.

All information obtained from the books, records, or reports required to be maintained under §§ 1240.50 and 1240.51 shall be kept confidential and shall not be disclosed to the public by any person. Only such information as the Secretary deems relevant shall be disclosed to the public and then only in a suit or administrative hearing brought at the direction, or upon the request, of the Secretary, or to which the Secretary or any officer of the United States is a party, and involving this subpart: Except that nothing in this subpart shall be deemed to prohibit; (a) The issuance of general statements based upon the reports of a number of handlers or importers subject to any order, if such statements do not identify the information furnished by any person; (b) the publication by direction of the Secretary, of the name of any person convicted of violating this subpart, together with a statement of the particular provisions of the Order violated by such person. Any disclosure of any confidential information by any employee of the Board shall be considered willful misconduct.

Miscellaneous

§ 1240.60 Influencing governmental action.

No funds collected by the Board under this order shall in any manner be used for the purpose of influencing governmental policy or action, except for making recommendations to the Secretary as provided for in this subpart.

§ 1240.61 Right of the Secretary.

All fiscal matters, programs or projects, rules or regulations, reports, or other substantive actions proposed and prepared by the Board shall be submitted to the Secretary for approval.

§ 1240.62 Suspension or termination.

(a) The Secretary shall, whenever he/she finds that this subpart or any provision thereof obstructs or does not tend to effectuate the declared policy of the Act, terminate or suspend the operation of this subpart or such provisions thereof.

(b) Five years from the date the Secretary issues an order authorizing the collection of assessments on honey under provisions of this subpart, and every five years thereafter, the Secretary shall conduct a referendum to determine if honey producers and importers favor the continuation, termination, or suspension of this subpart.

(c) The Secretary shall hold a referendum on the request of the Board, or when petitioned by 10 percent or more of the honey producers and importers to determine if the honey producers and importers favor termination or suspension of this subpart.

§ 1240.63 Proceedings after termination.

(a) Upon the termination of this subpart, the Board shall recommend to the Secretary not more than five of its members to serve as trustees for the purpose of liquidating the affairs of the Board. Such persons, upon designation by the Secretary, shall become trustees of all funds and property then in possession or under control of the Board, including claims for any funds unpaid or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall: (1) Continue in such capacity until discharged by the Secretary; (2) carry out the obligations of the board under any contracts or agreements entered into by it pursuant to § 1240.30; (3) from time to time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to such person as the Secretary may direct; and (4) upon the direction of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title and right to all of the funds, property, and claims vested in the Board or the trustees pursuant to this subpart.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this subpart shall be subject to the same obligations as imposed upon the trustees.

(d) Any residual funds not required to defray the necessary expenses of liquidation shall be returned to the persons who contributed such funds, or paid assessments, or if not practicable, shall be turned over to the Department to be utilized, to the extent practicable, in the interest of continuing one or more of the honey research or education programs hitherto authorized.

§ 1240.64 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this subpart or any regulation issued thereunder, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this subpart or any regulation issued thereunder;

(b) Release or extinguish any violation of this subpart or of any regulation issued thereunder; or

(c) Affect or impair any rights or remedies of the United States, or of any person, with respect to any such violation.

§ 1240.65 Personal liability.

No member, alternate member, or employee of the board shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, as such member, alternate member, or employee, except for acts of dishonesty or willful misconduct.

§ 1240.66 Separability.

If any provision of this subpart is declared invalid or the applicability thereof to any person or circumstance is held invalid, the validity of the remainder of this subpart, or the applicability thereof to other persons or circumstances shall not be affected thereby.

§ 1240.67 Patents, copyrights, inventions, and publications.

Except for a reasonable royalty paid to the inventor of a patented invention, any patents, copyrights, inventions, product formulations, or publications developed through the use of funds collected under the provisions of this subpart shall be the property of the United States government as represented by the Board. Funds generated by such patents, copyrights, inventions, product formulations, or publications shall be considered income subject to the same fiscal, budget, and audit controls as other funds of the Board.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 740, 741 and 745

Federal Credit Unions; National Credit Union Share Insurance Fund

AGENCY: National Credit Union Administration (NCUA).

ACTION: Notice of proposed rulemaking.

SUMMARY: The NCUA Board proposes to amend its regulations relating to the insurance provided by the National Credit Union Share Insurance Fund. The regulations to be amended address advertising by federally-insured credit unions, termination or conversion of Federal insurance, and the extent of insurance coverage provided on accounts. The proposed rules seek to (1) incorporate current practices, policies and interpretations in the regulations themselves and (2) clarify parts 740, 741 and 475 so that they may be more easily understood by the public. Additional clarification of insurance on accounts is provided in an appendix, which has been added in the proposed rules.

DATE: Comments must be received on or before May 30, 1986.

ADDRESS: Send comments to Rosemary Brady, Secretary, National Credit Union Administration Board, 1776 G Street NW., Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT: D. Michael Riley, Director, Office of Examination and Insurance, or James J. Engel, Deputy General Counsel, at the above address, or telephone: (202) 357-1065 (Mr. Riley) or (202) 357-1090 (Mr. Engel).

SUPPLEMENTARY INFORMATION:

Overview

As a result of its regulatory review process, NCUA proposes certain changes to its regulations related to Federal share insurance with a view toward simplification and clarification. Of particular concern to NCUA are ambiguities and other shortcomings in these regulations which have contributed to undesirable consequences. For example, many credit unions and their members have conveyed considerable misunderstanding as to how insurance coverage is determined. Similarly, some State credit unions applying for Federal insurance have objected to requirements that are not in the regulations but are in the Insurance Agreement that state credit unions must enter into with the National Credit Union Share Insurance Fund (NCUSIF). The purpose of this notice or proposed rulemaking is to identify and request public comment on the issues related to these concerns and to improve the regulations.

Certain technical amendments have been made throughout Parts 740, 741, and 745 to coincide with the definitions contained in Part 700. The terms "Act," "Administration," "Board," and "Regional Director" are already defined in section 700.1. Therefore, phrases have been reduced to the appropriate individual terms. Since these substitutions are nonsubstantive, they are not specifically identified as amendments each time they appear.

Part 740—Advertising

This Part was formerly titled "Advertisement of Insured Status." That title was revised because it did not accurately reflect the full scope of this Part. This Part primarily addresses the advertisement of a credit union's insured status but, as set forth in the present § 740.2, advertising in general by a federally-insured credit union is also covered. In this regard, § 740.0 would be amended to clarify the applicability of Part 740 to all federally-insured credit unions and to all types of advertising.

Section 740.1 would now have three Subsections. Subsection (a) is the former 740.1, that defined the term "deposit." Subsection (a) now defines "account," that term being substituted for "deposit" in the remaining provisions of this Part. The substance of the definition, however, is essentially the same. "Share draft account" has been substituted for "share deposit account" and the language "or their equivalent under State law" has been added to conform the definition to that contained in section 101(5) of the Act (12 U.S.C. 1752(5)). Subsection (b) adds the definition of "insured credit union" to mean a credit union insured by the NCUSIF, and Subsection (c) explains the acronym "NCUSIF."

Section 740.2, requires all advertising to be accurate. The title and wording are revised with a view towards simplification. The requirement that advertising by a branch office must state the location of the main office has been deleted. Added is a requirement that any advertising mentioning insurance by a party other than the NCUSIF must explain the insurance provided, the identity of the insurer and the fact that the insurer is not affiliated with the NCUSIF or Federal Government.

Several minor wording changes are made to section 740.3 regarding the official sign. The italicized phrases at the beginning of each subsection are considered redundant and are deleted. In Subsection (a), requiring the display of the official sign at teller stations, the proviso regarding the 30-day period for displaying the official sign is reworded and incorporated within the first sentence. The second sentence permitting display prior to the required display date is omitted as unnecessary. Subsection (b) is modified to denote the color of the official sign since Subsection (a) refers to the use of other colors at locations other than stations or windows. In Subsection (c), the statement to be displayed along with the official sign at those facilities where both federally-insured and other credit unions may receive funds is modified to refer specifically to Federal insurance by the NCUSIF. The last sentence is modified to require the statement be legible rather than stating the precise size of the lettering. There are no changes to Subsections (d) and (e).

Changes or deletions are made to § 740.4, regarding the official advertising statement, to reorganize, simplify and clarify this Section. As in the case of § 740.3, italicized introductory language is deleted. Paragraph (a)(1) is reworded and now provides that the Regional Director can grant extensions of the required 30-day period for using the advertising statement. Former subparagraphs (a)(2) (i) and (ii), that addressed temporary exemptions from the advertising requirements, have been deleted as unnecessary since the Board retains the authority to act on a case-by-case basis and the need for an exemption is rarely requested. Subsection (c) has been revised by combining paragraphs (12) through (15) into 740.4(c)(12). Subsection (d), "outside billboard advertising," has been deleted as unnecessary because such advertising would be covered under Subsection (a). Former Subsection (e), use of non-English equivalent of the official advertising statement, is now changed to (d). The subsection has been changed to require prior written approval of the Regional Director rather than the NCUA Board.

One of the major concerns of the Board is public awareness and recognition of the National Credit Union Share Insurance Fund as a Federal entity providing protection for member savings. The Board believes the public is familiar with and understands the terms "FDIC" and "FSLIC" and regards that same familiarity and understanding as desirable for the NCUSIF. For that reason, the phrase "National Credit Union Share Insurance Fund" and the term "NCUSIF" have been added or substituted for NCUA in various provisions of the proposed amendments. (See, for example, the advertising statement in § 740.4(b).) The proposal does not, however, contain a change in the language used in the official sign, § 740.3(b), that contains the terms "NCUA" and "National Credit Union Administration." Since the sign and the regulation should be consistent, the Board requests comments on which terminology is preferable. The appropriate changes would then be made to the sign or the regulations to make them consistent. Additionally, the Board would appreciate any other comments regarding changes to the language on the official sign that would aid the public in understanding the nature of protection afforded by share insurance. An example might be changing the phrase "Your savings insured to $100,000" to read "Your savings federally insured to $100,000."

Part 741—Requirements for Insurance and Voluntary Termination or Conversion of Insurance

The title of this Part was changed to reflect the addition of a new subsection (Section 741.9(b)) that requires notice of Federal insurance cancellation be provided to all members of a credit union that voluntarily converts from Federal to non-Federal insurance. This notice requirement is contained in section 206(d)(2) of the Act (12 U.S.C. 1786(d)(2)). A new § 741.0 is added. This Section sets forth the scope of Part 741 and defines "insured credit union" to mean one insured by the NCUSIF.

One change is made to § 741.1. The word "surety" was changed to "fidelity" wherever it appears, to be consistent with § 701.20 of NCUA Regulations and the Insurance Agreement that is entered into between NCUA and a credit union.

VOL 51 ISS 87 MY 6 1986 UMI

Nonsubstantive changes are made to § 741.2, maximum period for verification of accounts, and 741.3, maximum borrowing authority. Due to the fact that the requirements of §§ 741.2 and 741.3 must be met in order for insurance to continue, language has been added to clarify that both sections apply to credit unions after insurance is approved.

Section 741.4 is a new Section. This Section incorporates items 1 and 2 of the Insurance Agreement and is based on the authority contained in sections 201 and 206 of the Federal Credit Union Act (FCU Act) (12 U.S.C. 1781 and 1784). More specifically, § 741.4 addresses the examination of credit unions applying for Federal insurance and provides that such credit unions may be required to pay the costs incurred by the NCUSIF in carrying out the examination. It also provides, in accordance with the Act, that the Board will rely on examinations conducted by state agencies to the maximum extent feasible.

Section 741.5 is the former § 741.4. Subsection (a), adequacy of reserves, was revised to make the requirements consistent with item 4 of the Insurance Agreement, i.e., a State credit union must, at a minimum, meet the reserve and full and fair disclosure requirements imposed under Title I of the FCU Act and Part 702 of NCUA Rules and Regulations. Unnecessary introductory language was deleted from subsection (b). Subsection 741.5(b)(2) was amended by deleting reference to the Credit Manual and by adding the requirement that lending policies be written. There is no change to (b)(3). Subsection 741.5(b)(4) was added to incorporate item 3 of the Insurance Agreement, types of accounts or securities, into the criteria for insurability. Subsection 741.5(c) was amended by adding a reference to full and fair disclosure requirements. Also, a reference to the Act and the Regulations was added to § 741.5(c) to make it consistent with § 741.5(a). The word "fidelity" is substituted for "surety" in § 741.5(d) for conformity. The words "for its members" is added to § 741.5(e) to clarify that the general purpose of credit unions is to serve members and not the general public. Additionally, a new § 741.5(g) has been added to clarify the Board's authority to impose additional terms or conditions in the Insurance Agreement.

A new § 741.6 is added. This Section applies only in cases where a credit union has obtained non-Federal insurance coverage on amounts in excess of that provided by the NCUSIF. It clarifies the NCUSIF's priority over other insurers in the event of liquidation.

Although not contained in the proposal, the Board requests comments on whether a provision should be added to require notification to members when an insured credit union that does have excess share insurance coverage terminates such coverage. The Board is of the opinion that such a requirement would benefit the membership that may have relied on such excess coverage in establishing their accounts. For example, a husband and wife may utilize one joint account to maintain savings in amounts above the $100,000 coverage provided by the NCUSIF because of the existence of excess coverage. However, if such coverage were terminated, the couple may well want to restructure their savings by using a combination of joint and individual accounts in order to be fully insured. Without notice of termination, they would be unaware that a large portion of their savings would be uninsured.

Section 741.7, the former § 741.5, is amended by changing the definition of "Insurance year" in subsection (b)(1) from "January 1 through December 31" to "July 1 through June 30." This change is made for administrative and operating purposes of the NCUSIF and will not have a substantive effect on credit unions.

A new Subsection (i) is added to 741.7 requiring immediate payment of a capitalization deposit and prorated insurance premiums (if any) by a continuing federally-insured credit union when it has absorbed a nonfederally-insured credit union through a merger. This change coincides with the language of Part 708—Merger of Credit Unions—that is currently in proposed form and has been published for public comment. (See 51 FR 3793, Jan. 30, 1986).

One sentence was added to § 741.7(j), the former § 741.5(i), to clarify that a solvent credit union's capitalization deposit will be refunded in case of a voluntary liquidation.

A new § 741.8 was added. This Section requires a Federal credit union converting to a state charter to submit an insurance application if it desires to maintain Federal insurance of its accounts. This requirement was previously contained in Part 708 of NCUA's Regulations. Part 708 was deleted effective January 12, 1984. (48 FR 56041, Dec. 19, 1983) because it was essentially duplicative of the conversion provisions of the Act. The requirement is still contained in NCUA publication 4411, "Credit Union Conversion Procedure and Conversion Forms" (exp. 12/31/86). It is now proposed that, for purposes of consistency and clarity, the requirement be set forth in these Regulations.

The language and notice contained in former § 741.6 is now designated § 741.9(a). As previously noted, a new subsection (b) has been added to § 741.9. Paragraph (b) addresses the Federal insurance cancellation notice to members referenced in section 206(d)(2) of the Act, 12 U.S.C. 1786(d)(2), where a credit union converts to private share insurance. A notification form is also included.

Section 741.10 is the former § 741.7.

Part 745—Clarification and Definition of Account Insurance Coverage

A new scope section, 745.0, was added to this Part to state as simply as possible, the general principles providing the basis for member account insurance. It is hoped that this Section will aid in the general public's understanding of how member accounts are insured in credit unions. Wherever possible in this Part, the terms "deposit(s)" or "depositor" have been deleted or changed to "account" or "member" to conform the regulation to credit union terminology. The term "deposit" has a different legal significance from "share," "share account," or "account." A deposit represents a debtor/creditor relationship whereas shares in a credit union represent equity. NCUA believes that the previous use of "deposit" caused confusion in credit union liquidations, especially where accountholders' funds exceeded the maximum insurance coverage. Accordingly, the former § 745.1 (a) and (b) have been deleted, and replaced with a new Subsection (a) defining "account."

In addition, three other terms have been added to the definition section to further clarify account coverage. The term "member" has been defined to include those nonmembers permitted to have accounts pursuant to the FCU Act. (§ 745.1(b).) "Public unit" and "political subdivision" were previously defined in § 701.32 (d) and (e), payments on shares by public units, and crossed referenced in § 754.10(c). In April, 1982, however, § 701.32 was deleted and the terms were no longer defined in any regulation. They are now added as §§ 745.1 (c) and (d). The term "public unit" was further defined to specifically include Indian tribes as provided in section 207(c)(2)(A)(v) or the Act (12 U.S.C. 1787(c)(2)(A)(v)).

Section 745.2 was revised to conform to the definitional changes and to reference the Appendix of Examples, which is a major explanatory addition to this Part. Section 745.3(c), "Accounts held by guardians, custodians, or conservators," is changed to clarify that funds are treated as being owned by the ward or minor for whose benefit the account is established. The title of Subsection (d) is changed from "Custodial Accounts" to "Custodial Loan Accounts" to distinguish the Subsection's applicability to temporary accounts covered in Subsection (c).

Section 745.4, "Testamentary Accounts," has been reorganized into three Subsections. The current Subsection (a) has been divided into Subsections (a) and (b) to separate the definition of a testamentary account from the operative provisions on insurance coverage. The new Subsection (c) is essentially the same as the current Subsection (b). These changes were made for clarification purposes. There are no substantive changes to § 745.5. Those changes which are made are intended to clarify insurance coverage.

Section 745.6 was revised to incorporate § 745.7 with no change as to insurance coverage. Thus, the account coverage of corporations, partnerships and unincorporated associations is now addressed in this one Section. The definition of "independent activity," as that term has been applied by NCUA, as well as the FSLIC and FDIC in those agencies' rules, has been added to this Section. Section 745.7 is reserved, for purposes of the proposal, to avoid renumbering subsequent provisions and thus reduce confusion in comparing the changes proposed for the remainder of this Part with the current provisions.

Sections 745.8, "Joint Accounts," 745.9–1, "Trust Accounts," and 745.9–2, retitled as "IRA/Keogh Accounts," are revised to simplify and clarify account coverage with no change to the actual coverage provided. Section 745.9–2 now expressly states that IRA's are separately insured from Keogh accounts, an interpretation that has been previously applied by NCUA. Section 745.9–3, "Deferred Compensation Accounts," is revised to include specific reference to "§ 401(K)" plans.

Two new subsections were added to § 745.10. The first, § 745.10(a)(5), adds Indian tribes to the list of public units. This change conforms the regulation to section 207(c)(2)(A)(v) of the Act. The second, § 745.10(d) was added with the intent of clarifying that only public unit funds lawfully invested in credit unions will receive insurance coverage. This has been a point of considerable misunderstanding and in some cases has resulted in a loss of funds for the custodian or public unit. The addition of this Subsection should reduce the potential for loss due to misunderstanding about the insured status of the account. Present paragraphs (5) and (6) are changed to (b) and (c) with attendant changes to punctuation.

No substantive changes were made to §§ 745.11, "Accounts evidenced by negotiable instruments," and 745.12, "Accounts obligations for payment of items forwarded for collection by depository institutions acting as agent," but technical change is made to § 745.12. This change reflects NCUA's policy of honoring claims for the insurance on a member's account by parties that have honored items drawn on the account, but where the credit union is closed prior to presentment of the item. Inadvertently, the term "credit union" had been used. Generally, however, the presenting party is another depository institution. Therefore, "depository institution" has been substituted. Section 754.13, "Notification to members/shareholders," is replaced by a more concise provision. The substantive requirement of the former § 745.13, that members be provided information concerning the insurance coverage of their accounts, has been retained. The remaining portion, covering time periods for providing notice and obtaining brochures from NCUA, have been deleted as unnecessary.

Appendix

Previously, NCUA has published a booklet for members describing their insurance coverage and providing examples of such coverage. This booklet has proven to be very helpful to members. NCUA believes it would be even more useful to include with the regulation examples that provide more depth on insurance coverage than the booklet. Accordingly, NCUA has added an appendix, providing further amplification of the insurance rules.

Regulatory Procedures

The NCUA Board has determined and certifies that the proposed amendments, if adopted, will not have significant economic impact on a substantial number of small credit unions (primarily those under $1 million dollars in assets). Further, this rule is largely a clarification and simplication of the current rules. Accordingly, the Board has determined that a Regulatory Flexibility Analysis is not required.

Paperwork Reduction Act

The proposed changes include two new notification requirements. Section 741.6 requires annual notification to members of the amount in their accounts that are not federally insured. This only applies to a very few credit unions that have share insurance from a private carrier in excess of Federal insurance. Section 741.9(b) sets forth the current statutory notice requirement when a credit union converts from Federal insurance to insurance provided by a non-Federal carrier.

These notice requirements will be submitted to the Office of Management and Budget for review under the Paperwork Reduction Act. Written comments and recommendations regarding the notice requirements of these proposed rules should be forwarded directly to the OMB Desk Officer indicated below at the following address:

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503

PART 701—[AMENDED]

Accordingly, NCUA proposes to amend its regulations as follows:

1. It is proposed that Parts 740, 741 and 745 be revised to read as follows:

PART 740—ADVERTISING

Sec.

740.0 Scope.
740.1 Definition.
740.2 Accuracy of advertising.
740.3 Mandatory requirements with regard to the official sign and its display.
740.4 Mandatory requirements with regard to official advertising statement and manner of use.

Authority: The authority citation continues to read as 12 U.S.C. 1766, 12 U.S.C. 1781, 12 U.S.C. 1789.

VOL 51 ISS 87 MY 6 1986 UMI

§ 740.0 Scope.

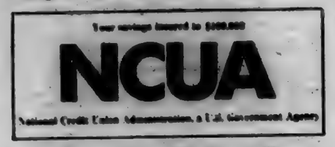
This Part applies to all federally-insured credit unions. It prescribes the requirements with regard to the official sign insured credit unions must display and the requirements with regard to the official advertising statement insured credit unions must include in their advertisements. It also prescribes a general requirement that all other kinds of advertisements must be accurate.

§ 740.1 Definition.

(a) "Account" as used in this Part means share, share certificate or share draft account or their equivalent under state law, of a member or individual of a credit union of a type approved by the Board which evidences money or its equivalent received or held by a credit union in the usual course of business and for which it has given or is obligated to give credit to the account of the member or individual.

(b) "Insured credit union" as used in this Part means a credit union insured by the National Credit Credit Union Share Insurance Fund.

(c) "NCUSIF" means the National Credit Union Share Insurance Fund.



§ 740.2 Accuracy of advertising.

No insured credit union shall use any advertising (which includes print or broadcast media, displays and signs, stationery and all other promotional material) or make any representation which is inaccurate or deceptive in any particular, or which in any way misrepresents its services, contracts, investments, or financial condition. Any advertising that mentions account insurance provided by a party other than the NCUSIF must clearly explain the type and amount of such insurance, the identity of the carrier and the fact that the carrier has no affiliation with the NCUSIF or the Federal Government.

§ 740.3 Mandatory requirements with regard to the official sign and its display.

(a) Each insured credit union shall continuously display the official sign described in paragraph (b) at each station or window where insured account funds or deposits are usually and normally received in its principal place of business and in all its branches 30 days after its first day of operation as an insured credit union. Additional signs in other sizes, colors, or materials, incorporating the basic design of the official sign, may be displayed in other locations within an insured credit union.

(b) The official sign shall be as depicted below, having a blue background with white lettering:

(1) All insured credit unions will automatically be furnished an initial supply of official signs, at no cost, from the Administration for compliance with paragraph (a) of this Section. If the initial supply is not adequate, an immediate request for additional signs must be made. Any credit union that does not have an adequate supply but requests additional signs from the Administration, shall not be deemed to have violated this regulation on account of not displaying an official sign or signs unless the credit union shall omit to display such official sign or signs after receipt thereof.

(2) Official signs reflecting variations in color and materials and additional signs reflecting variations in size, color and materials for use other than as prescribed in paragraph (a) of this section may be procured by insured credit unions from commercial suppliers.

(c) An insured credit union shall not receive account funds at any teller's station or window where any noninsured credit union or institution receives deposits. Excepted from this prohibition are credit union centers, service centers, or branches servicing more than one credit union where only some of the credit unions are insured by the NCUSIF. In such instances there must be placed immediately above or beside each official sign another sign stating "only the following credit unions serviced by this facility are federally insured by the NCUSIF ———" (the full name of each credit union insured will follow the word NCUSIF). The lettering will be of such size and print to be clearly legible to all members conducting share or share deposit transactions.

(d) The Board may require any insured credit union, upon at least 30 days' written notice, to change the wording of its official signs in a manner deemed necessary for the protection of shareholders or others.

(e) For purposes of this section the terms "branch," "station," "teller station," and "window" do not include automated teller machines or point-of-sale terminals.

§ 740.4 Mandatory requirements with regard to the official advertising statement and manner of use.

(a) Each insured credit union shall include the official advertising statement, prescribed in paragraph (b) of this Section, in all of its advertisements except as provided in paragraph (c) of this section.

(1) An insured credit union must include the official advertising statement in its advertisements thirty (30) days after its first day of operations as an insured credit union unless it has been granted an extension by the Regional Director.

(2) In cases where advertising copy not including the official advertising statement is on hand on the date the requirements of this section become operative, the insured credit union may cause the official advertising statement to be included by use of an overstamp or by other means for a period of 6 months or until the supplies are exhausted, whicheyer, occurs first.

(b) The official advertising statement shall be in substance as follows: "This credit union is insured by the National Credit Union Share Insurance Fund." The short title "Insured by NCUSIF" and a reproduction of the official sign may be used by insured credit unions at their options as the official advertising statement. The official advertising statement shall be of such size and print to be clearly legible.

(c) The following is an enumeration of the types of advertisements that need not include the official advertising statement:

(1) Statements of conditions and reports of condition of an insured credit union which are required to be published by State and Federal law or regulation;

(2) Credit union supplies such as stationery (except when used for circular letters), envelopes, deposits slips, checks, drafts, signature cards, account passbooks, and noninsurable certificates, etc.;

(3) Signs or plates in the credit union office or attached to the buildings or buildings in which the offices are located;

(4) Listings in directories;

(5) Advertisements not setting forth the name of the insured credit union;

(6) Display advertisements in credit union directory, provided the name of the credit union is listed on any page in the directory with a symbol or other descriptive matter indicating it is insured;

(7) Joint or group advertisements of credit union services where the names of insured credit unions and noninsured credit unions are listed and form a part of such advertisement;

(8) Advertisements by radio which do not exceed thirty (30) seconds in time;

(9) Advertisements by television, other than display advertisement, which do not exceed thirty (30) seconds in time;

(10) Advertisements which are of the type or character making it impractical to include thereon the official advertising statement, including but not limited to, promotional items such as calenders, matchbooks, pens, pencils, and key chains;

(11) Advertisements which contain a statement to the effect that the credit union is insured by the National Credit Union Administration or NCUSIF, or that its accounts and shares or members are insured by the Administration or NCUSIF to the maximum of $100,000 for each member or shareholder;

(12) Advertisements which do not relate to member accounts, including but not limited to:

(i) Advertisements relating specifically and only to the making of loans by the credit union or loan services;

(ii) Advertisements relating specifically and only to safekeeping box business or services;

(iii) Advertisements relating specifically and only to travelers' checks on which the credit union issuing or causing to be issued the advertisement is not primarily liable;

(iv) Advertisements relating specifically and only to loan life insurance.

(d) The non-English equivalent of the official advertising statement may be used in any advertisement: Provided, That the translation has had the prior written approval of the Regional Director.

PART 741—REQUIREMENTS OF INSURANCE AND VOLUNTARY TERMINATION OF CONVERSION OF INSURANCE

Sec. 741.0 Scope.
Sec. 741.1 Minimum fidelity bond requirements.
Sec. 741.2 Minimum period for verification of accounts.
Sec. 741.3 Maximum borrowing authority.
Sec. 741.4 Examination.
Sec. 741.5 Criteria.
Sec. 741.6 Other insurance or guaranty.
Sec. 741.7 Insurance premium and one percent deposit.
Sec. 741.8 Conversion to a state-chartered credit union.
Sec. 741.9 Notice of voluntary termination or conversion of Insured Status.
Sec. 741.10 Financial and statistical and other reports.

Authority: The authority citation continues to read as 12 U.S.C. 1766, 12 U.S.C. 1761, 12 U.S.C. 1786.

§ 741.0 Scope.

The provisions of this Part apply to Federal credit unions, federally-insured state credit unions, and credit unions making application for insurance of accounts pursuant to Title II of the Act unless the context of a provision indicates its application is otherwise limited. It prescribes various requirements for obtaining, maintaining and terminating Federal insurance and the payment of insurance premiums and capitalization deposit. As used in this Part, "insured credit union" means a credit union whose accounts are insured by the National Credit Union Share Insurance Fund (NCUSIF).

§ 741.1 Minimum fidelity bond requirements.

Any credit union which makes application for insurance of its accounts pursuant to Title II of the Act must possess the minimum fidelity bond coverage stated in §701.20 of this Chapter in order for its application for such insurance to be aproved and for such insurance coverage to continue. A federally-insured credit union whose fidelity bond coverage is terminated shall mail notice of such termination to the Regional Director not less than thirty-five (35) days prior to the effective date of such termination.

§ 741.2 Minimum period for verification of accounts.

The Supervisory Committee of any credit union which makes application for insurance of its accounts pursuant to Title II of the Act must verify or cause to be verified, under controlled conditions, the members' passbooks and accounts with the records of the treasurer not less frequently than once every 2 years. If such verification has not been made within 2 years prior to the date of submission of the application for insurance, the credit union concerned shall cause such verification to be completed prior to submission of such application and at least every 2 years after an application is approved. Information on the verification procedures can be found in §701.12(e).

§ 741.3 Maximum borrowing authority.

Any credit union which makes application for insurance of its accounts pursuant to Title II of the Act, or any insured credit union, must not borrow, from any source, an aggregate amount in excess of 50 per centum of its paid-in and unimpaired capital and surplus, in order for such application to be approved or for such insurance coverage to continue.

§ 741.4 Examination.

As provided in sections 201 and 204 of the Act (12 U.S.C. §§ 1761 and 1784), the Board is authorized to examine any insured credit union or any credit union making application for insurance of its accounts. Such examination may require access to all records, reports, contracts to which the credit union is a party, and information concerning the affairs of the credit union. Upon request, such documentation will be provided to the Board. Any insured credit union or credit union which makes application for insurance may be required to pay the cost of such examination and processing. To the maximum extent feasible, the Board will utilize examinations conducted by state regulatory agencies.

§ 741.5 Criteria.

In determining the insurability of a credit union which makes application for insurance of its accounts pursuant to Title II of the Act, the following criteria shall be applied:

(a) Adequacy of reserves. The credit union must be solvent. In the case of a state-chartered credit union, that credit union must meet, at a minimum, the statutory reserve and full and fair disclosure requirements imposed on Federal credit unions by section 116 of the Act and Part 702 of NCUA's Rules and Regulations. State-chartered credit unions may be required to establish an additional special reserve for investments if those credit unions are permitted by their respective state laws to make investments not authorized in the Federal Credit Union Act.

(b) Financial condition and policies. The following factors are to be considered in determining whether the credit union's financial condition and policies are both safe and sound:

(1) The existence of unfavorable trends which may include excessive losses on loans (i.e., losses which exceed the regular reserve or its equivalent [in the case of state-chartered credit unions] plus other irrevocable reserves established as a contingent against losses on loans), the presence of special reserve accounts used specifically for charging-off loan balances of deceased borrowers, and an expense ratio so high that the required transfers to reserves create a net operating loss for the period or that the net gain after these transfers is not sufficient to permit the payment of a nominal dividend.

(2) The existence of written lending policies, including adequate documentation of secured loans and the protection of security interests by

VOL 51 ISS 87 MY 6 1986 UMI

recording, bond, insurance, or other adequate means, adequate determination of the financial capacity of borrowers and comakers for repayment of the loan, and adequate determination of value of security on loans to ascertain that said security is adequate to repay the loan in the event of default;

(3) Investment policies which are within the provisions of applicable law and regulations, i.e., the Act and Part 703 of this Chapter for Federal credit unions and the laws of the state in which the credit union operates for state-chartered credit unions.

(4) The presence of any account or security, the form of which has not been approved by the Board, except for accounts authorized by state law for state-chartered credit unions.

(c) Fitness of management. The officers, directors, and committee members of the credit union must adhere to the provisions of applicable law, regulations, its charter and bylaws, and with full and fair disclosure requirements in accordance with Section 116 of the Act and Part 702 of NCUA's Rules and Regulations. No person shall serve as a director, officer, committee member, or employee of an insured credit union who has been convicted of any criminal offense involving dishonesty or breach of trust, except with the written consent of the Board.

(d) Insurance of member accounts would not otherwise involve undue risk to the NCUSIF. The credit union must maintain adequate fidelity bond coverage as specified in § 741.1. Any circumstances which may be unique to the particular credit union concerned shall also be considered in arriving at the determination of whether or not an undue risk to the NCUSIF is or may be present. For purposes of this Section, the term "undue risk to the NCUSIF" is defined as a condition which creates a probability of loss in excess of that normally found in a credit union and which indicates a reasonably forseeable probability of the credit union becoming insolvent because of such condition, with a resultant claim against the NCUSIF and a decrease therein.

(e) Powers and purposes. The credit union must not perform services other than those which are consistent with the promotion of thrift and the creation of a source of credit for its members except as otherwise permitted by law or regulation.

(f) Letters of disapproval. A credit union which makes application for share insurance and its application is disapproved shall receive a letter indicating the reasons for such disapproval, a citation of the authority for such disapproval, and suggested methods by which the applying credit union may correct these deficiencies and thereby qualify for share insurance.

(g) Nothing herein shall preclude the Board from imposing additional terms or conditions pursuant to the insurance agreement.

§ 741.6 Other insurance or guaranty.

The presence of excess insurance coverage provided by a party other than the NCUSIF shall in no way impair or affect the rights and priorities of the NCUSIF. In the event of insolvency, the NCUSIF has priority over all other insurers to a claim against credit union assets in an amount no less than its aggregate insurance coverage.

§ 741.7 Insurance premium and one percent deposit.

(a) *Scope.* This Section implements the requirements of section 202 of the Act (12 U.S.C. 1782) providing for capitalization of the NCUSIF through the maintenance of a deposit by each insured credit union in an amount equalling one percent of its insured shares and payment of annual insurance premium.

(b) *Definitions.* For purposes of this Section:

(1) "Insurance year" means the period from July 1 through June 30;

(2) "Insured shares" means the total amount of a credit union's share, share draft and share certificate accounts authorized to be issued to members, other credit unions or public units, exclusive of amounts in excess of insurance coverage limits as provided in 12 CFR Part 745, and, in the case of a federally-insured state-chartered credit union, shall include deposit accounts of members, other credit unions and public units if authorized by state law; and

(3) "Normal operating level" means a total value of the NCUSIF equity equalling 1.3 percent of the aggregate of all insured shares in insured credit unions as of the end of the preceding insurance year.

(c) *One Percent Deposit.* Each insured credit union shall maintain with the NCUSIF a deposit in an amount equalling one percent of the total of the credit union's insured shares as of the close of the preceding insurance year. The deposit amount shall be adjusted annually on or before January 31, or as otherwise directed by the Board.

(d) *Premium.* Each insured credit union shall pay to the NCUSIF, on or before January 31 or as otherwise directed by the Board, an insurance premium for that insurance year in an amount equalling one-twelfth of one percent of the credit union's total insured shares as of the close of the preceding insurance year.

(e) *Redistribution of NCUSIF Equity.* When the NCUSIF exceeds its normal operating level, the Board will, at least annually, make a proportionate adjustment for insured credit unions of the amount necessary to reduce the NCUSIF to its normal operating level. Such adjustment will be in the form determined by the Board and may include a waiver of insurance premiums, premium rebates and/or distributions from NCUSIF equity.

(f) *Form 1308.* A certified copy of NCUA Form 1308 will be completed by each insured credit union in connection with its computation and funding of its annual premium payment and any change in its one percent deposit. The Form 1308 provides for any adjustments declared by the Board, resulting in a single net transfer of funds between the credit union and NCUA. Copies of Form 1308 may be obtained from any NCUA Regional office.

(g) *New Charters.* A newly chartered credit union that obtains share insurance coverage from the NCUSIF during the insurance year in which it has obtained its charter shall not be required to pay an insurance premium for that insurance year. The credit union shall fund its one percent deposit on or before January 31 of the following insurance year, but shall not participate in any distribution from NCUSIF equity related to the period prior to the credit union's funding of its deposit.

(h) *Conversion to Federal Insurance.* An existing credit union that converts to insurance coverage with the NCUSIF during an insurance year shall immediately fund its one percent deposit based on the total of its insured shares as of the close of the month prior to conversion and shall pay a premium (unless waived in whole or in part for all insured credit unions during that year) in an amount that is prorated to reflect the remaining number of months in the insurance year. The credit union will be entitled to a prorated share of any distribution from NCUSIF equity declared subsequent to the credit union's conversion.

(i) *Mergers of Non Federally-Insured Credit Unions.* Where a non federally-insured credit union merges into a federally-insured credit union the continuning federally-insured credit union shall immediately pay to the NCUSIF a prorated insurance premium (unless waived in whole or in part for all federally insured credit unions), and an additional one percent deposit based upon the increase in insured shares resulting from the merger.

(j) *Return of Deposit.* Any insolvent credit union that is closed for involuntary liquidation will not be entitled to a return of its deposit. Any solvent credit union that is closed due to voluntary liquidation shall be entitled to a return of its deposit prior to final distribution of member shares. Any other credit union whose insurance coverage with the NCUSIF terminates will be entitled to a return of the full amount of its deposit immediately after the final date on which any shares of the credit union are insured, except that the Board reserves the right to delay payment by up to one year if it determines that immediate payment would jeopardize the financial condition of the NCUSIF. A credit union that receives a return of its deposit during an insurance year shall have the option of leaving a nominal sum on deposit with the NCUSIF until the next distribution from NCUSIF equity and will thus qualify for a prorated share of the distribution.

§ 741.8 Conversion to a state-chartered credit union.

Any Federal credit union which petitions to convert to a state-chartered federally-insured credit union must make application with the Regional Director for continued insurance of its accounts and meet the requirements as stated in the Act and this Part. If the application for continued insurance is not approved, such insurance ceases on the day immediately preceding the date on which the Federal credit union becomes a state credit union.

§ 741.9 Notice of voluntary termination or conversion of insured status.

(a) In the event of the termination of a credit union's status as an insured credit union as provided under subsection 206(a)(1) of the Act, the credit union shall give prompt notice to all of its members that it has ceased to be an insured credit union. The notice, which shall be mailed to each member's last address of record on the books of the credit union shall be as follows:

Notice of Termination

(Date)_____

1. The status of the _____ as an insured credit union under the provisions of the Federal Credit Union Act, will terminate as of the close of business on the _____ day of _____;

2. Any deposits made by you after that date, either new deposits or additions to existing accounts, will not be insured by the National Credit Union Administration;

3. Accounts in the credit union on the _____, day of _____, up to a maximum of $100,000 for each member, will continue to be insured, as provided by the Federal Credit Union Act, for one (1) year after the close of business on the day of _____, _____;

Provided, however, that any withdrawals after the close of business on the _____ day of _____, _____, will reduce the insurance coverage by the amount of such withdrawals.

(Name of Credit Union)

(Address)

(b) In the event of the conversion of a credit union's status as an insured credit union as provided under subsection 206(a)(2) of the Act, the credit union shall give prompt notice to all of its members that it has ceased to be a federally-insured credit union. The notice, which shall be mailed to each member's last address of record on the books of the credit union, shall be as follows:

Notice of Conversion

(Date)_____

1. The status of the _____ as an insured credit union under the provisions of the Federal Credit Union Act, will cease as of the close of business on the day of _____;

2. As of that date, your deposits are no longer insured by the National Credit Union Share Insurance Fund.

3. Accounts in the credit union on the _____ day of _____, _____, up to a maximum of $ _____ for each member, will be insured by _____, an organization not affiliated with the NCUSIF or the United States Government.

(Name of Credit Union)

(Address)

§ 741.10 Financial and statistical and other reports.

(a) Each operating insured credit union shall file with the National Credit Union Administration on or before January 31 and on or before July 31 of each year a semiannual Financial and Statistical report on Form NCUA 5300, as of the previous December 31 (in the case of the January filing) on June 30 (in the case of the July filing).

(b) Insured credit unions shall, upon written notice from the Board or Regional Director, file such financial or other reports in accordance with instructions contained in such notice.

PART 745—CLARIFICATION AND DEFINITION OF ACCOUNT INSURANCE COVERAGE

Secs.

Appendix—Examples of insurance coverage afforded accounts in credit unions.

Authority: The authority citation continues to read as 12 U.S.C. 1766, 12 U.S.C. 1781, 12 U.S.C. 1789.

PART 745—CLARIFICATION AND DEFINITIONS OF ACCOUNT INSURANCE COVERAGE

§ 745.0 Scope.

The regulation and appendix contained in this part describe the insurance coverage of various types of member accounts. In general, all types of member share accounts received by the credit union in its usual course of business, including regular shares, share certificates, and share draft accounts are insured. For the purposes of applying the rules in this Part, it is presumed that the owner of funds in an account is an insured credit union member or otherwise eligible to maintain an insured account in a credit union. These rules do not extend insurance coverage to persons not entitled to maintain an insured account or to account relationships that have not been approved by the Board as an insured account. Where there are multiple owners of a single account, generally only that part which is allocable to the member(s) is insured.

§ 745.1 Definitions.

(a) The terms "account" or "accounts" as used in this Part means share, share certificate or share draft account of a member (which includes a nonmember where permitted under the Act) or a credit union of a type approved by the Board which evidences money or its equivalent received or held by a credit union in the usual course of business for which it has given or is obligated to give credit to the account of the member or nonmember: Provided, that for purposes of insured state credit unions, reference in this Part to "share," "share certificate" or "share draft" accounts includes, as determined by the Board,

VOL 51 ISS 87 MY 6 1986 UMI

the equivalent of such accounts under state law.

(b) The terms "member" or "members" as used in this part include those nonmembers permitted under the Act to maintain accounts in an insured credit union including nonmember credit unions and nonmember public units and political subdivisions.

(c) The term "public unit" means the United States, any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Panama Canal Zone, any territory or possession of the United States, any county, municipality, or political subdivision thereof or any Indian tribe as defined in section 3(c) of the Indian Financing Act of 1974.

(d) The term "political subdivision" includes any subdivision of a public unit, as defined in paragraph (c) of the section, or any principal department of such public unit, (1) the creation of which subdivision or department has been expressly authorized by state statute, (2) to which some functions of government have been delegated by state statute, and (3) to which funds have been allocated by statute or ordinance for its exclusive use and control. It also includes drainage, irrigation, navigation improvement, levee, sanitary, school or power districts and bridge or port authorities and other special districts created by state statute or compacts between the states. Excluded from the term are subordinate or nonautonomous divisions, agencies, or boards within principal departments.

§ 745.2 General principles applicable in determining insurance of accounts.

(a) General: This Part provides for determination by the Board of the amount of members' insured accounts. The rules for determining the insurance coverage of accounts maintained by members in the same or different rights and capacities in the same insured credit union are set forth in the following provisions of this Part. The Appendix provides examples of the application of these rules to various factual situations. Insofar as rules or local law enter into such determinations, the law of the jurisdiction in which the insured credit union's principal office is located shall govern.

(b) The regulations in this Part in no way are to be interpreted to authorize any type of account that is not authorized by the Federal Law or Regulation or State Law or Regulation or by the bylaws of a particular credit union. The purpose is to be as inclusive as possible of all possible situations.

(c) Records: (1) The account records of the insured credit union shall be conclusive as to the existence of any relationship pursuant to which the funds in the account are deposited and on which a claim insurance coverage is founded. Examples would be trustee, agent, custodian, or executor. No claim for insurance based on such a relationship will be recognized in the absence of such disclosure.

(2) If the account records of an insured credit union disclose the existence of a relationship which may provide a basis for additional insurance, the details of the relationship and the interest of other parties in the account must be ascertainable either from the records of the credit union or the records of the member maintained in good faith and in the regular course of business.

(3) The account records of an insured credit union in connection with a trust account shall disclose the name of both the settlor (grantor) and the trustee of the trust and shall contain an account signature card executed by the trustee.

(4) The interests of the co-owners of a joint account shall be deemed equal, unless otherwise stated on the insured credit union's records in the case of a tenancy in common.

(d) Valuation of trust interests: (1) Trust interests in the same trust deposited in the same account will be separately insured if the value of the trust interest is capable of determination, without evaluation of contingencies, except for those covered by the present worth tables and rules of calculation for their use set forth in § 20.2031–7 of the Federal Estate Tax Regulations (26 CFR 20.2031–7).

(2) In connection with any trust in which certain trust interests are not capable of evaluation in accordance with the foregoing rule, payment by the Board to the trustee with respect to all such trust interests shall not exceed the basic insured amount of $100,000.

(3) Each trust interest in any trust established by two or more settlors shall be deemed to be derived from each settlor pro rata to his contribution to the trust.

(4) The term "trust interest" means the interest of a beneficiary in an irrevocable express trust, whether created by trust instrument or statute, but does not include any interest retained by the settlor.

§ 745.3 Single ownership accounts.

Funds owned by an individual and deposited in the manner set forth below shall be added together and insured up to $100,000 in the aggregate.

(a) *Individual accounts.* Funds owned by an individual (or by the husband-wife community of which the individual is a member) and deposited in one or more accounts in his own name shall be insured up to $100,000 in the aggregate.

(b) *Accounts held by agents or nominees.* Funds owned by a principal and deposited in one or more accounts in the name or names of agents or nominees shall be added to any individual account of the principal and insured up to $100,000 in the aggregate.

(c) *Accounts held by guardians, custodian, or conservators.*

Funds held by a guardian, custodian, or conservator for the benefit of his ward or for the benefit of a minor under a Uniform Gifts to Minors Act and deposited in one or more accounts in the name of the guardian, custodian, or conservator are insured as funds owned by the ward or minor and shall be added to any individual accounts of the ward or minor and insured up to $100,000 in the aggregate.

(d) *Custodial Loan Accounts.* Loan payments received by a Federal credit union prior to remittance to other parties to whom the loan was sold pursuant to section 107(13) of the Federal Credit Union Act and § 701.23 of NCUA's regulations shall be considered to be funds owned by the borrower and shall be added to any individual accounts of the borrower and insured up to $100,000 in the aggregate.

§ 745.4 Testamentary accounts.

(a) The term "testamentary account" refers to a revocable trust account, tentative or "Totten" trust account, "payable-on-death" account or any similar account which evidences an intention that the funds shall pass on the death of the owner of the funds to a named beneficiary.

(b) If the named beneficiary of a testamentary account is a spouse, child or grandchild of the owner, the account shall be insured up to $100,000 in the aggregate as to each such beneficiary, separately from any other accounts of the owner.

(c) If the named beneficiary of a testamentary account is other than the owner's spouse, child, or grandchild, the funds in such account shall be added to any individual accounts of such owner and insured up to $100,000 in the aggregate.

§ 745.5 Accounts held by executors or administrators.

Funds of a decedent held in the name of the decedent or in the name of the executor or administrator of the decedent's estate and deposited in one or more accounts shall be insured up to $100,000 in the aggregate for all such accounts, separately from the individual accounts of the beneficiaries of the estate or of the executor or administrator.

§ 745.6 Accounts held by a corporation, partnership, or unincorporated association.

Accounts of a corporation, partnership, or unincorporated association engaged in any independent activity shall be insured up to $100,000 in the aggregate. The account of a corporation, partnership or unincorporated association not engaged in an independent activity shall be deemed to be owned by the person or persons owning such corporation or comprising such partnership or unincorporated association and, for account insurance purposes, the interest of each person in such an account shall be added to any other account individually owned by such person and insured up to $100,000 in the aggregate. For purposes of this section, "independent activity" means an activity other than one directed solely at increasing insurance coverage.

§ 745.7 [Reserved]

§ 745.8 Joint accounts.

(a) *Separate insurance coverage.* Accounts owned jointly, whether as joint tenants with right of survivorship, as tenants by the entireties, as tenants in common, or by husband and wife as community property, shall be insured separately from accounts individually owned by any of the co-owners.

(b) *Qualifying Joint Accounts.* Joint accounts are insured separately from individual accounts up to a maximum of $100,000 provided that each of the co-owners has personally signed an account signature card and has a right of withdrawal on the same basis as the other co-owners. The restrictions of this paragraph shall not apply to co-owners of a time certificate of deposit or to any deposit obligations evidenced by a negotiable instrument, but such account must in fact be jointly owned.

(c) *Failure to qualify.* An account owned jointly which does not qualify as a joint account for purposes of insurance of accounts shall be treated as owned by the named persons as individuals and the actual ownership interest of each such person in such account shall be added to any other accounts individually owned by such person and insured up to $100,000 in the aggregate.

(d) *Same combination of individuals.* All joint accounts owned by the same combination of individuals shall be added together and insured up to $100,000 in the aggregate.

(e) *Different combination of individuals.* A person holding an interest in more than one joint account owned by different combinations of individuals may receive a maximum of $100,000 insurance coverage on the total of his interest in those joint accounts.

§ 745.9–1 Trust accounts.

(a) For purposes of this section, "trust" refers to an irrevocable trust.

(b) All trust interests, for the same beneficiary, deposited in an account and established pursuant to valid trust agreements created by the same settlor (grantor) shall be added together and insured up to $100,000 in the aggregate, separately from other accounts of the trustee of such trust funds or the settlor or beneficiary of such trust arrangements.

§ 745.9–2 IRA/Keogh accounts.

(a) The present vested ascertainable interest of a participant or designated beneficiary in a trust or custodial account maintained pursuant to a pension or profit-sharing plan described under section 401(d) (Keogh account) or section 408(a) (IRA) of the Internal Revenue Code shall each be insured up to $100,000 separately from other accounts of the participant or designated beneficiary. An IRA account shall be separately insured from a Keogh account.

§ 745.9–3 Deferred compensation accounts.

Funds deposited by an employer pursuant to a deferred compensation plan (including section 401(K) of the Internal Revenue Code) shall be insured up to $100,000 as to the interest of each plan participant who is a member, separately from other accounts of the participant or employer.

§ 745.10 Public unit accounts.

(a) Public funds invested in Federal credit unions and federally-insured state credit unions authorized to accept such investment shall be insured as follows:

(1) Each official custodian of funds of the United States lawfully investing the same in a federally-insured credit union shall be separately insured up to $100,000;

(2) Each official custodian of funds of any state of the United States or any county, municipality, or political subdivision thereof lawfully investing the same in a federally-insured credit union in the same state shall be separately insured up to $100,000;

(3) Each official custodian of funds of the District of Columbia lawfully investing the same in a federally-insured credit union in the District of Columbia shall be separately insured up to $100,000;

(4) Each official custodian of funds of the Commonwealth of Puerto Rico, the Panama Canal Zone, or any territory or possession of the United States, or any county, municipality, or political subdivision thereof lawfully investing the same in a federally-insured credit union in Puerto Rico, the Panama Canal Zone, or any such territory or possession, respectively, shall be separately insured up to $100,000;

(5) Each official custodian of tribal funds of any Indian tribe (as defined in section 3(c) of the Indian Financing Act of 1974) or agency thereof lawfully investing the same in a federally insured credit union shall be separately insured up to $100,000.

(b) Each official custodian referred to in subsection (a)(2), (3), and (4) of this section lawfully investing such funds in a federally-insured credit union outside their respective jurisdictions shall be separately insured up to $100,000; and

(c) For purposes of this section, if the same person is an official custodian of more than one public unit, he shall be separately insured with respect to the public funds held by him for each such unit, but shall not be separately insured with respect to all public funds of the same public unit by virtue of holding different offices in such unit or by holding such funds for different purposes.

(d) For purposes of this section, "lawfully investing" means pursuant to the statutory or regulatory authority of the custodian or public unit.

§ 745.11 Accounts evidenced by negotiable instruments.

If any insured account obligation of a credit union is evidenced by a negotiable certificate account, negotiable draft, negotiable cashier's or officer's check, negotiable certified check, or negotiable traveler's check or letter of credit, the owner of such account obligation will be recognized for all purposes of a claim for insured accounts to the same extent as if his name and interest were disclosed on the records of the credit union provided the instrument was in fact negotiated to such owner prior to the date of the closing of the credit union. Affirmative proof of such negotiation must be offered in all cases to substantiate the claim.

§ 745.12 Account obligations for payment of items forwarded for collection by depositary institution acting as agent.

Where a closed credit union has become obligated for the payment of items forwarded for collection by a depository institution acting solely as

VOL 51 ISS 87 MY 6 1986 UMI

agent, the owner of such items will be recognized for all purposes of a claim for insured accounts to the same extent as if his name and interest were disclosed on the records of the credit union when such claim for insured accounts, if otherwise payable, has been established by the executive and delivery of prescribed forms. Such depository institution forwarding such items for the owners thereof will be recognized as agent for such owners for the purpose of making an assignment of the rights of such owners against the closed insured credit union to the Board and for the purpose of receiving payment on behalf of such owners.

§ 745.13 Notification to members/shareholders.

Information regarding insurance coverage and these rules and regulations shall be conspicuously placed in each branch office and main office of the credit union, and shall also be made available to members upon request. For purposes of this section, an automated teller machine or point of sale terminal is not a branch office.

Appendix—Examples of Insurance Coverage Afforded Accounts in Credit Unions Insured by the National Credit Union Share Insurance Fund

The following examples illustrate insurance coverage on accounts maintained in the same federally insured credit union. They are intended to cover various types of ownership interests and combinations of accounts which may occur in connection with funds invested in insured credit unions. These examples interpret the rules for insurance of accounts contained in 12 CFR Part 745.

The examples, as well as the rules which they interpret, are predicated upon the assumption that, (1) invested funds are actually owned in the manner indicated on the credit union's records and (2) the owner of funds in an account is an insured credit union member or otherwise eligible to maintain an insured account in a credit union. If available evidence shows that ownership is different from that on the institution's records, the National Credit Union Share Insurance Fund may pay claims for insured accounts on the basis of actual rather than ostensible ownership. Further, the examples and the rules which they interpret do not extend insurance coverage to persons otherwise not entitled to maintain an insured account or to account relationships that have not been approved by the Board as an insured account.

A. Single Ownership Accounts

All funds owned by an individual member (or, in a community property state, by the husband-wife community of which the individual is a member) and invested by the member in one or more individual accounts are added together and insured to the $100,000 maximum. This is true whether the accounts are maintained in the name of the individual member owning the funds, in the name of the member's agent or nominee, or in the name of a guardian, conservator or custodian holding the funds for the member's benefit.

Example 1

Question: Members A and B, husband and wife, each maintain an individual account containing $100,000. In addition, they hold a joint account containing $100,000. What is the insurance coverage?

Answer: Each account is separately insured up to $100,000, for a total coverage of $300,000. The coverage would be the same whether the individual accounts contain funds owned as community property or as individual property of the spouses (§ 745.3(a) and § 745.3(a)).

Example 2

Question: Members H and W, husband and wife, reside in a community property state. H maintains a $100,000 account consisting of his separately owned funds and invests $100,000 of community property funds in another account, both of which are in his name alone. What is the insurance coverage?

Answer: The two accounts are added together and insured to a total of $100,000. $100,000 is uninsured (§ 745.3(a)).

Example 3

Question: Member A has $92,500 invested in an individual account, and his agent, Member B invests $25,000 of A's funds in a properly designated agency account. B also holds a $100,000 individual account. What is the insurance coverage?

Answer: A's individual account and the agency account are added together and insured to the $100,000 maximum, leaving $17,500 uninsured. The investment of funds through an agent does not result in additional insurance coverage for the principal (§ 745.3(b)). B's individual account is insured separately from the agency account (§ 745.3(a)). However, if the account records of the credit union do not show the agency relationship under which the funds in the $25,000 account are held, the $25,000 in B's name could, at the option of the NCUSIF, be added to his individual account and insured to $100,000 in the aggregate, leaving $25,000 uninsured (§ 745.2(c)).

Example 4

Question: Member A holds a $100,000 individual account. Member B holds two accounts in his own name, the first containing $25,000 and the second containing $92,500. In processing the claims for payment of insurance on these accounts, the NCUSIF discovers that the funds in the $25,000 account actually belong to A and that B had invested these funds as agent for A, his undisclosed principal. What is the insurance coverage?

Answer: Since the available evidence shows that A is the actual owner of the funds in the $25,000 account, those funds would be added to the $100,00 individual account held by A (rather than to B's $92,500 account) and insured to the $100,000 maximum, leaving $25,000 uninsured. (745.3(b).) B's $92,500 individual account would be separately insured.

Example 5

Question: Member C, a minor, maintains an individual account of $750. C's grandfather makes a gift to him of $100,000, which is invested in another account by C's father, designated on the credit union's records as custodian under a Uniform Gifts to Minors Act. C's father, also a member, maintains an individual account of $100,000. What is the insurance coverage?

Answer: C's individual account and the custodianship account held for him by his father are added together and would be insured to the $100,000 maximum, leaving $750 uninsured (§ 745.3(c)). the individual account held by C's father is separately insured to the $100,000 maximum (§ 745.3(a)).

Example 6

Question: Member G, a court appointed guardian, invests in a properly designated account $100,00 of funds in his custody which belong to member W, his ward. W and G each maintain $25,000 individual accounts. What is the insurance coverage?

Answer: W's individual account and the guardianship account in G's name are added together and insured to $100,000 in the aggregate leaving W with $25,000 in uninsured funds. The fact that a guardian has been judicially appointed does not alter the fact that the guardianship funds legally belong to W, the ward, and are insured as W's individually owned funds (§ 745.3(c)). G's individual account is separately insured (§ 745.3(a)).

Example 7

Question: X Credit Union acts as a servicer of FHA, VA, and conventional mortgage loans made to its members but sold to other parties. Each month X receives loan payments, for remittance to the other parties, from approximately 2,000 member mortgagors. The monies received each month total $1,000,000 and are maintained in a custodial loan account. What is the insurance coverage?

Answer: X Credit Union acts as custodian for the 2,000 individual mortgagors. The interest of each mortgagor is separately insured as his individual account (but added to any other individual accounts which the mortgagor holds in the Credit Union) (§ 745.3(d)).

B. Testamentary Accounts

The term "testamentary account" refers to a revocable trust account, tentative or "Totten" trust account, "payable-on-death" account or any similar account which evidences an intention that the funds shall pass on the death of the owner of the funds to a named beneficiary. If the beneficiary is a spouse, child or grandchild of the owner, the funds in all such accounts are insured for the owner up to $100,000 in the aggregate as to each such beneficiary, *separately* from any other individual accounts of the owner. If the beneficiary of such an account is other than a spouse, child or grandchild of the owner, the funds in the account are, for insurance purposes, added to any other individual accounts of the owner and insured up to $100,000 in the aggregate. In the case of a revocable trust account, the person who holds the power of revocation is deemed to be the owner of the funds in the account. If a revocable trust account is held in the name of a fiduciary other than the owner of the funds, any other accounts held by the fiduciary are insured separately from such revocable trust account.

Example 1

Question: Member H invests $200,000 in a revocable trust account with his son, S, and his daughter, D, as named beneficiaries. What is the insurance coverage?

Answer: Since S and D are children of H, the owner of the account, the funds are insured up to $100,000 as to each beneficiary (§ 745.4(c)). Assuming that S and D have equal beneficial interests ($100,000 each), H is fully insured for this account.

Example 2

Question: Member H invests $100,000 in each of four "payable-on-death" accounts. Under the terms of each account contract, H has the right to withdraw any or all of the funds in the account at any time. Any funds remaining in the account at the time of H's death are to be paid to a named beneficiary. The respective beneficiaries of the four accounts are H's wife, his mother, his brother and his son. H also holds an individual account containing $100,000. What is the insurance coverage?

Answer: The accounts payable on death to H's wife and son are each separately insured to the $100,000 maximum (§ 745.4(b)). The accounts payable to H's mother and brother are added to H's individual account and insured to $100,000 in the aggregate, leaving $200,000 uninsured (§ 745.4(c)).

Example 3

Question: Members H and W jointly invest in a "payable on death" account for the benefit of their son, S, and daughter, D. The account is held by H and W with right of survivorship. What is the maximum insurance coverage available on the account?

Answer: Since S and D are the children of H and W, the account will be insured up to $100,000 as to each beneficiary separately from any accounts of the owners. H and W (§ 745.4(b)). H would be entitled to $100,000 insurance for S and $100,000 for D. W would be entitled to the same coverage for a total of $400,000 on the account. However, upon the death of either H or W, insurance coverage would be reduced to $200,000.

C. Accounts Held by Executors or Administrators

All funds belonging to a decedent and invested in one or more accounts, whether held in the name of the decedent or in the name of his executor or administrator, are added together and insured to the $100,000 maximum. Such funds are insured separately from the individual accounts of any of the beneficiaries of the estate or of the executor or administrator.

Example 1

Question: Member A, administrator of Member D's estate, sells D's automobile and invests the proceeds of $12,500 in an account entitled "A Administrator for the estate of D." A has an individual account in that same credit union containing $100,000. Prior to his death, D had opened an individual account of $100,000. What is the insurance coverage?

Answer: The $12,500 is added to D's individual account and insured to $100,000, leaving $12,500 uninsured. A's individual account is separately insured for $100,000 (§ 745.5).

D. Accounts Held by a Corporation, Partnership or Unincorporated Association

All funds invested in an account or accounts by a corporation, a partnership or an unincorporated association engaged in any independent activity are added together and insured to the $100,000 maximum. The term "independent activity" means any activity other than the one directed solely at increasing coverage. If the corporation, partnership or unincorporated association is not engaged in an independent activity, any account held by the entity is insured as if owned by the persons owning or comprising the entity, and the imputed interest of each such person is added for insurance purposes to any individual account which he maintains.

Example 1

Question: Member X Corporation maintains a $100,000 account. The stock of the corporation is owned by members A, B, C and D in equal shares. Each of these stockholders also maintains an individual account of $100,000 with the same credit union. What is the insurance coverage?

Answer: Each of the five accounts would be separately insured to $100,000 if the corporation is engaged in an independent activity and has not been established merely for the purpose of increasing insurance coverage. The same would be true if the business were operated as a bona fide partnership instead of as a corporation (§ 745.5). However, if X corporation was not engaged in an independent activity, then $25,000 (¼ interest) would be added to each account of A, B, C and D. The accounts of A, B, C and D would then each be insured to $100,000, leaving $25,000 in each account uninsured.

Example 2

Question: Member C College maintains three separate accounts with the same credit union under the titles: "General Operating Fund," Teachers Salaries," and "Building Fund." What is the insurance coverage?

Answer: Since all of the funds are the property of the college, the three accounts are added together and insured only to the $100,000 maximum (§ 745.5).

Example 3

Question: The men's club of X Church carries on various social activities in addition to holding several fund raising campaigns for the church each year. The club is supported by membership dues. Both the club and X Church maintain member accounts in the same credit union. What is the insurance coverage?

Answer: The men's club is an unincorporated association engaged in an independent activity. If the club funds are, in fact, legally owned by the club itself and not the church, each account is separately insured to the $100,000 maximum (§ 745.5).

Example 4

Question: The PQR Union, a member of the ABC Federal Credit Union, has three locals in a certain city. Each of the locals maintains an account containing funds belonging to the parent organization. All three accounts are in the same insured credit union. What is the insurance coverage?

Answer: The three accounts are added together and insured up to the $100,000 maximum (§ 745.5).

E. Public Unit Accounts

For insurance purposes, the official custodian of funds belonging to a public unit, rather than the public unit itself, is insured as the account holder. All funds belonging to a public unit and invested by the same custodian in an insured credit union are added together and insured to the $100,000 maximum, regardless of the number of accounts involved and regardless of whether the funds are invested in accounts located in or outside the state. If there is more than one official custodian for the same public unit, the funds invested by each custodian are separately insured up to $100,000. If the same person is custodian of funds for more than one public unit, he is separately insured to $100,000 with respect to the funds of each unit held by him in properly designated accounts. The maximum coverage for an official custodian of funds of the United States would be $100,000.

For insurance purposes, a "political subdivision" is entitled to the same insurance coverage as any other public unit. "Political subdivision" includes any subdivision of a public unit or any principal department of such unit (1) the creation of which has been expressly authorized by state statute, (2) to which some functions of government have been allocated by state statute, and (3) to which funds have been allocated by statute or ordinance for its exclusive use and control.

Example 1

Question: As Comptroller of Y Consolidated School District, A maintains a $125,000 account in the credit union containing school district funds. He also maintains his own $100,000 member account in the same credit union. What is the insurance coverage?

Answer: The two accounts will be separately insured, assuming the credit union's records indicate that the account containing the school district funds is held by A in a fiduciary capacity. Thus, $100,000 of the school's funds and the entire $100,000 in A's personal account will be insured (§ 745.10(a)(2) and 745.3).

Example 2

Question: A, as city treasurer, and B, as chief of the city police department, each have $100,000 in city funds invested in custodial accounts. What is the insurance coverage?

Answer: Assuming that both A and B have official custody of the city funds, each account is separately insured to the $100,000 maximum (§ 745.10(a)(2)).

Example 3

Question: A is Treasurer of X County and collects certain tax assessments, a portion of

VOL 51 ISS 87 MY 6 1986 UMI

which must be paid to the state under statutory requirement. A maintains an account for general funds of the county and establishes a separate account for the funds which belong to the State Treasurer. The credit union's records indicate that the separate account contains funds held for the State. What is the insurance coverage?

Answer: Since two public units own the funds held by A, the accounts would each be separately insured to the $100,000 maximum (§ 745.10(A)(2)).

Example 4

Question: A city treasurer invests city funds in each of the following accounts: "General Operating Account," "School Transportation Fund," "Local Maintenance Fund," and "Payroll Fund." By administrative direction, the city treasurer has allocated the funds for the use of and control by separate departments of the city. What is the insurance coverage?

Answer: All of the accounts are added together and insured in the aggregate to $100,000. Because the allocation of the city's funds is not by statute or ordinance for the specific use of and control by separate departments of the city, separate insurance coverage to the maximum of $100,000 is not afforded to each account (§§ 745.1(c) and 745.10(a)(2)).

Example 5

Question: A, the custodian of retirement funds of a military exchange, invests $1,000,000 in an insured credit union. The military exchange, a nonappropriated fund instrumentality of the United States, is deemed to be a public unit. The employees of the exchange are the beneficiaries of the retirement funds but are not members of the credit union. What is the insurance coverage?

Answer: Because A invested the funds on behalf of a public unit, in his capacity as custodian, those funds qualify for $100,000 share insurance even though A and the public unit are not within the credit union's field of membership. Since the beneficiaries are neither public units nor members of the credit union they are not entitled to separate share insurance. Therefore, $900,000 is uninsured (§ 745.10(a)(1)).

Example 6

Question: A is the custodian of the County's employee retirement funds. He deposits $1,000,000 in the retirement funds with the credit union. The "beneficiaries" of the retirement fund are not themselves public units nor are they within the credit union's field of membership. What is the insurance coverage?

Answer: Because A invested the funds on behalf of a public unit, in his capacity as custodian, those funds qualify for $100,000 share insurance even though A and the public unit are not within the credit union's field of membership. Since the beneficiaries are neither public nor members of the credit union they are not entitled to separate share insurance. Therefore, $900,000 is uninsured (§ 745.10(a)(2)).

Example 7

Question: A county treasurer deposits in an insured credit union $100,000 in each of the following accounts:

"General Operating Fund"
"County Roads Department Fund"
"County Water District Fund"
"County Public Improvement District Fund"
"County Emergency Fund"

What is the insurance coverage?

Answer: The "County Roads Department," "County Water District" and "County Public Improvement District" accounts would each be separately insured to $100,000 if the funds in each such account have been allocated by law for the exclusive use of a separate county department or subdivision expressly authorized by State statute.

Funds in the "General Operating" and "Emergency Fund" accounts would be added together and insured in the aggregate to $100,000, if such funds are for countywide use and not for the exclusive use of any subdivision or principal department of the county, expressly authorized by State statute (§§ 745.1(c) and 745.10(a)(2)).

Example 8

Question: A, the custodian of Indian tribal funds, lawfully invests $1,000,000 in an account in an insured credit union on behalf of 15 different tribes; the records of the credit union show that no tribe's interest exceeds $100,000. A, as official custodian, also invests $1,000,000 in the same credit union on behalf of 100 individual Indians, who are not members. Each Indian's interest is $10,000. What is the insurance coverage?

Answer: Because each tribe is considered a separate public unit, the custodian of each tribe, even though the same person, is entitled to separate insurance for each tribe (§ 745.10(5)). Since the credit union's records indicate no tribe has more than $100,000 in the account, the $1,000,000 would be fully insured as 15 separate tribal accounts. If any one tribe had more than a $100,000 interest in the funds, it would be insured only to $100,000 and any excess would be uninsured.

However, the $1,000,000 invested on behalf of the individual Indians would not be insured since the individual Indians are neither public units nor, in the example, members of the credit union. If A, is the custodian of the funds in his capacity as an official of a governmental body that qualified as a public unit, then the account would be insured for $100,000, leaving $900,000 uninsured.

F. Joint Accounts

Accounts held under any form of joint ownership valid under state law (whether as joint tenants with right of survivorship, tenants by the entireties, tenants in common or by husband and wife as community property) are insured up to $100,000. This insurance is separate from that afforded individual accounts held by any of the co-owners.

An account is insured as a joint account only if each of the co-owners has personally executed an account signature card and possesses withdrawal rights. An account owned jointly which does not qualify as a joint account for insurance purposes is insured as if owned by the named persons as individuals. In that case, the actual ownership interest in the account of each person is added to any other accounts individually owned by such person and insured up to $100,000 in the aggregate.

Any individual, including a minor, may be a co-owner of a joint account provided that, under State law, he may execute a signature card and withdraw funds from the account on the same basis as the other co-owners.

All funds invested in joint accounts owned by the same combination of individuals are first added together and insured to the $100,000 maximum. Where a member has an interest in more than one joint account and different joint owners are involved, his interests in all of such joint accounts are then added together and insured to $100,000 in the aggregate.

For insurance purposes, the co-owners of any joint account are deemed to have equal interests in the account, except in the case of a tenancy in common. With a tenancy in common, equal interests are presumed unless otherwise stated on the records of the credit union.

Example 1

Question: Members A and B maintain an account as joint tenants with right of survivorship and, in addition, each holds an individual account. Is each account separately insured?

Answer: If both A and B have executed the signature card and possess withdrawal rights with respect to the joint funds, each account is separately insured to the $100,000 maximum (§ 745.8 (a) and (b)).

Example 2

Question: Members H and W, husband and wife, reside in a community property state. Each holds an individual account and, in addition, they hold a qualifying joint account. The funds in all three accounts consist of community property. Is each account separately insured?

Answer: Yes. An account in the individual name of a spouse will be insured up to $100,000 whether the funds consist of community property or separate property of the spouse. A joint account containing community property is also insured up to $100,000. Thus, community property can be used for individual accounts in the name of each spouse and for a joint account in the name of both spouses, each of which accounts is separately insured up to $100,000 (§ 745.3(a) and 745.8(a)).

Example 3

Question: Two accounts of $100,000 each are held by a member and his wife under the following names:

John Doe and Mary Doe, husband and wife, as joint tenants with right of survivorship.
Mrs. John Doe and John Q. Doe (community property).

Are the accounts separately insured?

Answer: No. Both accounts are considered joint accounts owned by the same combination of individuals, regardless of the form of joint ownership. Reversal of names or use of different styles does not change the result, as long as the account owners are in fact the same in both cases. For insurance purposes, the accounts are added together and insured to the maximum of $100,000 leaving $100,000 uninsured (745.8(b)).

Example 4

Question: The following accounts are held by members A, B and C, each of whom has personally executed signature cards for the accounts in which he has an interest. Each co-owner of a joint account possesses the necessary withdrawals rights.

1. A, as an individual—$100,000
2. B, as an individual—$100,000
3. C, as an individual—$100,000
4. A and B, as joint tenants w/r/o survivorship—$90,000
5. A and C, as joint tenants w/r/o survivorship—$90,000
6. B and C, as joint tenants w/r/o survivorship—$90,000
7. A, B and C, as joint tenants w/r/o survivorship—$90,000.

What is the insurance coverage?

Answer: Accounts numbered 1, 2 and 3 are each separately insured for $100,000 as individual accounts held by A, B and C, respectively (§ 745.3(a)). With regard to accounts number 4, 5, 6 and 7, the respective interests of A, B and C in such accounts are added together for insurance purposes (§ 745.8(c)). The interest of the co-owners of each joint account are deemed equal for insurance purposes (§ 745.2(c)(4)). Thus, A has an interest of $45,000 in account No. 4, $45,000 in account No. 5 and $30,000 in account No. 7, for a total joint account interest of $120,000, of which $100,000 is insured. The interest of B and C are similarly insured.

Example 5

Question: A, B and C hold accounts as set forth in Example 4. Members A and B are husband and wife. C, their minor child, has failed to execute the signature card for account No. 7. In account No. 5, C cannot make a withdrawal without A's written consent. In account No. 6, the signatures of both B and C are required for withdrawal. A has provided all of the funds for accounts numbered 5 and 7. What is the insurance coverage?

Answer: If any of the co-owners of a joint account have failed to meet any of the joint account requirements, the account is not insured as a joint account. Instead, the account is insured as if it consisted of commingled individual accounts of each of the co-owners in accordance with his actual ownership funds, as determined under applicable state law (§ 745.8(c)). Account No. 5 is not insured as a joint account because C does not possess the right to withdraw the funds in accordance with his purported interest in the account. However, account No. 6 does qualify as a joint account for insurance purposes since each co-owner possesses the right to withdraw funds on the same basis. Account No. 7 is not insured as a joint account since C did not personally execute the signature card. Assuming that, under applicable state law, A has the entire actual ownership interest in accounts 5 and 7, all of the funds in these accounts are treated for insurance purposes as individually owned by A (§ 745.8(c)). Thus, the $180,000 in these accounts is added to the $100,000 in account No. 1, A's individual account, and insured up to $100,000 in the aggregate, leaving $180,000 uninsured. Accounts 4 and 6, the remaining joint accounts, are each insured to the $100,000 limit, since they are owned by different combinations of individuals and no co-owner has an aggregate interest in the two accounts in excess of $100,000 (§ 745.8(e)).

Example 6

Question: The following accounts are owned by members A, B and C, each of whom has personnally executed signature cards for the accounts in which he has an interest. Each co-owner possesses withdrawal rights.

1. A, as an individual—$100,000
2. B, as an individual—$100,000
3. A, B and C, as joint tenants w/r/o survivorship—$100,000
4. A, B and C, as joint tenants w/r/o survivorship—$200,000
5. A, and B, as joint tenants w/r/o survivorship—$100,000

What is the insurance coverage?

Answer: Accounts numbered 1 and 2 are each separately insured for $100,000 as individual accounts held by A and B, respectively (§ 745.3(a)). With respect to the joint accounts, accounts numbered 3 and 4 are owned by the same combination of individuals and are added together and insured to a maximum of $100,000 leaving $200,000 uninsured (§ 745.8(d)). A, B and C each have a $33,334 insured interest in accounts 3 and 4. A and B also maintain a joint account, account number 5. Because C has no interest in this account, it is owned by a combination of individuals different from accounts 3 and 4. The interests of A and B in account number 5 are deemed to be equal (§ 745.2(c)(4)). A's $50,000 interest in account 5 is added to his insured interest in accounts 3 and 4, giving him a total of $83,334 insurance coverage for his interests in the verious joint accounts, in addition to the insurance in the amount of $100,000 provided for his individual account. B's interests in accounts 3, 4 and 5 are identical to A's and her interests are insured in a like manner.

G. Trust Accounts

A trust estate is the interest of a beneficiary in an irrevocable express trust, whether created by trust instrument or statute, that is valid under state law. Thus, funds invested in an account by a trustee under an irrevocable express trust are insured on the basis of the beneficial interests under such trust. The interest of each beneficiary in an account (or accounts) established under such a trust arrangement is insured to $100,000 separately from other accounts held by the trustee, the settlor (grantor) or the beneficiary. However, in cases where a beneficiary has an interest in more than one trust arrangement created by the same settlor, the interests of the beneficiary in all accounts established under such trusts are added together for insurance purposes, and the beneficiary's aggregate interest derived from the same settlor is separately insured to the $100,000 maximum.

A beneficiary's interest in an account established pursuant to an irrevocable express trust arrangement is insured separately from other beneficial interests (trust estates) invested in the same account if the value of the beneficiary's interest (trust estate) can be determined (as of the date of a credit union's insolvency) without evaluation of contingencies except for those covered by the present worth tables and rules of calculation for their use set forth in § 20.2031–10 of the Federal Estate Tax Regulations (26 CFR 20.2031–10). If any trust estates in such an account cannot be so determined, the insurance with respect to all such trust estates together shall not exceed the basic insured amount of $100,000.

In order for insurance coverage of trust accounts to be effective in accordance with the foregoing rules, certain recordkeeping requirements must be met. In connection with each trust account, the credit union's records must indicate the name of both the settlor and the trustee of the trust and must contain an account signature card executed by the trustee indicating the fiduciary capacity of the trustee. In addition, the interests of the beneficiaries under the trust must be ascertainable from the records of either the credit union or the trustee, and the settlor or beneficiary must be a member of the credit union. If there are two or more settlors or beneficiaries, then either all the settlors or all the beneficiaries must be members of the credit union.

Although each ascertainable trust estate is separately insured, it should be noted that in short-term trusts the insurable interest or interests may be very samll, since the interests are computed only for the duration of the trust. Thus, if a trust is made irrevocable for a specified period of time, the beneficial interest will be calculated in terms of the length of time stated. A reversionary interest retained by the settlor is treated in the same manner as an individual account of the settlor.

As stated, the trust must be valid under local law. A trust which does not meet local requirements, such as one imposing no duties on the trustee or conveying no interest to the beneficiary, is of no effect for insurance purposes. An account in which such funds are invested is considered to be an individual account.

An account established pursuant to a revocable trust arrangement is insured as a form of individual account and is treated under Section B, supra, dealing with Testamentary Accounts.

Example 1

Question: Member S invests $45,000 in trust for B, the beneficiary. S also has an individual account containing $90,000 in the same credit union. What is the insurance coverage?

Answer: Both accounts are fully insured. The trust account is separately insured from the individual account of S (§§ 745.3(a) and 745.9–1(a)).

Example 2

Question: S invests funds in trust for A, B, C, D, and E. A, B, and C are members of the credit union, D, E and S are not. What is the insurance coverage?

Answer: This is an uninsurable account. Where there is more than one settlor or more than one beneficiary, all the settlors or all the

VOL 51 ISS 87 MY 6 1986 UMI

beneficiaries must be members to establish this type of account. Since D, E and S are not members, this account cannot legally be established or insured.

Example 3

Question: Member S invests $500,000 in trust for ABC Employees Retirement Fund. Some of the beneficiaries are members and some are not. What is the insurance coverage?

Answer: The account is insured as to the determinable interests of each member beneficiary to a maximum of $100,000 per member. Member interests not capable of evaluation and nonmember interests shall be added together and insured to a maximum of $100,000 in the aggregate (§ 745.9–1).

Example 4

Question: Member A has an individual account of $100,000 and establishes an IRA and accumulates $50,000 in that account. Subsequently A becomes self employed and establishes a Keogh account in the same credit union and accumulates $100,000 in that account. What is the insurance coverage?

Answer: Each of A's accounts would be separately insured for up to $100,000. In the example, A would be fully insured for $250,000 (§ 745.3(a) and § 745.9–2).

BILLING CODE 7535–01–M

DEPARTMENT OF JUSTICE

28 CFR Part 16

[AAG/A Order No. 9–86]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Proposed rule.

SUMMARY: The Department of Justice, Executive Office for Immigration Review, proposes to exempt a new system of records entitled "Records and Management Information System, JUSTICE/EOIR–001," from the access and amendment provisions of the Privacy Act, 5 U.S.C. 552a(d). This exemption is needed to preclude access to any information in the system which has been properly classified under an Executive Order for national security reasons. It is also needed to preclude unauthorized access to certain confidential investigation materials compiled for the purposes of enforcing immigration laws. In addition, the exemption is needed to preclude the amendment of the Record of Proceeding which constitutes the official record of quasi-judicial administrative proceedings. The records may include transcripts of the proceedings, charging documents, investigatory reports, decisional memoranda, and evidentiary materials, such as exhibits and other case-related papers concerning aliens brought into the administrative adjudication process. These records are compiled during the course of proper hearings, established due process procedures; and any relevant investigations, if the individual who is the subject of the record could make ex parte correction of the material, administrative due process could not be achieved.

DATE: All comments must be received by June 5, 1986.

ADDRESS: All comments should be addressed to J. Michael Clark, Acting Assistant Director, General Services Staff, Justice Management Division, Room 6002, Department of Justice, 601 D Street, NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark, (202) 272–6474.

SUPPLEMENTARY INFORMATION: A description of the "Records and Management Information System" is being published in the Notice section of today's **Federal Register.**

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, it is hereby stated that the order will not have a significant economic impact on a substantial number of small entities."

List of Subjects in 28 CFR Part 16

Administrative Practice and Procedure; Courts; Freedom of Information; Privacy; and Sunshine Act.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General No. 793–78, 28 CFR Part 16 is amended to add § 16.83 as set forth below.

Dated: April 24, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

2. It is proposed to amend 28 CFR Part 16 by adding § 16.83 to read as follows:

§ 16.83 Exemption of the Executive Office for Immigration Review System—Limited Access.

(a) The following system of records is exempt from 5 U.S.C. 552a(d):

(1) The Executive Office for Immigration Review's Records and Management Information System (JUSTICE/EOIR–001). This exemption applies only to the extent that information in the system is subject to exemption pursuant to 5 U.S.C. 552a(k)(1) and (2).

(b) Exemption from the particular subsections are justified for the following reasons:

(1) From subsection (d) because access to information which has been properly classified pursuant to an Executive Order could have an adverse effect on the national security. In addition, from subsection (d) because unauthorized access to certain investigatory material could compromise ongoing or potential investigations; reveal the identity of confidential informants; or constitute unwarranted invasions of the personal privacy of third parties.

(2) From subsection (d) (2), (3), and (4) because the Record of Proceeding constitutes an official record which includes transcripts of quasi-judicial administrative proceedings, investigatory materials, evidentiary materials such as exhibits, decisional memoranda, and other case-related papers. Administrative due process could not be achieved by the ex parte "correction" of such materials by the individual who is the subject thereof.

[FR Doc. 86–10056 Filed 5–5–86; 8:45 am]

BILLING CODE 4410–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 51e

Project Grants for Health Programs for Refugees

AGENCY: Centers for Disease Control, Public Health Service, HHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Public Health Service proposes to develop regulations which would establish a regulatory base for project grants awarded to State and local health departments to assist them in providing initial health assessments and public health follow-up activities to refugees. These health assessments specifically indentify conditions of possible public health concern such as tuberculosis, and personal health problems such as anemia and dental caries, which could impair the effective resettlement of refugees. The Health Programs for Refugees (HPR) grant program which is authorized by section 412(b)(5) of the Immigration and Nationality Act (INA) is administered by the Centers for Disease Control (CDC) through an intra-agency agreement with the Office of Refugee Resettlement (ORR), HHS.

DATE: Written comments are invited and must be received on or before July 7, 1986.

ADDRESS: Comments should be addressed in writing to the Director, Division of Quarantine, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333. Comments received will be available for public inspection between 8 a.m. and 4:30 p.m., Monday through Friday (except holidays) in Room 211, 1600 Tullie Circle, Atlanta, Georgia. All relevant comments received during the comment period will be considered in developing the final rule.

FOR FURTHER INFORMATION CONTACT: Dr. Laurence S. Farer, Director, Division of Quarantine, Center for Prevention Services, Centers for Disease Control, Atlanta, Georgia 30333, telephone (404) 329–2574, or FTS 236–2574.

SUPPLEMENTARY INFORMATION: This NPRM proposes regulations which would govern a grant program first authorized under the broad authority of section 412(c)(3) of the INA (8 U.S.C. 1522(c)(3)), as amended by the Refugee Act of 1980, Pub. L. 96–212, approved March 17, 1980. The Refugee Assistance Amendments of 1982, Pub. L. 97–363, approved October 25, 1982, established a specific authority at section 412(b)(5) of the INA (8 U.S.C. 1522(b)(5)). CDC is responsible for administering this project grant program through an intra-agency agreement with the ORR. This grant program is designed to assist State and local governments in providing public health and general health assessments for refugees. These health assessments specifically identify conditions of possible public health concern and health problems which could impair the effective resettlement of refugees. The term "refugee" is defined in section 101(a)(42) of the INA (8 U.S.C. 1101(a)(42)). Individuals classified as refugees are eligible for services under this program, except certain refugees whose medical care and other resettlement needs are provided through a special matching grant program also administered by the ORR under section 412(c) of the INA (8 U.S.C. 1522(c)).

The provisions of this proposed rule are very similar to regulations under 42 CFR Part 51b, which are applicable to other preventive health service grant programs administered by CDC. This new part contains similar application requirements, including the applicant's plan of operation, the long-term and short-term objectives of the project, an evaluation plan, and a justification for the funds requested. The regulations describe the manner in which the applications will be evaluated and approved, with emphasis on the size of the applicant's refugee population, the extent of health problems among the refugee population, the applicant's ability to coordinate the delivery of needed services, and the consistency of the proposed program with comprehensive refugee resettlement plans required by 45 CFR Part 400.

The Secretary has determined that this proposed rule will not significantly impact on a substantial number of small entities and therefore does not require preparation of a regulatory flexibility analysis under the Regulatory Flexibility Act, Pub. L. 96–345.

The Secretary has also determined that this proposed rule is not a "major rule" under Executive Order 12291. Thus, a regulatory impact analysis is not required because it will not:

(1) Have an annual effect on the economy of $100 million or more;

(2) Impose a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or

(3) Result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Section 51e.4 of this proposed rule contains information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, we have submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to the agency official designated for this purpose whose name appears in this preamble, and to the Office of Information and Regulatory Affairs, OMB, Room 3208, New Executive Office Building, Washington, DC 20503, Attention: Fay S. Iudicello.

List of Subjects in 42 CFR 51e

Communicable diseases, Grant programs-health, Refugees.

It is, therefore, proposed to amend Title 42 of the Code of Federal Regulations by adding a new Park 51e as set forth below.

Dated: April 22, 1986.

Approved: April 29, 1986.

Otis R. Bowen,

Secretary.

Donald Ian Macdonald M.D.,

Acting Assistant Secretary for Health.

PART 51e—PROJECT GRANTS FOR HEALTH PROGRAMS FOR REFUGEES

Sec.

51e.1 To which programs do these regulations apply?
51e.2 Definitions.
51e.3 Who is eligible to apply for a grant?
51e.4 What information is required in the application?
51e.5 How will grant applications be evaluated and the grants awarded?
51e.6 How can grant funds be used?
51e.7 What other HHS regulations apply to these grants?
51e.8 What other conditions apply to these grants?

Authority: Sec. 412(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1522(b)(5)).

§ 51e.1 To which programs do these regulations apply?

The regulations in this part apply to project grants awarded for health assessments for refugees as authorized under section 412(b)(5) of the Immigration and Nationality Act, as amended.

§ 51e.2 Definitions.

As used in the regulations:

"Health assessment" means a physical and clinical examination to determine the health status of a refugee which may include the provision of diagnostic and treatment services and preventive health activities, as related to the presence and severity of a health condition of public health concern or of personal health consequence which could impede the refugee from becoming economically self-sufficient. The term "refugee" is defined in section 101(a)(42) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(42)).

"Secretary" means the Secretary of Health and Human Services (HHS) and any other officer or employee of that Department to whom the authority involved has been delegated.

"State" means one of the 50 States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, the Northern Mariana Islands, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands.

§ 51e.3 Who is eligible to apply for a grant?

An applicant must be a State health agency with responsibility for disease control under State law or a health agency of a political subdivision of a

VOL 51 ISS 87 MY 6 1986 UMI

State which has responsibility for disease control under such law.

§ 51e.4 What information is required in the application?

(a) The initial or renewal application for a project period must include a description of the following:

(1) An assessment of the scope, magnitude, and duration of the problems to which the program will be addressed. If the applicant is a political subdivision of a State, the application must reflect consultation with the State health agency.

(2) The intermediate (1-year budget period) and long-range (2- to 5-year project period) objectives of the project which are specific, measurable, realistic, and time-phased.

(3) A plan of operation, including the relationship of this project to the State's comprehensive refugee resettlement plan as implemented by regulations at 45 CFR Part 400.

(4) An evaluation plan for measuring the achievement of project objectives and the effectiveness with which the plan of operation is carried out.

(5) Prior progress toward the achievement of project objectives when the applicant has received prior health assessment grant funds.

(6) A budget and justification for the grant funds requested, including a description of direct health services that are provided by other health or resettlement agencies and which are related to referral and followup recommendation resulting from the health assessment.

(b) An application for a continuation grant must be submitted for each funding period. This continuation application must include the following:

(1) A budget and justification for the grant funds requested.

(2) A summary of the program activities achieved during the previous budget period, with a review of the extent of achievement of each objective.

(3) A description of any changes in the information shown in the initial application for the project period.

§ 51e.5 How will grant applications be evaluated and the grants awarded?

(a) Within the limits of funds available, the Secretary may award a grant to assist the applicant in carrying out a health program for refugees. Before awarding a grant to a political subdivision of a State, the Secretary will consult with the State health agency. Funds will normally be provided for a period not to exceed one year.

(b) Priorities for funding initial or continuing grants will be based on the following factors:

(1) Evidence of an assessment of the relationship of the proposed project to existing services.

(2) The size of the refugee population, including secondary migrants.

(3) The extent of unmet public health problems among refugees, based upon criteria to be developed by the Secretary.

(4) The need for general health assessments for refugees.

(5) The ability of the applicant to deliver and coordinate the delivery of needed services, including referrals and financing arrangements.

(6) Consistency with the State's comprehensive refugee resettlement plan.

(7) Current performance and ability to maintain program momentum.

§ 51e.6 How can grant funds be used?

(a) Grant funds may be used for costs associated with planning, organizing, and implementing health assessment activities directed to refugees. Such funds may also be used to assist in meeting the cost of:

(1) Activities designed to assure that refugees entering the United States with problems of public health concern receive appropriate follow-up care, and

(2) Activities designed to provide diagnostic and treatment services which are integral to the conduct of public health programs and are otherwise not available.

Any person classified as a refugee is eligible for services under this program, except those refugees whose medical care and other resettlement services are provided through a special matching grant program administered under section 412(c) of the Immigration and Nationality Act (8 U.S.C. 1522(c)).

(b) Grant funds may not be used for construction costs, inpatient care, or rehabilitative services.

§ 51e.7 What other HHS regulations apply to these grants?

Several other HHS regulations apply to grants under this part. These include, but are not limited to:

42 CFR Part 50, Subpart D—PHS grant appeals procedure

45 CFR Part 16—Procedures of the Departmental Grant Appeals Board

45 CFR Part 46—Protection of human subjects

45 CFR Part 74—Administration of grants

45 CFR Part 75—Informal grant appeals procedures

45 CFR Part 76—Debarment and suspension from eligibility for financial assistance

45 CFR Part 80—Nondiscrimination under programs receiving Federal assistance through the Department of Health and Human Services effectuation of Title VI of the Civil Rights Act of 1964

45 CFR Part 81—Practice and procedure for hearings under Part 80 of this Title

45 CFR Part 84—Nondiscrimination on the basis of handicap in programs and activities receiving or benefiting from Federal financial assistance

45 CFR Part 86 and Appendix A—Nondiscrimination on the basis of sex in education programs and activities receiving or benefiting from Federal financial assistance

45 CFR Part 91—Nondiscrimination on the basis of age in HHS programs or activities receiving Federal financial assistance

§ 51e.8 What other conditions apply to these grants?

(a) Neither the approval of any application nor the award of any grant commits or obligates the United States in any way to make any additional, supplemental continuation, or other award with respect to any approved application or portion of an approved application.

(b) Any funds granted pursuant to this part shall be expended solely for the purposes for which the funds were granted in accordance with the approved application and budget, the regulations of this part, the terms and conditions of the award; and the applicable cost principles prescribed in 45 CFR Part 74, Subpart Q.

(c) The Secretary may, at the time of award, impose additional conditions, including conditions governing the use of information or consent forms and requirements for periodic performance reports, when, in the Secretary's judgment, they are necessary to advance the approved program, the interest of the public health, or the conservation of grant funds.

BILLING CODE 4160-18-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-29; RM-4941]

FM Broadcast Station in Greenup, KY

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein denies a request for extension of time for filing reply comments in a proceeding involving the proposed allotment of Channel 289B1 to Greenup, Kentucky.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: D. David Weston, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio Broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1061, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

Order Denying Extension of Time for Filing Reply Comments

In the Matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (Greenup, Kentucky); MM Docket No. 86-29; RM-4941.

Adopted: April 22, 1986.
Released: April 25, 1986.

By the Chief, Policy and Rules Division.

1. On January 21, 1986, the Commission adopted the *Notice of Proposed Rule Making*, 51 FR 4940, February 10, 1986, proposing the allotment of Channel 289B1 to Greenup, Kentucky, and modification of license of Station WLGC(FM), Channel 288A to specify operation on that channel. The *Notice* was adopted in response to a petition filed by Greenup County Broadcasting, Inc. ("petitioner"), licensee of Station WGLC(FM), Greenup, Kentucky. The reply comment date is April 11, 1986.

2. On April 4, 1986 petitioner filed a motion for extension of time to, and including, April 25, 1986, in which to file reply comments. Petitioner states that the additional time is needed for newly retained engineering counsel to familiarize himself with the pleadings and to prepare a proper response.

3. As stated in § 1.46(a) of the Rules, the Commission does not routinely grant an extension request without good cause. An insufficient basis for an exception to that policy appears to exist here. Petitioner states that since an issue has been raised as to the appropriate class of channel in the particular transmitter site zone, its engineering counsel needs extra time to prepare a reply. However, in the event additional time is justified, petitioner can submit late filed engineering comments accompanied by a motion setting forth sufficient reason for their acceptance in this proceeding.

4. In view of the foregoing, it is ordered, that the motion of petitioner to extend the reply comment date is denied.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Federal Register
Vol. 51, No. 87
Tuesday, May 6, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Memorandum of Agreement: Emergency Repair of Flood Levees in Illinois

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: The Council proposes to execute a Programmatic Memorandum of Agreement pursuant to § 800.8 of its regulations (36 CFR Part 800) that provides for the U.S. Army Corps of Engineers, Rock Island District; to make emergency repairs of flood levees along rivers in Illinois. Repair will be conducted in a way that minimizes or mitigates damage to historic properties, and review of such work will be reduced. Interested parties are encouraged to obtain a copy of the proposed Agreement from the Council and submit comments.

DATE: Comments Due: June 5, 1986.

ADDRESS: Advisory Council on Historic Preservation, ATT: Michael C. Quinn, 1100 Pennsylvania Avenue, NW., Room 803, Washington, DC 20004. Telephone (202) 786-0505.

John M. Fowler,
Acting Executive Director.

BILLING CODE 4310-10-M

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

Wallace Watershed, SC; Finding of No Significant Impact

AGENCY: Soil Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Council on Environmental Quality Guidelines (40 CFR Part 1500), and the Soil Conservation Service Guidelines (7 CFR Part 650), the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Wallace Watershed, Marlboro County, South Carolina.

FOR FURTHER INFORMATION CONTACT: Mr. Billy Abercrombie, State Conservationist, Soil Conservation Service, 1835 Assembly Street, Room 950, Columbia, South Carolina 29201, telephone (803) 765-5681.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Billy Abercrombie, State Conservationist, has determined that the preparation and review of an environmental impact statement is not needed for this project.

The project concerns a plan for erosion control on 9,194 acres of cropland in Marlboro County. The work will be accomplished through conservation plans and long-term contracts involving about 90 farms. The soil and water conservation district will provide leadership for installing the project.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Billy Abercrombie.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10-904—Watershed Protection and Flood Prevention—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: April 28, 1986.
Billy Abercrombie,
State Conservationist.

[FR Doc. 86-10092 Filed 5-5-86; 8:45 am]
BILLING CODE 3410-16-M

Environmental Statements; Wabbaseka East RC&D Measure Plan, AR

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Wabbaseka East RC&D Measure Plan, Jefferson County, Arkansas.

FOR FURTHER INFORMATION CONTACT: Jack C. Davis, State Conservationist, Soil Conservation Service, 2405 Federal Office Building, 700 West Capitol Avenue, Little Rock, Arkansas 72201, telephone (501) 378-5445.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Jack C. Davis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a measure plan for reducing flooding and improving drainage on agricultural cropland. The planned work includes 8.2 miles of channel work which includes widening and deepening. Approximately 35 small pipe drops will be installed for erosion control along the ditches. Two low-water weirs will be installed for fish habitat. Turkey nesting areas will be created.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Jack C. Davis.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: April 22, 1986.
Jack C. Davis,
State Conservationist.

BILLING CODE 3410-16-M

DEPARTMENT OF COMMERCE

International Trade Administration

Applications for Duty-Free Entry of Scientific Instruments; Rush-Presbyterian-St. Luke's Medical Center et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-155. Applicant: Rush-Presbyterian-St. Luke's Medical Center, 1753 W. Congress Parkway, Chicago, IL 60612. Instrument: Electron Microscope System, Model JEM-1200 EX. Manufacturer: JEOL, Ltd., Japan. Intended use: The instrument is intended to be used to study the ultrastructure of tumor cells, red blood cells and ocular and endocrine tissues. Most specimens studied will be of biological origin, some from experimental animals and some from patients with pathological disorders. Application received by Commissioner of Customs: March 13, 1986.

Docket No. 86-179. Applicant: Cornell University, Materials Science Center, 308-A Thurston Hall, Ithaca, NY 14853. Instrument: Laser Interferometer System. Manufacturer: Transelek Enr., Canada. Intended use: The instrument is intended to be used to perform quantitative acoustic emission studies of indentation-produced cracks in composite materials. In addition, the instrument will be used for the following applications:

(1) Transducer characterization studies;

(2) Non-contact, long-working distance ultrasonic materials testing; and

(3) Quantitative materials absorption/microstructure measurements.

Application received by Commissioner of Customs: April 2, 1986.

Docket No. 86-182. Applicant: The Research Foundation of SUNY, Purchasing, ULB 66, 1400 Washington Avenue, Albany, NY 12222. Instrument: Spectrometer System for Atmospheric Measurements, Model TAMS 150. Manufacturer: Unisearch Associates, Inc., Canada. Intended use: The instrument is intended to be used for the study of the possible damage of Eastern U.S. forests by air pollutants especially sulfur dioxide and hydrogen peroxide. The instrument will also be used for measuring other very important pollutants including nitric acid, nitric oxide, nitrogen dioxide and ammonia. In addition to making measurements in the field for this research project, the instrument will be used as a calibration reference standard. Students working toward their Ph.D. will use the instrument to perform their required original research work. Application received by Commissioner of Customs: April 3, 1986.

Docket No. 86-183. Applicant: Montana College of Mineral Science and Technology, West Park Street, Butte, MT 59701. Instrument: Inductive Ground conductivity Meter, Model EM34-3. Manufacturer: Geonics Ltd., Canada. Intended use: The instrument is intended to be used for educational purposes in the following geophysics courses:

(1) Geophysics 410—Methods of Electrical Exploration;

(2) Geophysics 421—Geophysics Field Camp; and

(3) Geophysics 510—Problems in Electrical Exploration.

Application received by Commissioner of Customs: April 3, 1986.

Docket No. 86-184. Applicant: University of California, Los Alamos National Laboratory, SM-30 Bikini Road, P.O. Box 990, Los Alamos, NM 87545. Instrument: FT Spectrometer, Model DA3.25 with Accessories. Manufacturer: Bomen Inc., Canada. Intended use: The instrument is intended to be used for the study of the molecular structure, properties and energy levels of actinide molecular species and fluorine compounds. Application received by Commissioner of Customs: April 14, 1986.

Docket No. 86-185. Applicant: The Nebraska Methodist Hospital, 8303 Dodge Street, Omaha NE 68114. Instrument: Lithotripter. Manufacturer: Dornier Medizintechnick GmbH, West Germany. Intended use: The instrument is intended to be used for research relating to the cognitive skills of the urologist in the evaluation, treatment, and long-term management of the kidney stone patient. In addition, the instrument will be used for research in the use of lithotripter technology in the treatment of kidney stones versus the use of percutaneous techniques. Other research will include:

(1) Short-term and long-term evaluation of the effects of shock wave application upon renal structure and function.

(2) Short-term and long-term comparison of the use of extracorporeal shock wave treatment and precutaneous treatment upon the incidence of kidney stone recurrence.

(3) Evaluation of the impact of blast path angle and intensity of voltage of the shock wave generator, upon the incidence of post-extracorporeal shock wave lithotripter perirenal hematoma. The instrument will also be used for the training of medical students.

Application received by Commissioner of Customs: April 14, 1986.

Docket No. 86-186. Applicant: University of Nevada-Reno, Reno, NV 89557. Instrument: Circular Dichroism Spectropolarimeter, Model J-500A with Accessories. Manufacturer: JASCO, Japan. Intended use: The instrument will be used for spectroscopic studies, magnetic circular dichroism, kinetics measurements and UV/CD protein studies. The materials to be studied will include bile pigments, proteins, magnetic CD of aromatic hydrocarbons and porphyrins. Educational purposes will include pursuing research objectives in the courses Independent Studies, Thesis and Dissertation (Chemistry 793, 797, 799; Biochemistry 793, 797, 799). Application received by Commissioner of Customs: April 14, 1986.

National Bureau of Standards

[Docket No. 51288-6206]

Continuation of Fire Research Grants Program

AGENCY: National Bureau of Standards, Commerce.

ACTION: Announcing Continuation of Fire Research Grants Program.

SUMMARY: The purpose of this notice is to inform potential applicants that the Center for Fire Research, National Bureau of Standards, is continuing an approximately $2 million per year Fire Research Program. Previous notices of this research grant program were published in the Federal Register on February 20, 1981 (46 FR 13260) and November 19, 1984 (49 FR 45839). (Catalog of Federal Domestic Assistance No. 11.609 "Measurement and Engineering Research and Standards.")

DATE: *Closing Date for Applications:* Proposals must be received no later than close of business May 30, 1986.

ADDRESS: Applicants must submit one signed original plus two (2) copies of the proposal along with the Grant Application, Standard Form 424 as referenced under the provisions of OMB Circular A-110 to:

Center for Fire Research, Attn: Dr. Robert S. Levine, National Bureau of Standards, Gaithersburg, Maryland 20899.

FOR FURTHER INFORMATION CONTACT: Dr. Robert Levine, (301) 921-3645.

Eligibility: Academic institutions, Non-Federal agencies, and independent and industrial laboratories.

SUPPLEMENTARY INFORMATION: As authorized by section 18 of the Act of March 3, 1901, as amended (15 U.S.C. 278f), the NBS Center for Fire Research conducts directly and through grants and cooperative agreements, a basic and applied fire research program. This program has been in existence for several years at approximately the same funding level. No increase in funds has taken place. All grant proposals submitted must be in accordance with the programs and objectives listed below.

Program Objectives

(a) *Exploratory Fire Research*—Ignition and combustion of solids, action of fire retardants, soot formation, and polymer gasification and char formation chemistry.

(b) *Flammability and Toxicity Measurement*—Measurement of the acute toxicity of fire gases, development of test methods and safety criteria, research into the additive or synergistic acute effects of multiple gaseous toxicants, and development of behavior models for incapacitation. Development of laboratory size tests and measurements that are of use in predicting the performance of combustible items (including heat release rate, toxic gas production, and smoke production in full scale fire).

(c) *Fire Performance and Validation*—Obtaining and analyzing experimental data from full scale tests for input to model development. Evaluation of mathematical models and methodology for quantitatively assessing the correlation between the models and full-scale fire test data.

(d) *Hazard Analysis*—Development and evaluation of mathematical smoke and toxic species transport models for large, complex structures. Methods to calculate hazard development vs. time. Methods to stimulate the operation and impact of ventilation systems and components under conditions created by unwanted fires. Some research is carried out into the behavior of persons at risk in fire to calculate how rapidly such persons can evacuate the structure or otherwise find refuge.

(e) *Fire Growth and Extinction*—Research into the physics and chemistry of fire processes such as burning rate, flame spread, fire gas flows, fire suppression, and the development of an understanding of the relationship between these processes as they contribute to compartment fire growth and spread, fire suppression system performance and smoke transport in buildings.

(f) *Compartment Fire Modeling Research*—The development, improvement and validation of: (1) "benchmark" compartment fire model computer codes, and (2) their submodel algorithm components which describe individual fire compartment processes.

(g) *Fire Simulation*—Integration of the results of the above programs to create new methods of design for fire safety and calculational tools for such designs.

Application Requirements

The Fire Research Grants Program is limited to innovative ideas which are generated by the proposal writer on what research to carry out and how to carry it out. Proposals will be considered for research projects for one to three years. When a proposal for a multi-year grant is approved, funding will be provided for only the first year of the program. Funding for the remaining years of the program is contingent on satisfactory performance and subject to the availability of funds, but no liability shall be assumed by the government because of non-renewal or extension of a grant. Applicant's proposals should provide:

1. *A brief statementof the basic objectives and research plan.*

a. State concisely the objectives of the proposed research. Describe the present state of knowledge of the problem. An exhaustive review is not needed, but the discussion should show a familiarity with past and current work in the area and demonstrate how the proposed work will advance our understanding of the problem.

b. Describe how the work will be accomplished. Indicate, where appropriate, the range of variables to be explored, the number of tests to be performed, and the method of presenting the results. Describe any unusual techniques, apparatus, or special facilities to be employed in the program.

2. *Statement of Work.* State concisely just what will be accomplished during the program.

3. *Schedule.* Show dates at which major milestones are expected to be attained, including technical reports, papers, and presentations.

4. *Utilization of Results.* Show how the results of the proposed research relate to the Basic Center for Fire Research objective of providing the technical base for reducing the nation's fire loss. Describe how the results will be utilized for this purpose. This may range from the publication of basic data to the development of improved materials and systems to the introduction of findings to regulations and codes.

5. *Program Organization.* Identify the principal professional staff members who will participate in the program and describe their roles and level of effort.

6. *For clarity* of the program objectives, you may contact Dr. Levine by calling (301) 921-3645.

Proposal Review Process

All proposals are assigned to the appropriate group leader of the seven programs listed above for review, including external peer review, and recommendations on funding. Both technical value of the proposal and the relationship of the work proposed to the needs of the specific program are taken into consideration in the group leader's recommendation to the Center Director. Applicants should allow up to 60 days processing time.

Proposals are evaluated for technical merit by at least three professionals from NBS, the Center for Fire Research, or technical experts from other interested government agencies and in the case of new proposals, experts from the fire research community at large.

Evaluation Criteria

	Points
Rationality	0-20
Qualification of Technical Personnel	0-20
Resources Availability	0-20
Technical Merit of Contribution	0-40

The results of these evaluations are transmitted to the head of the appropriate research unit in the Center for Fire Research who prepares an analysis of comments and makes a recommendation. The Center for Fire Research unit head will also consider compatibility with programmatic goals and financial feasibility.

Paperwork Reduction Act

The Paperwork Reduction Act of 1980 does not apply since this notice does not impose any additional burdens, such as reporting or recordkeeping requirements or collection of information from offerors, contractors, or members of the public. The reporting requirement will be those contained in OMB Circular A-110.

Additional Requirements

Applicants are reminded that a false statement may be grounds for denial or termination of funds and grounds for possible punishment by fine or imprisonment. Any recipients/applicants who have an outstanding indebtedness to the Department of Commerce will not receive a new award until the debt is paid or arrangements satisfactory to the department are made to pay the debt.

Administrative questions pertaining to the grant process may be directed to the Grant Specialists, Sharon Green, National Bureau of Standards, Room B-158, Gaithersburg, Maryland 20899, telephone number (303) 921-2971.

Dated: May 1, 1986.

Federal Information Processing Standard 121, Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS)

AGENCY: National Bureau of Standards, Commerce.

ACTION: The purpose of this notice is to announce that the Secretary of Commerce (Secretary) has approved a new standard, which will be published as FIPS Publication 121.

SUMMARY: On April 10, 1985, notice was published in the Federal Register (50 FR 14128-29) that a Federal Information Processing Standard for Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS) was being proposed for Federal use.

The written comments submitted by interested parties and other material available to the Department relevant to this standard were reviewed by NBS. On the basis of this review, NBS recommended that the Secretary approve the standard as a Federal Information Processing Standard (FIPS) and prepared a detailed justification document for the Secretary's review in support of that recommendation.

The detailed justification document which was presented to the Secretary, and which includes an analysis of the written comments received, is part of the public record and is available for inspection and copying in the Department's Central Reference and Records Inspection Facility, Room 6628, Herbert C. Hoover Building, 14th Street between Pennsylvania and Constitution Avenues, NW., Washington, DC 20234.

This approved standard contains two portions: (1) An announcement portion which provides information concerning the applicability, implementation, and maintenance of the standard, and (2) a specifications protion which deals with the technical requirements of the standard. Only the announcement portion of the standard is provided in this notice.

ADDRESS: Interested parties may purchase copies of this new standard, including the technical specifications portion, from the National Technical Information Service (NTIS). Specific ordering information from NTIS for this standard is set out in the Where to Obtain Copies Section of the announcement portion of the standard.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Little, Center for Computer Systems Engineering, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, MD 20899, (301) 921-3723.

Dated: May 1, 1986.
Ernest Ambler,
Director.

Federal Information Processing Standards Publication 121

(date)

Announcing the Standard for Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS)

Federal Information Processing Standards Publications are issued by the National Bureau of Standards pursuant to section 111(f)(2) of the Federal Property and Administrative Services Act of 1949, as amended, Pub. L. 89-306 (79 Stat. 1127; 40 U.S.C. 759(f)), Executive Order 11717 (38 FR 12315, dated May 11, 1973), and Part 6 of Title 15, Code of Federal Regulations (CFR).

Name of Standard. Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS) (FIPS 121).

Category of Standard. Hardware and Software Standard, Interchange Codes.

Explanation. This standard describes the formats, rules, and procedures for the encoding of alphanumeric text and pictorial information for videotex and teletext applications. This standard is based upon the architecture defined in the multilayered reference model of open systems interconnection (OSI), under development by the International Organization for Standardization (ISO), but this standard does not define the OSI Standard presentation layer protocol itself. This standard defines a specific data syntax for use by OSI presentation layer protocols and some specific semantics for use at the application layer in videotex and teletext applications. This standard is based upon the American National Standard Code for Information Interchange (ASCII) and its extensions (as specified in FIPS 1-2). It is intended to be used in Federal information processing systems, communications systems, and associated videotex and teletext equipment.

Approving Authority. Secretary of Commerce.

Maintenance Agency. Department of Commerce, National Bureau of Standards (Institute for Computer Sciences and Technology).

Cross Index. American National Standard X3.110-1983/Canadian Standard T500-1983, Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS).

Related Documents.

a. FIPS PUB 1-2, Code for Information Interchange, Its Representations, Subsets and Extensions (adopts three ANSI standards: X3.4-1977, X3.32-1973,

VOL 51 ISS 87 MY 6 1986 UMI

X3.41–1974 and also has further specifications).

r. CCITT Recommendation F.300–1980, Videotex Service.

s. CCITT Recommendation S.100–1980, International Information Exchange for Interactive Videotex.

Objective. The objective of this standard is to facilitate the interchange of videotex and teletext information between different transaction services and between equipment developed by different manufacturer's of videotex and teletext devices.

Applicability. This standard is applicable to Federal acquisition and use of data processing and communication systems, data systems, system components, and related equipment that may be required to accept, process, store, transmit or interchange character coded information representing alphanumeric text or pictorial information to be displayed or printed on videotex or teletext terminals. This standard is applicable to the representation of alphanumeric text and pictorial information at the interface between host computers and videotex terminals or between teletext data and teletext decoders.

Implementation. This standard becomes effective November 3, 1986. All equipment and data systems to which this standard is applicable that are brought into the Federal Government inventory on or after the effective date of this FIPS PUB must be in conformance with this standard unless a waiver has been obtained in accordance with the waiver provisions given below.

Specifications. This standard adopts in whole American National Standard X3.110–1983/Canadian Standard T500–1983, Videotex/Teletext Presentation Level Protocol Syntax (North American PLPS).

Waivers. Under certain exceptional circumstances, the head of the agency is authorized to waive the application of the provisions of this FIPS PUB. Exceptional circumstances which would warrant a waiver are:

a. Significant, continuing cost or efficiency disadvantages will be encountered by the use of this standard and,

b. The interchange of information between the system for which the waiver is sought and other systems is not anticipated.

Agency heads may act only upon written waiver requests containing the information detailed above. Agency heads may approve requests for waivers only by a written decision which explains the basis upon which the agency head made the required finding(s). A copy of each such decision, with procurement sensitive or classified portions clearly identified, shall be sent to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Gaithersburg, Maryland 20899.

When the determination on a waiver request applies to the procurement of equipment and/or services, a notice of the waiver determination must be published in the *Commerce Business Daily* as a part of the notice of solicitation for offers on an acquisition or, if the waiver determination is made after that notice is published, by amendment to such notice.

A copy of the waiver request, any supporting documents, the document approving the waiver request and any supporting and accompanying document(s), with such deletions as the agency is authorized and decides to make under 5 U.S.C. Sec. 552(b), shall be part of the procurement documentation and retained by the agency.

Where to Obtain Copies. Copies of this publication are available for sale from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22161. (Sale of the included specifications document is by arrangement with the American National Standards Institute.) When ordering, refer to Federal Information Processing Standards Publication 121 (FIPSPUB121), and title. Payment may be made by check, money order, or deposit account.

BILLING CODE 3510-CN-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Apparel Products Produced or Manufactured in Sri Lanka

April 30, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 7, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

A CITA directive dated May 24, 1985 (50 FR 21923) established limits for certain specified categories of cotton, wool and man-made fiber textile products, including Categories 348 (women's, girls' and infants' cotton trousers), 634 (men's and boys' other coats of man-made fibers) and 648 (women's, girls' and infants' trousers of man-made fibers), produced or manufactured in Sri Lanka and exported during the agreement year which began on June 1, 1985 and extends through May 31, 1986. At the request of the Government of Sri Lanka, carryforward and swing are being applied to the restraint limits for Category 348, increasing it from 239,709 dozen to 272,745 dozen, and Category 648, increasing it from 184,868 dozen to 185,092 dozen, for the current agreement year. The limit for Category 634 is being reduced from 103,894 dozen to 92,417 dozen to account for the amount of swing applied to Categories 348 and 648, as provided in the agreement. The letter to the Commissioner of Customs which follows this notice implements the above amendments.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 28622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Leonard A. Mobley,
Acting Chairman, Committee for the Implementation of Textile Agreements.

April 30, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of May 24, 1985, from the Chairman of the Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in Sri Lanka and exported during the agreement period which began on June 1, 1985 and extends through May 31, 1986.

Effective on May 7, 1986, the directive of May 24, 1985, as amended, is hereby further amended to include the following adjusted restraint limits for Categories 348, 634 and 648:[1]

Category	Adjusted 12-mo limit [1]
348	272,745 dozen
634	92,417 dozen
648	185,092 dozen

[1] The limits have not been adjusted to account for any imports exported after May 31, 1986.

Also effective on May 7, 1986, I request that you deduct 2,986 dozen from charges to the adjusted restraint limit for Category 648.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

Leonard A. Mobley,
Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-CN-M

Announcing Import Restraint Limits for Certain Cotton Textiles and Cotton Textile Products Produced or Manufactured in Egypt

April 30, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 6, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Background

The Bilateral Cotton Textile Agreement of December 7, and 28, 1977, as amended and extended, between the Governments of the United States and the Arab Republic of Egypt establishes specific limits for carded and combed yarn in Categories 300/301, sheeting in Category 313, and twills and sateens in Category 317, produced or manufactured in Egypt and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. Flexibility in the form of swing is available for application to these categories, except that there will be no swing between Categories 300/301, 300 and 301. Carryforward and carryover are not available in the 1986 Agreement year.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 28622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Leonard A. Mobley,
Acting Chairman, Committee for the Implementation of Textile Agreements.

April 30, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Agreement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton Textile Agreement of December 7 and 28, 1977, as amended and extended, between the Governments of the United States and the Arab Republic of Egypt; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 6, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 300/301, 313 and 317, produced or manufactured in Egypt and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986, in excess of the following restraint limits:

Category	12-mo restraint limits
300/301	9,031,250 pounds of which not more than 7,766,875 pounds shall be in Category 300 and not more than 1,264,375 pounds shall be in Category 301.
313	14,177,812 square yards.
317	7,599,308 square yards.

In 1986 restraint limits are subject to adjustment in the future, as applicable, according to the provisions of the bilateral agreement of December 7, and 28, 1977, as amended and extended, between the Governments of the United States and the Arab Republic of Egypt which provide, in part, that: specific limits may be exceeded by designated percentages to account for swing, except that no swing will be available between Categories 300/301, 300 and 301, provided that a corresponding reduction in equivalent square yards is made in another specific limit during the same agreement year. Any appropriate adjustments under the provisions of the bilateral agreement referred to above will be made to you by letter.

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in Egypt, which have been exported to the United States on

[1] The bilateral agreement provides, in part, that: (1) Specific limits and sublimits may be exceeded by certain designated percentages of the square yard equivalent total, provided the amount of the increase is compensated for by a decrease in equivalent square yards in one or more other specific limits; (2) specific limits may be increased for carryover or carryforward; (3) administrative adjustments or arrangements may be made to resolve minor problems arising in the implementation of the agreement.

VOL 51 ISS 87 MY 6 1986 UMI

and after January 1, 1985 and extending through December 31, 1985, shall, to the extent of any unfilled balances, be charged against the levels established for that twelve-month period. To the extent levels established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

Textile products in Categories 306/361, 313 and 317 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 18, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Leonard A. Mobley,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Changes to the Textile Category System

April 30, 1986.

The CORRELATION, Textile and Apparel Categories with the Tariff Schedules of the United States, Annotated, provides for placement of Tariff Schedules of the United States Annotated (T.S.U.S.A.) numbers in the Textile Category System. On March 31, 1986, the 484e Committee approved the following amendments to the T.S.U.S.A., reflecting certain administrative changes requiring changes to the CORRELATION. These changes are cited in the list which follows this notice.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Martin Walsh, International Agreements and Monitoring Division, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, DC 20230, (202) 377-4212.

COMMODITY FUTURES TRADING COMMISSION

Public Information Collection Requirement Submitted to Office of Management and Budget for Review

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of information collection.

SUMMARY: The Commodity Futures Trading Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980, Pub. L. 96-511.

ADDRESS: Persons wishing to comment on this information collection should contact Katie Lewin, Office of Management and Budget, Room 3235, NEOB, Washington, DC 20503, (202) 395-7231. Copies of the submission are available for Joseph G. Salazar, Agency Clearance Officer, (202) 254-9735.

Title: Large Trader Reports.

Abstract: This data collection operation concerns Federal Regulation of clearing members, futures commission merchants, foreign brokers and large traders holding large futures positions on commodity exchanges.

Control Number: 3038-0009.

ACTION: Revision of a currently approved collection.

Respondents: Individuals or households, farms, and businesses or others for-profit.

Estimated annual burden: 16,670 hours.

Issued in Washington, DC, on April 30, 1986.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Public Information Collection Requirement Submitted to OMB for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following request for renewal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C., Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact for whom a copy of the information proposal may be obtained.

Revision

Information Collection Support of the DOD Acquisition Process (Solicitation Requirements) and Related Form (DD Form 1155).

Information concerns contractors' responses to government solicitations and is required to enable the evaluation and processing of contractors' offers.

Reporting is required to permit evaluation of offers.

Businesses or others for profit/small businesses or organizations and nonprofit institutions.

Responses: 27,050,000.

Burden Hours: 85,210,000.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503, and Mr. Daniel J. Vitiello, DoD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302 telephone (202) 746-0933.

SUPPLEMENTARY INFORMATION: A copy of the information collection proposal may be obtained from Mr. Fred J. Kohout, ODASD(P)CPA, Room 3D116, Pentagon, Washington, DC 20301-8000, telephone (202) 697-8334. This is a revision of an existing collection.

Add: ", computer and computer output products." to existing sentence.

Retrievability:

Add: "or SSN" to the sentence.

Retention and disposal:

Delete and substitute: "Individual name files are retained for not more than one year after end of year in which the final actions was taken. Records of committee action are retained for two years."

System manager(s) and address:

Delete and substitute: "HQ Management Engineering Agency, Randolph AFB TX 78150-6431."

Record access procedures:

Add to existing sentence: "or the installation suggestion program manager."

Contesting record procedures:

Add to existing sentence: "and are published in AFB 12-35. (32 CFR Part 806b)."

F900 AF MP B

SYSTEM NAME:

900 AF MP B Suggestions, Inventions, Scientific Achievements.

SYSTEM LOCATION:

Suggestion Program Divisions, Directorate of Requirements, Air Force Management Engineering Agency, Randolph AFB TX 78150-6431. Headquarters of major commands and separate operating agencies and direct reporting units. Base personnel offices. Official mailing addresses are in the Department of Defense Directory in the appendix to the Air Force's systems notices and in Air Force Pamphlet (AFP) 12-36, attachment 3.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Any individual submitting a suggestion, invention, scientific achievement.

CATEGORIES OF RECORDS IN THE SYSTEM:

Files include suggestion forms, evaluations and substantiating documentation consisting of forms, certificates, administrative correspondence; records of committee actions; award actions; reports.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

5 USC, chapter 45, Incentive Awards; and 10 USC 1124, Cash awards for suggestions, inventions or scientific achievements; as implemented by Air Force Regulation 900-4, The Air Force Suggestion Program.

PURPOSE(S):

Files are originated when personnel initiate a suggestion, invention, or scientific achievement. Case files and computer output products are reviewed by the suggestion office personnel, and are referred to the suggestion awards committee for review when required by governing directives. Copy of approved award is filed in civilian employee's official personnel file. Copy of approved award is not retained elsewhere for military member.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders and on cards, computer and computer output products.

RETRIEVABILITY:

Filed by name or SSN

SAFEGUARDS:

Records are accessed by custodian of the record system and by persons(s) responsible for servicing the records in performance of their official duties who are properly screened and cleared of need-to-know.

RETENTION AND DISPOSAL:

Individual name files are retained for not more then one year after end of year in which the final action was taken. Records of committee action are retained for two years.

SYSTEM MANAGER(S) AND ADDRESS:

HQ Management Engineering Agency, Randolph AFB TX 78150-6431.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager.

RECORD ACCESS PROCEDURE:

Individual can obtain assistance in gaining access from the System Manager or the installation suggestion program manager.

CONTESTING RECORDS PROCEDURE:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in AFR 12-35. (32 CFR Part 806b).

RECORD SOURCE CATEGORIES:

Information obtained from source document (Suggestion Form) include name, Social Security Number, job title, home or mailing address, grade and organizational address.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

New Record System

F125 AFSC A

SYSTEM NAME:

125 AFSC A AFSC Badge and Vehicle Control Records

SYSTEM LOCATION:

Headquarters Air Force Systems Command (HQ AFSC/SIRS and HQ AFSC/SP), Andrews AFB MD 20334-5000; AFSC bases.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

AFSC military and civilian personnel and visitors to AFSC headquarters and installations.

CATEGORIES OF RECORDS IN THE SYSTEM:

Badge and vehicle control records to include name; home address; home telephone; citizenship; grade or rank; SSN; clearance level; company employed by; military address; vehicle state license tag data; vehicle make, year, type and color; decal number; revoked license status.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 USC 8012, Secretary of the Air Force: Powers and duties; delegation by.

PURPOSE(S):

Badge records are used to record building/area-entry credential information, including information on the loss or theft of these credentials. Motor vehicle records are used to identify vehicles parked in an unsafe manner, enforce vehicle flow plan, notify owners, in case of evacuation and maintain effective security plan.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket rourtine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained on computers and computer output products, and in paper form.

RETRIEVABILITY:

Records are retrieved by SSN.

SAFEGUARDS:

Records are accessed by persons responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in locked babinets, locked rooms, or buildings with controlled entry. Computer records are controlled by computer system software.

RETENTION AND DISPOSAL:

Badge records are destroyed immediately after badge is premanently surrendered or confiscated. Vehicle records are destroved immediately after termination of registration.

SYSTEM MANAGER(S) AND ADDRESS:

Hq AFSC/SP, Andrews AFB MD 20334-5000 for HQ AFSC, or Chief of Security Police for AFSC installations.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the system manager.

RECORD ACCESS PROCEDURE:

Individuals may gain access from the system manager

CONTESTING RECORD PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulation 12-35.

RECORD SOURCE CATEGORIES:

Information obtained from individuals and from automated system interface.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 3910-01-M

Department of the Army

Contingency Arrangements for the Coastal Engineering Research Board (CERB) Meeting

In the event of adverse weather conditions or unforeseen circumstances, the following alternate agendas or changes will be made at the 45th meeting of CERB now scheduled in Fairbanks, Prudhoe Bay, Valdez, and Homer, Alaska, on May 14-16 1986. See announcement of meeting published in the **Federal Register**, Vol. 51, No. 78, dated Wednesday, April 23, 1986, 15361.

Change Number 1: In the event of adverse weather in Prudhoe Bay causing the cancellation of the field trip on May 14, there will be presentations and discussions scheduled on that day in Fairbanks. On May 15 the flight of Valdez with tour is scheduled, and a discussion of the field trip is scheduled in Homer, Alaska. On May 16 presentations will be made and participation by the public is scheduled in Homer for 10:00 a.m. The meeting will adjourn at 11:30 a.m.

Change Number 2: In the event that the field trip to Valdez on May 15 is cancelled due to adverse weather, the following will apply: On May 14 there will still be presentations in Fairbanks and a field trip on Prudhoe Bay; on May 15 there will be a fligh to Homer, Alaska, and discussions and presentations in the afternoon; the session on May 16 will consist of presentations and participation by the public is scheduled for 1:55 p.m. The meeting will adjourn at 3:30 p.m.

Change Number 3: In the event the trip to Homer on May 14 is cancelled due to adverse weather or other unforeseen events, the entire meeting will be held in Fairbanks. The session on May 14 will still consist of presentations and a tour of Prudhoe Bay. On May 15 a flight to Valdez and a tour of their facilities is planning, return to Fairbanks, and a discussion of the field trip is planned. The May 16 session will consist of presentations and participation by the public is scheduled for 3:05 p.m. The meeting will adjust at 4:35 p.m.

To find out if the original agenda has been changed, please call Mr. Carl D. Stormer, U.S. Army Engineer District, Alaska, at 907/753-2741.

Allen F. Grum,

Colonel USA, Executive Secretary.

Department of the Navy

Public Information Collection Requirement Submitted to OMB for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for MSC Afloat Employment MSC 12310/1

The information obtained is used to establish eligibility for MSC afloat employment and provide information for applicant evaluation for employment based on past work experience and education. Because the need for specific license and certification information is required, a custom form is necessary. The MSC Form is used in lieu of an SF-171.

Individuals

Responses 11,500

Burden hours 17,250

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson-Davis Highway, Suite 1204, Arlington, VA 22202-4302, telephone (202) 746-0933.

FOR FURTHER INFORMATION CONTACT: A copy of the information collection proposal may be obtained from Mr. John J. Foley, Department of the Navy, Military Sealift Command, Washington, DC 20390, telephone 202-282-2624.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

VOL 51 ISS 87 MY 6 1986 UMI

Chief of Naval Operations, Executive Panel Advisory Committee, Strategic Defense and Naval Warfare Task Force; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Chief of Naval Operations (CNO) Executive Panel Advisory Committee Strategic Defense and Naval Warfare Task Force will meet May 29–30, 1986, from 9 a.m. to 5 p.m. each day, at 4401 Ford Avenue, Alexandria, Virginia. All sessions will be closed to the public.

The purpose of this meeting is to assess the Navy's potential role in strategic defense architecture, and related intelligence. The entire agenda for the meeting will consist of discussions of key issues regarding strategic defense systems in support of U.S. national security. These matters constitute classified information that is specifically authorized by Executive order to be kept secret in the interest of national defense and is, in fact, properly classified pursuant to such Executive order. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting, contact Lieutenant Paul G. Butler, Executive Secretary of the CNO Executive Panel Advisory Committee, 4401 Ford Avenue, Room 908, Alexandria, Virginia 22302–0268. Phone (703) 756–1205.

Dated: May 1, 1986.

William F. Ross, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Over the Horizon Targeting Capabilities will meet on May 22–23, 1986, at the Science Applications International Corporation, 1710 Goodridge Drive, McLean, Virginia. The meeting will commence at 9:00 A.M. and terminate at 4:30 P.M. on May 22 and commence at 9:00 A.M. and terminate at 12:30 P.M. on May 23, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to conduct a comprehensive review of existing and planned over the horizon targeting programs; determine current and projected over the horizon targeting and related command and control capabilities and limitations; identify any problems and recommend solutions. The agenda for the meeting will consist of technical briefings addressing over the horizon targeting capabilities, programs, funding and shortfalls. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting.

Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T.C. Fritz, U.S. Navy, Office of the Chief of Naval Research (Code 00NR), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone number (202) 696–4870.

Dated: May 1, 1986.

William F. Ross, Jr.,

Lieutenant, JAGC, U.S. Naval Reserve, Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

Voluntary Agreement and Plan of Action To Implement the International Energy Program; Meeting

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following meeting notice is provided:

A joint meeting of Subcommittees A and C of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on May 13, 14 and 15, 1986, at the offices of Exxon Corporation, 1251 Avenue of the Americas, New York, New York, beginning at 9:00 a.m. on May 13. The agenda for the meeting is as follows:

1. Opening remarks.
2. U.S. Plan of Action.
3. Future work programs.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting is open only to representatives of members of Subcommittees A and C of the IAB, their counsel, representatives of the Departments of Energy, Justice, State, the Federal Trade Commission, and the General Accounting Office, representatives of committees of Congress, representatives of the IEA, representatives of the Commission of the European Communities, and invitees of the IAB or the IEA.

Issued in Washington, DC, May 1, 1986.

Eric J. Fygi,

Acting General Counsel.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Collections Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: The Department of Energy (DOE) has submitted the energy information collections, listed at the end of this notice, to the Office of Management and Budget (OMB) for approval under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by DOE.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The collection number(s); (2) Collection title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Affected public; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to respond to the collection; and (9) A brief abstract describing the proposed collection and, briefly, the respondents.

DATE: Comments should be filed within 10 days of publication of this notice. Last notice published Wednesday, April 2, 1986 (51 FR 11336).

ADDRESS: Address comments to Mr. Vartkes Broussalian, Department of Energy Desk Officer, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503. (Comments may also be addressed to, and copies of the submissions obtained from, Mr. Gross at the address below.)

FOR FURTHER INFORMATION CONTACT: John Gross, Director, Data Collection Services Division (EI–73), Energy Information Administration, M.S. 1H–023, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, (202) 252–2308.

SUPPLEMENTARY INFORMATION: This request constitutes a revision to the original proposal submitted to OMB on Thursday, October 17, 1985 (50 FR 42078) covering Forms EIA–1, 3, 4, 5, 5A, 6, 7A, 7A(Supp), 20, and 97. In this proposal we are no longer seeking approval for Forms EIA–5A and EIA–7A(SPP); we also have modified the proposal for the Forms EIA–3, 5 and 97. Forms EIA–1, 4, 6, 7A and 20 will remain the same.

Furthermore, we are seeking approval for this proposal only through March 1987. Within the next several months, however, we intend to propose further modifications to the EIA–3, 5, 6 and 7A. We will provide ample opportunity for public and other agency comments during the period. In any event, we plan to submit this revised proposal to OMB in the early autumn of 1986.

If you anticipate commenting on a collection, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise Mr. Broussalian of your intent as early as possible.

Issued in Washington, DC, May 2, 1986.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

DOE Collections Under Review by OMB

Collection No. (1)	Collection title (2)	Type of request (3)	Response frequency (4)	Response obligation (5)	Affected public (6)	Estimated number of respondents (7)	Annual respondent burden hrs (8)	Abstract (9)
EIA–1, 3, 4, 5, 6, 7A, 20 and 97.	Coal program package.	Revision	Weekly, quarterly, annual.	Mandatory	Businesses or other for profit.	9627	25737	The coal surveys collect data on coal production, consumption, stocks, prices, imports, and exports. Data are collected from manufacturing plants, coke producers, coal mining operations, coal purchasers and distributors, coal-consuming electric utilities, and boiler manufacturers. The data are published, used in EIA models and analyses, and used by other government and private organizations.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. TA86–3–2–000,001]

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

April 29, 1986.

Take notice that on April 23, 1986, East Tennessee Natural Gas Company (East Tennessee) filed Seventeenth Revised No. 4 to Original Volume No. 1 of its FERC Gas Tariff, to be effective April 25, 1986.

East Tennessee states that the purpose of the filing is to reflect a gas rate reduction based on the projected cost of gas supplies purchased from East Tennessee's local producers during the period April 25, 1986 throught June 30, 1986.

East Tennessee states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426 in accordance with Rules 206 and 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 7, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestant's parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–10076 Filed 5–5–86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. TA86–4–2000 and 001]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates

April 29, 1986.

Take notice that on April 23, 1986, Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021 tendered for filing with the Commission the following revised tariff sheets containing changes in rates in its FERC Gas Tariff, First Revised Volume No. 1.

Proposed Tariff Sheets and Effective Dates

Substitute Fifteen Revised Sheet No. 7—April 1, 1986
Substitute Thirteenth Revised Sheet No. 7—November 1, 1985
Substitute Second Revised Sheet No. 7–A—November 1, 1985
Second Substitute Thirteenth Revised Sheet No. 7—December 31, 1985
Third Revised Sheet No. 7–A—December 31, 1985
Substitute Fifth Revised Sheet No. 8—August 1, 1985
Sixth Revised Sheet No. 8—November 1, 1985
Seventh Revised Sheet No. 8—January 1, 1986

According to Granite State, the filing includes reduced sales rates reflecting an out-of-cycle purchased gas cost adjustment applicable to sales to Bay State Gas Company (Bay State) and Northern Utilities, Inc. (Northern Utilities), effective April 1, 1986. Granite State further states that its reduced gas costs result from a change in its gas purchase pattern, reducing purchases of available firm supplies to utilize a favorable "spot market" purchase. Also, Granite State states that the reduced gas costs reflect a reduction in gas costs from a firm supplier, effective April 1, 1986.

The effect of the reduction in gas costs, according to Granite State, is an annual reduction in the rates for sales to Bay State of $12,092,706 and an annual reduction in the rates for sales to Northern Utilities of $1,566,130. Bay State will also experience an additional annual reduction of $528,000 as a result

VOL 51 ISS 87 MY 6 1986 UMI

of a reduction in certain transportation costs, Granite State further states.

According to Granite State, the filing also includes revised rates for a storage service, a storage-related transportation service and other transportation services for Bay State which track changes in suppliers' rates for these services pursuant to certificate orders issued by the Commission.

According to Granite State, copies of the filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20428, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before May 7, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10077 Filed 5-5-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA86-6-51-003]

Great Lakes Gas Transmission Company; Proposed Changes in FERC Gas Tariff Under Purchased Gas Adjustment Clause Provisions

April 29, 1986.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes"), on April 24, 1986, tendered for filing Second Substitute Fifty-Eighth Revised Sheet No. 57, First Revised Volume No. 1 to its FERC Gas Tariff.

Great Lakes states that the filing provides for a purchased gas cost adjustment to reflect a reduction, of 3¢ to 41¢ per MMBtu in its cost of gas purchased for resale to certain of its customers, namely Michigan Power Company, Peoples Natural Gas Company, Inter-City Gas Corporation and ANR Pipeline Company as well as the surcharge rate filed for on March 31, 1986. These reductions result from the operation of indexing mechanisms in Great Lakes' gas purchase contracts with TransCanada Pipelines Limited which have been previously filed with the Commission in various filings by Great Lakes.

Great Lakes further states that due to an extremely heavy work load related to numerous discovery requests in its presently pending general rate increase application these reductions were inadvertently overlooked in Great Lakes' purchased gas cost surcharge filing of March 31, 1986 in Docket No. TA86-6-51-003,001. Therefore Great Lakes requests that Second Substitute Fifty-Eighth Revised Sheet No. 57 replace the similar tariff sheet filed on March 31, 1986 to be effective May 1, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20428, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 7, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10078 Filed 5-5-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER86-453-000]

Southern California Edison Co.; Filing

April 30, 1986

The filing company submits the following:

Take notice that, on April 29, 1986, Southern California Edison Company ("Edison") tendered for filing an agreement entitled "Edison-Salt River Project Interruptible Transmission Service Agreement", which has been executed by Edison and the Salt River Project Agricultural Improvement and Power District ("Salt River Project").

Under the terms and conditions of the Agreement, Edison will make available to Salt River Project interruptible transmission service from a specified point of receipt to specified point of delivery.

The Agreement is proposed to become effective when executed by the Parties and accepted for filing by the Commission.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the Salt River Project Agricultural Improvement and Power District.

Any person desiring to be heard or to protest this application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20428, in accordance with Section 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 9, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10079 Filed 5-5-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. C86-339-000]

Sugar Creek Producing Co.; Application for Limited-Term Abandonment

April 30, 1986.

Take notice that on April 17, 1986, as supplemented on April 25, 1986, Sugar Creek Producing Company (Applicant), One Texas Centre, 415 Texas Street, Suite 410, Post Office Box 1758, Shreveport, Louisiana 71166, filed in the above docket an application pursuant to section 7(b) of the Natural Gas Act, the Commission's Regulations thereunder and the Commission's declaration of policy in Order No. 436, for authorization to abandon for a limited term certain sales and its service obligations with respect thereto established under the small producer certificate of public convenience and necessity issued to Applicant in Docket No. CS77-382. Applicant states that it is subject to substantially reduced takes without payment.

Applicant states that it is an independent producer which sells natural gas to United Gas Pipe Line Company (United) pursuant to a sales contract dated April 1, 1982, which superseded a contract dated August 21, 1959. The term of the contract, according to Applicant, is for the life of the leases covered by the contract, and under the contract Applicant sells gas to United from the following described wells:

Well Name and NGPA Well Pricing Category

Averett No. 1—Section 108
Brown No. A-1—Section 108
Brownfield No. 1—Section 104
Hodges No. A-1—Section 104
Sims No. B-1—Section 104
Stevenson-Kilpatrick No. 1—Section 104
White No. 1—Section 108

These wells are located in Sugar Creek Field, Claiborne Parish, Louisiana.

Applicant states that United is taking only approximately 26 Mcf/d of the available deliverability of approximately 382 Mcf/d from the above-described wells which are covered by the contract. Accordingly, Applicant desires to abandon for a term of 2½ years its service and sales with respect to the gas produced from the above-described wells in order to enable Applicant to seek other markets for this gas.

The circumstances presented in the application meet the criteria for consideration on an expedited basis, pursuant to Section 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436-A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should, on or before 15 days after the date of publication of this notice in the Federal Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10080 Filed 5-5-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. RP80-97-005]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Tariff Revisions

April 29, 1986.

Take notice that on April 23, 1986, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), tendered for filing the following revised tariff sheets to its FERC Gas Tariff.

First Revised Volume No. 1

Second Substitute Original Sheet No. 394
Second Substitute Original Sheet No. 395
Second Substitute Original Sheet No. 396

Sixth Revised Volume No. 2

First Revised Sheet No. 299AAA
First Revised Sheet No. 299AAA1
First Revised Sheet No. 299AAA2
First Revised Sheet No. 299AAA3
First Revised Sheet No. 299AAA4
First Revised Sheet No. 299AAA5
First Revised Sheet No. 299AAA6
First Revised Sheet No. 299AAA7
First Revised Sheet No. 299AAA8
First Revised Sheet No. 299AAA9
First Revised Sheet No. 299AAA10
First Revised Sheet No. 299AAA11

These tariff sheets are proposed to be effective December 1, 1985. The purpose of the tariff sheets is to correct certain technical errors and omissions in Tennessee's April 7, 1986 tariff filing in this docket.

Tennessee states that Revised Sheet Nos. 394 through 396 in First Revised Volume No. 1 contain an effective date of December 1, 1985, instead of November 1, 1985, to reflect the fact that the rates and entitlements for Rate Schedules FSST-E and FSST-NE became effective on December 1, 1985. Tennessee asserts that these sheets also correct rounding errors in the entitlements for Rate Schedule CGT-NY and CGT-NE customers.

Tennessee states that Revised Sheet Nos. 299AAA through 299AAA11 in Sixth Revised Volume No. 2 constitute Rate Schedule T-130 with rates expressed on a dekatherm basis and with reduced service authorizations in accord with the Commission's order issued June 14, 1985 in Docket Nos. CP84-441, *et al.* Tennessee requests an effective date of December 1, 1985, consistent with the effective date of the reduced service authorizations.

Tennessee requests any waivers the Commission deems necessary in order to permit these tariff sheets to become effective as proposed. Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214, 385.214). All such motions or protests should be filed on or before May 7, 1986. Protests will be considered by the Commission in determining appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

FR Doc. 86-10081 Filed 5-5-86; 8:45am]

BILLING CODE 6717-01-M

[Docket Nos. ES86-38-000 et al.]

Edison Sault Electric Company et al.; Electric Rate and Corporate Regulation Filings

April 30, 1986.

Take notice that the following filings have been made with the Commission:

1. Edison Sault Power Company

[Docket No. ER86-38-000]

Take notice that on April 23, 1986, Edison Sault Electric Company (Applicant) filed an application seeking authority pursuant to section 204 of the Federal Power Act to issue up to $2,500,000 principal amount of short-term debt with final maturities of no later than December 31, 1986.

Comment date: May 22, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Southern California Edison Company.

[Docket No. ER86-425-000]

Take notice that, on April 25, 1986, Southern California Edison Company ("Edison") tendered for filing, as a supplement to the Integrated Operations Agreement ("IOA"), designated Rate Schedule FERC No. 94, the following agreement, which has been executed by Edison and the City of Riverside, California ("Riverside"): Supplemental Agreement for the Integration of Riverside's Entitlement in the Palo Verde Nuclear Generating Station.

The Supplemental Agreement provides for certain specific details relating to the integration of Riverside's entitlement to power from the Palo Verde Nuclear Generating Station as required by the IOA.

The Supplemental Agreement is proposed to become effective when executed by the Parties and accepted for filing by the Commission; and as such,

VOL 51 ISS 87 MY 6 1986 UMI

Edison requests, to the extent necessary, waiver of notice requirements.

Copies of this filing were served upon the Public Utilities Commission of the State of California and the City of Riverside, California.

Comment date: May 13, 1986, in accordance with Standard Paragraph E at the end of this document.

3. Bangor Hydro-Electric Company

[Docket Nos. ER86-145-000 and ER86-146-000]

Take notice that on April 21, 1986, Bangor-Hydro Electric Company tendered for filing an explanation of its deficiencies in its previous filing with respect to Part 35 of the Commission's Regulations.

Bangor Hydro states as follows:

Bangor Hydro has revised its energy charge as requested by FERC and filed an amended schedule on February 11, 1986.

Bangor Hydro did not prepare any cost of service studies for this rate. The maximum reservation charge is associated with Mystic #7 is a fossil fuel unit and typical of the type of unit being bought and sold in New England at this time.

Bangor Hydro does not currently have any similar rate schedule on file with FERC. However, it buys under this type of arrangements from Central Vermont Public Service Corporation (FERC Rate Schedules Nos. 127 and 129; Docket Nos. ER86-147-000 and ER86-148-000), Northeast Utilities (FERC Docket No. ER84-264-000) and the New Brunswick Electric Power Commission.

Bangor Hydro requires the customer of this rate to be an interconnected electric utility and is competing with other interconnected electric utilities to supply and sell capacity and energy. The utilities named in the above paragraph offer this similar service. Bangor's service compares favorably with similar services in availability, firmness, price and terms. Availability is directly associated with the ability of one or more units to provide power. This is firm power. The price is set on a competitive basis so that the buyer will request the service. Terms are substantially the same as the rate schedules mentioned above. Transmission limitations are not expected to affect the purchaser's alternatives. This is an economic transaction and alternatives are almost always available either on the purchaser's own system or from a competitor and the availability of these alternatives determines the negotiated price.

Comment date: May 12, 1986, in accordance with Standard paragraph E at the end of this notice.

4. The Kansas Power and Light Company and Midwest Energy, Inc.

[Docket No. ER86-423-000]

Take notice that the Kansas Power and Light Company and Midwest Energy, Inc., on April 24, 1986 tendered for filing proposed changes in its Federal Energy Regulatory Commission Electric Service Tariff No. 123.

Schedule H and Addendum No. 2 to Service Schedule K—Participation Power Service provides for the purchase of Participation Power by Midwest Energy, Inc. for the period June 1, 1986 through September 30, 1986 and minor contract wording changes.

Copies of the filing were served upon Kansas Corporation Commission.

Comment date: May 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Tampa Electric Company

[Docket No. ER86-423-000]

Take notice that on April 24, 1986, Tampa Electric Company (Tampa Electric) tendered for filing an Agreement for Interchange Service between Tampa Electric and the Florida Municipal Power Agency (FMPA). The Agreement was supplemented with Service Schedules A, B, C, J, and X, providing for emergency, scheduled, (short-term) economy, negotiated, and extended economy interchange service, respectively.

Tampa Electric proposes an effective date of May 1, 1986, and therefore requests waiver of the Commission's notive requirements.

Copies of the filing have been served on FMPA and the Florida Public Service Commission.

Comment date: May 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[Project No. 8833-001]

Enco Development Corp., Surrender of Preliminary Permit

April 25, 1986.

Take notice that Enco Development Corporation, permittee for the Yaak Falls Hydropower Project No. 8833 has requested that its preliminary permit be terminated. The preliminary permit for Project No. 8833 was issued on July 19, 1985, and would have expired on December 30, 1986. The project would have been located on the Yaak River, within the Kootenai National Forest in Lincoln County, Montana.

The permittee filed the request on October 30, 1985, and the preliminary permit for Project No. 8833 shall remain in effect through the thirtieth day after issuance of this notice unless that day is a Saturday, Sunday or holiday as described in 18 CFR 385.2007, in which case the permit shall remain in effect through the first business day following that day. New applications involving this project site, to the extent provided for under 18 CFR Part 4, may be filed on the next business day.

[Docket No. CS86-40 et al.]

First City National Bank of Midland, Trustee (Midland National Bank, Trustee), et al.; Applications for Small Producer Certificates[1]

April 30, 1986.

Take notice that each of the Applicants listed herein has filed an application pursuant to section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a small producer certificate of public convience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with Commission and open to public inspection.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Any person desiring to be heard or to make protest with reference to said applications should on or before May 15, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211,385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6712–01–M

[CC Docket No. 86–125]

Common Carrier Services; Interstate Access Charges; Order Designating Issues for Investigation

AGENCY: Federal Communications Commission.

ACTION: Order designating issues for investigation.

SUMMARY: The Common Carrier Bureau has adopted an Order designating for investigation issues concerning the reasonableness and accuracy of the interstate access charges that the local exchange carriers (LECs) and National Exchange Carrier Association (NECA) proposed on July 2, 1985, which became effective, subject to investigation, on September 30, 1985. The Bureau has tentatively concluded that NECA's Common Line rate and certain access rates of some LECs are too high, and that historical demand data submitted by the LECs and NECA are inconsistent. In order to make a final determination concerning the correct level of access charges, the Bureau requires that the LECs and NECA reconcile their demand data and provide updated information. To the extent that the LECs' and NECA's current rates are excessive, the Bureau proposes requiring refunds to customers of interstate access service.

FOR FURTHER INFORMATION CONTACT: Mark Uretsky, Public Utility Specialist, Common Carrier Bureau, (202) 632–6312.

SUPPLEMENTARY INFORMATION: This is a summary of the Common Carrier Bureau's Order Designating Investigation in CC Docket No. 86–125, Phase I, adopted April 4, 1986 and released April 14, 1986. The full text of this decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Order Designating Issues for Investigation

(1) The Bureau presents tentative conclusions regarding the reasonableness of the interstate access rates filed on July 2, 1985 which generally became effective on October 1, 1985, proposes adjustments to those rates and solicits public comment so that, in a following Order, modifications of existing rates can be required as necessary. The Bureau tentatively concludes that many rates, including the currently effective carrier common line (CCL) rate, should be reduced. The Bureau's analysis of cost trends indicates that aggregate LEC test year costs are overstated by $295.157 million and should be adjusted downward by that amount. Of the $295.157 million, $213 million has already been reduced by the September 30 Order. Of this amount, $143.932 million represents an overstatement of common line costs; the remainder represents an overstatement of non-common line costs. This Order also considers the depreciation expenses projected by all Tier 1 companies (companies with over $100 million in revenues), and their projections of costs in three key accounts.

(2) *Cost Forecasts:* The Bureau analyzed the key accounts that are used by each Tier 1 operating company to develop the interstate revenue requirement, including Accounts 100.1, 171 and 608, and an amalgam of costs labeled "Expenses and Other Taxes less Depreciation." These were analyzed on a "subject to separations" (*i.e.* "unseparated") basis. The Bureau made necessary adjustments to these forecasts, and flowed them through to the interstate jurisdiction, and ultimately, to the relevant access elements.

(3) *Demand Forecasts:* The Bureau estimated both aggregate and disaggregate (individual company) Tier 1 demand, improving the method employed to estimate NECA's CCL demand in the *January 17 Order*. Because the Bureau's forecast of demand proved to be highly accurate, it decided to forecast directly aggregate and disaggregate demand for the test period on which the LECs' July 2 filing is based (*i.e.*, June 1, 1985 to May 31, 1986). The analysis of demand [usage] trends indicates that aggregate LEC test year billable minutes of use [MOU] is understated by 5.086 percent or 9,950,381 million MOU and should be adjusted upward by that amount. The Bureau tentatively concludes that the CCL rate should be revised to incorporate this adjustment, and that each LEC for which billable MOU adjustments are proposed should revise its line termination rate by incorporating the proposed billable MOU adjustment. Revisions based on billable MOU adjustments to other access rates are not required. Also, historical demand data provided by NECA and the LECs are seriously inconsistent. NECA's measure of historical usage being, on average, approximately 2.5 percent less than the sum of the LECs'. The Bureau requires that NECA and LEC views of historical demand be reconciled to the extent possible.

(4) *Effect of Demand Changes on ISFs:* Because interstate separations factors (ISFs) are essentially ratios of interstate usage to total company usage, there is, for certain traffic sensitive (TS) access elements, a very strong feedback effect between demand changes and changes in ISFs and, as a result, interstate costs. Therefore, the Bureau's adjustments to test year demand should flow through to test year ISFs, and no direct adjustments to TS ISFs are necessary. The feedback effect does not affect the Line Termination and Common Line rate elements, however, because these are not traffic sensitive. Therefore, the Bureau proposes that each LEC found to have understated test year demand recompute its Line Termination access rate using the Bureau's demand estimate. Further, the Bureau proposes that NECA adjust its estimate of test year billable MOU by 9,950,381,000 MOU (the estimated Tier 1 LECs' aggregate understatement of test year billable MOU) and employ that adjusted amount to recompute its CCL rate.

Refunds to Compensate for Delayed Effectiveness of Corrected Rates: If the Bureau later adopts its tentative conclusions that some rates are unreasonably high, it will require refunds to customers of interstate access service. The refunds should be calculated by multiplying the excess of the rates that are currently in effect over the rates that are found reasonable by the demand accumulated during the time the unreasonable rates were in effect. The amounts thus calculated should be refunded with interest to customers of interstate access service based on relevant measures of customer usage during the relevant time period.

(5) *Retrospective Monitoring of Forecast Data:* The Bureau will continue to review the LECs' operating statistics through forecasting and monitoring. The Order includes an analysis of June 1, 1984–May 31, 1985 test year forecasts made by NECA on October 17, 1984 and by the Bureau of January 17, 1984. Comparisons of the two projections show that NECA substantially underestimated test year demand and overestimated test year costs. The comparisons also show that in both instances, the Bureau's forecasts were more accurate, especially for demand. On the basis of this one example, however, the Bureau will not draw any conclusions concerning the quality or accuracy of NECA's forecasting process versus the Bureau's.

(6) *Deferred Rate Increases:* In its *September 30 Order*, the bureau identified a number of proposed switched and special access rate increases which proposed, without adequate explanation, to increase rates which already earned returns at or above the authorized rate of return. The concerned carriers agreed to defer their tariff changes for one month and to submit additional information. The Bureau ultimately allowed the proposed tariffs, as amended in some cases, to become effective without further suspension after deferrals of one or two months. This Order concludes that the additional information provided by the carriers offered plausible explanations for the apparent anomalies. The decision to refrain from suspending these rates is not, however, a final determination with respect to the lawfulness of these rates. As part of their direct cases, each of the exchange carriers subject to the suspension or deferral of rates under the *September 30 Order* is directed to submit a report on actual earnings and operational results for the rates at issue. This report should show the actual rate of return for the service for the period since the rate change became effective and the information underlying this calculation. The carrier should also re-examine the factual claims presented in support of the rate increases and state the extent to which those factual claims have proved to be accurate.

(7) *Rate Issues Raised by Commenters:* After reviewing comments of numerous parties, the Bureau has reached the following tentative conclusions: Ohio Bell failed to rebut arguments that it seeks to recover the same expenses in both state and interstate rates. It should also recompute its Account 2296 expenses. Southwestern Bell and Pacific Bell should not include in their revenue requirements expenses related to intrastate operator takeback without additional cost support. Southwestern Bell used an improperly long lead-lag period in calculating working capital. Michigan Bell used an improperly high uncollectibles ratio in calculating uncollectible revenues. Bell Atlantic should exclude from its revenue requirement presubription expenses incurred prior to June 1, 1985. New York Telephone and C&P (D.C.) improperly included gross receipts taxes in their revenue requirements. Contel and United should submit additional information regarding Central Office Equipment and Outside Plant investments. NECA should submit additional information regarding the independent telephone companies' CPE revenue requirement. GTE California and Florida should recompute subscriber plant factor. GTE Florida and Illinois should submit additional information regarding use of five and seven day traffic studies.

(8) *Procedural Requirements:* The Bureau's view that certain access tariff rates are unreasonable is not final. Carriers and other commenters are invited to present evidence and comments relevant to this issue. The fundamental issue which the comments should address is whether the Bureau's analytical approach establishes adequate grounds for the initial conclusion that certain of the access rates are or will be unreasonable, and that the revisions proposed in the Order would be reasonable. The Bureau encourages comments suggesting improvements in its method, but notes that the fact that this method might be improved is not grounds for rejecting its use, so long as it is reasonable and produces reasonable results.

(9) By a recent Order (Revisions of Part 69 of the Commission's Rules and Regulations, CC Docket No. 85–385, FCC 86–70, released Feb. 6, 1986), carriers are not now required to revise the underlying support for their rates until the next annual access filing, to be effective January 1, 1987. *See also* Midyear 1986 Access Tariff Filings, Memorandum Opinion and Order, Mimeo No. 3414, released Mar. 26, 1986, at para. 2. Although carriers are scheduled to revise their rates to reflect other access rule changes effective June 1, 1986, these revisions can be made based on the July 2, 1985 data. Comments should address the reasonableness of using the tentative conclusions presented in this Order concerning the accuracy of the cost and demand data submitted in support of the July 2 rates as a benchmark for evaluating the rates scheduled to be effective June 1.

(1) In order to refine its forecasts, the Bureau requires some additional data, consisting primarily of data for the third and fourth quarters of 1985. Certain other information from Tier 1 companies is also required. The Industry Task Force is requested to organize the provision of this information. Additional information requested in the discussion of Rate Issues Raised By Commenters should be provided directly by the LECs in question by inclusion in their Direct Cases.

(11) LECs will have an opportunity to comment on the Bureau's analytical methods and tentative conclusions when they submit their Direct Cases, and interested parties may include such comments in their Oppositions. Filing parties are requested to comply with the following format in their filings. Filing parties should use the outline embodied in the Order's Table of Contents as headings for the various sections of their filings. Formal submissions should include the title and docket number of the proceeding in the heading, and reference the specific tariff or tariffs to which the pleading is directed (if appropriate). For example:

In the Matter of	CC Docket No. 86–125, Phase I
Annual 1985 Access Tariffs Filings	Transmittal No(s). XXX
Tariff F.C.C. No(s). XXX	

(12) The investigation in this docket will be conducted as a notice and comment proceeding. The initial round of filings by the LECs and NECA should be captioned "Direct Cases." The pleadings opposing the direct cases should be captioned "Opposition to Direct Cases" or "Comments on Direct Case," not as petitions to suspend or reject, and the LECs' and NECA's rebuttals to the oppositions and comments must be captioned "Rebuttals." Direct cases should be submitted on May 15, 1986; oppositions and comments should be submitted on June 5, 1986; and rebuttals should be submitted on June 16, 1986.

(13) This is a non-restricted notice and comment proceeding. *See* § 1.1231 of the Commission's rules, 47 CFR 1.1231, for rules governing permissible *ex parte* contacts.

(14) Therefore, it is ordered that the above mentioned carries comply with the information requirements as described in the text of this Order.

VOL 51 ISS 87 MY 6 1986 UMI

(15) It is further ordered that all mandatory and voluntary submissions be filed in accordance with the deadline established in paragraph 101 and the pleading cycle established in paragraph 104 above.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

FEDERAL MARITIME COMMISSION

[Docket No. 86-17]

Mobil Oil Corp. v. Barber Blue Sea Lines; Filing of Complaint and Assignment

Notice is given that a complaint filed by Mobil Oil Corp. (Mobil) against Barber Blue Sea Lines (Barber) was served May 1, 1986. Mobil alleges that Barber has violated section 10(b)(1), Shipping Act of 1984, through the application of an improper rate.

This proceeding has been assigned to Administrative Law Judge Seymour Glanzer. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the presiding officer in this proceeding shall be issued by May 1, 1987, and the final decision of the Commission shall be issued by September 1, 1987.

John Robert Ewers,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

The Summit Bancorporation et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the office of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 29, 1986.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The Summit Bancorporation,* Summit, New Jersey; to acquire 100 percent of the voting shares of The Trust Company of Princeton, Princeton, New Jersey, a *de novo* bank.

B. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *One Valley Bancorp of West Virginia, Inc.,* Charleston, West Virginia; to acquire 100 percent of the voting shares of Financial Management Bancshares of West Virginia, Inc., Morgantown, West Virginia, and thereby indirectly acquire Farmers' and Merchants' Bank, Morgantown, West Virginia and the First National Bank of Terra Alta, Terra Alta, West Virginia.

C. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Parker Bank Holding Company,* Muncie, Indiana; to become a bank holding company by acquiring 100 percent of the voting shares of The Parker Banking Company, Parker City, Indiana.

Board of Governors of the Federal Reserve System, April 30, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

First Jersey National Corporation et al.; Applications to Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo,* either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than May 27, 1986.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *First Jersey National Corporation,* Jersey City, New Jersey; to engage directly in making, acquiring and/or servicing loans for itself or for others of the type made by a consumer finance company or a commercial finance company pursuant to § 225.25(b)(1) of the Board's Regulation Y.

B. Federal Reserve Bank of Cleveland (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

11. *Toledo Trustcorp, Inc.,* Toledo, Ohio; to engage *de novo* through its subsidiary Trustcorp of Florida National Association, Naples, Florida, in trust company activities pursuant to § 225.25(b)(3) of the Board's Regulation Y. Comments on this application must be received not later than May 21, 1986.

C. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *Moore Financial Group Incorporated,* Boise, Idaho; to engage *de novo* through its subsidiary Moore Financial Services, Incorportated, Boise, Idaho, in making and servicing commercial and mortgage loans, and leasing personal or real property pursuant to § 225.25(b) (1) and (5) of the Board's Regulation Y.

2. *Midland Bank plc,* London, England, Midland California Holdings Limited, London, England, and Midland America Corporation, San Francisco, California, to engage *de novo* in underwriting and dealing in United States government securities through Midland-Montagu Government Securities, Inc., San Francisco, California, and in underwriting and dealing in general obligations of states and political subdivisions through Midland-Montagu Securities, Inc., San Francisco, California, pursuant to § 225.25(b)(16) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, May 1, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Project Grants for Health Programs for Refugees, Availability of Funds for Fiscal Year 1986

The Centers for Disease Control (CDC) announces the availability of funds for Fiscal Year 1986 for Project Grants for Health Programs for Refugees.

This grant program is authorized by section 412(b)(5) of the Immigration and Nationality Act (8 U.S.C. 1522(b)(5)), as amended by the Refugee Act of 1980, Pub. L. 96-212; the Refuge Amendments of 1982, Pub. L. 97-363; and the Further continuing Appropriations for Fiscal Year 1985, Pub. L. 98-473. The Catalog of Federal Domestic Assistance Number is 13.987.

Eligible applicants are the official State helath agencies and, in certain situations, health agencies of political subdivisions of a State. Direct grants to health agencies of political subdivisions will be considered for funding only in special situations which are clearly justified and after consultation with the official State health agency, the CDC Health Program for Refugees, and the Regional Health Administrator, Public Health Service, of the appropriate Department of Health and Human Services Regional Office. States are expected to work with agencies and organizations in localities with significant refugee populations to identify their health needs and to develop programs to meet these needs.

The purpose of the program is to augment State and local resources in providing public health and general health assessments for refugees newly arrived in the United States. The term "refugee" is defined in section 101(a)(42) of the INA (8 U.S.C. 1101(a)(42)). Individuals classified as refugees are eligible for services under this program, except certain refugees whose medical care and other resettlement needs are provided through a special matching grant program administered by the Office of Refugee Resettlement under section 412(c) of the INA (8 U.S.C. 1522(c)).

Approximately $5,489,000 is available to award up to 6 new and approximately 46 continuation grants with the average award expected to be $105,000, ranging from $6,000 to $1,600,000. Grants are usually funded for 12 months in a 2- to 5-year project period. Funding estimates outlined above may vary and are subject to change.

VOL 51 ISS 87 MY 6 1986 UMI

Priority for funding initial grants or applications for a new project period will be placed on: (1) The extent of unmet public health needs associated with refugees; and (2) the need for general health assessments for refugees, with particular attention given to the identification of health problems which might affect employability, the referral of refugees for appropriate diagnostic and treatment services, and the identification of funding sources for needed services. Continuation awards within the project period are made on the basis of satisfactory progress in meeting project objectives and on the availability of funds.

The initial application for a new project period will be reviewed and evaluated on the basis of:

(1) Evidence of an assessment of the relationship of the proposed project to existing services.

(2) The size of the refugee population, including secondary migrants.

(3) The extent of unmet public health problems among refugees.

(4) The need for general health assessments for refugees.

(5) The ability of the applicant to deliver and coordinate the delivery of needed services, particularly in those areas with high concentration of refugees needing intensified outreach and followup services for tuberculosis preventive therapy, including referrals and financing arrangements.

(6) Consistency with the State's comprehensive refugee resettlement plan.

(7) Current performance and ability to maintain program momentum.

Applications are subject to review as governed by Executive Order 12372, Intergovernmental Review of Federal Programs. Information on application and review procedures, deadlines, the consequences of late submission, and other materials may be obtained from the appropriate Department of Health and Human Services Regional Office as set forth below.

Dated: April 29, 1986.

William E. Muldoon,

Director, Office of Program Support Centers for Disease Control.

BILLING CODE 4140–01–M

Consensus Development Conference on the Utility of Therapeutic Plasmapheresis for Neurological Disorders; Meeting

Notice is hereby given of the NIH Consensus Development Conference on "The Utility of Therapeutic Plasmapheresis for Neurological Disorders," sponsored by the National Institute of Neurological and Communicative Disorders and Stroke, the Warren Grant Magnuson Clinical Center, and the Office of Medical Applications of Research, NIH. The conference will be held June 2–4, 1986, in the Masur Auditorium of the Warren Grant Magnuson Clinical Center (Building 10) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892.

Plasmapheresis (or plasma exchange), a technique for removing substances from the blood that may cause or promote disease, has been used for a wide variety of neurological illnesses, but proper indications and the risk-benefit ratio have been uncertain. A conference to develop consensus on these and other issues concerning plasmapheresis is timely since evidence about the therapy's efficacy, which until recently was only anecdotal, has been expanded by a number of controlled studies.

Participants at the two-and-a-half day conference will review and evaluate information on the efficacy of plasmapheresis as a treatment for neurological disorders. Illnesses that will be discussed include myasthenia gravis, Eaton-Lambert syndrome, Guillain-Barre syndrome, chronic inflammatory neuropathy, paraproteinemic neuropathies, amyotophic lateral sclerosis, and multiple sclerosis.

Conference participants will include research scientists and physicians, other health care practitioners, and members of voluntary health organizations concerned with neurological disease. Following two days of presentations by medical experts and discussion by the audience, a consensus panel, drawn from the medical and lay communities, will formulate a draft statement responding to the following key questions:

- Is therapeutic plasmapheresis of benefit for neurological disease? if so, for which diseases and under what circumstances?
- What are the risks of plasmapheresis?
- If effective, what are the mechanisms of action?
- Is efficacy influenced by technique?
- What is the relationship of plasmapheresis to other therapies?
- What insights has plasmapheresis provided to suggest relevant clinical or basic strategies?

Evidence relating to the utility of therapeutic plasmapheresis for neurological disorders will be presented by experts in the field and evaluated by a panel composed of representatives from neurology, blood banking, immunology, biostatistics, and the public. Presentations will continue until 5 p.m. Monday, June 2, and until noon on Tuesday, June 3. The information presented will be discussed by the panel and there will be opportunity for questions and comments from the audience.

On the third and final day of the conference, Consensus Panel Chairman Dr. Barry Arnason, Professor and Chairman of the Department of Neurology, University of Chicago, Pritzker School of Medicine, will read to the audience the draft consensus statement summarizing the scientific issues raised and the conclusions drawn by the panel. A press conference will follow open discussion of the consensus statement.

Information on the program may be obtained from Ms. Nancy Cowan, Prospect Associates, 2115 East Jefferson Street, Suite 401, Rockville, Maryland 20852; telephone (301) 468–6555.

Dated: April 28, 1986.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Pilot Study of Commercial Rafting on the Wild & Scenic Section of the North Fork of the American River

AGENCY: Bureau of Land Management, Interior.

ACTION: A Pilot Study Based on a Scoping Paper, to Determine the Feasibility of Commercial Rafting on the Wild & Scenic Section of the North Fork of the American River.

SUMMARY: The Bureau of Land Management, Folsom Resource Area and Tahoe National Forest are considering a study to determine the feasibility of providing commercial whitewater rafting opportunities on the North Fork of the American River between Euchure Bar and Iowa Hill Bridge.

The pilot study is needed to determine what level, if any, of commercial activity will satisfy the public needs and still be commensurate with maintaining those values which made it possible for the North Fork of the American River to be included in the Wild and Scenic System.

The study will begin in May of 1986 and could last up to three years. Upon completion of the study, the Bureau of Land Management, Folsom Resource Area, and the Tahoe National Forest will prepare an Environmental Analysis to analyze the various alternatives.

The scoping paper that was developed by the BLM and FS identified the critical issues and concerns and provides the direction for the pilot study. A copy of this scoping paper may be obtained from the Bureau of Land Management, Folsom Resource Area, 63 Natoma Street, Folsom, California 95630.

The following seven outfitters have been accepted by the Bureau of Land Management, Folsom Resource Area and Tahoe National Forest to conduct the pilot study in 1986.

BILLING CODE 4310-FB-M

Temporary Closure of Certain Public Lands in the Las Vegas District to Off Road Vehicle Use

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Temporary closure of certain Public Lands in the Las Vegas District, Clark County, Nevada, on and adjacent to the Mint 400 ORV race course, on May 10 and 11, 1986. Access will be limited to race officials, entrants, law enforcement, BLM emergency personnel licensees, permittees and right-of-way grantees and other authorized personnel as designated during the period of the closure.

SUPPLEMENTARY INFORMATION: Certain public lands in the Las Vegas District, Clark Count, Nevada will be temporary closed to public access from 00:01 hours May 10, 1986 through 08:00 hours May 11, 1986 to protect persons, property, and public lands and resources on and adjacent to the 1986 Mint 400 ORV race course. This temporary closure is made pursuant to 43 CFR 8364.

The public lands to be closed are those lands adjacent to and roads, trails, and washes identifed as the 1986 Mint 400 ORV race course and certain lands adjacent to the course within the southern Eldorado Valley area, further described as: T.25S, R.62E., all of section 10, 11, 12, 13, 14, 15, 16, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 33, 34, 35, and 36.

A map showing specific areas closed to public access is available from the Las Vegas District Office, P.O. Box 26569, Las Vegas, Nevada, 89126 (702) 388-6403 and the Stateline Resource Area Office, P.O. Box 7384, Las Vegas, Nevada (702) 388-6627. Any person who fails to comply with this closure order issued under 43 CFR 8364 may be subject to the penalties provided in 43 CFR 8360.0-7.

Ben F. Collins,
District Manager, Las Vegas District.

BILLING CODE 7035–01–M

[Ex Parte No. MC–178 (Sub-No. 3)]

Investigation Into Motor Carrier Insurance Rates—Conference of Interested Parties

AGENCY: Interstate Commerce Commission.

ACTION: Institution of proceeding.

SUMMARY: The Commission is instituting a proceeding to provide a forum for discussion by interested and affected parties of insurance-related problems in the motor carrier industry. We anticipate that this conference will contribute to a more thorough understanding of: (1) the nature and extent of the insurance crisis confronting motor carriers, (2) the various factors contributing to the prevailing conditions, and (3) administrative and/or legislative actions that may help alleviate the problems.

DATES: Notice of Intent to Participate should be filed by May 20, 1986. A docket management conference is scheduled for May 30, 1986.

ADDRESS: Direct notices and related correspondence to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, D.C. 20423.

Pleadings should refer to: Conference—Ex Parte No. MC–178 (Sub-No. 3).

FOR FURTHER INFORMATION CONTACT: Mary Kelly, Chief of Staff, Office of Commissioner Lamboley (202) 275–7419.

SUPPLEMENTARY INFORMATION: In response to a petition filed by the American Trucking Associations, Inc. (ATA), the Commission instituted a proceeding in Ex Parte No. MC–178, *Investigation into Motor Carrier Insurance Rates* (not printed), served October 31, 1985, and issued a supplemental decision and notice concerning self-insurance (not printed), served April 22, 1986. The initial notice invited comments concerning: (1) The extent of bodily injury and property damage (BI&PD) insurance problems facing the motor carrier industry; (2) the causes of these problems; and (3) what action, if any, the Commission could take to alleviate the problems. Comments relating to these matters were introduced by 75 parties, including motor property and passenger carriers, their representatives and trade associations, independent trucking interests, shippers and shipper associations, and insurance industry representatives.

By motion filed February 11, 1986, ATA requests that the Commission appoint a hearing officer for purposes of holding a conference of interested parties in this proceeding pursuant to 49 CFR 1110.4. Statements in support of ATA's motion were filed by the United Bus Owners of America, the Movers' and Warehousemen's Association of America, the National Industrial Transportation League, and jointly by the National Small Shipments Traffic Conference, Inc. and the Drug and Toliet Preparation Traffic Conference, Inc.

The initial comments filed in this proceeding indicate that the insurance problem is attributable to a range of factors. An informal conference of interested parties conducted before a Commission official could be useful in promoting full and frank discussions among the affected groups. Accordingly, pursuant to 49 U.S.C. 10321 and 10311, and 49 CFR 1110.4, we are instituting such a proceeding. Our purpose in taking this action is consistent with that announced in our prior decision inviting written comments: to collect and analyze, with the assistance of those parties most directly affected, information concerning the extent, causes, and recommended solutions to problems affecting the cost and availability of motor carrier BI&PD insurance.

A docket management conference is set for 10:00 a.m. on May 30, 1986, in Hearing Room C of the Interstate Commerce Commission Building, Washington, D.C., before the Honorable Paul H. Lamboley, Commissioner. Under the supervision of Commissioner Lamboley, common interest conference groups may be formed, if useful, to focus on specific areas material to the situation.

In advance of the docket management conference, parties should meet, where practical, to discuss organizational and topical agenda suggestions, and submit ideas to the Commissioner no later than 2 days before the conference date. An agenda for the docket management conference will be avaflable from the Commission's Office of Legislative and Public Affairs at noon on the day before the conference.

At the conference, parties should be prepared to discuss the most effective means of using this forum to ameliorate or eliminate the insurance crisis in the motor carrier industry. They also should be prepared to discuss and offer suggestions towards developing the most practicable, effective, and administratively feasible course of Commission action to assist carriers in resolving the insurance crisis consistent with our statutory responsibilities to promote safe operations.

The record, including findings and recommendations developed in the conference group, shall be certified by Commissioner Lamboley to the Commission.

This decision will not significantly affect the quality of the human environment or conservation of energy resources and will not have an adverse impact on small business.

Authority: 49 U.S.C. 10321 and 10311.

It is Ordered

1. A proceeding is instituted to provde a forum for discussion of motor carrier liability insurance issues, with a view toward developing recommendations for Commission action to alleviate insurance cost and availability problems.

2. A docket management conference on this subject will be held before the Honorable Paul H. Lamboley, Commissioner, in Hearing Room C of the Interstate Commerce Commission Building in Washington, D.C., at 10:00 a.m. on May 30, 1986,

3. After the initial docket management conference, a service list shall be established and served to permit notice to all interested parties. Copies of all materials filed with the Commission in this proceeding must be served on all parties on that list.

4. This notice will be published in both the *ICC* and **Federal Register.**

Decided: April 24, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Andre would have assigned the conference to one of the Commission's professional hearing officers. Chairman Gradison dissented with a separate expression.

James H. Bayne,

Secretary.

Chairman Gradison, dissenting:

I am opposed to further expansion of the Commission's involvement in this area of limited ICC jurisdiction. I view the conference as needless duplication of our existing rulemaking in Ex Parte No. MC–178, *Investigation Into Motor Carrier Insurance Rates.*

[FR Doc. 86–10184 Filed 5–5–86; 8:45 am]

BILLING CODE 7035–01–M

[Ex Parte No. 463]

Railroad Revenue Adequacy—1984 Determination

AGENCY: Interstate Commerce Commission.

ACTION: Notice of 1984 determination of rail revenue adequacy.

SUMMARY: Applying the return on investment/cost of capital formula adopted in *Standards for Railroad Revenue Adequacy*, 364 I.C.C. 803 (1981) and its previous determination that the cost of capital for 1984 was 15.78 percent, the Commission finds that none of the 31 Class I railroads in the nation met that test of revenue adequacy in 1984. However, the Commission also explains that the findings produced by the calculations performed in accordance with its existing procedures do not appear to produce a realistic picture of the state of the rail industry. Because the agency is not sure of the reason for this anomaly, it announces its intent to promptly issue a broad notice reopening Ex Parte No. 393 in order to re-evalute the manner in which it measures and determines revenue adequacy, including its use of the current cost of capital as the sole standard for revenue adequacy. In the interim, it will continue to apply the revenue adequacy determination made under the current methodology for purposes of establishing eligiblity for However, it will not necessarily treat the finding made under the current methodology as determinative of a revenue adequacy issue raised in individual rate reasonableness proceedings conducted under 49 U.S.C. 10701a. Rather, it will consider all probative evidence submitted in such cases pertaining to the revenue adequacy of the particular carrier involved.

FOR FURTHER INFORMATION CONTACT: Ward L. Ginn, Jr., (202) 275–7489.

SUPPLEMENTARY INFORMATION: To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423; or call 289–4357 (D.C. Metropolitan area) or toll free 800–424–5403.

Authority: (49 U.S.C. 10704(a)).

Decided: May 1, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Chairman Gradison concurred with a separate expression. Commissioner Andre concurred in part and dissented in part with a separate expression.

James H. Bayne,

Secretary.

[FR Doc. 86–10183 Filed 5–5–86; 8:45 am]

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 8–86]

Privacy Act of 1974; New System of Records; Privacy Act Extract Program

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), the Department of Justice proposes to establish a new system of records to be maintained by the Executive Office for Immigration Review (EOIR).

The Records and Management Information System (JUSTICE/EOIR–001) is a new system of records for which no public notice consistent with the provisions of 5 U.S.C. 552a (e)(4) and (11) has been published in the Federal Register. The new system will contain records and information which are relevant to administrative immigration proceedings for aliens, alleged aliens and aliens lawfully admitted for permanent residence.

In the Proposed Rules Section of today's Federal Register, the Executive Office for Immigration Review proposes to exempt the system from 5 U.S.C. 552a(d) of the Privacy Act pursuant to 5 U.S.C. 552a(k)(1) and (k)(2).

5 U.S.C. 552a(e)(4) and (11) provide that the public be given a 30-day period in which to comment on the routine uses of this system; the Office of Management and Budget (OMB), which has oversight responsibility under the Act, requires a 60-day period in which to review the system. However, a waiver of the 60-day requirement has been requested of OMB. Therefore, please submit any comments by June 5, 1986. The public, OMB, and the Congress are invited to submit comments to J. Michael Clark, Acting Assistant Director, General Services Staff, Justice Management Division, Department of Justice, Room 9002, 601 D Street, NW., Washington, D.C. 20530.

A report of the proposed system has been provided to the Director, OMB, the President of the Senate, and the Speaker of the House of Representatives.

Dated: April 24, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

JUSTICE/EOIR–001

SYSTEM NAME:

Records and Management Information System (JUSTICE/EOIR–001).

SYSTEM LOCATION:

Executive Office for Immigration Review, Department of Justice, 5201 Leesburg Pike, Suite 1501, Falls Church, Virginia 22041. The system is also located in EOIR field offices (see appendix identified as JUSTICE/EOIR–999)

CATEGORY OF INDIVIDUALS COVERED BY THE SYSTEM:

This system contains case-related information pertaining to aliens and alleged aliens brought into the immigration hearing process, including certain aliens previously or subsequently admitted for lawful permanent residence.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system includes the name, file number, address and nationality of aliens and alleged aliens, decision memoranda, investigatory reports and materials compiled for the purpose of enforcing immigration laws, exhibits, transcripts, and other case-related papers concerning aliens, alleged aliens or lawful permanent residents brought into the administrative adjudication process.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system is established and maintained under the authority granted the Attorney General pursuant to 44 U.S.C. 3101 and 3103 and to fulfill the legislative mandate under 8 U.S.C. 1103,

VOL 51 ISS 87 MY 6 1986 UMI

1226 and 1252. Such authority has been delegated to EOIR by 8 CFR Part 3.

PURPOSE OF THE SYSTEM:

Information in this system serves as the official record of immigration proceedings. EOIR employees use the information to prepare, process and track the proceedings. The information is further used to generate statistical reports and various documents, i.e., hearing calendars and administrative orders.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Information may be disseminated to the Department of State; Federal courts; Members of Congress; the alien or alleged alien's representative or attorney of record; and, to Federal, State and local agencies. Information is disseminated to the Department of State, pursuant to 8 CFR 208.10(b), to allow its preparation of advisory opinions regarding applications for political asylum; to the Federal courts to enable their review of EOIR administrative decisions on appeal; to Members of Congress to respond to consititituent inquiries; and, to the representative or attorney of record to ensure fair representation. Finally, in any claim in which there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature, information, including investigatory information, may be disseminated to the appropriate Federal, State or local agency charged with the responsibility of investigating or prosecuting such violation or with enforcing or implementing such law.

Release of information to the news media and the public: Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular matter would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress: Information contained in the system, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Release of information to the National Archives and Records Administration: A record from the system of records may be disclosed to the National Archives and Records Administration (NARA) for records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are maintained in file folders which are stored in file cabinets. A subset of the records is maintained on fixed disks or removable disk packs which are stored in file cabinets. All records are stored in secured EOIR office space.

RETRIEVABILITY:

Manual records are indexed by alien file number. Automated records are retrievable by a variety of indentifying data elements including, but not limited to, alien file number, alien name and nationality.

SAFEGUARDS:

Information maintained in the system is safeguarded in accordance with Department of Justice rules and procedures. Record files are maintained in file cabinets accessible only to EOIR employees. Automated information is stored on either fixed disks or removable disk packs which are stored in cabinets. Only EOIR employees in possession of specific access codes and passwords will be able to access automated information. All manual and automated records and mediums are located in EOIR office space accessible only to EOIR employees and locked during off-duty hours.

RETENTION AND DISPOSAL:

Record files are retained for six months after the final disposition of the case, then forwarded to regional Federal Records Centers. Automated records are maintained in EOIR field office data bases for ninety days after final disposition, then transferred to the host computer at EOIR headquarters and retained indefinitely.

SYSTEM MANAGER AND ADDRESS:

Counsel to the Chief Immigration Judge, Executive Office for Immigration Review, Office of the Chief Immigration Judge, U.S. Department of Justice, 5201 Leesburg Pike, Suite 1501, Falls Church, Virginia 22041.

NOTIFICATION PROCEDURE:

Address all inquiries to the system manager listed above.

RECORD ACCESS PROCEDURES:

Portions of this system are exempt from disclosure and contest by 5 U.S.C. 522a (k)(1) and (k)(2). Make all request for access to those portions not so exempted by writing to the system manager identified above. Clearly mark the envelope and letter "Privacy Access Requests"; provide the full name and notarized signature to the individual who is the subject of the record, his/her date and place of birth, or any other identifying number or information which may assist in locating the record; and, a return address.

CONTESTING RECORD PROCEDURE:

Direct all requests to contest or amend information maintained to the system manager listed above. State clearly and concisely what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

RECORD SOURCE CATEGORIES:

Department of Justice offices and employees, primarily those of the Immigration and Naturalization Service; the Department of State and other Federal, State and local agencies; and the parties to immigration proceedings and their witnesses.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

The Attorney General has exempted certain records of this system from the access provisions of the Privacy Act (5 U.S.C. 552a (d)) pursuant to 5 U.S.C. 552a (k)(1) and (k)(2). Rules have promulgated in accordance with the requirements of 5 U.S.C. 553(b), (c) and (e) and have been published in the Federal Register.

JUSTICE/EOIR-999

SYSTEM NAME:

Appendix to Executive Office for Immigration Review System of Records.

EOIR field offices are located as follows:

Executive Office for Immigration Review, Office of the Immigration Judge, Richard B. Russell Federal Building, 75 Spring Street, SW., Room 1310, Atlanta, Georgia 30303

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Bureau of Labor Statistics

Business Research Advisory Board and Committee; Meetings and Agenda

The regular spring meetings of the Board and Committees of the Business Research Advisory Council will be held on May 28, 29, and 30, 1986. All of the meetings will be held in Washington, DC.

The Business Research Advisory Board and its committees advise the Bureau of Labor Statistics with respect to technical matters associated with the Bureau's programs. Membership consists of technical officers from American business and industry.

The schedule and agenda for the meetings are as follows:

Wednesday, May 28

10 a.m.—Committee on Employment and Unemployment Statistics, Room N-3437 A and B, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. Impact of FY 1986-87 Budgets on Programs
2. Status of On-going Programs
   a. Plant Closing-Mass Layoff Reporting
   b. Status of Improvements to Local Area Statistics
   c. Measurement of Trends in Temporary Help Sector
   d. Occupational Employment Statistics
   e. Adjustments to CPS for Hispanics and Undocumented Workers
   f. Displaced Worker Data
   g. Employment and Trade Statistics
3. Special Topics:
   a. SIC Revision
   b. Part-time Employment Trends
4. Other Business

Wednesday, May 28

1:30 p.m.—Committee on Economic Growth, Room N-3437 A and B, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. Update on Budget Situation
2. Outline of Time Schedule for 1986-2000 Projections
3. Review of Three On-going Studies
   a. De-industrialization
   b. The Declining Middle
   c. Outlook for the Medical Services Industry
4. Other Business

Thursday, May 29

9:30 a.m.—Committee on Productivity/Foreign Labor, Room S-4215, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. Impact of GNP Revisions on Productivity Measures
2. Report of Work on Multi-Factor Productivity Measures for 2-digit Manufacturing Industries
3. New OMB Government Productivity Program and Relation to BLS Productivity Program
4. Developments in International Comparisons Work
5. Other Business

10 a.m.—Committee on Occupational Safety and Health Statistics, Room N-4437, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. National Academy of Sciences Study and General Program Developments
2. Recordkeeping Guidelines
3. On-Site Case Study and Post Symposium Developments
4. WIR Updates
5. SDS Updates
6. Other Business

1:30 p.m.—Committee on Price Indexes, Room N-4437, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. Derivation of Personal Consumption Expenditures and Department of Energy Consumption Estimates
2. Other Business

Friday, May 30

9 a.m.—BRAC Board, Room N-4437, Frances Perkins Department of Labor Building, 200 Constitution Avenue, NW.

1. Chairperson's Opening Remarks
2. Commissioner's Remarks—Janet L. Norwood
3. Committee Reports:
   a. Employment and Unemployment Statistics
   b. Economic Growth
   c. Occupational Safety and Health Statistics
   d. Productivity/Foreign Labor
   e. Price Indexes
4. Other Business
5. Chairperson's Closing Remarks

The meetings are open to the public. It is suggested that persons planning to attend these meetings as observers contact Janice D. Murphey, Liaison, Business Research Advisory Council on Area Code (202) 523-1347.

Signed at Washington, DC, this 29th day of April 1986.

Janet L. Norwood,

Commissioner of Labor Statistics.

BILLING CODE 4510-24-M

VOL 51 ISS 87 MY 6 1986 UMI

Pension and Welfare Benefits Administration

[Application No. D-6071 et al.]

Proposed Exemptions; United Parcel Service Thrift Plan et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

United Parcel Service Thrift Plan (the Thrift Plan) and United Parcel Service Retirement Plan (the Retirement Plan; Together, the Plans) Located in Greenwich, Connecticut

[Application Nos. D-6071 and D-6366]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to (1) the acquisition by the Plans of six aircraft from United Parcel Service Co. (UPS Co.), provided the Plans pay no more than the fair market value of the aircraft on the date of acquisition; (2) the leaseback of the aircraft by the Plans to UPS Co., under the terms described in this notice of proposed exemption, provided such terms are not less favorable to the Plans than those terms obtainable in an arm's-length transaction with an unrelated party; (3) the guarantee of UPS Co.'s payments under the lease by United Parcel Service of America, Inc. (UPS); (4) the acquisition of notes issued by the Plans by Overseas Partners, Ltd. (OPL), in connection with the transaction; and (5) the possible future reacquisition of the aircraft by UPS Co. for cash pursuant to the terms of the lease.

Summary of Facts and Representations

1. The sponsors of the Plans are UPS and several of its domestic subsidiaries. UPS is a holding and management company, the principal subsidiaries of which provide specialized transportation services, primarily through the delivery of small parcels, throughout the United States, portions of Canada, and all of West Germany. UPS is the largest motor carrier in the United States. With minor exceptions, all UPS stock is owned by or for the benefit of over 10,000 managers and supervisors in the employ of UPS and its subsidiaries, or by former employees and their families. UPS Co., one of the employers participating in the Plans, is an operating subsidiary of UPS which provides parcel delivery services.

2. The Thrift Plan is a savings and profit sharing plan designed to provide benefits to employees of UPS and certain of its subsidiaries, upon their retirement, death, or other separation from service. As of June 30, 1985, the Thrift Plan had approximately 91,800 participants. The Thrift Plan had assets of approximately $461,577,000 as of October 31, 1985. The Retirement Plan is a non-contributory defined benefit pension plan. As of June 30, 1985, the number of active participants in the Retirement Plan was approximately 22,200, all of whom are employees of UPS and its subsidiaries. The Retirement Plan had approximately $439,834,000 in assets as of October 31, 1985. Bankers Trust Company (BTC) serves as a directed trustee of the assets of the Plans, taking its directions from the Plans' Administrative Committees.

3. UPS Co. owns approximately 60 aircraft which it uses in its air service operations. The applicants have requested an exemption to permit UPS Co. to sell six Boeing 747-123SF aircraft (the Aircraft) to the Plans and to lease the Aircraft back from the Plans. The purchase price for the Aircraft would be their current fair market value as determined by Avmark Services, Ltd. (Avmark), an experienced, independent appraiser of aircraft. Avmark has performed a preliminary appraisal of the Aircraft as of August 30, 1985, and has estimated their fair market value at approximately $151,000,000. It is proposed that the Thrift Plan will take a two-thirds participation in this transaction, and that the Retirement Plan will take a one-third participation. Thus, as of October 31, 1985, the transaction would involve approximately 19.7% of the Thrift Plan's assets, and approximately 13.3% of the Retirement Plan's assets.

4. It is anticipated that $50,000,000 of the purchase price for the Aircraft will be provided by the two Plans. The Plans would obtain the balance by issuing interest-bearing evidence of

indebtedness (Secured Equipment Certificates) to OPL, in exchange for which OPL would provide the Plans with an amount equal to approximately $101,000,000 of the purchase price of the Aircraft. OPL is a Bermuda corporation, engaged in the property and casualty reinsurance business, 97% of whose stock is owned by shareholders of UPS. None of such shareholders owns 10% or more of OPL's stock. However, one or more members of the Plans' Administrative Committees are also officers or directors of OPL. Payment of interest and principal on the Secured Equipment Certificate would be secured by the pledge of the Aircraft, the lease of the Aircraft by the Plans to UPS Co., the residual value insurance (see rep. 6, below), and UPS's guarantee of UPS Co.'s payment obligations under the lease. The holders of the Secured Equipment Certificates have no recourse to any assets of the Plans.

5. Immediately following the sale, the Plans would lease the Aircraft to UPS Co. for a term of 15 years. Rental under the lease would equal both the debt service for the Secured Equipment Certificates and payment to the Plans to amortize their cost and provide them with a return on their investment. Rental rates have been calculated so that over the first 10 years of the lease, the Plans will be paid their total investment plus an annual yield of 12.5%. If the lease continues for the full 15 year term, the average annual rate of return over the 15 year term will be 15%. The lease may be terminated by UPS Co. (i) at any time if the payments on the Secured Equipment Certificates become subject to Federal income tax withholding in certain circumstances; and (ii) otherwise at any time after 1990. Upon termination, UPS Co. is required to attempt to obtain a purchaser for the Aircraft or may purchase the Aircraft itself, in which event it would be required to make up the deficiency between (i) Termination Value (the amount necessary to liquidate the Secured Equipment Certificates plus the amount necessary to return the Plans' investment and provide their expected 15% return to the date of payment) and (ii) the proceeds of such purchase or purchases. In addition, if the Aircraft are destroyed and not replaced by UPS Co., UPS Co. is required to pay the Plans Stipulated Loss Value, which is equal to Termination Value.

6. Two additional termination features have been provided to cause the lease to be characterized as an operating lease for financial reporting purposes but as a financing transaction for tax purposes. To provide the required financial reporting treatment, UPS Co. has been given the option at the end of 10 years to either purchase the Aircraft or to "walk away" (i.e., to cancel the lease, without making further payments, and without acquiring the Aircraft), in which case the Plans would sell the Aircraft. If UPS Co. exercises the purchase option, which is at the lower of fair market value or Termination Value, or the "walk away" option, and the resultant sale of the Aircraft does not produce an amount which will discharge the Secured Equipment Certificates, an insurer would be required to pay the difference under a residual insurance policy to be purchased at the inception of the transaction by UPS Co. and maintained by it during the first 10 years of the lease (see rep. 4, above). At that point, rentals received by the Plans would have provided a return of their total investment and an average annual 12.5% yield. The inclusion of the "walk away", and the purchase option at the lower of fair market value or Termination Value, at the end of 10 years, is intended to support the characterization of the lease as an operating lease under generally accepted accounting principles. By using the lesser (instead of the greater) of fair market value or Termination Value for the purchase option, the applicants represent that the Plans' income from the transaction will not be subject to taxation under the unrelated business taxable income provisions of the Code. The Plans are assured the expected minimum rate of return of 12.5% through lease payments, and the payment for the Aircraft will bring that return to 15% if Termination Value is paid, and something in excess of 12.5% in the event that fair market value is less than Termination Value at the time in question. Termination Value at the ten year point is based on an appraisal by Avmark indicating that the fair market value of the Aircraft at that time is expected to approximate Termination Value at that time. To obtain the desired tax treatment, if UPS Co. continues the lease for its full 15 year term, then, at the end of this period, it has an option to purchase any or all of the Aircraft at the nominal price of $1.00. The lease ensures that the exercise of this option will not be unfair to the Plans, because at the end of 15 years, the Plans would have been repaid their investment and an effective annual 15% yield over the 15 year term.

7. The applicants represent that the proposed transactions provide a number of important benefits and protections for the Plans. UPS Co.'s payments under the lease are guaranteed by UPS. Thus, the Plans can look for payment to the creditworthiness of UPS, a corporation with over $3 billion in total assets. At closing, the Plans will pay for the Aircraft their current fair market value as determined by Avmark, a firm of nationally recognized, independent aircraft appraisers. UPS Co. is required to pay rent until the lease expires or is terminated, regardless of any or all circumstances. The lease is net, such that UPS Co. is responsible for all the costs of insuring, maintaining and operating the Aircraft. In addition, UPS Co. will pay all transaction costs relating to the transaction. The lease contains a number of remedies for the Plans if UPS Co. defaults, including the right to take possession and sell the Aircraft and to obtain a cash payment from UPS Co. in an amount that when added to the sale proceeds will provide the Plans with a return of their total investment and expected return.

8. For purposes of the proposed transaction, the Plans have retained an independent trustee, the Connecticut National Bank (the Bank). The Bank is independent of and unrelated to the Plans, UPS Co., and all other employers participating in the Plans, and has no commercial or business relationship to these employers, except that it acts as an investment advisor to the Retirement Plan. The Bank has extensive experience as a corporate fiduciary which includes management of assets in excess of $2,175,000,000, both real and personal, held by the Bank as trustee for plans which are subject to the Act. The Bank has consulted with counsel familiar with the provisions of the Act, and has been advised of its duties, liabilities and responsibilities as a fiduciary under the Act.

9. The Bank has concluded that the proposed transaction is in the interest of both Plans and is protective of the rights of the participants and beneficiaries of the Plans. The Bank represents that the terms and conditions of the transaction are at least as favorable to the Plans as those generally obtainable from unrelated parties in a similar investment. The Bank also represents that, in its opinion, the subject transaction or a like transaction would be marketable to unrelated third parties. In reaching these conclusions, the Bank represents that it has considered the following factors to be particularly significant:

(a) The Bank has the authority necessary to monitor and enforce the transaction for the benefit of the Plans;

(b) The Plans will pay no investment management fees, advisory fees, underwriting fees, sales commissions or

VOL 51 ISS 87 MY 6 1986 UMI

similar compensation in connection with the proposed transaction;

(c) The percentages of the Plans' assets invested in the transaction will be approximately 19.7% of the Thrift Plan's assets and 13.3% of the Retirement Plan's assets, and these percentages are likely to decrease as the Plans' assets increase;

(d) Considering the Plans' overall investment portfolios, the investments of the Plans, after the Plans enter into the proposed transaction, will be sufficiently diversified and adequately liquid;

(e) The risk of loss to the Plans is minimal given the size and creditworthiness of UPS Co., and its guarantor UPS, and give other protections provided in the documents governing the proposed transaction;

(f) The return to the Plans compares favorably with other types of investments of similar quality generally available to the Plans, and the Plans will not sell any of their existing assets earning more than the projected rate of return on the proposed transaction in order to enter into the proposed transaction;

(g) The Plans will provide only the equity funds needed to consummate the proposed transaction and will have no liability under any circumstances to make any payments with respect to the loan made in connection with the proposed transaction;

(h) The provisions of the lease for UPS Co., at the end of the 10th year or thereafter, to purchase the Aircraft, to terminate the lease, or to "walk away" from the lease, are all carefully designed to ensure that the Plans will be adequately protected under all of those circumstances;

(i) The lease requires UPS Co. to continue making payments under the lease, without set-off or recoupment, regardless of the condition or fitness of the Aircraft, except in stated circumstances in which the Plans would be adequately protected;

(j) The lease is a net lease, with all costs, taxes and expenses of the Aircraft to be borne by UPS Co.;

(k) The Bank is satisfied that income received by the Plans pursuant to the proposed transaction will not be taxable as unrelated business taxable income;

(l) The Bank has reviewed and relied upon Avmark's preliminary appraisal dated August 30, 1985, indicating the fair market value of the Aircraft to be approximately $151,000,000, and will require a final appraisal of the Aircraft by Avmark as of the closing date, which must be satisfactory to the Bank in its absolute discretion; and

(m) The Bank has extensive experience with leveraged lease transactions and is of the view that, in general, the proposed transaction is customary for the industry, except that the transaction is structured to provide the user of the equipment with the tax benefits inherent to ownership while still treating the transaction as an operating lease for accounting purposes. This difference is embodied in the purchase and "walk away" options after 10 years, and the nominal purchase option after 15 years. The inclusion of these options in the proposed transaction and the results thereof are not detrimental to the Plans or to the returns the Plans will receive from the proposed transaction.

10. BTC, which has extensive experience with regard to sale/leaseback transactions, has represented that it believes the transaction is fair, equitable and attractive to all participants. BTC further represents that it is willing and able to place third party debt in the transaction, and would be willing to step in as an equity participant in the transaction as well. BTC represents that it has closed several financing materially similar to the proposed transactions, and has several others pending. The applicants represent that the subject transaction is closely modeled upon a $146,400,000 leveraged lease financing for American Airlines, Inc., involving seven McDonnell Douglas DC-82 aircraft, which closed in July, 1983. The equity participants in that transaction were subsidiaries of BTC and UPS.

11. In summary, the applicants represent that the proposed transaction satisfies the criteria of section 408(a) of the Act because: (a) The transaction involves less than 25% of the assets of each Plan; (b) the purchase price for the Aircraft will be determined by an appraisal conducted by Avmark, a qualified, independent appraiser as of the date of closing; (c) the Plans' independent fiduciary, the Bank, has determined that the proposed transaction is appropriate for, in the best interest of, and protective of the rights of the Plans and their participants and beneficiaries; and (d) the Bank will monitor the transaction throughout its duration and will take whatever action is necessary to enforce the Plans' rights.

For futher information contact: Mr. Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Fred A. Loe, D.D.S., P.A. Profit-Sharing Plan (the Plan) Located in Las Cruces, New Mexico

[Application No. D-6485]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the code [1] and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to (1) the purchase by the Plan of approximately 10.03 acres of vacant land located in Las Cruces, New Mexico, from Fred A. Loe, D.D.S. (Loe) for Loe's segregated account in the Plan, provided the Plan pays no more than fair market value for the property and the transaction represents no more than 25 percent of the assets in Loe's account at the time of purchase; and (2) the proposed transfer to the Plan in connection with the Plan's purchase of the real property of a real estate contract executed by Loe with unrelated third parties.

Summary of Facts and Representations

1. The Plan is a profit-sharing plan that provides an individual, segregated account for each participant. As of January 1, 1986, the Plan had one participant, although there have been other participants in the past and may be others in the future. The Plan provides that each participant may direct the investments in his or her individual account.

2. Loe is a participant in the Plan as well as the Plan trustee and the sole shareholder of Fred A. Loe, D.D.S., P.A. The total assets in Loe's account as of January 1, 1986, equaled $167,678. Loe is the owner of approximately 10.03 acres of vacant land located just outside the border of Las Cruces, New Mexico.

3. An appraisal was made on the parcel of real property on June 24, 1985, by Milton A. Romney (Romney), a real estate appraiser located in Las Cruces, New Mexico. According to the applicant, Romney is independent of Loe. Using the direct sales comparison approach, Romney placed the fair market value of the property at $40,000. The parcel of land contains no on-site

[1] Because Fred A. Loe is the sole shareholder of the Employer and the only participant in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3-3(b). However, there is jurisdiction under Title II of the Act under section 4975 of the Code.

improvements. Romney states that the subject property is located in the path of city growth and, therefore, potential value is inherent.

4. the Plan proposes to purchase the real property from Loe for Loe's individual account in the Plan. Loe believes that the land represents a good investment for the account because he anticipates that the property will substantially appreciate in value. The Plan will pay the appraisal price stated in the application for the property or fair market value at the time of purchase, whichever is lower. Based on the most recent available data, the transaction will represent approximately 23.8 percent of the assets in Loe's account.

5. The Plan will pay no sales commissions or fees in connection with the purchase. The Plan will pay $8,864 in cash and will assume an existing real estate contract on the property in the remaining principal amount of $31,136. These figures will be adjusted at the closing to reflect payments made in the interim on the contract. The real estate contact bears an interest rate of 10 percent per annum, with 3½ years remaining to maturity as of February 1986. The contract will be repaid monthly in equal installments of principal and interest. The contract is presently held by the sellers of the land, Ysidro and Mary Lopez, who are unrelated to Loe and the Plan.

6. In summary, the applicant represents that the proposed transaction will satisfy the statutory criteria of section 408(a) of the Act because: (1) The Plan will pay no more than fair market value for the real property at the time of purchase, based on a current independent appraisal; (2) the purchase of the property will involve no fees or commissions; (3) the transaction will involve only Loe's individual account in the Plan and will represent less than 25 percent of the assets in that account; and (4) the applicant believes that the property should appreciate in value, resulting in further growth of the account.

For Further Information Contact: Paul Kelty of the Department, telephone (202) 523-8882. (This is not a toll-free number.)

Union Gas System, Inc. and Affiliates Pension Trust Agreement (the Plan) Located in Independence, Kansas

[Application No. D-6489]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of 216 shares of common stock (the Stock) of Citizens National Bank, Independence, Kansas (the Bank) by the Plan to William H. Reeder [2] (Mr. Reeder), a party in interest with respect to the Plan, provided that the consideration paid for the Stock is not less than the higher of either $600 per share or the fair market value of the Stock on the date of the sale.

Summary of Facts and Representations

1. The Plan is a qualified money purchase pension plan, created in January 1944, with 614 participants and total assets of $9,865,428.83, as of August 31, 1985. These assets of the Plan consist of stocks, bonds, nongovernment obligations, and other securities. Included in the assets of the Plan is the Stock, which represents approximately a 5-percent interest in the Bank. Beginning June 25, 1947 and ending June 5, 1959, the Stock was acquired by the Plan in five different purchases, at varying prices per share, for a total expenditure of $16,354.17. Fiduciaries for the Plan are six individuals who are officers of the sponsoring employer, Union Gas System, Inc. (the Employer), located in Independence, Kansas. None of the fiduciaries is a shareholder or director of the Employer. The Employer is a diversified energy company whose activities include being (a) an interstate operator for distribution and transmission systems of natural gas; (b) an interstate distributor of propane gas; (c) a producer of oil and gas in two states; and (d) in the Kansas City metropolitan area, an owner and operator of mobile home subdivisions, industrial parks, shopping centers, and food supermarkets.

2. The Bank is primarily owned and controlled by a local family with whom Mr. Reeder is not related. The facilities of the Bank are located in three different small communities in the State of Kansas, where the prime economic activities are agriculture and the oil business. Both these economic activities are currently depressed and it appears they will be for the foreseeable future. The dividend history of the Stock for the past three years has been limited to $14 per share in 1983 and $10 per share in both 1984 and 1985. There is virtually no market for the Stock and its trading activities have been confined to transactions between shareholders of the Bank. Currently, of the 4,000 shares issued and outstanding, Mr. Reeder owns 26 shares of the common stock of the Bank. Mr. Paul Viets, President of the Bank, indicates that there is a very limited market for the Stock. Furthermore, he speculates that the only likely purchasers of the Stock would be the other directors of the Bank who own stock in the Bank. However, he is doubtful of their financial ability to acquire an additional 216 shares for themselves at $600 per share. In 1977, 160 shares were sold in seven different blocks at an average price of $486 per share. After receiving the offer made by Mr. Reeder and considering the limited market, the other five fiduciaries concluded that it was in the interest of the Plan and its participants and beneficiaries to sell the Stock to Mr. Reeder. Since Mr. Reeder was an interested party, he was not permitted to vote as a fiduciary of the Plan on this matter of selling the Stock to himself.

3. Mr. Grafton M. Potter, of the United Missouri Bank of Kansas City, determined that the market price for the common stock of the Bank would be realistic at $525 per share, as of December 31, 1984. He computed the book value at the same date to be $1,684.25 per share; and then, discounted the book value of the Bank's stock after noting that a few shares were sold during 1984 for $525 per share. Also, Mr. Potter noted that the President of the Bank, Mr. Viets, had represented to him that the principal reason the market price is discounted so extensively is because of the small dividend payout by the Bank and the lack of prospective purchasers of the Bank's common stock. In addition to Mr. Potter's appraisal, Mr. Walter I. Cole, of Beecroft-Cole & Company, Topeka, Kansas, a member of the Midwest Stock exchange, was requested to make an appraisal of the Stock. Mr. Cole determined that, as of June 1, 1985, the Stock, as a minority interest in a basically unmarketable security, had a value in the range of $550 to $600 per share.

4. Mr. Reeder, as an individual, proposes to purchase the Stock from the Plan for the higher of either the cash sum of $600 per share or the fair market value of the Stock on the date of the sale. The Plan will incur no expenses with respect to the proposed transaction. Mr. Reeder represents that his reasons for desiring to purchase the

[2] Mr. Reeder is one of six fiduciaries of the Plan and he is also one of seven directors of the Bank. In addition, Mr. Reeder is Senior Vice President and General Counsel of the sponsoring employer of the Plan, Union Gas Systems, Inc.

VOL 51 ISS 87 MY 6 1986 UMI

Stock are that he currently has the funds available; he believes that the Stock has long-term potential; and most importantly, as he is currently serving on the board of directors of the Bank, he will be able to have a direct control of his investment.

5. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 408(a) of the Act because (a) the proposed sale of the Stock will be a one-time transaction for cash; (b) the Plan will be able to invest the proceeds from the sale in better income producing assets; and (c) the Plan will receive the highest fair market price for the Stock as determined by a qualified independent appraiser.

Aerosol Services Company, Inc. Profit Sharing Plan (the Plan) Located in Industry, California

[Application No. D-6490]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of a parcel of real property (the Property) by the Plan to Aerosol Services Company, Inc. (Aerosol), or to Howard and Walter Lim (the Lims), parties in interest with respect to the Plan, for the greater of $725,000 or the fair market value of the Property on the date of the sale.

Summary of Facts and Representations

1. Aerosol is a California corporation involved in developing aerosol-related products and providing services in connection with the aerosol industry. Aerosol is owned by two brothers, the Lims, who are also trustees of the Plan. The Plan had approximately 115 participants as of June 30, 1985, and had assets of approximately $875,000.

2. On December 12, 1972, the Plan purchased the Property from an unrelated party in an arm's-length transaction for $120,676. The Property is approximately 3.33 acres in size, is unimproved and is located in Industry, California. On the same date as the purchase, the Plan leased a portion of the Property to Aerosol. The leased portion of the Property represented approximately ⅓ of the Property, or about 20,000 square feet of the 145,000 square feet. Aerosol uses the leased portion for packing by its employees. The initial term of the lease was for a period of 10 years and called for monthly payments of $1,000. since the lease expired in December, 1982, the Plan has continued to lease the portion of the Property to Aerosol on a month-to-month basis for the same rental, $1,000 per month.[3]

3. The applicants now seek an exemption to permit the Plan to sell the Property to Aerosol, or alternatively, to the Lims. The sale will be for cash, and no commissions will be paid. Mr. Phillip Gottfried, M.A.I. (Mr. Gottfried), an independent appraiser located in Ontario, California, has determined the fair market value of the Property to be $725,000 as of May 10, 1985. The applicants represent that the fair market value of the Property will be updated by an M.A.I. appraisal immediately prior to its sale, and the sales price to be paid to the Plan will be the higher of $725,000 or its updated appraised value. Mr. Gottfried represents that the Property has no special value to Aerosol by virtue of its proximity to Aerosol's present location.

4. The applicants represent that the Plan has been receiving at least fair market rental value since July 1, 1984, for Aerosol's use of the portion of the Property. Mr. Gottfried determined that as of July 1, 1984, the portion of the Property leased to Aerosol had a fair market rental value of $833 per month, and that the rent of $1,000 per month currently being paid by aerosol to the Plan is a fair amount. However, the applicants recognize that the leasing of the portion of the Property by the Plan to Aerosol since July 1, 1984 constitutes a prohibited transaction, for which no exemptive relief is being proposed by the Department. Accordingly, Aerosol represents that it will pay all excise taxes due to the Internal Revenue Service by reason of its use of the Property, within 60 days of the granting of the exemption proposed herein.

5. In summary, the applicants represent that the proposed transaction meets the criteria of section 408(a) of the Act because: 1) the sale is a one-time transaction for cash; 2) no commissions will be paid on the sale; 3) the sales price is to be determined by an independent M.A.I. appraisal; and 4) with respect to the past prohibited lease, Aerosol will pay all excise taxes due within 60 days of the date of granting of the exemption proposed herein.

For Further Information Contact: Mr. Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Michigan Lithographing Retirement Plan (the Plan) Located in Grand Rapids, Michigan

[Application No. D-6498]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Plan of a certain parcel of improved real property (the Property) to the Michigan Lithographing Company (the Employer), the sponsor of the Plan, provided that the sales price is no less than the fair market value of the Property on the date of sale.

Summary of Facts and Representations

1. The Plan is a defined benefit plan which, as of January 1, 1985, had approximately 128 participants and total assets of approximately $535,074. The trustee of the Plan is Union Bank and Trust Company of Grand Rapids, Michigan (Union Bank). The applicant states that Union Bank is an independent trustee, exercising independent judgement and discretion over Plan investments with respect to assets of the Plan other than the Property. However, the applicant states further that with respect to the Property, Union Bank is a directed trustee and the Board of Directors of the Employer has investment discretion. The Employer is a Michigan corporation, located at 1 Carlton Avenue, S.E., Grand Rapids, Michigan, engaged in the lithographing business.

2. The Property is a rectangularly shaped parcel of land located at 25 Carlton Avenue, S.E., Grand Rapids, Michigan. The Property is the site of an existing two story, wood frame coverted residence occupied as an office, plus an asphalt paved parking lot. The Plan acquired the Property from the Employer in 1983. Since that time, the Plan has leased the Property to the Employer for use as an office, for storage, and for parking. The Property is adjacent to the Employer's property. The Employer is currently paying the Plan $550 per month in rent for the Property. The applicant states that the Plan is currently receiving fair market value rent for the Property as the result of an audit by the Internal Revenue Service (the Service). In addition, the Employer has paid to the Plan a sum of money determined by the Service as a "correction" to make the Plan whole for amounts due with respect to the difference between the past rents paid by the Employer and the past fair market value rental for the Property. The applicant states further that Form 5330, Return of Initial Excise Taxes Related to Pension and Profit Sharing Plans, has been filed with the Service. In addition, the Employer represents that additional Forms 5330 will be filed and appropriate excise taxes for the remainder of the leasing transaction will be paid within 60 days of the date of a grant of an exemption for the proposed sale of the Property.

3. The Property was appraised on March 4, 1986 by Joseph H. Foster, M.A.I. (Mr. Foster), an independent real estate appraiser in Grand Rapids, Michigan, as having a fair market value of $57,000. Mr. Foster states that consideration was given to the plottage value of the Property and the Property's proximity to the Employer's adjacent location in arriving at the appropriate fair market value. Mr. Foster represents that in his opinion the market value for the Property would be lower if it were not located adjacent to an industrial district. However, the applicant states that other potential purchasers are not as likely to pay as much for the Property as the Employer because of its proximity to the Employer's property.

4. The Employer proposes to purchase the Property for $57,000 in cash in accordance with Mr. Foster's appraisal. The applicant represents that the sale of the Property to the Employer is in the best interest of the Plan's participants and beneficiaries since the proceeds of the sale can be reinvested in other assets and create greater diversity. The Plan will not pay any fees or commissions in connection with the sale.

5. In summary, the applicant represents that the proposed transaction satisfies the statutory criteria of section 408(a) of the Act because: (a) the sale will be a one-time tansaction for cash; (b) the Plan will receive the fair market value for the Property as determined by an independent qualified appraiser; and (c) the Plan will not pay any commissions or other expenses in connection with the sale.

For Further Information Contact: Mr. E.F. Williams of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Michigan National Bank Pooled Fund for Qualified Retirement Plans (MNB Grand Rapids Pooled Fund) and Michigan National Bank of Detroit Pooled Trust Fund A (MNB Detroit Pooled Fund) Located in Grand Rapids and Detroit, Michigan

[Application No. D-6506]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(b)(2) of the Act shall not apply to the proposed merger of the MNB Detroit Pooled Fund into the MNB Grand Rapids Pooled Fund, provided that the aggregate fair market value of the interests of each plan participating in these two funds (collectively, the Funds), upon completion of the merger transaction, equals the aggregate fair market value of such plan's interest in the Funds immediately preceding the merger.

Summary of Facts and Representations

1. Both Michigan National Bank of Detroit (MNB Detroit) and Michigan National Bank (MNB Grand Rapids) are National Banking Associations, whose capital stock, other than qualifying shares held by directors, is owned by Michigan National Corporation, a registered bank holding company under the Bank Holding Company Act of 1956. MNB Detroit serves as trustee for numerous qualified retirement benefit plans which participate in the MNB Detroit Pooled Fund, and MNB Grand Rapids serves as trustee, or agent for the trustee, of numerous qualified retirement benefit plans which participate in the MNB Grand Rapids Pooled Fund.

2. The MNB Detroit Pooled Fund had 42 participating plans with total net assets of $18,742,514, as of March 31, 1986. These participating plans are offered by the MNB Detroit Pooled Fund three options in investment funds: an Equity Fund, a Fixed Income Fund, and a Limited Volatility Fund. Pursuant to the terms and conditions of the MNB Detroit Pooled Fund, MNB Detroit has the privilege and authority to divide any of its investment funds into a greater number of units of a lesser value or into a smaller number of units of a greater value, as long as the proportionate interest of each participating plan is not changed. Furthermore, MNB Detroit has the right to sell, transfer, or dispose of any assets of the respective investment funds and to terminate any of the investment funds at the discretion of its board of directors. Upon a decision to terminate an investment fund, and after providing the required notice to interested parties, MNB Detroit would be required to transfer the assets of the terminating investment fund into a separate liquidating account for disposition for the sole benefit of the participating plans. Distributions from the liquidating account must be made ratably in accordance with respective unit interests of the participating plans.

3. The MNB Grand Rapids Pooled Fund had 333 participating plans and total net assets of $67,009,094.71, as of June 30, 1985. These participating plans are offered five choices as to investment funds: a Liquidity Fund, a Limited Volatility Fund, a Fixed Income Fund, an Equity Fund, and a Mutual Equity Fund. The terms and conditions of the MNB Grand Rapids Pooled Fund permit MNB Grand Rapids to divide any of its investment funds into a greater number of units of lesser value or into a smaller number of units of greater value as long as the proportionate interest of each participating plan is not changed. Furthermore, MNB Grand Rapids is authorized to accept deposits to any of its investment funds in even multiples of the then fair value of each unit in that investment fund.

4. The applicants propose that the MNB Detroit Pooled Fund be merged into the MNB Grand Rapids Pooled Fund. This merger will be accomplished in two steps which will occur simultaneously with no cash exchanged between the funds. The first step will involve MNB Detroit transferring the majority[4] of the assets in its MNB Detroit Pooled Fund at fair market value, based upon values reflected on national securities exchanges, to the MNB Grand Rapids Pooled Fund. Any securities not traded on national securities exchanges will have their fair market value determined by MNB Detroit with information available to it. There are only two securities[5] of the

---

[3] The applicants represent that the leasing of the portion of the Property by the Plan to Aerosol was exempt through June 30, 1984 from the prohibitions of sections 406 and 407(a) of the Act and section 4975 of the Code by reason of sections 414(c)(2) and 2003(c)(2)(B) of the Act. The Department expresses no opinion as to whether the lease satisfied the conditions of Act sections 414(c)(2) and 2003(c)(2)(B).

[4] It is not known how many of the participating plans will transfer to the MNB Grand Rapids Pooled Fund; however, it is anticipated most will do so.

[5] The securities are two bonds, each in the principal amount of $80,000, issued by the City of

Continued

VOL 51 ISS 87 MY 6 1986 UMI

MNB Detroit Pooled Fund which are not listed on a national securities exchange. In addition, each participating plan will be given the opportunity to discontinue its participation in the MNB Detroit Pooled Fund immediately prior to the proposed transfer and have its assets invested in a different manner than being invested in the MNB Grand Rapids Pooled Fund. The second step of the proposed merger will involve the issuance of units in MNB Grand Rapids Pooled Fund to the former participating plans in the MNB Detroit Pooled Fund. The portion of the proceeds attributable to each investment fund from the MNB Detroit Pooled Fund will be invested in a comparable investment fund under the MNB Grand Rapids Pooled Fund. No fractional units of participation will be issued. The MNB Grand Rapids Pooled Fund will pay each participating plan cash equal to the fair market value of any fractional units to which the plan would otherwise be entitled. MNB Grand Rapids has reviewed the assets of MNB Detroit Pooled Fund and has determined that the assets to be received from MNB Detroit Pooled Fund are appropriate investments for the MNB Grand Rapids Pooled Fund. Neither MNB Detroit nor MNB Grand Rapids will receive any fee or commission with respect to the transfer of assets in the proposed transactions. It is further represented by the applicants that each participating plan in the MNB Detroit Pooled Fund (other than those discontinuing participation) will obtain units of equal value in the corresponding investment fund of the MNB Grant Rapids Pooled Fund. The only difference will be a further diversification of each investment represented by each unit in the MNB Grand Rapids Pooled Fund. MNB Grand Rapids will become solely responsible for the administration and investment of all the remaining assets which were previously and separately held by the Funds.

5. The applicants represent that although both of the existing Funds are adequately diversified, their merger would produce a single, larger pooled fund with a greater diversification of investments, which will benefit the participating plans. Moreover, the increased amount of assets in the resulting pooled fund will broaden the range of its potential investments and permit it to benefit from volume discounts on certain services it purchases. Also, the new pooled fund will permit a more efficient and economical administration of the investment of assets, eliminating the duplication of efforts by the Funds. The merger will centralize and enhance the expertise in administering the Funds.

6. In summary, the applicants represent that the proposed transactions meet the statutory criteria contained in section 408(a) of the Act because (a) neither MNB Detroit, MNB Grand Rapids, nor any affiliate of either bank will receive any fee or commission in connection with the transactions; (b) the fair market value of the interest of a participating plan in the Funds will remain unchanged by the proposed transactions; (c) the assets of each participating plan will be invested in the same type of investments both before and after the proposed transactions; (d) the proposed transactions wil result in additional diversification of current investments of participating plans and will permit further diversification in the future because the larger size of the resulting pooled fund; and (e) the proposed transactions will permit the more efficient administration of the funds by the banks owned by Michigan National Corporation.

For Further Information Contact: Mr. C.E. Beaver of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Thayer E. and Anne K. Merrill, Ltd. Defined Benefit Pension Plan (the Plan) Located in Scottsdale, Arizona

[Application No. D–6509]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed purchase by the Plan of a mortgage note (the Note) from Thayer E. Merrill and Anne K. Merrill (the Merrills), who are the sole participants in and trustees of the Plan and disqualified persons with respect to the Plan,[*] for cash in the amount of $42,812.20, provided that such amount does not exceed the fair market value of the Note on the date of sale; and (2) the fair market value of the Note constitutes no more than 25% of the Plan's net assets after its purchase.

Summary of Facts and Representations

1. The Plan is a defined benefit pension plan with two participants, Thayer E. Merrill and his wife, Anne K. Merrill, who are also the sole shareholders of Thayer E. and Anne K. Merrill, Ltd. (the Plan Sponsor) and the trustees of the Plan. The Plan had net assets, as of January 31, 1986, of approximately $151,973.

2. The Merrills are the holders of and payees on a first deed of trust note (the Note) in the face amount of $45,000, bearing interest at the rate of 10% per annum payable annually from December 16, 1985 until December 16, 1987, at which time the principal balance, together with any accrued interest, must be paid in full. The Merrills represent that all payments on the Note have been made in a timely manner. The makers of the Note (the Makers) are Mr. and Mrs. Douglas D. Sutton, Mr. and Mrs. Dean K. Woodward and Mr. and Mrs. George E. Hanson, all of whom are unrelated to the Plan and to the Merrills. The Note is the result of the December 16, 1984 sale of three undivided one-third interests in certain unimproved real property (the Property) by the Merrills to the Makers. The Property was sold to the Makers for $65,000, of which $20,000 was paid in cash. The Note is secured by the Property. The Property is otherwise unencumbered.

3. The Note was appraised on March 7, 1986 by Mr. Donald J. Bernstein, president of Mutual Mortgage, Inc., a business which has been engaged in the buying and selling of trust deeds for over five years. Mr. Bernstein determined the fair market value of the Note on that date to be $42,812.20, based on a discount rate of 15%. Mr. Bernstein states that 15% is an appropriate discount rate as the real estate underlying the Note is raw land and there are no current payments of principal on the Note. Mr. Bernstein is independent of the Merrills.

4. The Merrills propose to sell the Note to the Plan for cash in the amount of $42,812.20. The Merrills, as trustees of the Plan, state that the purchase of the Note would be an excellent investment for the Plan as the Plan will have a high rate of return on a very well secured investment. The applicants represent that, prior to the Plan's purchase of the Note, the Plan Sponsor will make an additional contribution to the Plan in an amount such that the value of the Note after its purchase by the Plan will represent no more than 25% of the Plan's net assets. The Plan will pay no brokerage fees or commissions with respect to the purchase of the Note. The applicants represent also that if any present or future employees of the Plan Sponsor become eligible to participate in the Plan, a separate, comparable Plan will be established so that the Merrills will be the only participants affected by the proposed transaction.

5. In summary, the applicants represent that the proposed transaction meets the statutory criteria of section 4975(c)(2) of the Code because:

(a) The Plan will purchase the Note for its fair market value as determined by a qualified, independent appraiser;

(b) The Plan's trustees have determined that the proposed purchase of the Note is protective of and in the best interest of the Plan;

(c) The purchase of the Note by the Plan will be a one-time transaction for cash;

(d) The Plan will pay no fees or commissions with respect to its purchase of the Note; and

(e) The transaction will at all times only affect the Merrills' interests in the Plan.

Since the Merrills are the only participants in the Plan and the sole owners of the Plan Sponsor, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments with respect to this proposed exemption are due 30 days after the date of publication of this notice in the **Federal Register**.

For Further Information Contact: Ms. Katherine D. Lewis of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

NBD Banks Short-term Investment Fund for Master Trust/Custodian Accounts (the Fund) Located in Detroit, Michigan

[Application No. D–6578]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted, the restrictions of sections 406(a) and 406(b)(1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the making of a three-day repurchase agreement that was entered into on September 27, 1985, between the Fund and the National Bank of Detroit (NBD).

Summary of Facts and Representations

1. NBD is a national banking association with its principal offices in Detroit, Michigan. NBD has established and maintains the Fund as a domestic trust within the United States for the collective investment and reinvestment of moneys contributed thereto by NBD and its affiliate banks in their capacity as fiduciaries of participating trusts that are qualified under section 401 of the Code and exempt from income taxation under section 501(a) of the Code. At the time of the transaction described below, the Fund had 369 participating investment accounts representing 105 trust, agency, and custodial relationships. As a group trust, the Fund is a trust that constitutes a part of each of the qualified plans that is a participating account. NBD as Trustee (the Trustee) of the Fund is thereby subject to the duties and responsibilities of a fiduciary with respect to each such qualified plan.

2. Designated personnel in NBD's Trust Division execute NBD's responsibilities as Trustee of the Fund. Each day NBD's Trust Division calculates the amount of cash in the Fund available for investment in various types of short-term money market instruments. NBD has established guidelines for such investments which include an approved list of banks and broker-dealers through which the Trust Division's investment officers may invest the cash of the Fund. These investments typically are made through the New York City financial markets. NBD does not have established contracts with financial markets in other areas of the country.

3. Early in the day on Friday, September 27, 1985, Hurricane Gloria threatened the East Coast and, in particular, New York City. The threat was sufficiently severe to cause the financial markets in New York and in some other parts of the country either not to open or to close by the middle of the morning. An NBD Trust Division cash investment officer was able to invest most of the cash of the Fund available on September 27 through the New York markets before those markets closed at about 10:00 a.m. Until approximately 11:00 a.m. the officer investor some of the remaining money with direct issuers in Detroit. However, as revised cash-for-investment figures for the Fund later became available, the officer was unable to find a direct issuer on the NBD approved list that was still open for investment. Finally, $12,000,000 of Fund cash remained uninvested. The $12,000,000 represented 11 percent of the Fund cash available that day for investment. Of the Fund's total assets of $886,921,129, the $12,000,000 represented 1.35 percent.

4. One of the purposes of the Fund is to keep all available cash invested at all times. In light of NBD's obligation as Trustee of the Fund to invest the remaining $12,000,000 in cash, and with no apparent external sources available, the investment officer called the Bank Investment Division of NBD to determine the availability of suitable investment vehicles. The Bank Investment Division offered a three-day repurchase agreement with NBD at the market rate of 7.375 percent. The investment was made at 1:15 p.m. on September 27. Pursuant to the agreement, United States Treasury Notes having a market value of $12,375,010 were transferred to the Fund. Consequently, under the repurchase agreement, the Fund held U.S. Government securities having a market value of more than 103 percent of the purchase price paid by the Fund. On Monday morning, September 30, the Government securities underlying the repurchase agreement were transferred back to the Bank Investment Division in exchange for $12,007,375 pursuant to the terms of the agreement.

5. NBD loaned the $12,000,000 at the Federal funds rate on September 27 and made net earnings of $595, after taking account of the interest paid to the Fund on the repurchase agreement. NBD received no fees or commissions in connection with the agreement, and will return to the Fund the net earnings of $595 it made from the $12,000,000 during the term of the repurchase agreement.

6. The applicant represents that the repurchase agreement with NBD was entered into because of the extraordinary circumstances caused by Hurricane Gloria and because the only reasonable alternative was to leave the remaining $12,000,000 of Fund cash uninvested for the weekend. The applicant represents further that the terms and conditions of the repurchase agreement were at least as favorable to the Fund as those the Fund could have obtained from an unrelated party, and that the terms and conditions of the agreement were the same as those NBD would have used in dealing with an unrelated party.

7. In summary, the applicant represents that the transaction satisfies the statutory criteria of section 408(a) of the Act because: (1) NBD cash

London, Ontario and maturing December 15, 1986, and 1987, respectively. They were each acquired for $60,438 in a private placement and were last valued, as of March 31, 1986, with the 1986 bond valued at $58,083 and the 1987 bond valued at $56,550. These two bonds represent less than ¾ of 1-percent of the total assets of the MNB Detroit Pooled Fund.

[*] Because Thayer E. Merrill and Anne K. Merrill (the Merrills) are husband and wife and are the sole shareholders of the plan sponsor as well as the sole participants in the Plan, there is no jurisdiction under Title I of the Employee Retirement Income Security Act of 1974 (the Act) pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

VOL 51 ISS 87 MY 6 1986 UMI

investment officers made reasonable efforts to invest as much as possible of the Fund cash available for investment on September 27, 1985, with unrelated parties; (2) due to the unusual circumstances caused by Hurricane Gloria, the only reasonable alternative was to leave $12,000,000 of Fund cash uninvested for the weekend; (3) under the terms of the repurchase agreement, the agreement was entered into for only three days; (4) the repurchase agreement was made at the market rate of 7.375 percent; (5) the assets of the Fund involved in the repurchase agreement were protected at all times during the term of the agreement because the Fund received U.S. Government securities having a market value of more than 103 percent of the purchase price paid by the Fund; (6) NBD received no fees or commissions and will return to the Fund any net earnings it made from the agreement; and (7) the terms and conditions of the repurchase agreement were the same as those NBD would have used in dealing with an unrelated party.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 1st day of May, 1986.

Robert J. Doyle,

Deputy Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

BILLING CODE 4510-29-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. STN 50-455, STN 50-456 and STN 50-457]

Commonwealth Edison Co.; Issuance of Amendments to Construction Permits

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 1 to Construction Permit Nos. CPPR-131, CPPR-132 and CPPR-133 for the Byron Station, Unit 2 and the Braidwood Station, Units 1 and 2. Amendment No. 1 modifies the construction permits to reflect issuance, by the Commission, of an Exemption dated October 28, 1985. The Exemption, from a portion of the requirements of General Design Criterion 4 (GDC-4) of Appendix A to 10 CFR Part 50, was granted for the first two cycles of operation for Byron Station, Unit 2 and Braidwood Station, Units 1 and 2 to eliminate the need for pipe whip restraints and jet impingement shields on primary loop piping. The amendments are effective as of the date of issuance.

The application for the amendments comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the amendments. Prior public notice of these amendments were not required since the amendments do not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments dated September 25, 1985; (2) Amendment No. 1 to Construction Permits Nos. CPPR-131, CPPR-132 and CPPR-133; (3) the Exemption dated October 28, 1985; (4) the Commission's related Safety Evaluation; and (5) the Notice of Environmental Assessment and Finding of No Significant Impact dated October 21, 1985. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Local Public Document Rooms located in the Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61103 and in the Wilmington Township Public Library, 201 S. Kankakee Street, Wilmington, Illinois 60481. In addition, a copy of items (2), (3), (4), and (5) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing-A, Office of Nuclear Reactor Regulation.

Dated this 29th day of April, 1986 in Bethesda, Maryland.

For the Nulear Regulatory Commission.

Vincent S. Noonan,

Director, PWR Project Directorate No. 5, Division of PWR Licensing-A.

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301-53]

Initiation of Investigation Under Section 301; National Soybean Processors Association

On April 4, 1986, the National Soybean Processors Association (NSPA) filed a petition under section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411 et seq.) seeking relief from the effects of certain policies and practices of the Government of Argentina.

Argentina applies a 28.5 percent export tax on soybeans, and an 16.5 percent export tax on soybean oil and meal. NSPA argues that the export tax differential is unreasonable and burdens or restricts U.S. commerce. More specifically, NSPA contends that the export tax differential results in an artificial and unfair cost advantage to Argentine soybean crushers, essentially because the export tax suppresses the domestic Argentine price of soybeans to a level well below world (and U.S.) prices—an advantage for Argentine processors that far exceeds the cost to them of the export tax on oil and meal.

NSPA claims the tax differential has distorted Argentina's export mix of soybean and soybean products and has resulted in vastly increased Argentine exports of oil and meal, suppression of world prices for oil and meal, and significantly reduced U.S. exports of oil and meal. NSPA also contends that the system costs Argentina both export earnings and tax revenues, relative to an equalized export tax.

On April 25, 1986, the United States Trade Representative decided to initiate an investigation based on the petition filed by NSPA in accordance with the provisions of 19 U.S.C. 2412(b).

USTR has requested bilateral consultations with representatives of the Government of Argentina. To assist USTR in preparing for these discussions, interested parties are invited to submit written comments with respect to issues raised in the petition. USTR is particularly interested in information on the following points:

(1) To what extent does the export tax on soybeans suppress the domestic price of Argentine soybeans?

(2) To what extent does the export tax differential distort the mixture of soybeans and soybean products exported from Argentina?

(3) What effect, if any, do factors other than the export tax differential have on exports of soybeans and soybean products from Argentina?

(4) What would be the economic effects on U.S. and Argentine growers and processors of eliminating the export tax differential by (a) raising the export tax on soybean products to the level for soybeans; (b) lowering the export tax on soybeans to the level of soybean products; and (c) equalizing the export taxes at another rate?

Comments should be filed in accordance with the procedures set forth in 15 CFR 2006.8 and should be submitted to the Chairman, Section 301 Committee, Office of the U.S. Trade Representative, Room 223, 600 17th Street NW., Washington, DC 20506 no later than June 5, 1986. Copies of the petition are available at the above address.

C. Christopher Parlin,

Acting Chairman, Section 301 Committee.

BILLING CODE 8010-01-M

[Release No. 34-23180; File No. SR-CBOE-86-10]

Self-Regulatory Organizations; Proposed Rule Change by the Chicago Board Options Exchange, Inc.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 16, 1986, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of the Proposed Rule Change

The proposed rule change provides for a 6 month pilot program for the participation of three different groups on RAES: individuals, joint accounts, and member organizations with multiple nominees. Each is treated somewhat differently under the eligibility provisions. Individual market-makers may log onto RAES, are expected to continue on the system whenever present in the OEX pit for the remainder of the week, and may log on and off of the system whenever they leave the trading crowd.[1] Failure to meet the obligation to stay on the system while present in the OEX pit will disqualify a member from signing onto RAES for a period of one month, absent a good cause circumstance.

Joint account participants must all be on RAES simultaneously. Once the joint account has been logged onto RAES all

[1] The proposal, however, requires individual market makers to be on the system for the next expiration Friday.

VOL 51 ISS 87 MY 6 1986 UMI

members of the joint account will automatically remain on the system for the remainder of that week *and* will automatically be present on the system for the entire week containing the next expiration Friday. Members of the joint account will not be able to log off of RAES at will during a trading day, although relief can be obtained from the OEX Floor Procedure Committee. Such relief may be necessary, for example, where position limits would otherwise be violated or for financial capital reasons.

Member organizations may have multiple nominees on the system.[2] Any of the organizations nominees may log all such nominees onto the RAES system, using their acronyms and passwords. All nominees' trades will clear into the account of the designated nominee, as designated by each nominee. Whenever any of the participating nominees is logged onto the system, all must be. As a joint account, a group consisting of nominees of a member organization will log onto the system for a week at a time and will automatically be logged onto the system for the week containing expiration Friday. Release from these obligations can only be obtained from the OEX Floor Procedure Committee.

OEX Floor Procedure Committee reserves the authority to establish limits on the size of groups eligible to use RAES. The Committee also retains the right to disallow any group from participating in RAES where it appears to the Committee that such group is disproportionately large in comparison to other users of RAES, appears to have been formed solely for the purpose of engaging in RAES trades, and is not reasonably necessary to the efficient functioning of the system.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

[2] Joint accounts, and the designated nominee of a member organization, will incur the customary trade match and transaction fees.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The Exchange introduced its retail automatic execution system ("RAES") in options on the Standard & Poor's 100 Index ("OEX") in February, 1986. Since then, the daily volume of RAES-executed trades has grown at a substantial rate. At present, only individual market-makers are eligible to participate in the RAES system as contra-brokers. Each market-maker logged onto RAES is assigned RAES trades on a rotating basis.

As originally conceived, RAES was to have been a system utilized chiefly, if not exclusively, by individual market-makers. Recently, however, the noticeable increase in volatility that has characterized the marketplace has discouraged individual participation in RAES by increasing the potential exposure of an individual to substantial, one-sided market movements. At the same time, market-makers have shown tremendous interest in pooling their RAES trading activity, thereby lessening their exposure to the vagaries of the market.

The proposed rule change reflects a careful balancing of the Exchange's desire to open the RAES system to groups of participants, and thereby ensure both the integrity and the continued availability of the system to public customers, with the realistic expectation that certain affirmative obligations may be expected of market-makers who use RAES. As the guidelines make clear, stricter market-making obligations are imposed upon groups than upon individuals, since the sudden departure from the system of a group of participants could have more deleterious consequences to the remaining users of RAES than would the logging off of an individual market-maker.

The Exchange believes that only the quickest possible implementation of these guidelines will enable the Exchange accurately to gauge their efficacy in guaranteeing that the RAES system remains available to public customers in all market conditions.

The Exchange believes that the proposed rule change is consistent with the provisions of the Securities Exchange Act of 1934, and the rules and regulations promulgated thereunder, and in particular section 6(b)(5) of the Act, in that the proposal is designed to improve market efficiency and enhance the market functioning of the automatic execution system utilized at the Exchange.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that this proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by May 27, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

April 28, 1986.

[FR Doc. 86-10133 Filed 5-5-86; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-23188; File No. SR-Phlx-86-1]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

On January 27, 1986, the Philadelphia Stock Exchange, Inc. ("Phlx"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b-4 thereunder,[2] a proposed rule change to narrow the bid-ask differentials applicable to individual stock options and index options and change the reference point for applying the differentials from the last preceding transaction to the prevailing bid.

The proposed rule change was noticed in Securities Exchange Act Release No. 22950 (February 26, 1986), 51 FR 7513. No comments were received on the proposed rule change.

Under Phlx's proposd rule change the maximum allowable bid-ask differentals for individual stock options and index options will be narrowed in cases where the prevailing bid does not exceed $3.00.[3] In addition, the Phlx proposal changes the reference point for establishing which differential applies to the prevailing bid rather than the last preceding transaction as required under the existing rule.[4]

In its filing, the Phlx states that the proposed changes will improve price continuity in stock options and index options. In reviewing the proposed rule change, the Commission generally believes that the narrowing of the bid-ask differentials should allow for tighter markets and improved price continuity. In addition, the change in reference points for the differentials from the last preceding transaction to the prevailing bid does not appear to create any problems. In this regard, we note that the Chicago Board Options Exchange, Inc., ("CBOE") uses the prevailing bid as its reference point for its bid-ask differentials.[5]

For these reasons, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [6] and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[7] that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Dated: April 30, 1986.

John Wheeler,

Secretary.

[FR Doc. 86-10135 Filed 5-5-86; 8:45 am]

BILLING CODE 8010-01-M

[1] 15 U.S.C. 78s(b)(1)(1982).

[2] 17 CFR 240.19b-4 (1985)

[3] The maximum allowable bid-ask differentials for contracts where the bid is over $3.00 will remain unchanged. The reference point, however, also will be changed for such contracts to the prevailing bid rather than the last preceding transaction price.

[4] The Phlx proposal also eliminates a portion of the rule that currently sets the bid-ask differentials for options series fo more than nine months at twice the amounts stated in the rule. Accordingly, the bid-ask differentials in the rule apply to all series of stock options and index options.

[5] *See* CBOE Rule 8.7.

[File No. 22-15218]

Application and Opportunity for Hearing; Trans World Airlines Inc.

May 2, 1986.

Notice is hereby given that Trans World Airlines, Inc. (the "Applicant") has filed an application under clause (ii) of Section 310(b)(1) of the Trust Indenture Act of 1939, as amended (the "Act"), for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of The Connecticut National Bank, a national banking association ("CNB"), under the Equipment Trust Agreement (the "Equipment Trust Agreement") dated as of February 18, 1986, as amended and supplemented, between CNB and the Applicant is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify CNB from acting as trustee thereunder and under the following other indentures (the "Indentures") between the Applicant and CNB, as trustee: (i) The Equipment Trust Agreement dated as of February 15, 1983, (ii) the Equipment Trust Agreement dated as of April 1, 1983, as amended by Amendment No. 1 dated as of May 25, 1983, (iii) the Equipment Trust Agreement dated as of July 15, 1983, (iv) the Equipment Trust Agreement dated as of August 25, 1983, (v) the Equipment Trust Agreement dated as of September 15, 1983, (vi) The Equipment Trust Agreement dated as of November 15, 1983 and (vii) the Mortgage and Trust Indenture dated as of April 10, 1985.

Section 310(b) of the Act provides, in part, that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in such Section), it shall within ninety days after ascertaining that it has such conflicting interest, either eliminate such conflicting interest or resign. Subsection (1) of such Section provides that, with certain exceptions, a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which any other securities of the same obligor are outstanding. However, pursuant to clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the same obligor are outstanding, if the obligor shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeship under the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under any of such indentures.

The Applicant alleges that:

(1) The Applicant, a Delaware corporation, sold $209,700,000 aggregate principal amount of Equipment Trust Certificates under the Equipment Trust Agreement in a private placement on February 20, 1986 and $103,000,000 aggregate principal amount of Equipment Trust Certificates under the Equipment Trust Agreement, as amended, in a private placement on March 25, 1986.

(2) Under related Registration Rights Agreements dated February 20, 1986 and March 25, 1986, the Applicant agreed with the purchasers of the Equipment Trust Certificates to file a registration statement pursuant to Rule 415 under the Securities Act of 1933, as amended (the "Securities Act"), and to use its best efforts to have such registration statement declared effective by June 2, 1986. The Applicant intends that, pursuant thereto, the Equipment Trust Certificates will be registered under the Securities Act and the Equipment Trust Agreement will be qualifed under the Act.

(3) As of the date hereof, the Applicant has outstanding $195,123,658

VOL 51 ISS 87 MY 6 1986 UMI

aggregate principal amount under the following Indentures, other than the Equipment Trust Agreement, for which CNB is trustee:

(A) $35,159,021 principal amount outstanding, maturing in March 1998, under the Equipment Trust Agreement dated as of February 15, 1983, between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N604 TW);

(B) $25,808,113 principal amount outstanding, maturing in April 1993, under the Equipment Trust Amendment dated as of April 1, 1983, as amended by Amendment No. 1 dated as of May 25, 1983, between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N606 TW);

(C) $24,064,617 principal amount outstanding, maturing in July 1993, under the Equipment Trust Amendment dated as of July 15, 1983, between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N607 TW);

(D) $24,054,617 principal amount outstanding, maturing in August 1993, under the Equipment Trust Agreement dated as of August 25, 1983, between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N609 TW);

(E) $24,064,617 principal amount outstanding, maturing in September 1993, under the Equipment Trust Agreement dated as of September 15, 1983 between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N608 TW);

(F) $25,992,673 principal amount outstanding, maturing in November 1993, under the Equipment Trust Agreement dated as of November 15, 1983 between CNB and the Applicant, covering one Boeing Model 767–231 Aircraft (United States Registration No. N610 TW; and

(G) $36,000,000 principal amount outstanding maturing in May 1995, under the Mortgage and Trust Indenture dated as of April 10, 1985, between CNB as Loan Trustee and the Applicant, relating to one Boeing 747–284–B Aircraft (United States Registration No. N305–TW) and one Boeing 747–131 Aircraft (United States Registration No. N93109).

(4) The Indentures were not qualified under the Act, since the Indentures were exempt from qualification thereunder by reason of Section 304(b) thereof as privately placed securities exempt from registration under the Securities Act.

(5) The Applicant is not in default under any of its obligations with respect to the Equipment Trust Agreement or any of the Indentures.

(6) Such differences as exist between the Equipment Trust Agreement and the other Indentures are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify CNB from acting as trustee under the Equipment Trust Agreement or the other Indentures. The Equipment Trust Certificates and the securities issued under each of the Indentures are secured by separate and distinct sets of identified aircraft and engines. A default resulting in the acceleration by CNB of the maturity of the securities issued pursuant to any of the Indentures, or the acceleration by CNB of the maturity of the Equipment Trust Certificates, could trigger a similar default with respect to the Equipment Trust Certificates and the securities issued pursuant to the Indentures. If CNB enforces its security interest under the Equipment Trust Agreement or any of the Indentures, such action would not affect CNB's security interest or its ability to enforce its security interest under the Equipment Trust Agreement or any of the other Indentures. Accordingly, the existence of the several trusteeships should not place CNB in a situation where a potential material conflict of interest could arise.

The Applicant has waived notice of hearing, hearing, and any and all rights to specify procedures under the Rules of Practice of the Commission in connection with this matter.

For a more detailed account of the matters of fact and law asserted, all persons are referred to said application which is a public document on file in the offices of the Commission at the Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

Notice is further given that any interested persons may, not later than May 20, 1986, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert. Any such request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and in the interest of investors.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secetary.

BILLING CODE 8010–01–M

DEPARTMENT OF STATE

[Public Notice 961]

Delegation of Authority No. 120–3; Procurement Executive

By virtue of the authority vested in me by Department of State Delegation of Authority No. 120 (34 FR 18095) and in order to implement the Office of Federal Procurement Policy Act (41 U.S.C. 401 et set.), it is directed as follows:

1. Functions Delegated to the Procurement Executive

I hereby delegate to the Procurement Executive authority to:

a. Prescribe, promulgate and amend the Department's procurement and grant policies, rules and regulations;

b. Review all Department contracts over $100,000 for compliance with law and regulations;

c. Provide advice and guidance, in consultation with the Office of the Legal Adviser as appropriate, to all Department offices and to diplomatic and consular posts on all matters of procurement law and policy;

d. Make determinations and findings or justifications and approvals and take other actions as are deemed consistent with applicable policies, procedures or regulations, with respect to purchases, contracts, grants, leases, sales agreements and other transactions, except where such determinations and findings or justifications and approvals are required by law or regulation to be made by another officer;

e. Select, certify and appoint contracting officers and grant officers, and representatives thereof, by written instrument;

f. Evaluate, monitor and report on the performance of the Department's procurement system as may be required by law, regulation or directive, and certify to the Assistant Secretary for Administration that the Department's procurement system meets approved standards;

g. Develop and maintain a procurement career management program to assure an adequate professional work force;

h. Examine the Department's procurement system, in coordination with the Office of Federal Procurement Policy, to determine specific areas where government-wide performance standards should be established and applied;

i. Participate in the development of government-wide procurement policies, regulations and standards, and represent the Department on all councils, interagency task forces, working groups, and other bodies concerned with acquisition policy and procedures;

j. Select and designate an independent advocate for competition for Department of State procurements, and provide advice and counsel to such advocate in accordance with the Office of Federal Procurement Policy Act;

2. Re-Delegation

The Procurement Executive is authorized to redelegate to the employees of the Department any of the authorities or functions, delegated herein, except that the certification responsibility under section 1.f may not be redelegated. Any redelegation may include authority for further redelegation.

3. General Provisions

a. Any official actions within the scope of this delegation taken prior to the effective date hereof by officers duly authorized are hereby continued in effect, according to their terms, until modified, revoked, or superseded by action of the Procurement Executive or other officer of the Department acting under authority of this delegation.

b. All authorities delegated herein shall be exercised in accordance with the applicable limitations and requirements of the Federal Acquisition Regulation (48 CFR Chapter 1) and other Federal procurement laws and regulations.

Donald J. Bouchard,

Assistant Secretary for Administration.

[Docket 43687]

Denver-London Route Proceeding

This proceeding was instituted by Order 85–12–70 issued December 26, 1985. Pursuant to section 302.1753(a) of the Department's procedural regulations in 14 CFR the 136-day period for service of an initial decision by the Chief Judge would have expired on May 12, 1986. However, several delays in the procedural schedule have occurred within the meaning of section 401(c)(2) of the Federal Aviation Act. Accordingly, in compliance with section 302.1753(a)(2) of the regulations, this notice extends the due date for service of the initial decision for a period of 63 days, to July 14, 1986.

Entered this 30th day of April, 1986.

Elias C. Rodriguez,

Chief Administrative Law Judge.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 2:00 p.m. (eastern time), Monday, May 12, 1986.

CHANGE IN THE MEETING:

Change from: Discussion of Subpoena Determinations
Change to: Discussion of Certain Commissioners' Charges

CONTACT PERSON FOR MORE INFORMATION: Cynthia C. Matthews, Executive Officer, Executive Secretariat, at (202) 634-6748.

Dated: May 1, 1986.

Barbara Parris,
Policy Analyst.

This Notice Issued May 1, 1986.

Part II

Department of Health and Human Services

Health Care Financing Administration

42 CFR Parts 400, 405, 412, and 489
Medicare Program; Fiscal Year 1986 Changes to the Inpatient Hospital Prospective Payment System; Interim Final Rule With Comment Period

VOL 51 ISS 87 MY 6 1986 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Parts 400, 405, 412, and 489

[BERC-385-IFC]

Medicare Program; Fiscal Year 1986 Changes to the Inpatient Hospital Prospective Payment System

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Interim final rule with comment period.

SUMMARY: This interim final rule sets forth revisions to the Medicare inpatient hospital prospective payment system. This rule is needed to implement those portions of sections 9101 through 9105 and 9112 of the Consolidated Omnibus Budget Reconciliation Act of 1985 having an effective date of May 1, 1986 or earlier. The changes required by this legislation affect the fiscal year 1986 prospective payment rates; the rate-of-increase limits (target amounts) for hospitals excluded from the prospective payment system; the length of the transition period and the method of payment; application of the hospital wage index; payment for the indirect costs of medical education; and payments for hospitals that serve a disproportionate share of low-income patients.

DATES: Effective date: With certain exceptions, this interim final rule is effective on May 1, 1986. We refer the reader to section VII.B. of this preamble for a detailed discussion of effective dates.

Comment Date: To be considered, comments must be mailed or delivered to the appropriate address, as provided below, and must be received by 5:00 p.m. on June 5, 1986.

ADDRESS: Mail comments to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC-385-IFC, P.O. Box 26676, Baltimore, Maryland 21207.

If you prefer, you may deliver your comments to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC, or

Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

In commenting, please refer to file code BERC-285-IFC. Comments received timely will be available for public inspection as they are received, beginning approximately three weeks after publication of this document, in Room 309-G of the Department's offices at 200 Independence Avenue SW., Washington, DC, on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (phone: 202-245-7890).

FOR FURTHER INFORMATION CONTACT: Linda Magno, (301) 594-9343.

SUPPLEMENTARY INFORMATION:

I. Background

On September 3, 1985, we published a final rule in the **Federal Register** (50 FR 35646) that made the following changes to the Medicare inpatient hospital prospective payment system:

- We adjusted the diagnosis-related groups (DRG) classifications and weighting factors for discharges occurring on or after October 1, 1985.
- For cost reporting periods beginning on or after October 1, 1983, we adopted a new hospital wage index that was based on the HCFA survey of hospital wages.
- We made several changes to the regulations in 42 CFR Parts 405 and 412 concerning—

—The rate-of-increase limits for hospitals excluded from the prospective payment system;
—Payments for indirect costs of medical education;
—Limitations on charges to beneficiaries for hospitals paid under State reimbursement control systems or demonstration projects;
—The exclusion of alcohol/drug hospitals and units;
—Review of cost outliers; and
—Qualifying criteria for referral centers.

- We established the FY 1986 Federal rates by—

—Restandardizing the base year cost data to reflect the new wage index;
—Grouping the standardized costs per case for urban/rural averages for the nine census regions and the nation, reflecting the most recent geopgraphic designations;
—Updating the standardized amounts by zero percent; and
—Applying the same adjustment factors for nonphysician anesthetist costs and outlier payments as were used for FY 1985.

- We did not increase either the hospital-specific rates for hospitals under the prospective payment system or the rate-of-increase limits for hospitals excluded from the prospective payment system.

With certain exceptions, the September 3 final rule was to be effective on October 1, 1985.

On September 30, 1985, the Emergency Extension Act of 1985 (Pub. L. 99-107) was enacted. Section 5 of Pub. L. 99-107 extended through November 14, 1985 the Medicare payment rates for inpatient hospital services that were in effect on September 30, 1985. A result of this delay was that certain changes in the rules that govern Medicare payment for inpatient hospital services, which would have become effective on October 1, 1985, for FY 1986 as a result of the September 3, 1985 final rule, were postponed initially until November 15, 1985. The affected changes concerned the rules for determining payment rates for hospitals covered by the prospective payment system and the rate-of-increase limits for hospitals excluded from that system. In addition, the amendments to 42 CFR 412.118(f)(2) and (f)(3) concerning determination of indirect medical education costs that were scheduled to be effective on October 1, 1985 under the September 3, 1985 final rule were also postponed until November 15, 1985. We announced this postponement in a notice in the **Federal Register** published on November 12, 1985 (50 FR 46851).

Since publication of that notice, several more laws were enacted that further delayed the implementation of revised Medicare inpatient hospital services payment rules as follows:

- Pub. L. 99-155, enacted December 14, 1985, extended the delay through December 14, 1985.
- Pub. L. 99-181, enacted December 13, 1985, extended the delay through December 16, 1985.
- Pub. L. 99-189, enacted December 16, 1985, extended the delay through December 19, 1985.
- Pub. L. 99-201 enacted December 23, 1985, extended the delay through March 14, 1986.

To announce the first of these extensions of the delay, we published a notice in the **Federal Register**, on December 6, 1985 (50 FR 49930); the remaining extensions were described in a notice published February 3, 1986 (51 FR 4166). The result of these extensions is that, for the period of the extension, we continued to pay for hospital discharges under the rules that were in effect in FY 1985. Thus, we did not implement the following changes that were included in the September 3, 1985 final rule:

- Revised DRG classifications and weights.
- Revised wage index.
- Revised adjusted standardized amounts.
- Revised regulations concerning exclusions on the count of interns and residents assigned to outpatient and ancillary department of a hospital to be used in determining the cost of indirect medical education.

II. New Legislation

On April 7, 1986, the Consolidated Omnibus Budget Reconciliation Act of 1985 (Pub. L. 99-272) was enacted. Sections 9101, 9102, 9104, and 9105 of Pub. L. 99-272 made the following amendments, which concern payment to hospitals in FY 1986, to section 1886 of the Social Security Act:

- The FY 1985 inpatient hospital payment rates are extended through April 30, 1986.
- For discharges occurring on or after May 1, 1986 and before October 1, 1986, the standardized amounts for prospective payment hospitals are increased by one-half of one percent.
- For cost reporting periods beginning in FY 1986, the hospital-specific rates are increased by zero percent for the first seven months of a hospital's cost reporting period and by one-half of one percent for the remaining five months of the cost reporting period.
- For cost reporting periods beginning in FY 1986, the rate-of-increase limits for hospitals excluded from the prospective payment system are increased by five-twenty-fourths of one percent.
- Except for hospitals in the State of Oregon as discussed in greater detail below, the prospective payment system transition period is extended through FY 1987, thus delaying the transition to full Federal rates for one year.

—The national/regional blend of the Federal portion remains at 25 percent national and 75 percent regional through FY 1986.
—The hospital-specific and Federal portion percentages for cost reporting periods beginning in FY 1986 remain at 50/50 for the first seven months of the cost reporting period and change to 45 percent of the hospital-specific portion and 55 percent of the Federal portion for the remaining five months of the hospital's cost reporting period.

- For discharges occurring on or after May 1, 1986 and before October 1, 1986, the indirect teaching adjustment is changed from 11.59 percent, paid on a linear basis (that is, for each one-tenth of the hospital's intern and resident to bed ratio), to 8.1 percent, paid on a variable or curvilinear basis. In addition, interns and residents assigned to outpatient departments of a hospital will continue to be counted for purposes of determining the indirect teaching adjustment.
- For discharges occurring on or after May 1, 1986, and before October 1, 1986, an additional payment will be made to each prospective payment hospital that serves a disproportionate share of low-income patients (as defined in the statute).

Section 9103 of Pub. L. 99-272 amends section 2316(b) of the Deficit Reduction Act of 1984 (Pub. L. 98-369) to specify that the hospital wage index based on the HCFA survey, which was published in the September 3, 1985 final rule, must be used to determine payment for discharges occurring on or after May 1, 1986.

Section 9112 of Pub. L. 99-272 amends section 602(k) of the Social Security Amendments of 1983 (Pub. L. 98-21) to provide that—

- For hospitals that have a waiver under section 602(k) of Pub. L. 98-21, the payment for their indirect costs of medical education is to be made as if the hospitals were receiving under Medicare Part A (Hospital Insurance) all the payments that are made under Medicare Part B (Supplementary Medical Insurance) because of the waiver; and
- Any Part B payments made to suppliers under a waiver are to equal 100 percent of the reasonable charge for the service and, in order to retain its waiver, the hospital must assure us that the supplier will accept that payment as payment in full.

These provisions are discussed in detail below.

III. FY 1986 Changes to the Prospective Payment System

A. Payment for Inpatient Hospital Services

For the period of the extension described above, payment to hospitals under the prospective payment system is made under the payment rates and rules in effect on September 30, 1985. Thus, the adjusted standardized amounts and hospital-specific rates and the list of DRG weights that were set forth in the August 31, 1984 final rule (49 FR 34728) remained in effect for discharges occurring in the extension period. Similarly, for hospitals that are not subject to the prospective payment system, each hospital's target amount for its cost reporting period beginning in FY 1985 has been carried forward for its next cost reporting period.

Section 9101(a) of Pub. L. 99-272 amends section 5(c) of Pub. L. 99-107 to extend the FY 1985 inpatient hospital prospective payment rates through April 30, 1986. Therefore, the DRG classification changes and recalibrated DRG weights that were set forth in the September 3, 1985 final rule (50 FR 35722) are effective for discharges occurring on or after May 1, 1986.

Section 9101(b) of Pub. L. 99-272 amends section 1886(b)(3)(B) of the Act to provide that the adjusted standardized rates, the hospital-specific rates, and the target rate-of-increase limits are increased by one-half of one percent for cost reporting periods beginning in or discharges occurring in FY 1986, as applicable. Section 9101(e) of the law further specifies the following:

- For prospective payment hospitals, the update to the adjusted standardized rates of one-half of one percent is effective for discharges occurring on or after May 1, 1986. The hospital-specific rates are increased by zero percent for discharges occurring during the first seven months of a hospital's cost reporting period beginning in FY 1986 and by one-half of one percent for discharges occurring during the remaining five months of that cost reporting period.
- For hospitals excluded from the prospective payment system, the hospital's target amount for cost reporting periods beginning in FY 1986 is the previous year's target amount increased by five-twenty-fourths of one percent (that is, an increase of one-half of one percent for five months of the 12-month cost reporting period.
- For purposes of determining update percentages for discharges occurring on or after October 1, 1986 or cost reporting periods beginning on or after October 1, 1986, as appropriate, the applicable percentage increase for both prospective payment hospitals and excluded hospitals, for discharges occurring in FY 1986 or cost reporting periods beginning in FY 1986, as appropriate, is deemed to have been one-half of one percent.

In accordance with the provisions of section 9101(b) and (e) of Pub. L. 99-272, the adjusted standardized amounts that were published in the September 3, 1985 final rule (which reflected a zero percent update) are updated by one-half of one percent effective for discharges on or after May 1, 1986. The revised standardized amounts are set forth in Table 1, below.

The amendment made to section 1886(b)(3)(B) of the Act by section 9101(b) of Pub. L. 99-272 also sets forth the methodology the Secretary is to use to update the prospective payment adjusted standardized amounts, the hospital-specific rates and the target rate-of-increase limits for excluded hospitals for discharges occurring on or cost reporting periods beginning on or after October 1, 1986, as applicable. The provisions are as follows:

- Beginning with FY 1987, the standardized amounts are to be updated

by the percentage determined by the Secretary under section 1886(e)(4) of the Act; that is, the percentage determined by the Secretary that takes into account amounts the Secretary believes are necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality. For FY 1987 and FY 1988, this percentage cannot exceed the percentage change in the hospital market basket.

- For cost reporting periods beginning on or after October 1, 1986, the hospital-specific rates are to be updated by the percentage determined by the Secretary under section 1886(e)(4) of the Act. As with the standardized amounts, the update percentage for cost reporting periods beginning in FY 1987 and FY 1988 is limited by the percentage change in the market basket.
- Starting with cost reporting periods beginning on or after October 1, 1986, the target rate-of-increase limits are to be updated by the percentage determined by the Secretary under section 1886(e)(4) of the Act. Once again, the rate-of-increase update percentage for cost reporting periods beginning in FY 1987 and FY 1988 is limited by the percentage change in the hospital market basket.

We are revising §§ 405.463, 412.63, and 412.73 to implement sections 9101 (b) and (e) of Pub. L. 99-272.

B. Extension of the Prospective Payment System Transition Period

Section 9102 of Pub. L. 99-272 revises sections 1886(b)(1) (A), (C), and (D) of the Act to extend the three-year transition to a fully national prospective payment system by one additional year. During the transition period, payment to hospitals is based on a combination of the Federal prospective payment rates and hospital-specific rates. The Federal and hospital-specific portions change with the hospital's cost reporting period. In addition, during that period, the Federal rate is a combination of regional and national rates, the proportions of which change with the Federal fiscal year. The two tables set forth below demonstrate the composition of a hospital's payment rate prior to the enactment of Pub. L. 99-272.

SUMMARY OF HOSPITAL-SPECIFIC AND FEDERAL PERCENTAGES

Cost reporting period beginning on or after	Hospital-specific percentage	Federal percentage
Oct. 1, 1985	75	25
Oct. 1, 1986	50	50
Oct. 1, 1987	25	75
Oct. 1, 1988	0	100

SUMMARY OF REGIONAL AND NATIONAL PERCENTAGES OF THE FEDERAL PORTION

Federal fiscal year beginning	Regional percentage	National percentage
Oct. 1, 1985	100	0
Oct. 1, 1986	75	25
Oct. 1, 1987	50	50
Oct. 1, 1988	0	100

The provisions concerning the transition period are set forth in regulations at § 412.70.

Section 9102 of Pub. L. 99-272 extends the transition by making the following changes:

- For cost reporting periods beginning on or after October 1, 1985 and before October 1, 1986, the blend of hospital-specific and Federal portions is 50 percent hospital-specific and 50 percent Federal for the first seven months of the cost reporting period and 45 percent hospital-specific and 55 percent Federal for the remaining five months of the cost reporting period. For cost reporting periods beginning in FY 1987, the blend is 25 percent hospital-specific and 75 percent Federal. Starting with cost reporting periods beginning in FY 1988, the payment rate is based exclusively on the Federal portion.
- For discharges occurring in FY 1986, the Federal portion is made up of 25 percent national and 75 percent regional. For discharges occurring in FY 1987, the combined rate is 50 percent national and 50 percent regional. The Federal portion is based exclusively on the national rate beginning in FY 1988.

Therefore, the revised transition prospective payment rates are determined as follows:

SUMMARY OF HOSPITAL-SPECIFIC AND FEDERAL PERCENTAGES

Cost reporting period beginning on or after	Hospital-specific percentage	Federal percentage
Oct. 1, 1985	75	25
Oct. 1, 1986	50	50
Oct. 1, 1986:		
—The first seven months of the cost reporting period	50	50
—The remaining five months of the cost reporting period	45	55
Oct. 1, 1986	25	75
Oct. 1, 1987	0	100

SUMMARY OF REGIONAL AND NATIONAL PERCENTAGES OF THE FEDERAL PORTION

Federal fiscal year beginning	Regional percentage	National percentage
Oct. 1, 1985	100	0
Oct. 1, 1986	75	25
Oct. 1, 1987	50	50
Oct. 1, 1988	0	100

We are revising the following sections to reflect the change in the transition period: §§ 412.1, 412.70, 412.80, 412.82, and 412.115.

Under the provisions set forth in section 9102 (d)(4) of Pub. L. 99-272, all hospitals subject to the prospective payment system that are located in the State of Oregon are excepted from the changes made to the transition period by sections 9102(a), (b), (c), and (d)(1) through (d)(3) of Pub. L. 99-272. Section 9102(d)(4) of Pub. L. 99-272 further specifies that for those hospitals located in Oregon, the following applies:

- *Hospital-specific/Federal blend.* Section 9102(d)(4)(B) states that for the first seven months of a cost reporting period beginning in FY 1986, the payment rate consists of a blend of 50 percent of the hospital-specific rate and 50 percent of the Federal rate. For the remaining five months of a cost reporting period beginning in FY 1986, the blend is 25 percent of the hospital-specific rate and 75 percent of the Federal rate. For cost reporting periods beginning on or after October 1, 1986, the payment rate is comprised solely of the Federal rate.
- *Regional/National blend of Federal rate.* For discharges occurring on or after October 1, 1985 and before May 1, 1986, section 9102(d)(4)(C) provides that the Federal rate consists of 75 percent of the regional rate and 25 percent of the national rate. In the absence of a special provision applicable to Oregon beginning May 1, 1986, the provisions of section 1886(d)(1)(D) of the Act would apply.

However, section 1886(d)(1)(D) of the Act applies in its form prior to the enactment of Pub. L. 99-272 since section 9102(d)(4)(A) makes the amendments of that law to section 1886(d)(1)(D) of the Act inapplicable to Oregon. Therefore, for discharges occurring on or after May 1, 1986 and before October 1, 1986, the Federal rate consists of 50 percent of the regional rate and 50 percent of the national rate. For discharges occurring on or after October 1, 1986, the Federal rate is comprised solely of the national rate.

C. Hospital Wage Index

Section 1886(d)(2)(C)(ii) of the Act requires that we standardize the average cost per case of each hospital used to develop the separate urban and rural standardized amounts for differences in wage levels. Section 1886(d)(2)(H) of the Act requires that the standardized amounts be adjusted for hospital area wage levels as part of the methodology for determining prospective payments to hospitals. To fulfill both of these requirements, we constructed a wage index to eliminate variations in the average cost per case.

For purposes of determining the prospective payments to hospitals in FY 1984 and FY 1985, we used calendar year 1981 hospital wage and employment data obtained from the Bureau of Labor Statistics' (BLS's) ES 202 Employment, Wages and Contributions file for hospital workers to construct the wage index. However, the September 3, 1985 final rule set forth a revised hospital wage index that is based on an HCFA survey of hospital wage and salary data as well as data on paid hours in hospitals. This wage index was developed in an attempt to overcome the limitation of the BLS data with regard to full-time and part-time employment.

This revised wage index was not implemented because of the provisions of the Emergency Extension Act of 1985 (Pub. L. 99-107) and the succeeding amendments to that Act. Section 9103(a) of Pub. L. 99-272 specifies that, for discharges occurring on or after May 1, 1986, prospective payments to hospitals are to be adjusted to reflect the changes made in the September 3, 1985 final rule relating to the hospital wage index. The retroactive application of the revised wage index to cost reporting periods beginning on or after October 1, 1983 is repealed.

We are making adjustments to the wage index published in the September 3, 1985 final rule to correct data errors. These changes are similar to those that we made between the publication of the June 10, 1985 proposed rule (50 FR 24366) and the September 3, 1985 final rule, which are described in the final rule (50 FR 35663). By making these corrections, we can ensure that the wage index used to determine payment for discharges occurring on or after May 1, 1986 is as accurate as possible. The wage index is set forth in Tables 4a and 4b, below.

D. Payment for Medical Education

1. Indirect Costs of Medical Education

Section 1886(d)(5)(B) of the Act provides that prospective payment hospitals receive an additional payment for the indirect costs of medical education computed in the same manner as the adjustment for those costs under regulations in effect as of January 1, 1983. Under those regulations, we provided that the indirect costs of medical education incurred by teaching hospitals are the increased operating costs (that is, patient care costs) that are associated with approved intern and resident programs. These increased costs may reflect a number of factors; for example, an increase in the number of tests and procedures ordered by interns and residents relative to the number ordered by more experienced physicians or the need of hospitals with teaching programs to maintain more detailed medical records.

Because the indirect costs of medical education are defined in terms of increased operating costs, they are not separately identifiable on the cost report or in other financial or accounting records.

Rather, these incremental costs have been statistically estimated as function of teaching intensity, and a proxy measure (the hospital's ratio of the number of interns and residents to the number of beds) has been used to measure teaching intensity. The coefficient describing this statistical relationship has been expressed as a percentage and applied as the indirect medical eduction factor. This factor was first used as an adjustment to the routine operating cost limits and the total operating cost limits under the reasonable cost reimbursement system. The regulations governing this matter under the prospective payment system are found at § 412.118.

Currently, § 412.118(d) provides that each hospital's indirect medical education payment is determined by multiplying the following three factors:

(1) Total DRG revenue based on the Federal rates.

(2) A factor for each ten percent increment above zero in the hospital's ratio of full-time equivalent interns and residents to beds.

(3) An education adjustment factor, expressed as a percentage, that represents double the statistically-estimated effect of teaching activity on operating costs. The current adjustment factor is 11.59 percent.

As a part of the September 3, 1985 final rule, we revised § 412.118, effective for cost reporting periods beginning on or after October 1, 1984, to—

- Change the method used to determine the number of beds in a hospital for purposes of counting interns and residents;
- Provide for an annual report of the count, by specialty, of the number of interns and residents in each hospital on September 1 or the first business day after September 1 if that day falls on a weekend or Federal holiday (with an additional count on April 15, 1985 for hospitals with cost reporting periods beginning on or after October 1, 1984 and before July 1, 1985);
- Count as full-time all interns and residents assigned to the hospital on September 1 (or April 15, 1985, if applicable) except for those individuals splitting their time between prospective payment areas and one or more areas excluded from the prospective payment system or spending all their time in excluded areas; and
- Provide for intermediary reviews of hospital documentation to verify the hospital's intern and resident-to-bed ratio.

The following revisions (set forth at § 412.118(f)(2) and (3)) were to be effective for cost reporting periods beginning on or after October 1, 1985:

- Interns and residents assigned to the outpatient department of the hospital on the day the count of interns and residents is made are not counted as full-time equivalents. Only the percentage of time that these interns and residents spend in the portion of the hospital subject to the prospective payment system on the day of the count is used in determining the indirect medical education adjustment.
- The number of interns and residents assigned to ancillary departments of the hospital are apportioned between inpatient and outpatient settings based on the ratios of each ancillary department's inpatient and outpatient charges, respectively, to total department charges. Only the number of full-time equivalent interns and residents thus determined to be furnishing inpatient services is included in the count.

These last two changes did not become effective on October 1, 1985 because of the enactment of Pub. L. 99-107 and the amendment to that law, as we discussed earlier.

Section 9104(a) of Pub. L. 99-272 revises section 1886(d)(5)(B) of the Act of reduce the education adjustment factor used to determine the indirect medical education payment from 11.59 percent to 8.1 percent for discharges occurring on or after May 1, 1986 and before October 1, 1988. For discharges occurring on or after October 1, 1988, the adjustment factor is equal to 6.7 percent. In addition to being reduced, the adjustment factor is no longer applied on a linear basis, but rather on a curvilinear or variable basis. An adjustment made on a curvilinear basis reflects a nonlinear cost relationship; that is, each absolute increment in a hospital's ratio of interns and residents to beds does not result in an equal proportional increase in costs. Therefore, the adjustment factors are only approximately 8.1 percent and 6.7 percent.

We are revising § 412.118 to provide that for discharges occurring on or after May 1, 1986 and before October 1, 1988, the indirect medical education factor equals the following:

VOL 51 ISS 87 MY 6 1986 UMI

$$2 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.405} - 1\right]$$

For Example: A hospital has an intern and resident to bed ratio of .2. Its adjustment factor is computed in the following way:

$2 \times [(1+.2)^{.405} - 1] = 2 \times [.07663] = .1533$

This hospital's indirect medical education adjustment factor is .1533. To determine the hospital's additional payment, this factor is multiplied by the hospital's total DRG revenue based on the DRG-adjusted prospective payment rates (for transition period payments, the Federal portion of the hospital's payment) including outlier payments but excluding any other additional payments such as the payment for hospitals that serve a disproportionate share of low-income patients as discussed below.

For discharges occurring on or after October 1, 1988, that factor equals the following:

$$1.5 \times \left[\left(1 + \frac{\text{interns and residents}}{\text{beds}}\right)^{.405} - 1\right]$$

On February 20, 1986, we published a notice of proposed rulemaking in the **Federal Register** (51 FR 6755) to revise the application of the formula used to calculate payment for the indirect costs of medical education for prospective payment hospitals. We proposed to apply the education adjustment factor of 11.59 on a curvilinear basis.

Since the provisions of section 9104 of Pub. L. 99-272 supersede that proposal, we are withdrawing it from consideration.

Section 9104(a) of Pub. L. 99-272 also amended section 1886(d)(5)(B) of the Act to provide that, for discharges occurring on or after May 1, 1986, interns and residents assigned to outpatient departments of a hospital are included in the count of interns and residents for the purpose of determining the indirect medical education adjustment factor. Thus, we are deleting from the regulations the changes we made to § 412.118(f) in the September 3, 1985 final rule concerning the exclusion from the count of interns and residents of those individuals who are assigned to outpatient departments or are furnishing outpatient services in ancillary departments. Because of the provisions of Pub. L. 99-107, the changes we made to § 412.188(f) never became effective.

2. Direct Costs of Medical Education

We note here that Pub. L. 99-272 changes the way Medicare pays for the direct costs of medical education. Under section 1886(a)(4) of the Act, direct costs of medical education are excluded from the definition of inpatient operating costs that are covered by the prospective payment system. Thus, the direct costs of approved medical education programs (for example, salaries for interns and residents and overhead costs) are not included in hospital-specific, regional, or national payment rates to hospitals subject to the prospective payment system, but are reimbursed on a reasonable cost basis. The provisions governing reimbursement for the services of interns and residents appear at section 1832(a)(2)(B)(i) and 1861(b)(6) of the Act.

On July 5, 1985, we published a final rule in the **Federal Register** (50 FR 27722) that placed a one-year limit on the amount of reimbursement for providers for their direct costs of approved medical eduction activities for cost reporting periods beginning on or after July 1, 1985 and before July 1, 1986. Section 9202 of Pub. L. 99-272 specifies a different approach to reimbursement of direct medical education costs starting with cost reporting periods beginning on or after July 1, 1985. The provisions of this section of the law supersede the provisions set forth in the July 5, 1985 final rule, thus making that rule no longer effective. We plan to publish revised regulations to implement section 9202 of Pub. L. 99-272 in the near future.

E. Payments for Hospitals That Serve a Disproportionate Share of Low-Income Patients

Section 1886(d)(5)(C)(i) of the Act authorizes the Secretary to make adjustments to the prospective payment rates to take into account the special needs of certain classes of hospitals, including public or other hospitals that serve a significantly disproportionate number of low-income patients or Medicare Part A beneficiaries. We had not made special provisions for these hospitals in the Medicare regulations because, based on our past analyses (which are described in several **Federal Register** publications at 47 FR 43285, 48 FR 39416, 49 FR 39783, 49 FR 276-277, 50 FR 24384-24385 and 50 FR 35685-35686), we believed that there had not been sufficient evidence to demonstrate that an adjustment is warranted.

Section 9105 of Pub. L. 99-272 adds a new section 1886(d)(5)(F) to the Act to require that we make an additional payment for hospitals that serve a disproportionate share of low-income patients. Section 1886(d)(5)(F)(i) of the Act provides that for discharges occurring on or after May 1, 1986 and before October 1, 1988, an additional payment must be made for each prospective payment must be made for each prospective payment hospital that meets one of the following criteria:

- During the hospital's cost reporting period, the hospital has a disproportionate patient percentage that is at least equal to—
  - —15 percent if the hospital is located in an urban area and has 100 or more beds;
  - —40 percent, if the hospital is located in an urban area and has fewer than 100 beds; or
  - —45 percent if the hospital is located in an rural area. (Sections 1886(d)(5)(F)(i)(I) and (v) of the Act).
- The hospital is located in an urban area, has 100 or more beds, and can demonstrate that, during its cost reporting period, more than 30 percent of its total inpatient care revenues is derived from State and local government payments for indigent care furnished to patients not covered by Medicare or Medicaid. (Section 1886(d)(5)(F)(i)(II) of the Act).

For purposes of meeting the latter criterion, it is incumbent upon a hospital to demonstrate that more than 30 percent of its total inpatient care revenues are from State and local government sources and that these revenues are specifically earmarked for the care of indigents (that is, none of that money may be used for any purposes other than indigent care). The following are among the types of care that are not to be included by the hospital as indigent care:

- Free care furnished to satisfy the hospital's Hill-Burton obligation.
- Free care or care furnished at reduced rates made available by the hospital to its employees or by a government hospital to any category of public employees.
- Funds furnished to the hospital to cover general operating deficits.

For purposes of determining a hospital's bed size, we are using the same definition that is currently used for determining number of beds for purposes of calculating the indirect medical education adjustment [§ 412.118(b)]. That is, the number of beds in a hospital is determined by counting the number of available bed days during the hospital's cost reporting period, not including beds assigned to newborns, custodial care, and excluded distinct part hospital units, and dividing that number by the number of days in the cost reporting period.

Section 1886(d)(5)(F)(vi) states that the term "disproportionate patient percentage," which is used in the criterion implementing section 1886(d)(5)(F)(i)(I) and (v) of the Act, which is described above, means the sum of the following two fractions, which is expressed as a percentage:

$$\frac{\text{1. Patient days of those patients entitled to both Medicare Part A and Supplemental Security Income (SSI) (excluding } \textit{those patients receiving State supplementation only}\text{)}}{\text{Patient days of those patients entitled to Medicare Part A}}$$

$$+ \frac{\text{2. Patient days of those patients entitled to } \textit{Medicaid but not to Medicare Part A}}{\text{Total number of patient days}}$$

The number of patient days of those patients entitled to both Medicare Part A and SSI will be determined by matching data from the Medicare Part A Tape Bill (PATBILL) file with the Social Security Administration's (SSA's) SSI file. This match will be done at least annually and will involve a match of the individuals who are SSI recipients for each month during the Federal fiscal year in which the hospital's cost reporting period begins with the Medicare Part A beneficiaries who received inpatient hospital services during the same month. Thus, if a Medicare beneficiary is eligible for SSI benefits (excluding State supplementation only) during a month in which the beneficiary is a patient in the hospital, the covered Medicare Part A inpatient days of hospitalization in that month will be counted for the purpose of determining the hospital's disproportionate patient percentage. The match of SSI eligibility records to Medicare inpatient hospital days for a hospital will consist of counting the days in which Medicare inpatient hospital services are furnished during each month to patients entitled to both Medicare Part A and SSI, summing those days, and dividing by the total number of days for which Medicare inpatient hospital services are furnished to all Medicare Part A beneficiaries in the hospital.

Although section 1886(d)(5)(F)(vi)(I) of the Act specifies that the match is done on a cost reporting period basis, we believe that matching Social Security numbers on a Federal fiscal year basis is the most feasible approach. A monthly match of SSI eligibility files to Medicare hospital records would be administratively more cumbersome and costly and could not be accomplished in a timely manner. Relying on Medicare billing records for the Federal fiscal year rather than the hospital cost reporting period avoids the problem of billing lag at the end of the cost reporting period. We do not believe that there are likely to be significant fluctuations from one year to the next in the percentage of patients served by the hospital who are dually entitled to Medicare Part A and SSI. Consequently, the percentage for a hospital's own experience during the Federal fiscal year should be reasonably close to the percentage specific to the hospital's cost reporting period.

However, we are affording all hospitals the option to determine their number of patient days of those dually entitled to Medicare Part A and SSI for their own cost reporting periods. A hospital that avails itself of this option must furnish to its fiscal intermediary, in a manner and format to be prescribed by HCFA, data on its Medicare patients for its cost reporting period. These data will then be matched by SSA to determine those patients dually entitled to Medicare and SSI for the hospital's cost reporting period. The full cost of this process, including the cost of verification by SSA, will be borne by the hospital.

The number of patient days of those patients entitled to Medicaid but not to Medicare Part A will be determined by the hospital's Medicare fiscal intermediary based on Medicaid statistical data reported on the hospital's Medicare cost report. Total Medicaid inpatient days will include all covered days attributable to Medicaid patients including any inpatient days for Medicaid patients who are members of a health maintenance organization.

Section 1886(d)(5)(F)(vi)(II) of the Act describes Medicaid patient days at those ". . . which consist of patients who (for such days) were eligible for medical assistance under a State plan approved under title XIX . . . ." Therefore, Medicaid covered days will include only those days for which benefits are payable under title XIX. Any day of a Medicaid patient's hospital stay that is not payable by the Medicaid program will not be counted as a Medicaid patient day since the patient is not considered eligible for Medicaid coverage on those days. For example, if a patient is hospitalized for 15 days and is eligible for Medicaid benefits for 10 of those days, only the 10 covered days will be considered Medicaid patient days for purposes of determining a hospital's disproportionate patient percentage.

The process we will use for making payments to hospitals that serve a disporprotionate share of low-income patients will be similar to the process we use to make the additional payment for the indirect medical education costs; that is, we will make interim payments based on the latest available data subject to a year-end settlement on a cost reporting period basis. For purposes of making these interim payments, the initial determination of a hospital's eligibility for this payment will be made by the hospital's Medicare fiscal intermediary based on Medicaid statistical data as reported on the hospital's most recent cost report and the SSI and Medicare data to be supplied by HCFA central office. If a hospital disagrees with the intermediary's determination of its Medicaid patient days, it will be the hospital's responsibility to demonstrate to the intermediary that the Medicaid statistics reported on its cost report are incorrect or were improperly applied. Medicaid data submitted by the hospital, whether on the cost report or furnished subsequently, are subject to intermediary audit to ensure their accuracy.

Sections 1886(d)(5)(f) (ii) and (iv) of the Act specify that the additional payment adjustment for hospitals that meet the disproportionate patient percentage criterion (section 1886(d)(5)(F)(i)(I) of the Act) is determined as follows:

- For urban hospitals with 100 or more beds, the hospital's total DRG revenue (as defined below) is increased by 2.5 percent plus one-half the difference between the hospital's percentage of low-income patients and 15 percent, up to a maximum of 15 percent; that is, the disproportionate share adjustment factor is the lesser of 15 percent or $(P-.15)(.5)+.025$, where P equals the hospital's disproportionate patient percentage expressed as a decimal.
- For urban hospitals with fewer than 100 beds, the hospital's total DRG revenue is increased by five percent.

VOL 51 ISS 87 MY 6 1986

• For rural hospitals the hospital's total DRG revenue is increased by four percent.

As specified in sections 1886(d)(5)(F)(ii) and (iii) of the Act, for those hospitals that meet the indigent care revenue criterion (section 1886(d)(5)(F)(i)(II) of the Act), the payment adjustment is determined by increasing the hospital's total DRG revenue by 15 percent. A hospital's total DRG revenue is the revenue based on DRG-adjusted prospective payment rates (for transition period payments, the Federal portion of the hospital's payment rates) including outlier payments but excluding any other additional payments such as the indirect medical education payment.

The provisions for adjusting the prospective payment rates for hospitals serving a disproportionate share of low-income patients are set forth in regulations at a new §412.106.

F. Hospitals that Qualify for Waiver of Requirements Concerning Part A Billing

Section 602(k) of Pub. L. 98–21 authorizes a temporary waiver, in certain circumstances, of the requirement, set forth in sections 1862(a)(14) and 1866(a)(1)(H) of the Act, that hospitals bill for all nonphysician inpatient hospital services under Medicare Part A. This waiver authority is implemented through our regulations governing provider agreements (42 CFR Part 489). Essentially, a hospital qualifies for a waiver if it—

• Had traditionally followed the practice of allowing suppliers of items and services furnished to its inpatients to bill directly under Medicare Part B for those items and services; and

• This practice was so extensive that the hospital's immediate compliance with the new requirement would threaten the stability of patient care.

These provisions are set forth at §489.23.

Section 602(k) of Pub. L. 98–21 requires that we reduce the Medicare Part A payment to a hospital that has a waiver for the amount of Part B billings for nonphysician services furnished to the hospital's inpatients. Therefore, our regulations (§412.120(c)) state that payments for inpatient services are reduced to take into account 100 percent of the reasonable charges (before application of the Medicare Part B deductible and coinsurance amounts) for nonphysician services furnished by an outside supplier.

As mentioned earlier in section III.D.1. of this preamble, §412.118 provides that a hospital's indirect medical education payment is determined on the basis of the total DRG revenue based on the Federal rates received by the hospital. The DRG revenue received by hospitals that qualify for a waiver under §489.23 does not include the Part B reasonable charges for nonphysician services furnished by an outside supplier. Therefore, our policy for determining the amount of the indirect medical education payment for a hospital that has a waiver has been to base the payment on the DRG revenue based on Federal rates after it has been reduced for Part B billings.

Section 9112(a) of Pub. L. 99–272 amends section 602(k) of Pub. L. 98–21 by adding a provision that specifies that the indirect medical education payment for hospitals that have a waiver is to be computed as if the hospital were receiving under Part A all the payments that were made under Part B because of the waiver. That is, a hospital with a waiver under section 602(k) of Pub. L. 98–21 is treated as if the waiver is not in effect for purposes of computing the additional payment for the indirect costs of medical education. Section 9112(b) of Pub. L. 99–272 specifies that this amendment is effective for cost reporting periods beginning on or after January 1, 1986. Therefore, we are revising § 412.118(a)(2) to include in the computation of the additional payment for the costs of indirect medical education the payments made under Part B to hospitals that have a waiver.

In addition, section 9112(a) of Pub. L. 99–272 amended section 602(k) of Pub. L. 98–21 to specify that Part A services billed under Part B under a waiver will be paid at 100 percent of the reasonable charge (or other applicable basis of payment) and that in order to retain its waiver, the hospital must ensure that the supplier that bills for the services accepts this payment as payment in full (that is, the beneficiary is not responsible for payment of the coinsurance). In section 9112 of Pub. L. 99–272, Congress specifically stated that payment for Part A services billed under Part B is equal to 100 percent of the reasonable charge and that the entity furnishing the services must accept *this amount* as the full charge. Because there is no mention of a reduction of this amount by the Part B deductible, for administrative simplicity, we will not apply the deductible to these payments. We are revising § 489.23 to include this requirement, which is effective 10 days after the day of enactment of Pub. L. 99–272, that is, April 17, 1986.

V. Tables

This section contains the tables referred to in this preamble. For tables 2, 3a, and 3b, refer to the September 1, 1983 interim final rule (48 FR 39845). For Table 5, refer to the September 3, 1985 final rule (50 FR 35646).

VI. Regulatory Impact Statement

A. Executive Order 12291

Section 3(a) of Executive Order 12291 (E.O. 12291) requires us to prepare and publish a regulatory impact analysis for regulations that meet the criteria of a "major rule". Under section 1(b) of E.O. 12291, a major rule is a regulation that would be likely to result in—

1. An annual effect on the economy of $100 million or more;

2. A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

3. Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Generally, the consequences of the provisions contained in this interim final rule flow from the statute, not the regulation itself. Nonetheless, their magnitude is substantial, and, in such cases, we voluntarily prepare a regulatory impact analysis, even if the rule, in itself, may not meet the definition of a major rule. It is unpractical for us either to determine whether or not this rule is a major rule or to prepare and consider a regulatory impact analysis within the time allowed by Pub. L. 99-272 for implementation of its provisions. Section 8 of E.O. 12291 provides for exemption from the requirements for impact analysis in cases in which compliance with the terms of E.O. 12291 would conflict with deadlines imposed by statute. Therefore, we have sought and received an exemption from the Director of the Executive Office of Management and Budget (EOMB).

We are in the process of preparing a proposed rule setting forth the FY 1987 prospective payment rates, which will include a regulatory impact analysis in accordance with the E.O. 12291. We plan to include in that impact analysis an analysis of the provisions of this interim final rule. By so doing, we will adhere to the requirements of E.O. 12291 as closely as is feasible in view of the statutory deadline.

B. Regulatory Flexibility Act

We prepare and publish a regulatory flexibility analysis, consistent with the Regulatory Flexibility Act of 1980 (RFA) (5 U.S.C. 601 through 612), for regulations unless the Secretary certifies that implementation of the regulations would not have a significant economic impact on a substantial number of small entities. We treat all hospitals under the prospective payment system as small entities for purposes of the RFA. Therefore, this rule clearly affects a substantial number of small entities.

Preparation of a regulatory flexibility analysis is not feasible for this rule in view of the time allowed under Pub. L. 99-272. Moreover, section 606 of the RFA authorizes the Secretary to delay completion of a regulatory flexibility analysis under certain conditions. However, a final regulatory flexibility analysis must be prepared no later than 180 days after the date of publication in the Federal Register of a final rule.

The Secretary finds that, due to the necessity for the timely implementation of sections 9101 through 9105 and 9112 of Pub. L. 99-272, an emergency exists that makes timely preparation of a regulatory flexibility analysis impracticable. However, we propose to prepare and publish a regulatory flexibility analysis, including an analysis of the provisions of this interim final, in the forthcoming proposed rule setting forth the proposed FY 1987 prospective payment rates.

VII. Other Required Information

A. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the Federal Register for substantive rules to afford a period for public comment. However, we may waive that procedure if we find good cause that notice and comment are impractical, unnecessary, or contrary to the public interest. When we do so, we incorporate an explanation of our findings in the rule to be issued.

Section 9115(b) of Pub. L. 99-272 provides that we may issue the regulations that implement sections 9101 through 9105 and 9112 of Pub. L. 99-272 on an interim of other basis as may be necessary. The statute, which was enacted on April 7, 1986, provided that these provisions are generally effective on May 1, 1986. It is clear, therefore, that undergoing a proposed rulemaking process for this rule, which is effective May 1, 1986, would be impactical and, in terms of notifying affected parties of final implementing regulations as soon as possible, would not be in the public interest. Therefore, we find good cause to waive proposed rulemaking and to issue these regulations as final. Nonetheless, we are providing a 30-day comment period as indicated at the beginning of this preamble.

Because of the large number of items of correspondence we normally receive on regulations, we cannot acknowledge or respond to them individually. However, we will consider all comments that are received by the date and time specified in the "Dates" section of this preamble and we will respond to those comments in the preamble to the final rule that announces the FY 1987 prospective payment rates

B. Effective Dates

Based on the provisions of Pub. L. 99-272, the effective date of this interim final rule is May 1, 1986. Changes to the regulation are effective as follows:

- May 1, 1986:

§ 400.310 Display of currently valid OMB control numbers.
§ 405.463 Rate of increase limits.
§ 412.1 Scope of part.
§ 412.63 Federal rates for fiscal years after Federal fiscal year 1984.
§ 412.70 General description.
§ 412.73 Determination of the hospital-specific rate.
§ 412.80 General provisions.
§ 412.82 Payment for extended length-of-stay cases (day outliers).
§ 412.90 General rules.
§ 412.106 Special treatment: Hospitals that serve a disproportionate share of low-income patients.
§ 412.113 Payments determined on a reasonable cost basis.
§ 412.118 Determination of indirect medical education costs.

The changes affecting the determination of indirect medical education costs are all effective on May 1, 1986 except that the provision under which HCFA will no longer offset the total DRG revenue used to compute the payment for indirect medical education costs for payments made to outside suppliers under a section 602(k) waiver (§ 412.118(a)(2)) is effective for cost reporting periods beginning on or after January 1, 1986.

- April 17, 1986:

§ 489.23 Special provisions for waiver of certain inpatient hospital services requirements.

- Cost reporting periods beginning on or after January 1, 1986:

§ 412.118(a)(2)—Calculation of a hospital's total DRG revenue for purposes of determining the payment for the indirect medical education costs.

C. Waiver of 30-Day Delay in Effective Dates

We normally provide a delay of 30 days in the effective date of all final rules. However, the effective dates of the provisions of sections 9101, 9102, 9103, 9104, 9105, and 9112 of Pub. L. 99-272 that are being implemented by these regulations are specified in those sections of the law. The provisions of these interim final regulations conform to the clear direction provided in the law. For this reason, and also for purposes of placing the regulations into operation as soon as possible, a delayed effective date is both impractical and unnecessary. Therefore, we find good cause to waive the usual 30-day delay.

D. Paperwork Reduction Act

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3511) requires that any information collection requirements included in a regulatory document must be submitted to and approved by the EOMB before the public is required to comply with those requirements. However, section 9115(a) of Pub. L. 99-272 specifies that the Paperwork Reduction Act of 1980 does not apply to information required for purposes of carrying out Subpart A, Part 1, Subtitle A, Title IX of Pub. L. 99-272 (that is, sections 9101 through 9115). Therefore, any information collection requirements that stem from the changes made by this interim final rule, which implements sections 9101, 9102, 9103, 9104, 9105, and 9112 of Pub. L. 99-272, are not subject to EOMB approval.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Nursing homes, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 412

Health facilities. Medicare.

42 CFR Part 489

Health facilities, Medicare.

42 CFR Chapter IV is amended as set forth below:

CHAPTER IV—HEALTH CARE FINANCING ADMINISTRATION, DEPARTMENT OF HEALTH AND HUMAN SERVICES

I. Part 400, Subpart C is amended as follows:

PART 400—INTRODUCTION; DEFINITIONS

Subpart C—OMB Control Numbers for Approved Collections of Information

A. The authority citation for Part 400 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh) and 44 U.S.C. Chapter 35.

§ 400.310 [Amended]

B. In § 400.310, the line that reads "412.118(d)(2) . . . 0938-0337" is revised to read "412.118(f)(2) . . . 0938-0337".

B. II. Part 405, Subpart D is amended as follows:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

Subpart D—Principles of Reimbursement for Providers, Outpatient Maintenance Dialysis, and Services by Hospital-Based Physicians

A. The authority citation for Subpart D continues to read as follows:

Authority: Secs. 1102, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, 1886, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1395f(b), 1395g, 1395l(a), 1395x(v), 1395hh, 1395rr, 1395ww, and 1395xx).

B. In § 405.463, paragraph (c)(3)(i) is revised to read as follows:

§ 405.463 Ceiling on rate of hospital cost increases.

* * * * *

(c) *Procedure for establishing the ceiling (target amount).* * * *

(3) *Target rate percentage.* (i) The applicable target rate percentage is determined as follows:

(A) *Federal fiscal year 1986.* The applicable target rate percentage for cost reporting periods beginning on or after October 1, 1985 and before September 30, 1986 is five-twenty-fourths of one percent. For purposes of determining the target amount for cost reporting periods beginning on or after October 1, 1986, the applicable percentage increase with respect to cost reporting periods beginning during Federal fiscal year 1986 is deemed to have been one-half percent.

(B) *Federal fiscal years 1987 and following.* Subject to the limitation set forth in paragraph (c)(3)(i)(C) of this section, the applicable target rate percentage for cost reporting periods beginning during fiscal year 1987 and in all fiscal years thereafter is determined using the methodology set forth in §412.63 (e)(1) through (e)(3).

(C) *Limitation for Federal fiscal years 1987 and 1988.* For cost reporting periods beginning in fiscal years 1987 and 1988, the applicable percentage determined under paragraph (c)(3)(i)(B) of this section is not to exceed the prospectively estimated increase in the market basket index for the cost reporting period.

* * * * *

III. Part 412 is amended as follows:

PART 412—PROSPECTIVE PAYMENT SYSTEM FOR INPATIENT HOSPITAL SERVICES

A. The authority citation for Part 412 continues to read as follows:

Authority: Secs. 1102, 1871, and 1886 of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395ww).

B. The table of contents of Part 412 is amended by adding the title of a new § 412.106 to Subpart G to read as follows:

Subpart G—Special Treatment of Certain Facilities

Sec.

* * * * *

412.106 Special treatment: Hospitals that serve a disproportionate share of low-income patients.

* * * * *

§ 421.1 [Amended]

C. In Subpart A, § 412.1, in the fifth sentence of paragraph (b), "Three years" is changed to read "four years".

D. In Subpart D, § 412.63, the introductory language of paragraphs (c)(2) and (c)(3) is reprinted without change for the convenience of the reader; paragraphs (c)(2)(iv) and (c)(3)(i) are revised; current paragraphs (d), (e), (f), and (g) are redesignated as paragraphs (e), (f), (g), and (h), respectively; a new paragraph (d) is added; and newly redesignated paragraphs (e) and (h) are revised to read as follows:

Subpart D—Basic Methodology for Determining Federal Prospective Payment Rates

§ 412.63 Federal rates for fiscal years after Federal fiscal year 1984.

* * * * *

(c) *Updating previous standardized amounts.* * * *

(2) Each of those amounts is equal to the respective adjusted average standardized amount computed for fiscal year 1984 under § 412.62(g)—

* * * * *

(iv) Adjusted for budget neutrality under paragraph (f) of this section.

(3) For fiscal year 1986 and thereafter, HCFA computes, for urban and rural hospitals in the United States and for urban and rural hospitals in each region, average standardized amounts equal to the respective adjusted average standardized amounts computed for the previous fiscal year—

(i) Increased by the applicable percentage increase determined under paragraph (e) of this section;

* * * * *

(d) *Applicable percentage change for fiscal year 1986.*

(1) The applicable percentage change for fiscal year 1986 is—

(i) For discharges occurring on or after October 1, 1985 and before May 1, 1986, zero percent; and

(ii) For discharges occurring on or after May 1, 1986, one-half of one percent.

(2) For purposes of determining the standardized amounts for discharges occurring on or after October 1, 1986, the applicable percentage increase for fiscal year 1986 is deemed to have been one-half of one percent.

(e) *Determining applicable percentage changes for fiscal years 1987 and following.*

(1) Subject to the limitations described in paragraph (e)(4) of this section, beginning with fiscal year 1987, the Secretary determines for each fiscal year the applicable percentage change that applies for purposes of paragraph (c)(3) of this section as the applicable percentage increase for discharges in that fiscal year.

(2) The percentage change takes into account amounts the Secretary believes necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality.

(3) In making this determination, the Secretary considers the recommendations of the Prospective Payment Assessment Commission.

(4) For fiscal years 1987 and 1988, the applicable percentage change is not to exceed the prospectively estimated increase in the market basket index (as described in § 405.463 of this chapter) for the fiscal year.

* * * * *

(h) *Adjusting for different area wage levels.* HCFA adjusts the proportion (as estimated by HCFA from time to time) of Federal rates computed under paragraph (g) of this section that are attributable to wages and labor-related costs for area differences in hospital wage levels by a factor (established by HCFA) reflecting the relative hospital wage level in the geographic area of the hospital compared to the national average hospital wage level.

E. Subpart E is amended as follows:

Subpart E—Determination of Transition Period Payment Rates

1. Section 412.70 is revised to read as follows:

§ 412.70 General description.

(a) *Basic rules.* (1) During the initial four-year transition period, payments to all hospitals paid under the prospective payment system are based on a combination of the Federal prospective payment rates, as determined under Subpart D of this part, and hospital-specific rates determined under this subpart.

(2) For the first two years of the transition period, both portions of the payment rates are also adjusted to ensure budget neutrality.

(3) At the end of the transition period (that is, for cost reporting periods beginning on or after October 1, 1987, payments are based on the national prospective payment rates determined under Subpart D of this part, except for payments that may be made under the special treatment provisions of Subpart G of this part.

(b) *Payment amounts based on the hospital-specific portion and the Federal portion.* For discharges occurring in cost reporting periods beginning on or after October 1, 1983 and before October 1, 1987, the Medicare transition payment rate for a particular covered discharge equals a blend of the applicable portion of the hospital-specific rate, as determined under § 412.73, plus the applicable portions of the Federal national and regional prospective payment rates, as described in paragraph (c) of this section, and summarized in the Table. Payments to new hospitals are based on the Federal national and regional prospective payment rates, as described in paragraph (d) of this section.

(c) *Amount of blended portions.*[1] The blends of hospital-specific and Federal portions are as follows:

(1) For cost reporting periods beginning on or after October 1, 1983 and before October 1, 1984, the blend is—

(i) 75 percent of the hospital-specific rate; and

(ii) 25 percent of the appropriate Federal prospective payment rate.

(2) For cost reporting periods beginning on or after October 1, 1984 and before October 1, 1985, the blend is—

(i) 50 percent of the hospital-specific rate; and

(ii) 50 percent of the appropriate Federal prospective payment rate.

(3) For cost reporting periods beginning on or after October 1, 1985 and before October 1, 1986, the blend is as follows:

(i) For the first seven months of the cost reporting period, the blend is—

(A) 50 percent of the hospital-specific rate; and

(B) 50 percent of the appropriate Federal prospective payment rate.

(ii) For the remaining five months of the cost reporting period, the blend is—

(A) 45 percent of the hospital-specific rate; and

(B) 55 percent of the appropriate Federal prospective payment rate.

(4) For cost reporting periods beginning on or after October 1, 1986 and before October 1, 1987, the blend is—

(i) 25 percent of the hospital-specific rate; and

(ii) 75 percent of the appropriate Federal prospective payment rate.

(5) The appropriate Federal prospective payment rate is a combined regional and national rate and changes with the Federal fiscal year. For Federal fiscal year 1984, which begins October 1, 1983, the Federal prospective payment rate is 100 percent regional. For Federal fiscal years 1985 and 1986, which begin October 1, 1984 and October 1, 1985, respectively, the combined rate is 75 percent regional and 25 percent national. For Federal fiscal year 1987, which begins October 1, 1986, the combined rate is 50 percent regional and 50 percent national. Effective with Federal fiscal year 1988, which begins October 1, 1987, the Federal prospective payment rate is 100 percent national.

[1] For purposes of this paragraph and §§ 412.80(a)(1)(ii)(B) and 412.82(c), see section 9162(d)(4) of Pub. L. 99-272 for special provisions concerning the transition period applicable to hospitals in the State of Oregon.

TABLE—SUMMARY OF HOSPITAL-SPECIFIC AND FEDERAL PORTION PERCENTAGES FOR DETERMINING TRANSITION PAYMENT RATES

Cost reporting period beginning on or after	Hospital-specific portion percentage	Federal portion percentage*
October 1, 1983	75	25
October 1, 1984	50	50
October 1, 1985—		
The first seven months of the cost reporting period	50	50
The remaining five months of the cost reporting period	45	55
October 1, 1986	25	75
October 1, 1987	0	100

* NOTE: The Federal portion percentages are applied to the combined national or regional prospective payment rates, as appropriate, as determined under Subpart D of this part for the Federal fiscal year in which the discharge occurs.

(d) *Blended portions for new hospitals.* The prospective payment rates for new hospitals are a blend of the Federal regional and national rates as follows:

(1) For discharges occurring on or after October 1, 1983, and before October 1, 1984, the prospective payment rate equals the appropriate Federal regional rate.

(2) For discharges occurring on or after October 1, 1984 and before October 1, 1986, the prospective payment rate is a blend of—

(i) 75 percent of the appropriate Federal regional prospective payment rate; and

(ii) 25 percent of the appropriate Federal national rate.

(3) For discharges occurring on or after October 1, 1986 and before October 1, 1987, the prospective payment rate is a blend of—

(i) 50 percent of the appropriate Federal regional prospective payment rate; and

(ii) 50 percent of the appropriate Federal national prospective payment rate.

(4) For discharges occurring on or after October 1, 1987, the prospective payment rate equals the appropriate Federal national rate.

2. In § 412.73, paragraph (c)(3) is revised and new paragraphs (c)(4) and (c)(5) are added to read as follows:

§ 412.73 Determination of the hospital-specific rate.

* * * * *

(c) *Updating base-year costs.* * * *

(3) *For Federal fiscal year 1986.* (i) The amount determined under paragraph (c)(2) of this section is updated by—

(A) Zero percent for the first seven months of the hospital's cost reporting period; and

(B) One-half of one percent for the remaining five months of the hospital's cost reporting period.

(ii) For purposes of determining the updated base-year costs for cost reporting periods beginning in Federal fiscal year 1987 (that is, on or after October 1, 1986 and before October 1, 1987), the update factor for the previous cost reporting period is deemed to have been one-half of one percent.

(4) *For Federal fiscal year 1987.* The amount determined under paragraph (c)(3)(ii) of this section is updated by the target rate percentage determined under § 405.463(c)(3) of this chapter.

(5) *For Federal fiscal years 1988 and following.* For purposes of determining the prospective payment rates for sole community hospitals under § 412.92(d), the base-year cost per discharge continues to be updated for each Federal fiscal year after Federal fiscal year 1987 by the target rate percentage determined under § 405.463(c)(3) of this chapter.

* * * * *

F. Subpart F is amended as follows:

Subpart F—Payment for Outlier Cases

§ 412.80 [Amended]

1. In § 412.80, the chart in paragraph (e)(1)(ii)(B) is revised to read as follows:

Federal fiscal year	Regional rate percentage	National rate percentage
October 1, 1983	100	0
October 1, 1984	75	25
October 1, 1985	75	25
October 1, 1986	50	50
October 1, 1987	0	100

§ 412.82 [Amended]

2. In § 412.82, the chart in paragraph (c) is revised to read as follows:

Cost reporting periods beginning on or after	Federal portion (percent)
October 1, 1983	25
October 1, 1984	50
October 1, 1985—	
The first seven months of the cost reporting period	50
The remaining five months of the cost reporting period	55
October 1, 1986	75
October 1, 1987	100

VOL 51 ISS 87 MY 6 1986 UMI

G. Subpart G is amended as follows:

Subpart G—Special Treatment of Certain Facilities

1. In § 412.90, a new paragraph (h) is added to read as follows:

§ 412.90 General rules.

* * * * *

(h) *Hospitals that serve a disproportionate share of low-income patients.* For discharges occurring on or after May 1, 1986 and before October 1, 1986, HCFA makes an additional payment to hospitals that serve a disproportionate share of low-income patients. The criteria for this additional payment are set forth in § 412.106.

2. A new § 412.106 is added to read as follows:

§ 412.106 Special treatment: Hospitals that serve a disproportionate share of low-income patients.

(a) *Basic rule.* (1) Unless a hospital elects the option concerning the period of time used for counting the number of patient days (that is, the hospital's cost reporting period rather than the Federal fiscal year), as described in paragraph (a)(2) of this section, a hospital's disproportionate patient percentage is the sum of the following, expressed as a percentage:

(i) Number of covered patient days during each month of the Federal fiscal year in which the hospital's cost reporting period begins of those patients who are entitled during that month to both Medicare Part A and Supplemental Security Income benefits under title XVI of the Act (excluding those patients receiving State supplementation only), summed for the months of the Federal fiscal year, and divided by the number of patient days during that same Federal fiscal year of those patients entitled to Medicare Part A.

(ii) Number of patient days during the hospital's cost reporting period of those patients who are entitled to Medicaid but not to Medicare Part A divided by the total number of patient days in that same period.

(2) For purposes of making the calculation in paragraph (a)(1)(i) of this section, a hospital may elect to have the count of the number of patient days made on the basis of its cost reporting period, rather than by Federal fiscal year, if the following conditions are met:

(i) The hospital furnishes to its intermediary, in a manner and format prescribed by HCFA, data on its Medicare Part A patients for its cost reporting period.

(ii) The hospital bears the full cost of preparing its submittal as described in paragraph (a)(2)(i) of this paragraph and the cost incurred by SSA in determining the number of beneficiaries entitled to both Medicare Part A and Supplemental Security Income benefits for each month of the cost reporting period.

(3) The number of beds in a hospital is determined as specified in § 412.118(b).

(4) The definitions for urban and rural areas are the same as those set forth in § 412.62(f).

(b) *Criteria for classification.* For discharges occurring on or after May 1, 1986 and before October 1, 1986, a payment adjustment (as described in paragraph (c) of this section) is made for each hospital that meets one of the following criteria:

(1) During the hospital's cost reporting period, the hospital has a disproportionate patient percentage that is at least equal to—

(i) 15 percent, if the hospital is located in an urban area and has 100 or more beds;

(ii) 40 percent, if the hospital is located in an urban area and has fewer than 100 beds; or

(iii) 45 percent, if the hospital is located in a rural area.

(2) The hospital is located in an urban area, has 100 or more beds, and can demonstrate that, during its cost reporting period, more than 30 percent of its total inpatient care revenues are derived from State and local government payments for indigent care furnished to patients who are not covered by Medicare or Medicaid.

(c) *Payment adjustment.* If a hospital meets one of the criteria in paragraph (b) of this section, the hospital's total DRG revenue based on DRG-adjusted prospective payment rates (for transition period payments, the Federal portion of the hospital's payment rates), including outlier payments determined under Subpart F of this part but excluding additional payments made under the provisions of this subpart or § 412.116, is increased by the disproportionate share payment adjustment factor, determined as follows:

(1) If the hospital meets the criteria of paragraph (b)(1) (i) of this section, the disproportionate share payment adjustment factor is the lesser of—

(i) 15 percent; or

(ii) 2.5 percent plus one-half the difference between the hospital's disproportionate patient percentage and 15 percent.

(2) If the hospital meets the criteria of paragraph (b)(1)(ii) of this section, the disproportionate share payment adjustment factor is five percent.

(3) If the hospital meets the criteria of paragraph (b)(1)(iii) of this section, the disproportionate share payment adjustment factor is four percent.

(4) If the hospital meets the criteria of paragraph (b)(2) of this section, the disproportionate share payment adjustment factor is 15 percent.

F. Subpart H is amended as follows:

Subpart H—Payments to Hospitals under the Prospective Payment System

§ 412.113 [Amended]

1. In § 412.113, paragraph (b) is amended by revising the date in the third sentence from "Ootober 1, 1986" to "October 1, 1987".

2. Section 412.116 is amended by revising the introductory language; revising paragraphs (a) and (c); redesignating current paragraphs (d), (e), (f), and (g) as paragraphs (e), (f), (g), and (h), respectively; adding a new paragraph (d); and revising newly redesignated paragraphs (e) and (g) to read as follows:

§ 412.116 Determination of indirect medical education costs.

To determine the indirect medical education costs, HCFA uses the following procedures:

(a) *Basic data.* HCFA determines the following for each hospital:

(1) The hospital's ratio of full-time equivalent interns and residents, except as limited under paragraph (g) of this section, to number of beds (as determined in paragraph (b) of this section).

(2) The hospital's total DRG revenue based on DRG-adjusted prospective payment rates (for transition period payments, the Federal portion of the hospital's payment rates), including outlier payments determined under Subpart F of this part but excluding additional payments made under the provisions of Subpart G of this Part. For cost reporting periods beginning on or after January 1, 1986, for purposes of this section, the total DRG revenue is not offset for payments made to outside suppliers under § 489.23 of this chapter for nonphysician services furnished to beneficiaries entitled to Medicare Part A.

* * * * *

(c) *Measurement for teaching activity.* The factor representing the effect of teaching activity on inpatient operating costs is equal to the following:

(1) For discharges occurring on or after May 1, 1986 and before October 1, 1988, the factor equals .405.

(2) For discharges occurring on or after October 1, 1988, the factor is equal to .5795.

(d) *Determination of education adjustment factor.* (1) For discharges occurring on or after May 1, 1986 and before October 1, 1988, each hospital's education adjustment factor is calculated as follows:

(i) *Step one*—A factor representing the sum of 1.00 plus the hospital's ratio of full-time equivalent interns and residents to beds, as determined under paragraph (a)(1) of this section, is raised to an exponential power equal to the factor set forth in paragraph (c)(1) of this section.

(ii) *Step two*—The factor derived from step one is reduced by 1.00.

(iii) *Step three*—The factor derived from completing steps one and two is multiplied by 2.00.

(2) For discharges occurring on or after October 1, 1988, each hospital's education adjustment factor is calculated as follows:

(i) *Step one*—A factor representing the sum of 1.00 plus the hospital's ratio of full-time equivalent interns and residents to beds, as determined under paragraph (a)(1) of this section, is raised to an exponential power equal to the factor set forth in paragraph (c)(2) of this section.

(ii) *Step two*—The factor derived from step one is reduced by 1.00.

(iii) *Step three*—The factor derived from completing steps one and two is multiplied by 1.50.

(e) *Determination of payment amount.* Each hospital's indirect medical education payment is determined by multiplying the total DRG revenue, as determined under paragraph (a)(2) of this section, by the applicable education adjustment factor derived in paragraph (d) of this section.

* * * * *

(g) *Limits on count of interns and residents.* (1) Interns and residents who are assigned to a freestanding family practice center or an excluded distinct part hospital unit on the day that the count of interns and residents (as described in paragraph (f)(2)(i) of this section) is made are not counted as full-time equivalents. Only the percentage of time that these interns and residents spend in the portion of the hospital subject to the prospective payment system on the day the count is made is used to determine the indirect medical education adjustment.

(2) Interns and residents in anesthesiology who are employed to replace anesthetists are not counted as full-time equivalents.

* * * * *

IV. Part 489, Subpart B is amended as follows:

PART 489—PROVIDER AGREEMENTS UNDER MEDICARE

Subpart B—Essentials of Provider Agreements

1. The authority citation for Part 489 is revised to read as follows:

Authority: Secs. 1102, 1861, 1864, 1866, and 1871 of the Social Security Act as amended (42 U.S.C. 1302, 1395x, 1395aa, 1395cc, and 1395hh); section 602(k) of Pub. L. 98–21 (42 U.S.C. 1395ww note).

2. Section 489.23 is amended by adding a new paragraph (d) to read as follows:

§ 489.23 Special provisions for waiver of certain inpatient hospital services requirements.

* * * * *

(d) *Special waiver criteria effective April 17, 1986.* (1) For items and services furnished on or after April 17, 1986, a hospital that has received a waiver under this section must show that outside supplier's furnishing the items and services to the hospital's Medicare inpatients under the waiver have agreed to accept the amount paid under paragraph (d)(2) of this section as the full charge for the items and services.

(2) For items and services furnished on or after April 17, 1986, the Medicare Part B payment for items and services furnished by outside suppliers to beneficiaries who are inpatients of a hospital that has a waiver under this section is equal to 100 percent of the reasonable charge or other applicable Medicare Part B payment for the items and services and is not subject to the deductible amounts specified in § 405.245 of this chapter.

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance)

Dated: April 24, 1986.

Henry R. Desmarais,

Acting Administrator, Health Care Financing Administration.

Approved: April 30, 1986.

Otis R. Bowen,

Secretary.

[Docket Nos. 85N-0322 and BERC-324-P]

Cardiac Pacemaker Registry

AGENCIES: Food and Drug Administration and Health Care Financing Administration.

ACTION: Proposed rule.

SUMMARY: This proposed rule, prepared jointly by the Food and Drug Administration (FDA) and the Health Care Financing Administration (HCFA) is being issued to establish a national cardiac pacemaker registry, as mandated by the Deficit Reduction Act of 1984. The proposed rule would require that certain information be submitted to FDA for inclusion in the registry from providers and physicians requesting Medicare payment for an implantation, removal, or replacement of cardiac pacemaker devices and pacemaker leads. The proposed rule would permit HCFA to deny Medicare payment to physicians and providers of services who fail to submit the required information to the registry. The proposed rule would also permit HCFA to deny payment to providers who fail to return removed pacemaker devices or leads to the manufacturer if required by subsequent FDA regulations or fail to obtain a report of the manufacturer's test results on such returned pacemaker devices or leads.

DATES: Comments by July 7, 1986. We propose that any final rule based on this proposal become effective 60 days after the date of publication in the Federal Register of the final rule. The final rule would apply to cardiac pacemaker devices and leads implanted or removed on or after the effective date.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

A copy of comments on information collection requirements to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attn: Faye Iudicello, Rm. 3208, New Executive Office Bldg., Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: For FDA information: Les Weinstein, Center for Devices and Radiological Health (HFZ-84), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4874.

For Medicare information: Stan Katz, Bureau of Eligibility, Reimbursement and Coverage, Health Care Financing Administration, Rm. 489, East High Rise Bldg., 6325 Security Blvd., Baltimore, MD 21207, 301-594-8561.

SUPPLEMENTARY INFORMATION:

Statutory Authority

The Deficit Reduction Act of 1984 (Pub. L. 98-369), which was enacted on July 18, 1984, amends title XVIII of the Social Security Act (the Act) and mandates the establishment of a national pacemaker registry.

An important purpose of section 2304, the pacemaker registry portion of the Deficit Reduction Act of 1984, is to reduce unnecessary Medicare expenditures for pacemakers and pacemaker lead implants and removals. Specifically, paragraph (A) and (C) of new section 1862(h)(1) of the Act require that, by regulations, the Secretary of Health and Human Services (the Secretary), through the Commissioner of Food and Drugs (the Commissioner), provide for a registry of all cardiac pacemaker devices and pacemaker leads implanted or removed, for which Medicare is requested to make, or has made, payment. Under section 1862(h)(1)(B) of the Act, the registry is to include, but is not limited to, data regarding the manufacturer, model number, and serial number of the device; the name of the recipient; the date and location of the implantation or removal of the device; the name of the physician implanting or removing the device; the name of the provider; and any express or implied warranties associated with the device.

The purposes of the registry are: to assist the Secretary in determining when Medicare payments for pacemaker devices may properly be made; to track the performance of the devices; to assist FDA in determining when testing or analyzing of any device by the manufacturer may be necessary; and to assist the Secretary in carrying out studies regarding the use of the devices.

Under section 1862(h)(1)(C) of the Act, each physician and each provider of services engaged in the implantation, removal, or replacement of cardiac pacemaker pulse generators and pacemaker leads for which payment is made or requested under Medicare is required, in accordance with the Secretary's regulations, to furnish information to FDA regarding such implantation, removal, or replacement for the pacemaker registry maintained by FDA.

Section 1862(h)(2) of the Act provides that the Secretary may by regulation require providers of services (1) to return to the manufacturer for testing any cardiac pacemaker or pacemaker lead which has been removed from a patient for whom Medicare payment is claimed, and (2) to forego charging any beneficiary for replacement of the pacemaker or pacemaker lead if the removed device has not been returned to the manufacturer for testing if required.

Section 1862(h)(3) of the Act provides that the Secretary may also require by regulation that the manufacturer of any cardiac pacemaker or pacemaker lead returned to the manufacturer under section 1862(h)(2) of the Act test or analyze the device and provide the results of the testing or analysis to the appropriate provider, together with information and documentation with respect to any warranties covering the pacemaker or the pacemaker lead. In any case in which the Secretary has reason to believe, based on information obtained from the registry or any other source, that removal of a cardiac pacemaker or pacemaker leads for which payment is or may be requested under Medicare is related to the malfunction of the pacemaker or lead, the Secretary may require that FDA personnel be present at the testing of the device by the manufacturer to determine whether the device was functioning properly.

Section 1862(h)(4) of the Act provides that the Secretary may deny payment under Medicare, in whole or in part, and for so long as the Secretary determines to be appropriate, for the implantation, removal, or replacement of a pacemaker or pacemaker lead by a physician or provider of services, if the Secretary determines in accordance with procedures established under section 1862(d) (2) and (3) of the Act that (1) the physician or provider failed to submit the required information to the registry, (2) the provider failed to return to the manfacturer any removed pacemaker or pacemaker lead as required by regulations issued under the Act, (3) the provider charged Medicare beneficiaries for replacement of a removed pacemaker or pacemaker lead that the provider failed to return to the manufacturer, or (4) the manufacturer of the pacemaker or pacemaker lead failed to test and report to the provider on the condition of, and any warranties applicable to, the returned device. (Paragraphs (2) and (3) of section 1862(d) of the Act require notice in accordance with regulations and allow administrative and judicial appeals from determinations.)

The Proposed Regulations

The proposed regulations would (1) implement the mandatory provisions of section 1862(h)(1)(A) of the Act by providing for an FDA pacemaker registry of all cardiac pacemaker devices and leads for which Medicare payment is requested or made; (2) implement the mandatory provisions of section 1862(h)(1) (B), (C), and (D) of the Act by specifying the information that is to be required to be submitted to the registry, and when, how, and by whom it is to be submitted; and (3) implement the discretionary provisions of section 1862(h)(4) of the Act which authorize withholding of Medicare payments to physicians and providers who fail to submit the required information to the registry, or to providers when testing of pacemaker devices is not ordered or conducted if required by subsequent FDA regulations.

As proposed in 21 CFR 805.1(a) of FDA's regulations and 42 CFR 405.232(k) of HCFA's regulations, only those physicians and providers who engage in the implantation, removal, or replacement of cardiac pacemakers or leads paid for by Medicare would be required to submit data to the registry. It is estimated that approximately 85,000 to 100,000 pacemaker implants and replacements are performed annually on Medicare beneficiaries. Because these procedures involved the insertion of a pulse generator and pacemaker lead, however, the total number of devices on which information would be collected would equal approximately 170,000 to 200,000 per year.

Under proposed 21 CFR 805.10 of FDA's regulations and 42 CFR 405.232(k) of HCFA's regulations, physicians and providers of services who engage in the implantation, removal, or replacement of pacemakers and pacemaker leads, for which payment is made or requested under Medicare, would be required to supply information specified by FDA for the pacemaker registry for each procedure performed. Proposed 42 CFR 405.232(k) would require that the information by submitted in the form and manner provided under general instructions of the Medicare program.

Proposed 42 405.180 would authorize denial of Medicare payment to physicians or providers who the Secretary determines failed to submit required information for the registry. Under proposed 42 CFR 405.180(b), the affected physician or provider would be provided a 45-day notice and the physician or provider would be able to appeal the Secretary's determination under 42 CFR Part 405, Subpart O.

The proposed regulations would amend the existing regulations governing provider agreements (see proposed 42 CFR 489.21(g)) to ensure that patients are not charged (except for coinsurance and deductible amounts) by providers for covered services furnished in connection with the implantation, removal, or replacement of a pacemaker or pacemaker lead in any case in which HCFA denies payment for failure to submit the required information to the registry or failure to comply with any subsequent FDA regulations regarding return, testing, and reporting. If the provider later submits the appropriate information required by FDA, payment would be made if the provider resubmits the claim timely.

Under section 1866(a)(1)(A) of the Act, providers may not charge beneficiaries for items or services that are covered by the Medicare program except as provided under section 1866(a)(2)(A) of the Act. Under section 1866(a)(2)(A) of the Act and regulations at 42 CFR 489.30 providers may charge beneficiaries for deductible and coinsurance amounts for covered services. This provision applies regardless of whether HCFA denies payment to the provider for failure to comply with pacemaker registry requirements. Accordingly, the deductible and coinsurance amounts for implantation, removal, or replacement of a pacemaker or pacemaker lead would not be affected by a denial of payment to the provider under section 1862(h)(4) of the Act.

Denials of provider reimbursement claims because of failure to comply with the proposed regulations and any subsequent FDA pacemaker registry regulations are technical denials of otherwise covered services (that is, they do not relate to the medical need for, or appropriateness of, the services) and would, therefore, not be made by a Utilization Quality Control and Peer Review Organization (see 42 CFR 405.162).

FDA intends not to develop at this time regulations to implement other provisions of section 1862(h) of the Act that are discretionary. These provisions of the Act (1) provide for the return by providers of removed pacemakers and leads to manufacturers (section 1862(h)(2)(A) of the Act), and (2) provide for the testing of returned devices by manufacturers and the sharing of test results with providers and describe the circumstances under which FDA will participate in the testing (section 1862(h)(3) of the Act).

FDA believes that it should defer to subsequent regulations any implementation of section 1862(h) (2)(A) and (3) of the Act because the means to implement these provisions, and the degree of specificity that is needed, will depend to a large degree on the actual functioning of the pacemaker registry. The legislation itself recognizes this, in that it provides that once the registry is in operation, information derived from the registry will be used to identify pacemakers and pacemaker leads which are to be tested, and that information from the registry will be used to determine whether FDA personnel are to be present at the testing of specific pacemakers and leads. The agencies, however, invite comments on the deferral of regulations implementing these discretionary portions of the legislation. Any such comments should address (1) the need for implementing either or both of the discretionary provisions of the legislation and (2) the nature and extent of the regulations that should be established.

Although FDA has decided to defer to subsequent regulations any implementation of those portions of the Act pertaining to the return and testing of pacemakers and pacemaker leads and the sharing of test results, the HCFA portion of the proposed regulations (see 42 CFR 405.180 (a)(2) and (4)) would deny Medicare payment to providers of services if providers or manufacturers fail to comply with any return, testing, and reporting requirements that may be established by subsequent FDA regulations.

Submission of Data to the Registry

Under the proposed regulations, physicians and providers of services who engage in, and request or receive Medicare reimbursement for the implantation, removal, or replacement of pacemakers and pacemaker leads would be required to supply information specified by FDA to the pacemaker registry for initial implants, removals, and replacements in the form and manner required under general instructions of the Medicare program (see proposed 42 CFR 405.232(k)). Section 1862(h)(1)(B) of the Act requires that the registry include the following data elements: manufacturer name, model and serial numbers of the pacemaker or pacemaker lead; name of the recipient of the pacemaker or lead; date and location of implantation or removal of the pacemaker or lead; name of the physician implanting or removing the pacemaker or lead; name of the hospital or other provider billing for the procedure; any express or implied

VOL 51 ISS 87 MY 6 1986 UMI

warranties associated with the pacemaker or lead under contract or State law; and any other information that the Secretary deems appropriate.

FDA's regulations in proposed 21 CFR 805.10 would require the submission of each of these data elements when a pacemaker or pacemaker lead is implanted, removed, or replaced plus the following additional data elements deemed necessary for purposes of the registry: the patient's name and health insurance claim number (HICN), the provider number, the date of the procedure, the name and identification number of the physician who ordered the procedure, and the name and identification number of the operating physician. In addition, if the procedure about which the submission to the registry is being made was the removal or replacement of a pacemaker and/or lead, the following data elements would also have to be submitted: the date the device was initially implanted; whether a device that was replaced was left in the body; whether a device not left in the body was returned to the manufacturer; if the pulse generator was removed or replaced, whether a lead also was removed or replaced; and if the procedure involved a lead implant, whether a former lead was left in the body. Although the agencies believe we have identified the data elements essential to achievement of the statutory purpose, we will consider additional elements and may incorporate them in the final rule if such additional elements are identified and found to be necessary.

Section 1862(h)(1)(F) of the Act states that any person or organization other than those required by the Act to submit registry information respecting pacemakers or pacemaker leads may provide to the registry such information. The proposed rule would not require this information from anyone other than physicians and providers reimbursed by Medicare. We, however, encourage all persons who implant, remove, or replace cardiac pacemakers or pacemaker leads in non-Medicare patients to provide such information to the registry. We request that these reports include the data elements described in 21 CFR 805.10.

How Registry Data Would Be Used

FDA plans to use the data from the registry to monitor the performance of pacemakers and leads. The registry will provide FDA with a mechanism for monitoring and evaluating the long-term performance of pacemakers and leads in order to identify generic failures or defects. This information, along with notification of recalls resulting from product malfunctions identified by the registry, would be made available to HCFA and accessible to other Department of Health and Human Services components in connection with their statutory responsibilities.

FDA may notify HCFA of risks associated with a particular device and HCFA could make appropriate adjustments in Medicare coverage of the device. Also, the information generated by examination of pacemaker data may lead FDA to promulgate regulations that would set forth criteria for requesting that certain types of pacemakers and leads be returned to the manufacturers for testing. If in accordance with any such regulations, these devices are not tested and the results are not sent to the providers and FDA, FDA may notify HCFA that payment should be denied for the services provided in connection with the devices.

Public Availability of Registry Data

Public availability of information submitted to or stored in the registry or contained in agency studies regarding the use of pacemakers and pacemaker leads will be governed by section 1862(h)(D) of the Act which prohibits the Secretary from releasing any specific information that identifies by name a recipient of any pacemaker device or lead or that would otherwise identify a specific recipient. Moreover, information reported to the registry would be made available to the public on request in accordance with the Freedom of Information Act (the FOIA) (5 U.S.C. 552), the Privacy Act of 1974 (5 U.S.C. 552a), the Department's public information regulations (45 CFR Part 5), FDA's public information regulations (21 CFR Part 20), and HCFA's public information regulations (42 CFR Part 401).

Delegation of Authority

The Secretary plans to delegate to FDA the authority to establish and maintain the registry and to HCFA the authority to require Medicare physicians and providers to comply with the requirements of furnishing information for the registry.

Interagency Task Force/Interagency Agreement

FDA and HCFA each are mindful of the need to cooperate and coordinate their activities related to the registry. To accomplish this, they have formed an interagency task force consisting of representatives from FDA and HCFA. The task force is charged with developing the implementing regulations, developing policies on data collection and analysis, and working out the details necessary for the registry to become operational efficiently and successfully. Moreover, FDA and HCFA will sign an interagency agreement defining their respective responsibilities in accordance with the Secretary's delegation of authority.

Educational Initiatives

FDA and HCFA will undertake educational initiatives for informing physicians, providers of services, and pacemaker and pacemaker lead manufacturers of their responsibilities under the registry and the regulations.

Regulatory Impact Statement

A. General

Executive Order 12291 requires Federal agencies to prepare and publish an initial regulatory impact analysis for any proposed major rule. A major rule is defined as any rule that is likely to: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State, and local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Consistent with the Regulatory Flexibility Act (5 U.S.C. 601–612), we prepare and publish a regulatory flexibility analysis for any proposed rule unless the Secretary or an agency head certifies that the rule would not have a significant economic impact on a substantial number of small entities. (See discussion under section F. below.)

The regulatory impact of the rule proposed by this document would result primarily from the statutory mandate to establish a pacemaker registry. The probable impact of this requirement would not exceed any threshold requiring analysis. Because of the widespread interest in the pacemaker program, however, we are voluntarily providing an initial impact analysis in this preamble.

The pacemaker registry will impose costs on both providers of health care services and the Federal government. It may also provide benefit payment savings to the Medicare program by enabling purchasers of pacemaker leads to make more informed decisions. Private sector costs would arise from the requirement for physicians and health care providers to supply information for the registry regarding implanted,

removed, or replaced pacemakers and pacemaker leads and, if required by the Secretary in accordance with any subsequent FDA regulations, to return any removed pacemaker or pacemaker lead to the manufacturer of the device. Federal government costs would arise from the administration and data management of the registry. Any offsetting government savings from Medicare would depend on the content and functions of the registry and its impact on provider behavior.

Potential savings cannot be estimated with any confidence at this time. Both savings (that is, reductions of program expenditures) and the costs that would result from implementation of this proposal would be functions of the number of pacemaker implants.

We estimate, based on data supplied by the industry, that 85,000 to 100,000 pacemaker implants (this estimate includes both original implants and replacements) are performed annually on Medicare beneficiaries. Further, we estimate that about 20 percent of all such procedures are for the purpose of replacing, for various reasons, pulse generators or pacemaker leads previously implanted. Because an implant involves the insertion of a pulse generator and a pacemaker lead, however, the total number of devices on which information is collected could equal approximately 170,000 to 200,000 per year.

B. Effects on Providers—Administrative Costs

We are not specifying the exact methods to be used by hospitals for collecting and retaining information about pacemakers for the registry but only the form and manner in which they are to be supplied to HCFA for transmittal to FDA. We believe, however, that a relatively simple system of recordkeeping could be established that would require minimum effort and facility expense. Administrative costs can be expressed by the following formula:

$$\text{Cost of establishing recordkeeping system (one-time)} + \text{Number of devices} \left(\begin{array}{c} \text{Cost of recording information on each device} + \text{Cost of reporting information on each device} \end{array} \right)$$

We do not have data available from the industry to calculate precisely the cost elements of the formula above. We believe that it would cost a typical hospital about $2 per device to record the required information and an additional $2 per device to report information on it. The cost of establishing a system to record, maintain, and report the information would vary considerably from hospital to hospital, depending on the record management capabilities already available, and the number of records and reports required in addition to those already maintained.

Only 2,000 hospitals performed more than 90 percent of all the pacemaker procedures for which Medicare received bills for FY 1984. Those bills showed that many hospitals performed only a few pacemaker procedures during the year, and that a very few performed several hundred. Considering both pacemakers and leads, a typical hospital would be required to maintain data on 85 to 100 devices per year. Few would have to retain data on more than 400 devices per year. Most hospitals would be required to maintain data on relatively few devices.

Proposed 42 CFR 405.360 would require hospitals to return removed devices to the manufacturer for testing if required by subsequent FDA regulations. At the present time, we do not have any estimate of the number of devices that might be returned under such subsequent regulations.

The expenses incurred by hospitals in recording, maintaining, and reporting required data would be considered reasonable costs for hospitals paid on a cost basis. Hospitals under the prospective payment system are paid for such administrative expenses related to inpatient procedures under the prospective payment amount.

C. Effects on Physicians

As discussed in the section of this preamble entitled "Statutory Authority," physicians, as well as providers of services, are responsible for submitting information to the registry. New section 1862(h)(4) of the Act also grants the Secretary the authority to deny payment to physicians for noncompliance with certain requirements specified in regulations issued by the Secretary. Thus, the statute clearly makes the provider of services and the physician who implants, removes, or replaces a pacemaker or pacemaker lead jointly responsible for complying with the regulations and proposed 42 CFR 405.232(k) and 405.252(b) so provide.

Although we expect the information to be supplied by hospitals to HCFA for the registry, if the surgeon or attending physician is found not to be supplying information necessary for the program to the hospital, authority would exist to deny payment to the physician for each case. If payment already had been made to the physician, HCFA could reduce future payments by the amounts paid for the cases denied or take other appropriate recovery action as specified in proposed 42 CFR 405.180. This action could result in denial or recovery of payments to physicians of several thousand dollars per case. As in the case of hospitals, however, we expect physicians to comply. Therefore, the provision permitting denial of payment to physicians should not have any significant economic impact. Further, because the hospital will be accumulating and reporting the data, we believe that physicians would not incur any significant additional administrative costs associated with the rule to be based on this proposal.

D. Effects on Medicare Expenditures

1. Administrative Costs

The costs for collecting, processing, and transmitting data to the registry would equal approximately $750,000 per year. Administrative costs for organizing and processing the data received would equal about $250,000 per year. Therefore, total costs to the Federal government for administering the registry would be approximately $1 million per year.

2. Denial of Payment

We anticipate support for the pacemaker program by the industry and do not anticipate noncompliance with the rule. Providers of services and physicians would be able to avoid any financial impact as a result of denial of payment for not providing information by complying with the requirements of the proposed rule. Therefore, Medicare program expenditures should not be affected by potential denials of payment.

3. Long-Term Effects on Medicare Expenditures

The proposed rule should have several long-term beneficial effects on Medicare beneficiaries and expenditures through implementation of the pacemaker registry and testing of devices: (1) Models of pacemakers with greater than expected replacement rates

VOL 51 ISS 87 MAY 6 1986 UMI

could be more readily identified; and (2) the operation of the registry may lead to improvements in manufacturing and testing which, in the long term, could result in the need for fewer operations for replacements and fewer hospitalizations for adverse effects associated with pacemakers and pacemaker leads. To illustrate the magnitude of such potential savings, assume the following:

Average Medicare payment to hospital per case=$4,200

(The average national urban payment rate under the prospective payment system for DRG No. 118, pulse generator replacement, in FY 1985 is $4,208.)

Average payment to attending physician and surgeon=$3,000

20,000 operations for replacements are performed each year.

At this time, we cannot estimate how great a reduction in replacement operations would result. We expect that each percentage point reduction of the number of replacements of pacemakers and pacemaker leads would result in savings to the Medicare program of approximately $1.4 million per year.

E. Effects on Medicare Beneficiaries

Beneficiaries will not be negatively affected by the proposed rule. If payment is denied to a hospital for noncompliance with the rule, the hospital is prohibited by proposed 42 CFR 489.21(g) from increasing charges to beneficiaries to recover such denied payments. Although we do not expect implementation of the proposed rule to have a financial impact on patients in the short term, we expect long-term beneficial effects in the form of fewer complications and possibly fewer deaths associated with malfunctioning pacemaker devices. The magnitude of such effects can only be determined after the registry is implemented and we have a period of experience under the program.

F. Impact on Small Entities

The proposed rule would require the physicians and providers of services, all of which may be considered small entities under the Regulatory Flexibility Act, submit to FDA and HCFA certain information regarding pacemakers and pacemaker leads. Although this requirement would obligate hospitals to record and report the information, we do not believe that it represents a significant increase in hospitals' overall paperwork or human resources requirements. To a large extent, much of this information is already kept by hospitals.

Manufactures of cardiac pacemaker devices and pacemaker leads may be required by subsequent FDA regulations to test and report on devices that are returned by providers of services. We would review the impact of any such regulations at the time that they are issued. We understand from discussions with representatives in the industry, however, that the manufacturers currently test returned products for quality control purposes. We believe that any increased costs of retaining test results or of preparing reports on test results would not represent a significant portion of manufacturers' total costs.

G. Conclusion

We conclude, based on the analysis above, that the proposed rule is not a major rule under Executive Order 12291. Further, we have determined, and the Secretary certifies, that the proposed rule will not have a significant economic impact on a substantial number of small entities. We have therefore not prepared a regulatory flexibility analysis.

Environmental Considerations

We have determined under 21 CFR 25.24(a)(8) (April 26, 1985; 50 FR 16636) that this action is a type that does not individually or cumulatively have a significant effort on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Information Collection Requirements

42 CFR 405.232(k) and 21 CFR 805.10 of this proposed rule contain information collections which are subject to review by the Office of Management and Budget (OMB) under section 3504(h) of the Paperwork Reduction Act of 1980. FDA and HCFA have submitted a copy of this proposed rule to OMB for its review of these information collections. Other organizations and individuals desiring to submit comments on the information collections should direct them to FDA's Dockets Management Branch (address above), and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg., Rm. 3208, Washington, DC 20503, ATTN. Fay Iudicello.

HCFA has already obtained OMB approval of the Form HCFA-497, HCFA Pacemaker Related Data, which implements the collection of information requirements contained in this rule. The OMB control number, which reflects approval of that form, is 0938-0436.

Interested persons may, on or before (July 7, 1986), submit to FDA's Dockets Management Branch (address above) written comments regarding the proposed rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket numbers found in brackets in the heading of this document. Received comments may be seen in FDA's Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 805

Medical devices; Medicare records; Reporting and recordkeeping requirements.

List of Subjects in 42 CFR Parts 400, 405, and 489

Part 400

Grant programs-health; Health facilities; Health maintenance organizations (HMO); Medicaid, Medicare; Reporting and recordkeeping requirements.

Part 405

Administrative practice and procedure; Health facilities; Health professions; Kidney diseases; Laboratories; Medicare; Reporting and recordkeeping requirements; Rural areas; X-rays.

Part 489

Health facilities; Medicare.

Therefore, under the Social Security Act and the Deficit Reduction Act, it is proposed that Title 21 and Title 42 of the Code of Federal Regulations be amended as follows:

1. By adding new 21 CFR Part 805 to read as follows:

PART 805—CARDIAC PACEMAKER REGISTRY

Subpart A—General Provisions

Sec.
805.1 Scope.
805.3 Definitions.

Subpart B—Submission of Information

805.10 Submission of information by physicians and providers.
805.20 How to submit information.
805.23 Confidentiality.

Authority: Sec. 1862(h) of the Social Security Act and sec. 2306(d) of the Deficit Reduction Act, 98 Stat. 1066–1089 (42 U.S.C. 1395y(h), 1395y note); 21 CFR 5.10 and 5.11.

Subpart A—General Provisions

§ 805.1 Scope.

(a) FDA providing for a nationwide cardiac pacemaker registry and is requiring any physician and any provider of services who engage in the implantation, removal, or replacement of cardiac pacemaker devices and pacemaker leads for which the physician or provider of services receives or requests payment from the Medicare program to submit certain information to the registry. If the physician or the provider of services does not submit the information according to this part and 42 CFR 405.180(b), 405.232(k), and 405.380, HCFA, which administers the Medicare program, may deny payment to the physician or the provider in whole or in part. FDA will use the information submitted to the registry to track the performance of pacemakers and pacemaker leads and to perform studies and analyses regarding the use of the devices, and to transmit data to HCFA to assist HCFA in administering the Medicare program and to other Department of Health and Human Services components to carry out statutory responsibilities.

(b) References in this part to regulatory sections of the Code of Federal Regulations are to Chapter I of Title 21, unless otherwise noted.

§ 805.3 Definitions.

(a) "FDA" means the Food and Drug Administration.

(b) "HCFA" means the Health Financing Administration.

(c) A "pacemaker" or "pacemaker device" is a device that produces priodic electrical impulses to stimulate the heart. It consists of two basic components: a pulse generator and one or more leads. See § 870.3610 for a more detailed definition.

(d) A "pacemaker lead" is a flexible, insulated wire connected at one end to a pacemaker's pulse generator and at the other end to the heart. It transmits electrical stimuli to and from the heart. See § 870.3680(b) for a more detailed definition.

(e) A "physician" is a doctor of medicine or osteopathy legally authorized to practice medicine and surgery by applicable laws of the State in which he or she performs such function or actions. (This definition includes an osteopathic practitioner.).

(f) A "PRO" is a Utilization Quality Control and Peer Review Organization that contracts with the Secretary of Health and Human Services to review health care services funded by the Medicare program to determine whether those services are reasonable, medically necessary, furnished in the appropriate setting, and are of a quality which meets professionally recognized standards.

(g) A "provider" is a hospital, skilled nursing facility, comprehensive outpatient rehabilitation facility, home health agency, or (effective November 1, 1983, through September 30, 1986) a hospice, that has in effect an agreement to participate in Medicare.

(h) A "warranty" is an express or implied guarantee, under contract or State law, of the integrity of a pacemaker device or pacemaker lead and of the manufacturer's responsibility for the repair or replacement of defective parts of a pacemaker device or pacemaker lead.

(i) Any terms defined in section 201 of the Federal Food, Drug, and Cosmetic Act will have that definition.

Subpart B—Submission of Information

§ 805.10 Submission of information by physicians and providers.

A physician or a provider of services that requests or receives reimbursement from Medicare for the implantation, removal, or replacement of a cardiac pacemaker device or pacemaker lead shall submit the following information on a specified form to HCFA for inclusion in the pacemaker registry provided for by FDA under § 805.1:

(a) Provider number.

(b) Patient's health insurance claim number (HICN).

(c) Patient's name.

(d) Date of the procedure.

(e) Identification number (used by PRO's) and name of the physician who ordered the procedure.

(f) Identification number (used by PRO's) and name of the operating physician.

(g) For each device (pulse generator, atrial lead, ventricular lead) implanted during the procedure about which the report is being made: the name of the manufacturer, model number, serial number, and the warranty expiration date.

(h) For each device (pulse generator, atrial lead, ventricular lead) removed or replaced during the procedure about which the report is being made: The name of the manufacturer; model number; serial number; the warranty expiration date; the date the device was initially implanted; whether a device that was replaced was left in the body; if the device was not left in the body, whether it was returned to the manufacturer; if the pulse generator was removed or replaced, whether a lead also was removed or replaced; and, if the procedure involved a lead implant, whether a former lead was left in the body.

§ 805.20 How to submit information.

Information shall be submitted to the registry in the form and manner required under general instructions of the Medicare program (see 42 CFR 405.232(k)).

§ 805.25 Confidentiality.

(a) FDA and HCFA will keep confidential, and will not reveal to the public, any specific information that identifies by name a recipient of any pacemaker device or lead or that would otherwise identify a specific recipient.

(b) All other information under this part is available for public disclosure in accordance with Part 20.

PART 400—INTRODUCTION; DEFINITIONS

Subpart B—Definitions

2. The authority citation for 42 CFR Part 400 continues to read as follows:

Authority: Secs 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh) and 44 U.S.C. Chapter 35.

3. In § 400.200 by adding the definition of "FDA" in alphabetical order to read as follows:

§ 400.200 General Definitions.

* * * * *

"FDA" stands for Food and Drug Administration.

* * * * *

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

4. The table of contents is amended by adding the title of § 405.180, revising the title of § 405.252, and adding a center heading and § 405.380 to read as follows:

Subpart A—Hospital Insurance Benefits

* * * * *

§ 405.180 Denial of payment for implantation or replacement of cardiac pacemakers and leads; conditions.

* * * * *

Subpart B—Supplementary Medical Insurance Benefits; Enrollment, Coverage, Exclusions, and Payment

* * * * *

§ 405.252 Conditions affecting payment of benefits.

* * * * *

Subpart C—Exclusions, Recovery of Overpayment, Liability of a Certifying Officer and Suspension of Payment

* * * * *

VOL 51 ISS 87 MY 6 1986 UMI

Payment Requirements for Cardiac Pacemakers

§ 405.380 Return and testing of pacemakers or leads.

Subpart A—Hospital Insurance Benefits

5. The authority citation for 42 CFR Part 405, Subpart A, continues to read as follows:

Authority: Secs. 1102, 1814, 1815, 1881, 1866(d), and 1871 of the Social Security Act (42 U.S.C. 1302, 1395f, 1395g, 1395x, 1395cc(d), and 1395hh).

6. By adding § 405.180 to read as follows:

§ 405.180 Denial of payment for implantation or replacement of cardiac pacemakers and leads; conditions.

(a) Notwithstanding any other provision of this chapter, payment will be denied to a provider of services with respect to the implantation, removal, or replacement of any cardiac pacemaker or pacemaker lead when, and for so long as, HCFA determines, in accordance with the procedures established in paragraph (b) of this section, that:

(1) The provider has failed to submit information required by FDA (under 21 CFR Part 805) for the pacemaker registry, as required by § 405.232(k).

(2) The provider did not return the removed pacemaker or pacemaker lead to the manufacturer of the pacemaker or pacemaker lead for testing and reporting when required to do so under FDA regulations.

(3) The provider has made any charges to Medicare beneficiaries in violation of § 405.380.

(4) The manufacturer to whom any pacemaker or pacemaker lead was returned in accordance with FDA regulations has failed to test the device and report to the provider if required under FDA regulations.

(b)(1) Whenever HCFA determines that a physician or a provider of services has failed to meet any of the requirements contained in §§ 405.232(k) or 405.380 or 21 CFR Part 805, HCFA will send written notice of its determination to the affected party at least 45 days before the determination becomes effective.

(2) The notice will state the reasons for the determination and its effective date, and will provide the affected party 45 days from the date of the notice to submit information or evidence to demonstrate that HCFA's determination is in error. The notice will also inform the affected party of its right to a hearing.

(3) Following the expiration of the 45-day notice period provided in paragraph (b)(1) of this section, HCFA's determination and notice constitute an "initial determination" and a "notice of initial determination" for purposes of the administrative and judicial appeal procedures specified in Part 405, Subpart O of this chapter.

Subpart B—Supplementary Medical Insurance Benefits; Enrollment, Coverage, Exclusions, and Payment

7. The authority citation for 42 CFR Part 405, Subpart B, continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh), unless otherwise noted.

8. In § 405.232 by adding paragraph (k) to read as follows:

§ 405.232 Medical and other health services; conditions, limitations, and exclusions.

* * * * *

(k) *Cardiac pacemakers and leads.* For cardiac pacemakers and pacemaker leads covered as prosthetic devices under § 405.231(h), physicians and providers of services engaged in the implantation, removal, or replacement of cardiac pacemakers and pacemaker leads must submit information required by FDA under 21 CFR Part 805 for the pacemaker registry to HCFA in the form and manner set forth in the general instructions of the Medicare program.

9. In § 405.252 by revising the section heading and by adding paragraph (b) to read as follows:

§ 405.252 Conditions affecting payment of benefits.

* * * * *

(b) *Denial of payment for cardiac pacemakers and leads.* Payment may be denied in whole or in part to a physician who performs the implantation, removal, or replacement of any cardiac pacemaker or pacemaker lead when, and for so long as, HCFA determines in accordance with the procedures established in § 405.180(b) that the physician does not meet the reporting requirements in § 405.232(k).

* * * * *

Subpart C—Exclusions, Recovery of Overpayment, Liability of a Certifying Officer and Suspension of Payment

10. The authority citation for Part 405, Subpart C, continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act as amended (42 U.S.C. 1302 and 1395hh), unless otherwise noted.

11. By adding an undesignated center heading at the end of Subpart C and new § 405.380 to read as follows:

PAYMENT REQUIREMENTS FOR CARDIAC PACEMAKERS

§ 405.380 Return and testing of pacemakers or leads.

In cases in which HCFA notifies a provider that the return of any removed or replaced pacemaker or pacemaker lead for testing and reporting is required under FDA regulations with respect to a pacemaker or pacemaker lead or a type or class of pacemakers or pacemaker leads, providers of services are prohibited from charging Medicare beneficiaries for any services furnished in connection with such removal or replacement if the device has not been returned to the manufacturer as required.

Subpart O—Providers of Services, Emergency Service Hospitals, Independent Laboratories, Suppliers of Portable X-Ray Services, Ambulatory Surgical Centers, End-Stage Renal Disease Treatment Facilities, and Persons; Determinations and Appeals Procedures

12. The authority citation for 42 CFR Part 405, Subpart O, continues to read as follows:

Authority: Secs. 1102, 1866, 1869, 1871, and 1872 of the Social Security Act; 42 U.S.C. 1302, 1395cc, 1395ff, 1395hh, and 1395ii; unless otherwise noted.

13. In § 405.1502 by adding new paragraph (g) to read as follows:

§ 405.1502 Initial determinations.

* * * * *

(g) A determination to deny payment under §§ 405.180 or 405.252, pertaining to cardiac pacemakers and the pacemaker registry.

PART 489—PROVIDER AGREEMENTS UNDER MEDICARE

14. The authority citation for 42 CFR Part 489 continues to read as follows:

Authority: Secs. 1102, 1861, 1864, 1866, and 1871 of the Social Security Act (42 U.S.C. 1302, and 1395x, 1395aa, 1395cc, and 1395hh).

15. In § 489.21 the introductory text is repeated unchanged for the convenience of the reader and new paragraph (g) is added to read as follows:

§ 489.21 Specific limitations on charges.

Except as specified in Subpart C of this part, the provider agrees not to charge a beneficiary for any of the following:

* * * * *

(g) Items and services furnished in connection with the implantation of cardiac pacemakers or pacemaker leads when HCFA denies payment for those devices under §§ 405.180 or 405.252 of this chapter.

Dated: February 2, 1986.
Frank E. Young,
Commissioner of Food and Drugs.

Dated: March 5, 1986.
Henry R. Desmarais,
Acting Administrator of Health Care Financing Administration.

Dated: April 8, 1986.
Otis R. Bowen,
Secretary of Health and Human Services.

Federal Acquisition Regulation; Interim Rule With Request for Comment

VOL 51 ISS 87 MY 6 1986 UMI

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 25 and 52

[Federal Acquisition Circular 84-17]

Federal Acquisition Regulation

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: Federal Acquisition Circular (FAC) 84-17 amends the Federal Acquisition Regulation (FAR) with respect to Government purchases of products from countries designated under the Caribbean Basin Economic Recovery Act.

DATES: *Effective date:* May 6, 1986.

Comment Date: Comments must be received on or before July 7, 1986. Please cite FAC 84-17 in all correspondence on this subject.

ADDRESS: Interested parties should submit written comments to: GSA, Attn: FAR Secretariat, 18th & F Streets NW., Room 4041, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Margaret A. Willis, FAR Secretariat, Telephone (202) 523-4755.

SUPPLEMENTARY INFORMATION:

A. Background

The United States Trade Representative, under the authority delegated by the President in section 1-201 of Executive Order 12260 of December 31, 1980, has determined that countries designated by the President as beneficiaries under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et seq.) provide appropriate reciprocal competitive government procurement opportunities for United States products and suppliers of such products.

The Trade Representative made a public announcement to this effect in the Federal Register on February 27, 1986 (51 FR 6964-6965), and by means of an additional notice in the Federal Register on April 4, 1986 (51 FR 11660), further requested implementation of such policies in the Federal Acquisition Regulation to be effective for solicitations issued after April 30, 1986.

B. Regulatory Flexibility Act

In the initial regulatory flexibility analysis it was concluded that this interim rule is not likely to have a significant economic impact on a substantial number of small entities. However, publication of this rule as an interim rule will afford the public the opportunity to comment with respect to this rule's economic impact on small entities, and such comments will be considered in the formulation of the final regulatory flexibility analysis and the final rule.

C. Determination to Issue an Interim Regulation

A determination has been made under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator of the National Aeronautics and Space Administration that the regulation in FAC 84-17 must be issued as an interim regulation in compliance with the request from the Office of the U.S. Trade Representative that the FAR be amended by April 30, 1986, to implement the Caribbean Basin Initiative policy published in the Federal Register on February 27, 1986 (51 FR 6964-6965).

D. Paperwork Reduction Act

FAC 84-17 does not contain any additional information collection requirements which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Parts 25 and 52

Government procurement.

Dated: May 2, 1986.

Lawrence J. Rizzi,

Director, Office of Federal Acquisition and Regulatory Policy.

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 84-17 is effective immediately.

Eleanor R. Spector,

Deputy Assistant Secretary of Defense for Procurement.

T.C. Golden,

Administrator.

S.J. Evans,

Assistant Administrator for Procurement.

Federal Acquisition Circular (FAC) 84-17 amends the Federal Acquisition Regulation (FAR) as specified below:

Item—Revision to Subpart 25.4, Concerning Caribbean Basin Countries

Subpart 25.4, Purchases Under the Trade Agreements Act of 1979, and the clauses at 52.225-6 and 52.225-9 are revised to include requirements with respect to acquisitions from the Caribbean Basin countries and to delete a reference to the Civil Aeronautics Board, which has been disestablished.

Therefore, 48 CFR Parts 25 and 52 are amended as set forth below.

1. The authority citation for 48 CFR Parts 25 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. Chapter 137; and 42 U.S.C. 2453(c).

PART 25—FOREIGN ACQUISITION

2. Section 25.400 is revised to read as follows:

25.400 Scope of subpart.

This subpart provides additional policies and procedures peculiar to acquisitions subject to the Agreement on Government Procurement and the Trade Agreements Act of 1979 (19 U.S.C. 2501-2582) and acquisitions from countries designated under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et seq.).

3. Section 25.401 is amended by adding in alphabetical sequence two definitions, "Caribbean Basin country" and "Caribbean Basin country end product," and by revising the definition "Eligible product" to read as follows:

25.401 Definitions.

"Caribbean Basin country," as used in this subpart, means a country designated by the President as a beneficiary under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2701, et seq.) and listed below:

Antigua and Barbuda
Aruba
Bahamas
Barbados
Belize
British Virgin Islands
Costa Rica
Dominica
Dominican Republic
El Salvador
Grenada
Guatemala
Honduras
Jamaica
Montserrat
Netherlands Antilles
Panama
St. Christopher-Nevis
St. Lucia
St. Vincent and the Grenadines
Tobago
Trinidad

"Caribbean Basin country end product," as used in this subpart, means an article that: (a) Is wholly the growth, product, or manufacture of the Caribbean Basin country, or (b) in the case of an article which consists in whole or in part of materials from another country or instrumentality, has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed. The term *includes* services (except transportation services) incidental to its supply; provided, that the value of those incidental services does not exceed that of the product itself. It does not include service contracts as such. The term *excludes* products that are excluded from duty free treatment for Caribbean countries under 19 U.S.C. 2703(b), which presently are—

(1) Textiles and apparel articles that are subject to textile agreements;

(2) Footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel not designated as eligible articles for the purpose of the Generalized System of Preferences under Title V of the Trade Act of 1974;

(3) Tuna, prepared or preserved in any manner in airtight containers;

(4) Petroleum, or any product derived from petroleum; and

(5) Watches and watch parts (including cases, bracelets and straps), of whatever type including, but not limited to, mechanical, quartz digital or quartz analog, if such watches or watch parts contain any material that is the product of any country to which the Tariff Schedule of the United States (TSUS) column 2 rates of duty apply.

* * * * *

"Eligible product," as used in this subpart, means a designated country end product or a Caribbean Basin country end product.

4. Section 25.402 is amended by adding a new paragraph (b); by revising the existing paragraph (b) and redesignating it as paragraph (c); and by redesignating the existing paragraphs (c) and (d) as (d) and (e) as follows:

25.402 Policy.

* * * * *

(b) The U.S. Trade Representative has determined that in order to promote further the economic recovery of the Caribbean Basin countries (as defined in 25.401), products originating in those countries which are eligible for duty free treatment under the Caribbean Basin Economic Recovery Act shall be treated as eligible products for the purposes of this subpart (see 51 FR 6964-6965, February 27, 1986). This determination is effective until September 30, 1995, unless otherwise extended by the U.S. Trade Representative by means of a notice in the Federal Register.

(c) Except when waived under section 302(b)(2) of the Trade Agreements Act, there shall be no purchases of foreign end products subject to the Act unless the foreign end products are designated country end products or Caribbean Basin country end products.

* * * * *

5. Section 25.403 is amended by adding paragraph (m) to read as follows:

25.403 Exceptions.

* * * * *

(m) Purchases of products that are excluded from duty free treatment for Caribbean countries under 19 U.S.C. 2703 (b), which presently are—

(1) Textiles and apparel articles that are subject to textile agreements;

(2) Footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel not designated as eligible articles for the purpose of the Generalized System of Preferences under Title V of the Trade Act of 1974;

(3) Tuna, prepared or preserved in any manner in airtight containers;

(4) Petroleum, or any product derived from petroleum; and

(5) Watches and watch parts (including cases, bracelets and straps), of whatever type including, but not limited to, mechanical, quartz digital or quartz analog, if such watches or watch parts contain any material that is the product of any country to which the Tariff Schedule of the United States (TSUS) column 2 rates of duty apply.

6. Section 25.405 is amended by revising paragraph (d) to read as follows:

25.405 Procedures.

* * * * *

(d) Solicitations shall not specify that offers involving eligible products from designated countries or Caribbean Basin countries shall be submitted in the English language and in U.S. dollars.

* * * * *

25.406 [Amended]

7. Section 25.406 is amended by removing in the alphabetical listing the agency "Civil Aeronautics Board".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

8. Section 52.225-6 is amended by inserting in the introductory text a colon following the word "provision" and removing the remainder of the sentence; by removing in the title of the provision the date "(APR 1984)" and inserting in its place the date "(MAY 1986)"; by revising paragraphs (a) and (c) of the provision; and by removing both derivation lines following "(End of provision)" as follows:

52.225-6 Buy American Act—Trade Agreements Act—Balance of Payments Program Certificate.

* * * * *

(a) The offeror hereby certifies that each end product, except those listed in paragraph (b) of this provision, is a domestic end product (as defined in the clause entitled "Buy American Act—Trade Agreements Act—Balance of Payments Program") and that components of unknown origin have been considered to have been mined, produced, or manufactured outside the United States, a designated country, or a Caribbean Basin country, as defined in section 25.401 of the Federal Acquisition Regulation.

* * * * *

(c) Offers will be evaluated by giving certain preferences to domestic end products, designated country end products, and Caribbean Basin country end products over other end products. In order to obtain these preferences in the evaluation of each excluded end product listed in paragraph (b) of this provision, offerors must identify and certify below those excluded end products that are designated country end products or Caribbean Basin country end products. Products that are not identified and certified below will not be deemed designated country end products or Caribbean Basin country end products. Offerors must certify by inserting the applicable line item numbers in the following:

(1) The offeror certifies that the following supplies qualify as "designated country end products" as that term is defined in the clause entitled "Buy American Act—Trade Agreements Act—Balance of Payments Program":

(Insert line item numbers)

(2) The offeror certifies that the following supplies qualify as "Caribbean Basin country end products" as that term is defined in the clause entitled "Buy American Act—Trade Agreements Act—Balance of Payments Program":

(Insert line item numbers)

* * * * *

9. Section 52.225-9 is amended by removing in the title of the clause the date "(APR 1985)" and inserting in its place the date "(MAY 1986)"; by adding alphabetically in paragraph (a) the definition "Caribbean Basin country end product"; and by revising the introductory text of paragraph (a) and (b) to read as follows:

52.225-9 Buy American Act—Trade Agreements Act—Balance of Payments Program.

* * * * *

(a) This clause implements the Buy American Act (41 U.S.C. 10), the Trade Agreements Act of 1979 (19 U.S.C. 2501-2582), and the Balance of Payments Program by providing a preference for domestic end products over foreign end products, except for certain foreign end products which meet

VOL 51 ISS 87 MY 6 1986 UMI

the requirements for classification as designated country end products or Caribbean Basin country end products.

"Caribbean Basin country end product," as used in this clause, means an article that: (1) Is wholly the growth, product, or manufacture of a Caribbean Basin country (as defined in section 25.401 of the Federal Acquisition Regulation (FAR)), or (2) in the case of an article which consists in whole or in part of materials from another country or instrumentality, has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed. The term includes services (except transportation services) incidental to its supply; provided that the value of those incidental services does not exceed that of the product itself. It does not include service contracts as such. The term *excludes* products that are excluded from duty free treatment for Caribbean countries under the Caribbean Basin Economic Recovery Act (19 U.S.C. 2703(b)). These exclusions presently consist of (i) textiles and apparel articles that are subject to textile agreements; (ii) footwear, handbags, luggage, flat goods, work gloves, and leather wearing apparel not designated as eligible articles for the purpose of the Generalized System of Preferences under title V of the Trade Act of 1974; (iii) tuna, prepared or preserved in any manner in airtight containers; (iv) petroleum, or any product derived from petroleum; and (v) watches and watch parts (including cases, bracelets and straps), of whatever type including, but not limited to, mechanical, quartz digital or quartz analog, if such watches or watch parts contain any material that is the product of any country to which the Tariff Schedule of the United States (TSUS) column 2 rates of duty apply.

* * * * * *

(b) The Contractor agrees to deliver under this contract only domestic end products unless, in its offer, it specifies delivery of foreign end products in the provision entitled "Buy American Act—Trade Agreements Act—Balance of Payments Program Certificate." An offer certifying that a designated country end product or a Caribbean Basin country end product will be supplied requires the Contractor to supply a designated country end product or a Caribbean Basin country end product or, at the Contractor's option, a domestic end product. Contractors may not supply a foreign end product with a total value of $. . . *[Contracting Officers shall insert the dollar threshold amount distributed through agency procedures in accordance with FAR 25.402(a)]* or more unless the foreign end product is a designated country end product or a Caribbean Basin country end product (see FAR 25.401), or unless a waiver is granted under section 302 of the Trade Agreements Act of 1979 (see FAR 25.402(c)).

Airworthiness Directives: Pratt & Whitney Canada (PWC) PT6A-42 Turboprop Engines; Final Rule

VOL 51 ISS 87 MY 6 1986 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-ANE-29; Amdt. 39-5266]

Airworthiness Directives: Pratt & Whitney Canada (PWC) PT6A-42 Turboprop Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires the removal and replacement of the PT6A-42 first stage compressor hub Part Number (P/N) 3030356 at or before 5,000 cycles in accordance with PWC Service Bulletin (SB) 3002, Revision 12. The AD is needed to prevent first stage compressor hub failure and possible engine failure.

DATES: Effective June 5, 1986.

Compliance schedule—as prescribed in body of AD.

Incorporation by reference—approved by the Director of the Federal Register effective June 5, 1986.

ADDRESSES: The applicable SB may be obtained from Pratt & Whitney Canada, Box 10, Longueuil, Quebec, Canada J4K 4X9.

A copy of the SB is contained in Rules Docket Number 85-ANE-29, in the Office of the Regional Counsel, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Diane Kirk, Engine Certification Branch, ANE-142, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7082.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include an AD which requires the removal and replacement of the first stage compressor hub on certain PT6A-42 turboprop engines was published in the **Federal Register** on November 18, 1985 (50 FR 12172). The FAA has determined that the originally published low cycle fatigue (LCF) life limit for the stage 1 compressor hub P/N 3030356 on certain PWC PT6A-42 turboprop engines must be adjusted downward based on a re-analysis by PWC. This action is required to assure against hub and possible engine failures.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received.

The commenter suggested that a list of applicable engine serial numbers be included for ease of locating the subject hubs. The FAA has added the engine serial numbers as suggested.

Conclusion

The FAA has determined that this regulation involves 803 engines installed on Beech Super King Air B200T and B200CT Aircraft. The operator will receive financial credit for the subject hub on a pro-rated basis during engine overhaul. These aircraft are not operated by small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT"**.

List of Subjects in 14 CFR Part 39

Engines, Air Transportation, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulation (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12 1983); and 14 CFR 11.89.

2. By adding to § 39.13 the following new AD:

Pratt & Whitney Canada: Applies to Pratt & Whitney Canada (PWC) PT6A-42 turboprop engines.

Compliance is required as indicated unless already accomplished.

To prevent first stage compressor hub failure, and possible engine failure, accomplish the following:

Remove from service Part Number(P/N) 3030356 first stage compressor hub on PWC Engine Model PT6A-42 with engine Serial Numbers 93001 thru 93804 inclusive at or before 5,000 total cycles in accordance with PWC Service Bulletin (SB) 3002, Revision 12, dated November 9, 1983, or FAA approved equivalent.

Note.—The 15,000 hour life limit remains unaffected by this airworthiness directive (AD).

Aircraft may be ferried in accordance with the provisions of FAR 21.197 and 21.199 to a base where the AD can be accomplished.

PWC SB 3002, Revision 12, dated November 9, 1983, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552 (a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to Pratt & Whitney Canada, Longueuil, Quebec, Canada, J4K-4X9. This document also may be examined at the Office of the Regional Counsel, Rules Docket 85-ANE-29, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

This amendment becomes effective on June 5, 1986.

Issued in Burlington, Massachusetts, on March 21, 1986.

Clyde DeHart, Jr.

Acting Director, New England Region.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 88
Wednesday, May 7, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 210, 225, and 226

Meat Alternates Used in Child Nutrition Programs

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule amends regulations governing the meal pattern requirements for the National School Lunch Program, Summer Food Service Program and Child Care Food Program to allow the use of nuts and seeds and nut and seed butters as meat alternates. Peanut butter has always been included as a meat alternate in the Child Nutrition Programs. However, despite their nutritional comparability to peanut butter and other authorized meat alternate items, nuts and seeds and other nut and seed butters are not currently recognized as making a contribution toward child nutrition meal pattern requirements. With the changing trend in food habits, participants in the Child Nutrition Programs have requested that the list of allowable meat alternates be expanded to accommodate these changes. The Department is issuing this rule in response to these requests, in an effort to establish more consistent crediting standards and to provide increased flexibility in menu planning. This final rule allows peanuts, soynuts, tree nuts such as walnuts (excluding acorns, chestnuts, and coconuts), and seeds (that are nutritionally comparable to meat or other meat alternates) to fulfill: (1) No more than one-half of the meat/meat alternate requirement for lunch/supper patterns for all Child Nutrition Programs; and (2) all of the meat/meat alternate requirement for the supplemental food (snack) patterns for the child care and summer programs. Additionally, this rule allows peanut butter and other nut and seed butters to fulfill all of the meat/meat alternate requirement for all Child Nutrition Programs.

EFFECTIVE DATE: June 6, 1986.

FOR FURTHER INFORMATION CONTACT: Alberta C. Frost, Director, Nutrition and Technical Services Division, Food and Nutrition Service, USDA, 3101 Park Center Drive, Alexandria, Virginia 22302, (703) 756-3556.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Executive Order 12291 and has been classified nonmajor because it does not meet any of the three criteria of the Executive Order. It will not have an annual effect on the economy of $100 million, will not cause a major increase in costs or prices, and will not have a significant adverse effect on competition, employment, investment, productivity, innovation or on the ability of United States based enterprises to compete with foreign based enterprises in domestic or export markets. This rule provides greater flexibility to schools and institutions participating in the Child Nutrition Programs, rather than imposing more restrictive requirements upon them. The overall types and frequency of service of foods used in the Child Nutrition programs should not be significantly affected by this rule. Nuts and seeds and nut and seed butters are currently served as "other foods" which are used to complement meal pattern requirements in the Child Nutrition Programs to meet regional and ethnic food preferences.

This rule has also been reviewed with regard to the requirements of the Regulatory Flexibility Act (5 U.S.C. 601-612). The Administrator of the Food and Nutrition Service has certified that this rule will not have a significant economic impact on a substantial number of small entities.

These programs are listed in the Catalog of Federal Domestic Assistance under Nos. 10.555, 10.556, and 10.559 and are subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials. (7 CFR Part 3015, Subpart V, 49 FR 22675, May 31, 1984.)

No new collection or recordkeeping requirements are included which require Office of Management and Budget (OMB) approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520). The programs being amended are approved by OMB under the following control numbers: National School Lunch Program, 0584-0006; Summer Food Service Program, 0584-0057; and Child Care Food Program, 0584-0055.

Background

The National School Lunch Act and Child Nutrition Act of 1966 require that the Secretary of Agriculture set minimal nutritional requirements for meals served in the Child Nutrition Programs. Meal pattern requirements have been established for specific types and amounts of food to be served in each of the programs that the Department administers. These meal patterns are designed to provide a flexible framework for foodservice managers to use in planning nutritious meals and snacks from a wide variety of foods and within a diversity of regional, cultural, and ethnic food preferences. From time to time, the Department has revised these meal patterns to reflect new knowledge about food consumption habits and the food preferences of children, as well as nutritional needs.

The meal pattern requirements for the National School Lunch Program, Summer Food Service Program, and Child Care Food Program specify amounts of various food items to be served from four basic food components. One of these is the meat/meat alternate component. In addition to meat, poultry, and fish, various meat alternates are allowed to be used to fulfull all or part of the requirement for this component. Currently approved meat alternates are cheese, cooked dry beans or peas, eggs, and peanut butter. The Department authorized specific quantities of these foods as meat alternates based on their protein and vitamin/mineral content (e.g. iron) as compared to meat and practicality of serving size. In approving these foods as meat alternates, the Department also considered the meal pattern requirement for lunch/supper that foods used to fulfill the meat/meat alternate component be served in the main dish or in the main dish and one other menu item. Consistent with this requirement, the Department limited allowable meat alternates to those foods

VOL 51 ISS 88 MY 7 1986 UMI

that were not only nutritionally comparable to meat, but were also traditionally recognized as main dish items. This recognition was based on knowledge of food consumption habits and food preferences at the time.

Food consumption habits and food preferences are influenced by many cultural, ethnic, economic, religious, and environmental factors and are constantly changing. These changes can affect how foods are used in meals. Nuts and seeds and a variety of nut and seed butters are now playing a more conventional and popular role in meals as or in main dish items. In view of these changes and the nutritional value of nuts and seeds and their butters, on December 6, 1985 (50 FR 49933), the Department issued a proposed rule to add nuts and seeds and nut and seed butters to the list of acceptable meat alternates for the Child Nutrition Programs. The proposal also solicited comments on allowing yogurt and tofu as meat alternates.

Comment Analysis

The Department provided the general public with 45 days to comment on the proposed rule. On January 21, 1986, the comment period closed. During the comment period, 181 comments were received from a variety of sources, including State educational agencies, foodservice personnel, teachers, medical and nutrition professionals, food industry associations, universities, advocacy groups, and the general public. Of the 181 comments received, 148 were in favor of and 19 were opposed to the use of nuts and seeds and nut and seed butters in the Child Nutrition Programs. Additionally, 11 comments only addressed the use of tofu and yogurt as meat alternates, and 3 commenters did not understand or did not address the issues in the proposal.

Comments in Favor

In general, commenters favoring the proposal agreed that allowing nuts and seeds and their butters as meat alternates is nutritionally sound and provides increased flexibility in menu planning to meet local preferences. Several of these commenters stated that it is time that nuts and seeds and their butters are recognized for their contribution to the diet in the Child Nutrition Programs. Many commenters also stated that nutritionally it has been impossible to defend the allowance of peanut butter as a meat alternate, when not allowing the same for peanuts and other nuts and seeds and their butters. Although favoring the proposal, 13 commenters expressed concerns about nuts being served to young children due to possible problems with choking. To prevent the problem of children choking on nuts, the Department is following recommendations cited in the *Journal of the American Medical Association*, May 4, 1984, Volume 25, No. 17, page 2231. The Department will provide information to School Food Authorities on this subject and recommend product modification. Guidance material will contain recommendations on the age to introduce whole nuts and seeds into children's diets, as well as encouraging the use of ground or chopped nuts and seeds for children under age 5. The guidance material also will include information on choking problems children have with other types of food.

Comments in Opposition

In general, commenters opposing the proposal were concerned that nuts and seeds and their butters are not nutritionally comparable to meat. Several of these commenters were concerned about the frequency of use of meat alternates and a decrease in the use of meat in the Child Nutrition Programs.

As stated in the proposed rule, the protein level of peanuts is comparable to meat, and soynuts are greater in protein value than meat. The Department also recognized in the proposal that some tree nuts and seeds and their butters do not have a protein level comparable to meat. However, with a few exceptions, all commonly available tree nuts and seeds and their butters have a protein level comparable to other currently approved meat alternates and most are comparable to or greater in iron value than meat. These exceptions include acorns, chestnuts, and coconuts which are excluded from this rule. Pecans and macadamia nuts do have a slightly lower protein value than other meat alternates. However, they are good sources of iron. Studies have shown that meeting the protein requirement of children in the Child Nutrition Programs is not a problem. However, meeting the iron requirement has been difficult. Allowing nuts and seeds and their butters as meat alternates will provide additional foods to be used which are good sources of iron. Although the meat/meat alternate component of the meal pattern supplies the major contribution of protein and iron to the diet, it is not designed to be the only component that contributes these nutrients. The requirements and recommendations of the four food components are designed to provide nutritious and well-balanced meals to each child. The nutrients of the lunch or supper, averaged over a period of time, should approximate one-third of the Recommended Dietary Allowance for children of each group. Some commenters questioned our basis for the nutritional comparison between nuts, seeds, and their butters and meat or other meat alternates. The basis used for the nutritional comparability is determined by the grams of protein and iron per one ounce of product to one ounce of cooked lean meat or equivalent serving size for other meat alternates. This comparison is consistent with the basis used for determining nutritional comparability between meat and other meat alternates.

The Department does not expect this rule to significantly affect the frequency of service of meat or the quantity of meat used in the Child Nutrition Programs. With the limitations placed on the service of nuts and seeds in this rule, it is most likely that these foods will be used in small quantities: (1) In recipes to meet local and ethnic food preferences; (2) to add variety and additional choices to menus; and (3) to increase the quantity of meat/meat alternate served to junior and senior high school students. Additionally, since the inception of the Child Nutrition Programs, peanut butter has been allowed as a meat alternate. Therefore, it is expected that other nut and seed butters allowed by this rule will be used as an alternate to peanut butter and not in place of meat.

Discussion

The following is a discussion of comments received on specific issues surrounding the service of nuts and seeds and their butters in the Child Nutrition Programs. Additionally, comments concerning the use of tofu and yogurt as meat alternates are discussed. It should be noted that a thorough understanding of the issues presented below requires reference to the December 6, 1985, proposal.

1. *Allow nuts and seeds to meet no more than one-half of the meat/meat alternate requirement for lunch/supper patterns and the full requirement for the supplemental food patterns.* A total of 134 commenters favored limiting the use of nuts and seeds to meet no more than one-half of the meat/meat alternate requirement for lunch/supper. In general, these commenters supported the Department's position which would maintain the service of a traditionally recognized entree. Several of these commenters also stated that this limitation would avoid impractical serving sizes. Only 11 commenters opposed this provision and favored allowing nuts and seeds to fulfill all of the meat/meat alternate requirement at the option of local foodservice personnel. No commenters expressed opposition to allowing nuts and seeds to meet the full requirement for the supplemental food (snack) patterns.

The provision on the quantity of nuts and seeds allowed to meet child nutrition meal pattern requirements remains unchanged in the final rule. This supports the meal pattern requirement for lunch/supper that the meat/meat alternate component be served in the main dish or in the main dish and one other menu item.

2. *Proposal—Allow peanut butter and other nut and seed butters to fullfill no more than one-half of the meat/meat alternate requirement for the school lunch and child care lunch/supper pattern and the full requirement for the supplemental food (snack) patterns and summer lunch/supper pattern.*

Alternate Proposal—Allow peanut butter and other nut and seed butters to fulfill all of the meat/meat alternate requirement for all Child Nutrition Program meal patterns.

Comments in favor of allowing nut and seed butters to fulfill no more than one-half of the meat/meat alternate requirement for the school lunch and child care lunch/supper pattern numbered 116. In general, these commenters felt that this limitation would provide for a practical serving size and consistency with the proposal on nuts and seeds. Of the 116 commenters in favor, 18 wanted an exception to keep peanut butter at full credit as it has always been. Additionally, 12 commenters wanted the summer program to be consistent with other programs.

A total of 28 commenters favored the alternate proposal to allow nut and seed butters to fulfill the entire meat/meat alternate requirement for all Child Nutrition Program meal patterns. In general, the commenters supported full credit because maintaining the current requirement for peanut butter would minimize confusion. They stated that it would be less confusing to allow full credit for nut and seed butters for all meal patterns than to try to monitor exceptions. Many also felt that limiting peanut butter to one-half credit would make it difficult for foodservice personnel to plan acceptable menus using this food.

More than 30 percent of the comments in favor of nut and seed butters in the Child Nutrition Programs addressed specific concerns about crediting. These comments favored consistency in all programs and/or consistency with the current policy that allows peanut butter to fulfill the entire meat/meat alternate requirement.

In view of the 18 commenters who favored keeping peanut butter at full credit, the 12 commenters who favored consistency of the summer program with other programs and the 28 commenters who favored the alternate proposal, the Department feels that adopting the alternate proposal (nut and seed butters at full credit) is warranted. Since other nut and seed butters are nutritionally equivalent to peanut butter, there is no basis to differentiate peanut butter from other nut and seed butters. Furthermore, nut and seed butters are expected to be used in limited amounts, as peanut butter has been, mainly in the summer program and when off-site bag lunches are served. The Department feels that the alternate proposal will ease the understanding of crediting issues by having consistency in crediting nut and seed butters in all programs. Therefore, the final rule allows nut and seed butters to fulfill all of the meat/meat alternate requirement for all child nutrition meal pattern requirements.

3. *Comments on allowing tofu and yogurt as meat alternates in the Child Nutrition Programs.* Of the total comments received, 58 percent addressed tofu and 56 percent addressed yogurt being allowed as a meat alternate. Most of the commenters stated that they either favored or opposed these issues. The comments did not provide any new nutritional research data on tofu and yogurt nor any sanitation information regarding the control of bacteria in tofu. The Department will continue to study these issues and would like to express its appreciation to those commenters who took time to respond.

Breakfast Program

This final rule does not amend the meal pattern requirements for the School Breakfast Program (7 CFR Part 220) and the summer and child care breakfast programs because the service of meat/meat alternates is a recommendation and not a requirement for these programs. However, nuts and seeds and nut and seed buttters as defined in this rule, may also be used as meat alternates in the breakfast programs.

Final Rule

In response to all comments received on the proposed rule, only one substantive revision has been made in the final rule as referenced under specific issues for nut and seed butters. This revision allows nut and seed butters to fulfill the entire meat/meat alternate requirement for all Child Nutrition Programs. Additionally, minor revisions have been made to provide clarity. Footnotes presented in the proposed rule have been rearranged and incorporated into regulatory text as appropriate, and the meal pattern charts appear in their entirety.

List of Subjects

7 CFR Part 210

Food assistance programs, National School Lunch Program, Commodity School Program, Grant programs—social programs, Nutrition, Children, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 225

Food assistance program, Grant programs—health, Infant and children, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 226

Daycare, Food assistance programs, Grant programs—health, Infants and children, Reporting and recordkeeping requirements, Surplus agricultural commodities.

Accordingly, Parts 210, 225, and 226 are amended as follows:

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

1. The authority citation for Part 210 continues to read as follows:

Authority: Secs. 2–12, 60 Stat. 230, as amended; sec. 10, 80 Stat. 889, as amended; 84 Stat. 270; 42 U.S.C. 1751–1760, 1779, unless otherwise noted.

2. In § 210.10:

a. Paragraph (a)(2)(ii)(A) is redesignated as paragraph (a)(2)(ii)(A)(*1*) and a new paragraph (a)(2)(ii)(A)(*2*) is added;

b. The School Lunch Pattern table is revised.

The revisions and additions read as follows:

§ 210.10 Requirements for lunches.

(a) * * *

(2) * * *

(ii) (A) * * *

(2) Nuts and seeds and their butters listed in program guidance are nutritionally comparable to meat or other meat alternates based on available nutritional data. Acorns, chestnuts, and coconuts shall *not* be used as meat alternates due to their low protein content. Nut and seed meals or flours shall *not* be used as a meat alternate except and defined in this part under Appendix A: Alternate Foods for

Meals. As noted in the School Lunch Pattern table of this section, nuts or seeds may be used to meet no more than one-half of the meat/meat alternate requirement. Therefore, nuts and seeds must be combined with another meat/meat alternate to fulfill the requirement.

* * * * *

SCHOOL LUNCH PATTERN—PER LUNCH MINIMUMS

Components	Minimum quantities	Group I, age 1–2 (preschool)	Group II, age 3–4 (preschool)	Group III, age 5–8 (K–3)	Group IV, age 9 and older (4–12)	Recommended quantities, group V, 12 years and older (7–12 [2])
Milk	Unflavored, fluid lowfat, skim, or buttermilk must be offered [1]	½ cup (8 fl. oz.)	¾ cup (6 fl. oz.)	½ pint (8 fl.oz.)	½ pint (8 fl.oz.)	½ pint (8 fl.oz.)
Meat or meat alternate (quantity of the edible portion as served).	Lean meat, poultry, or fish	1 oz.	1½ oz.	1½ oz.	2 oz.	3 oz.
	Cheese	1 oz.	1½ oz.	1½ oz.	2 oz.	3 oz.
	Large egg	½	¾	¾	1	1½.
	Cooked dry beans or peas	¼ cup	⅜ cup	⅜ cup	½ cup	¾ cup.
	Peanut butter or soynut butter or other nut or seed butters.	2 Tbsp	3 Tbsp	3 Tbsp	4 Tbsp	6 Tbsp.
	Peanuts or soynuts of tree nuts or seeds [3] or an equivalent quantity of any combination of the above meat/meat alternates.	½ oz. [4] = 50%	¾ oz. [4] = 50%	¾ oz. [4] = 50%	1 oz. [4] = 50%	1½ oz. [4] = 50%.
Vegetable or fruit	2 or more servings of vegetable or fruit or both	½ cup	½ cup	½ cup	¾ cup	¾ cup.
Bread or bread alternate (servings per week).	Must be enriched or whole-grain. At least ½ serving [5] for group I or one serving [5] for groups II–V must be served daily.	5	8	8	8	10.

[1] If a school serves another form of milk (whole or flavored), it must offer its children unflavored fluid lowfat milk, skim milk, or buttermilk as a beverage choice.
[2] The *minimum* portion sizes for these children are the portion sizes for group IV.
[3] Tree nuts and seeds that may be used as meat alternates are listed in program guidance.
[4] No more than 50% of the requirements shall be met with nuts or seeds. Nuts or seeds *shall* be combined with another meat/meat alternate to fulfill the requirement. For purposes of determining combinations, 1 oz. of nuts or seeds is equal to 1 oz. of cooked lean meat, poultry or fish.
[5] Serving 1 slice of bread; or ½ cup of cooked rice, macaroni, noodles, other pasta products, other cereal product such as bulgar or corn grits; or as stated in the *Food Buying Guide for Child Nutrition Programs* (PA 1331) for biscuits, rolls, muffins, and similar products.

* * * * *

PART 225—SUMMER FOOD SERVICE PROGRAM

1. The authority citation for Part 225 continues to read as follows:

Authority: Secs. 803, 807, 809, 816, and 817, Pub. L. 97–35, secs. 203 and 206, Pub. L. 96–499, secs. 5, 7, 10, Pub. L. 95–627, 95 Stat. 3603 (42 U.S.C. 1771); sec. 2, Pub. L. 95–166, 91 Stat. 1325 (42 U.S.C. 1761); Sec. 7, Pub. L. 91–248, 84 Stat. 211 (42 U.S.C. 1859a), unless otherwise noted.

§ 225.20 [Amended]

2. In § 225.20:

a. Paragraph (b)(2), lunch or supper meal pattern, and paragraph (b)(3), supplemental food pattern, are revised;

b. Paragraph (c) is amended by adding a new paragraph (5).

The revisions and additions read as follows:

§ 225.20 Meal Service Requirements.

* * * * *

(b) * * *

Lunch or Supper

(2) The minimum amounts of food components to be served as lunch or supper are as follows:

Food components	Minimum amount
Meat and Meat Alternates	
Lean meat or poultry or fish	2 oz.
or	
Cheese	2 oz.
or	
Eggs	1 large egg.
or	
Cooked dry beans or peas	¼ [1] cup.
or	
Peanut butter or soynut butter or other nut or seed butters.	4 tbsp.
or	
Peanuts or soynuts or tree nuts or seeds [2]	1 oz. [3] = 50%.
or	
An equivalent quantity of any combination of the above meat/meat alternates	
Vegetables and Fruits	
Vegetable(s) and/or fruit(s) [4]	¾ cup total.
Bread and Bread Alternates [5]	
Bread	1 slice.
or	
Cornbread, biscuits, rolls, muffins, etc.	1 serving [6]
or	
Cooked pasta or noodle products	¼ cup.
or	
Cooked cereal grains of an equivalent quantity of any combination of bread/bread alternate.	¼ cup.
Milk	
Milk, fluid, served as a beverage	1 cup (½ pint, 8 fl. oz.).

[1] For purposes of the requirements outlined in this subsection, a cup means a standard measuring cup.
[2] Tree nuts and seeds that may be used as meat alternates are listed in program guidance.
[3] No more than 50% of the requirement shall be met with nuts or seeds. Nuts or seeds *shall* be combined with another meat/meat alternate to fulfill the requirement. For purposes of determining combinations, 1 oz. of nuts or seeds is equal to 1 oz. of cooked lean meat, poultry or fish.
[4] Serve 2 of more kinds of vegetable(s) and/or fruit(s) or a combination of both. Full-strength vegetable or fruit juice may be counted to meet not more than one-half of this requirement.
[5] Bread, pasta or noodle products, and cereal grains (such as rice, bulgur, or corn grits) shall be whole-grain or enriched; cornbread, biscuits, rolls, muffins, etc., shall be made with whole-grain or enriched meal or flour, cereal shall be whole-grain or enriched or fortified.
[6] Serving sizes and equivalents will be in guidance materials to be distributed by FNS to State agencies.

Supplemental Food

(3) The minimum amounts of food components to be served as supplemental food are as follows: Select two of the following four components. (Juice may not be served when milk is served as the only other component.)

Food components	Minimum amount
Meat and Meat Alternates	
Lean meat or poultry or fish	1 oz.
or	
Cheese	1 oz.
or	
Eggs	1 large egg.
or	
Cooked dry beans or peas	1/2 [1] cup.
or	
Peanut butter or soynut butter or other nut or seed butters.	2 tbsp.
or	
Peanuts or soynuts or tree nuts or seeds [2]	1 oz.
or	
An equivalent quantity of any combination of the above meat/meat alternates.	
Vegetables and Fruits	
Vegetable(s) and/or fruit(s)	3/4 cup.
or	
Full-strength vegetable or fruit juice or an equivalent quantity of any combination of vegetable(s), fruit(s), and juice.	3/4 cup (6 fl. oz.).

Food components	Minimum amount
Bread and Bread Alternates [3]	
Bread	1 slice.
or	
Cornbread, biscuits, rolls, muffins, etc [4]	1 serving.
or	
Cold dry cereal [5]	3/4 cup or 1 oz.
or	
Cooked cereal	1/2 cup.
or	
Cooked pasta or noodle products	1/2 cup.
or	
Cooked cereal grains or an equivalent quantity of any combination of bread/bread alternate.	1/2 cup.
Milk [6]	
Milk, fluid	1 cup (1/2 pint, 8 fl. oz.).

[1] For purposes of the requirements outlined in this subsection, a cup means a standard measuring cup.
[2] Tree nuts and seeds that may be used as meat alternates are listed in program guidance.
[3] Bread, pasta or noodle products, and cereal grains (such as rice, bulgur, or corn grits shall be whole-grain or enriched; cornbread, biscuits, rolls, muffins, etc., shall be made with whole-grain or enriched meal or flour, cereal shall be whole-grain or enriched or fortified.
[4] Serving sizes and equivalents will be in guidance materials to be distributed by FNS to State agencies.
[5] Either volume (cup) or weight (oz.), whichever is less.
[6] Milk should be served as a beverage or on cereal, or used in part for each purpose.

(c) * * *

(5) Nuts and seeds and their butters listed in program guidance are nutritionally comparable to meat or other meat alternates based on available nutritional data. Acorns, chestnuts, and coconuts shall *not* be used as meat alternates due to their low protein content. Nut and seed, meals or flours shall *not* be used as a meat alternate except as defined in this section under paragraph (c)(3) and in this part under Appendix A: Alternate Foods for Meals. As noted in paragraph (b)(2) of this section, nuts or seeds may be used to meet no more than one-half of the meat/meat alternate requirement for lunch or supper. Therefore, nuts or seeds must be combined with another meat/meat alternate to fulfill the requirement. For the supplemental food pattern, nuts or seeds may be used to fulfill all of the meat/meat alternate requirement.

* * * * *

PART 226—CHILD CARE FOOD PROGRAM

1. The authority citation for Part 226 continues to read as follows:

Authority: Secs. 803,810, and 820, Pub. L. 97–35, 95 Stat. 521–535 (42 U.S.C. 1758, 1766); sec. 2, Pub. L. 95–627, 92 Stat. 3603 (42 U.S.C. 1766); sec. 10, Pub. L. 89–642, 80 Stat. 889 (42 U.S.C. 1779), unless otherwise noted.

2. In § 226.20:

a. Paragraph (a)(2)(ii) is redesignated as paragraph (a)(2)(ii)(A) and a new paragraph (a)(2)(ii)(B) is added;

b. Paragraph (a)(3)(ii) is revised;

c. Paragraph (c)(2), lunch or supper pattern, and paragraph (c)(3), supplemental food pattern, are revised.

The revisions and additions read as follows:

§ 226.20 Requirements for Meals.

(a) * * *

(2) * * *

(ii) * * *

(B) Nuts and seeds and their butters listed in program guidance are nutritionally comparable to meat or other meat alternates based on available nutritional data. Acorns, chestnuts, and coconuts shall *not* be used as meat alternates due to their low protein content. Nut or seed meals or flours may be used as an ingredient in a bread/bread alternate, but shall *not* be used as a meat alternate except as defined in this part under Appendix A: Alternate Foods for Meals, and in program guidance materials. As noted in paragraph (c)(2) of this section, nuts or seeds may be used to meet no more than one-half of the meat/meat alternate requirements. Therefore, nuts or seeds must be combined with another meat/meat alternateto fulfill the requirement;

* * * * *

(3) * * *

(ii) A serving of meat or meat alternate. Nuts and seeds and their butters listed in program guidance are nutritionally comparable to meat or other meat alternates based on available nutritional data. Acorns, chestnuts, and coconuts are excluded and shall *not* be used as meat alternates due to their low protein content. Nut or seed meals or flours shall *not* be used as a meat alternate except as defined in this part under Appendix A: Alternate Foods for Meals;

* * * * *

(c) * * *

Lunch or Supper

(2) The minimum amounts of food components to be served as lunch or supper as set forth in paragraph (a)(2) of this section are as follows:

Food components	Age 1 up to 3	Age 3 up to 6	Age 6 up to 12 [1]
Milk			
Milk, fluid	½ cup [2]	¾ cup	1 cup.
Vegetables and Fruits [3]			
Vegetable(s) and/or fruit(s)	¼ cup total	½ cup total	¾ cup total.
Bread and Bread Alternates [4]			
Bread	½ slice	½ slice	1 slice.
or			
Cornbread, biscuits, rolls muffins, etc. [5]	½ serving	½ serving	1 serving.
or			
Cooked pasta or noodle products	¼ cup	¼ cup	½ cup.
or			
Cooked cereal grains or an equivalent quantity of any combination of bread/bread alternate.			
Meat and Meat Alternates			
Lean meat or poultry or fish [6]	1 oz	1 ½ oz	2 oz.
or			
Cheese	1 oz	1 ½ oz	2 oz.
or			
Eggs	1 egg	1 egg	1 egg.
or			
Cooked dry beans or peas	¼ cup	⅜ cup	½ cup.
or			
Peanut butter or soynut butter or other nut or seed butters	2 tbsp	3 tbsp	4 tbsp.
or			
Peanuts or soynuts or tree nuts or seeds [7]	½ oz [8] = 50%	¾ oz [8] = 50%	1 oz [8] = 50%.
or			
An equivalent quantity of any combination of the above meat/meat alternates.			

[1] Children age 12 and up may be served adult size portions based on the greater food needs of older boys and girls, but shall be served not less than the minimum quantities specified in this section for children age 6 up to 12.
[2] For purposes of the requirements outlined in this subsection, a cup means a standard measuring cup.

[1] Serve 2 or more kinds of vegetable(s) and/or fruit(s). Full-strength vegetable or fruit juice may be counted to meet not more than one-half of this requirement.
[2] Bread, pasta or noodle products, and cereal grains shall be wholegrain or enriched; cornbread, biscuits, rolls, muffins, etc., shall be made with whole-grain or enriched meal or flour.
[3] Serving sizes equivalents to be published in guidance materials by FNS.
[4] Edible portion as served.
[5] Tree nuts and seeds that may be used as meat alternates are listed in program guidance.
[6] No more than 50% of this requirement shall be met with nuts or seeds. Nuts or seeds shall be combined with another meat/meat alternate to fulfill the requirement. For purpose of determining combinations, 1 oz. of nuts or seeds is equal to 1 oz. of cooked lean meat, poultry or fish

Supplemental Food

(3) The minimum amounts of food components to be served as supplemental food as set forth in paragraph (a)(3) of this section are as follows. Select two of the following four components. (Juice may not be served when milk is served as the only other component.)

Food components	Age 1 up to 3	Age 3 up to 6	Age 6 up to 12
Milk			
Milk, fluid	½ cup [8]	½ cup	1 cup.
Vegetables and Fruits			
Vegetable(s) and/or fruit(s)	¼ cup	½ cup	½ cup.
or			
Full-strength vegetable or fruit juice or an equivalent quantity of any combination of vegetable(s), fruit(s) and juice.	¼ cup	½ cup	½ cup
Bread and Bread Alternates [9]			
Bread	½ slice	½ slice	1 slice.
or			
Cornbread, biscuits, rolls, muffins, etc [4]	½ serving	½ serving	1 serving.
or			
Cold dry cereal [5]	¼ cup or ½ oz.	½ cup or ½ oz.	¾ cup or 1 oz.
or			
Cooked cereal	¼ cup	¼ cup	½ cup.
or			
Cooked pasta or noodle products	¼ cup	½ cup	½ cup.
or			
Cooked cereal grains or an equivalent quantity of any combination of bread/bread alternate	¼ cup	½ cup	½ cup.
Meat and Meat Alternates			
Lean meat or poultry or fish [6]	½ oz	½ oz	1 oz.
or			
Cheese	½ oz	½ oz	1 oz.
or			
Eggs	½ egg	½ egg	1 egg.
or			
Cooked dry beans or peas	¼ cup	¼ cup	½ cup.
or			
Peanut butter or soynut butter or other nut or seed butters	1 tbsp.	1 tbsp.	2 tbsp.
or			
Peanuts or soynuts or tree nuts or seeds [7]	½ oz	½ oz	1 oz.
or			
An equivalent quantity of any combination of the above meat/meat alternates.			

[1] Children age 12 and up may be served adult size portions based on the greater food needs of older boys and girls, but shall be served not less than the minimum quantities specified in this section for children age 6 up to 12.
[2] For purposes of the requirements outlined in this paragraph, a cup means a standard measuring cup.
[3] Bread, pasta or noodle products, and cereal grains shall be wholegrain or enriched; cornbread, biscuits, rolls, muffins, etc., shall be made with wholegrain or enriched meal or flour; cereal shall be wholegrain or enriched or fortified.
[4] Serving size and equivalents to be published in guidance materials by FNS.
[5] Either volume (cup) or weight (oz.), whichever is less.
[6] Edible portion as served.
[7] Tree nuts and seeds that may be used as meat alternates are listed in program guidance.

(42 U.S.C. 1758, 1761, 1766)

Dated: May 1, 1986.

John W. Bode,

Assistant Secretary for Food and Consumer Services.

[FR Doc. 86-10225 Filed 5-6-86; 8:45 am]

BILLING CODE 3410-30-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 918

[Georgia Peach Regulation 3; Amendment 3]

Fresh Peaches Grown in Georgia; Change in Quality Requirements for 1986 and Subsequent Seasons

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule and opportunity to file comments.

SUMMARY: This interim final rule adds a tolerance for decay to the maturity, size, and inspection requirements currently in effect for Georgia peaches to assure that only good quality peaches will be available for fresh market shipment. The action recognizes the expected composition of the 1986 crop, the current and prospective marketing conditions for Georgia peaches, and is in the interest of producers and consumers.

DATES: Interim final rule effective May 1, 1986. Comments which are received by June 6, 1986 will be considered prior to issuance of the final rule.

ADDRESS: Comments should be sent to: Docket Clerk, F&V, AMS, Room 2085–S, U.S. Department of Agriculture, Washington, DC 20250. Two copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250. Telephone: (202) 447–5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1521–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such action in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities for their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that about 35 handlers of Georgia peaches under the marketing order for fresh peaches grown in Georgia will be subject to regulation during the course of the current season and that the majority of this group may be classified as small entites. While regulations issued under this order impose some costs on affected handlers and the number of such persons may be substantial, the added burden on small entities, if present at all, is not significant.

This interim final rule is issued under the marketing agreement and Order No. 918, both as amended (7 CFR Part 918), regulating the handling of peaches grown in Georgia. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). This action is based on a recommendation and information submitted by the Georgia Peach Industry Committee. That committee, established under the marketing agreement and order, works with the Department in administering the program.

Shipments of Georgia peaches, except peaches in bulk to adjacent markets (The States of Florida, Alabama, Tennessee, North Carolina, South Carolina, Mississippi, and the portion of Louisiana which is east of the Mississippi River) currently are required to be mature as provided in § 918.400, and not be smaller than 1⅝ inches in diameter, except that not more than 10 percent, by count, of such peaches in any lot, and not more than 15 percent, by count, of such peaches in any container in such lot may be smaller than 1⅝ inches in diameter. All such peaches must be inspected and certified as meeting these requirements prior to shipment.

In making its recommendation, the Committee considered supply and market conditions and other factors affecting the need for and type of regulations suitable for the 1986 Georgia peach crop. On the basis of these considerations, the committee recommended continuation of the currently prescribed maturity, size, and inspection requirements and the establishment of a one-percent tolerance for decay.

This season, decay is expected to be unsually severe, and the overall quality of the crop is expected to be lower because of adverse weather conditions during the growing season. Hence, this action will assure that only good quality peaches will be available for fresh market shipment. Such shipments are expected to begin about May 1. The recommended requirements are not expected to eliminate any appreciable quantity of fresh peaches from commercial channels other than low quality fruit.

The 1986 regulations are designed to assure the shipment of suitable quality peaches consistent with the expected composition of the crop, the expected supply, and current and prospective demand conditions. They are expected to maximize benefits to producers and consumers by preventing the shipment of undesirable peaches.

The Georgia peach production area is one of the first each season to market an appreciable amount of fresh peaches. During the early weeks of the season there is tendency to ship immature and smaller size fruit. Also, last season some problems with decay surfaced during the shipping season. Shipment of such fruit early in the season tends to adversely affect consumer demand, with resultant depressing effects on grower returns.

The 1986 crop of Georgia peaches is expected to total 2,000 equivalent trailer loads (based on 786 bushels per load) as compared to 1,433 equivalent trailer loads in 1985. Shipments of Georgia peaches compete with peach shipments from adjoining states. The recommended requirements for shipments of Georgia peaches are necessary to provide consumers with suitable quality peaches and promote orderly marketing of shipments from the 1986 crop. The committee unanimously adopted and has submitted to the Secretary a marketing policy for the 1986 season Georgia peach crop including an analysis of supply, demand, and other factors having a bearing on the marketing of the crop.

The regulation currently in effect (Peach Regulation 3, Amendment 2), was issued May 1, 1985 (50 FR 19321), on a continuing basis subject to modification, suspension, or termination upon recommendation by the committee and approval by the Secretary. The regulations for Georgia peaches established by this action, if finalized after the comment period, will continue to be in effect from marketing season to marketing season indefinitely unless modified, suspended, or terminated by the Secretary upon recommendation and information submitted by the committee or other information available to the Secretary. The issuance of seasonal regulations which continue in effect from marketing season to marketing season reflect the fact that such regulations change infrequently from season to season and it is believed unnecessary to issue them for only a single season. In addition, this action could result in a reduction in operational costs to the committee and the government.

Although the seasonal regulations will be effective for an indefinite period, the committee will continue to meet prior to and during each season to consider recommendations for modification, suspension, or termination of the regulatory requirements for Georgia peaches. Prior to making any such recommendations, the committee would submit to the Secretary a marketing policy for the season including an analysis of supply and demand factors having a bearing on the marketing of the crop. Committee meetings are open to the public and interested persons may express their views at these meetings. The Department will review committee recommendations and information submitted by the committee, and other available information, and determine whether modification, suspension, or termination of the regulatory requirements would tend to effectuate the declared policy of the Act.

After consideration of all relevant matter presented, the information and recommendation submitted by the committee, and other available information, it is found that Peach Regulation 3, Amendment 3, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days

VOL 51 ISS 88 MY 7 1986 UMI

after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this interim final rule is based and the effective date necessary to effectuate the declared purposes of the Act. The harvest and shipment of 1986 Georgia peaches is expected to begin soon. Hence, this action must be effective promptly to minimize any inequity among producers or handlers due to different requirements for different parts of the 1986 shipping season. This change in the administrative rules and regulations was recommended by unanimous vote of the committee at an open meeting held April 3, 1986. Information regarding this anticipated action has been disseminated among growers and handlers of peaches in the production area and they have been preparing to conduct their operations in light thereof. Hence, they do not require additional time or notice for preparation. However, because of the future effect of this action, it is appropriate to request comments on the action before finalizing it.

List of Subjects in 7 CFR Part 918

Marketing agreements and orders, Peaches, Georgia.

1. The authority citation for 7 CFR Part 918 continues to read as follows:

Authority. Secs. 1–19, 48 Stat. 31, as amended; U.S.C. 601–674.

2. Section 918.325 is revised to read as follows:

§ 918.325 Peach Regulation 3, Amendment 3.

On and after (May 1, 1986) no handler shall ship peaches unless such peaches are mature as provided in § 918.400, contain no more than one percent decay, and are not smaller than 1⅝ inches in diameter, except that not more than 10 percent, by count, of such peaches in any lot, and not more than 15 percent, by count, of such peaches in any container in such lot, may be smaller than 1⅝ inches in diameter: *Provided*, That peaches shipped to adjacent markets in bulk are exempt from such maturity, decay, and size requirements, and the inspection requirements in § 918.64 shall not apply.

Dated: May 1, 1986.

Thomas R. Clark,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

On page 15311, first column, under "J-50 [Amended]", fourth line, "CA" should be removed.

BILLING CODE 1505-01-M

---

14 CFR Part 95

[Docket No. 24977; Amdt. No. 330]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rule) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFO-230), Air Transportation Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 95 of the Federal Aviation Regulations (14 CFR Part 95) prescribes new, amended, suspended, or revoked IFR altitudes governing the operation of all aircraft in IFR flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as prescribed in Part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference.

The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment is unnecessary, impracticable, and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3)

does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

VOL 51 ISS 88 MY 7 1986 UMI

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 399

[Docket No. 60353-6053]

Amendment to the Commodity Control List; GLV Dollar Value Limit

AGENCY: Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Office of Export Administration published (49 FR 50606-50631, December 31, 1984) a final rule amending the Commodity Control List (CCL). That rule established a new classification category, ECCN 1567A, for certain stored program controlled switching equipment.

The CCL provides a General (export) License GLV value limit on commodities in the list. The GLV value is the maximum value allowed for exporting the commodity without a validated license to the designated Country Groups.

This rule, which neither expands nor limits the provisions of the Export Administration Regulations, corrects the GLV value limit for exports of ECCN 1567A commodities to the People's Republic of China and all destinations in Country Groups QSWYZ. The GLV value was incorrectly stated in the December 31, 1984 rule as being $1,000 for exports to all destinations.

EFFECTIVE DATE: May 7, 1986.

FOR FURTHER INFORMATION CONTACT: John Black or Patti Muldonian, Export Administration, (Telephone (202) 377-2440).

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Written comments (six copies) should be submitted to: Betty Ferrell, Regulations Branch, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule does not contain a collection of information subject to the requirements of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

List of Subjects in 15 CFR Part 399

Exports.

Accordingly, 15 CFR Part 399 of the Export Administration Regulations is amended as follows:

1. The authority citation for 15 CFR Part 399 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. App. 2401 *et seq.*, as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 96-223, 50 U.S.C. 1701 *et seq.*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

2. Supplement No. 1 to § 399.1 (the Commodity Control List) is amended by revising the *GLV $ Value Limit* paragraph for ECCN 1567A (in Commodity Group 5, Electronics and Precision Instruments) to read as follows:

1567A Stored Program Controlled Communication Switching Equipment or Systems and Technology Therefor; and Specially Designed Components Therefor, for the Use of These Equipment or Systems

* * * * *

GLV $ Value Limit: $1,000 for Country Groups T & V, except $0 for the People's Republic of China; $0 for all other destinations.

Dated: April 30, 1986.

Walter J. Olson,

Deputy Assistant Secretary for Export Administration.

Social Security Administration

20 CFR Parts 404 and 416

[Regs. No. 4 and 16]

Supplemental Security Income for the Aged, Blind, and Disabled; Determining Disability and Blindness Frequency and Notice of Continuing Eligibility Reviews

AGENCY: Social Security Administration, HHS.

ACTION: Final rules.

SUMMARY: Section 15 of the Social Security Disability Benefits Reform Act of 1984, Pub. L. 98-460 (the 1984 Disability Amendments) requires the Secretary to issue regulations which establish the rules to be used to schedule reviews of continuing entitlement of persons receiving benefits because of disability or blindness. Section 221(i) of the Social Security Act requires that all persons with nonpermanent impairments receiving benefits because of disability must generally be reviewed at least once every 3 years. Section 221(i) also requires that the eligibility of persons having permanent impairments be reviewed at such times as the Secretary deems appropriate. There is no definition of "permanent impairment" in the statute. The identification of impairments now considered permanent is based on administrative experience with continuation rates for certain impairments and age groups or combinations thereof. The categories of impairments considered permanent will be continually modified with increased experience and medical developments. In addition there is a body of cases involving medical conditions which we expect to improve within a short time. These are referred to as medical improvement expected cases (formerly called medical reexamination diary cases) and under administrative procedures are diaried for review. These rules set forth the standards pursuant to which continuing disability reviews (CDR) will be scheduled so that those receiving disability benefits may better understand the review process and its timing. Appropriate definitions are provided, including definitions of permanent and nonpermanent impairments. These regulations also implement sections 6 (a) and (b) of the 1984 Amendments, which require notice to an individual preceding the CDR of his or her case. These rules apply to persons receiving benefits because of disability or blindness under title II or title XVI of the Act.

DATE: These rules are effective May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Harry J. Short, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, Telephone (301) 594-7337.

SUPPLEMENTARY INFORMATION: Section 15 of the 1984 Disability Amendments requires the Secretary to publish in regulations the standards to be used in determining the frequency of reviews under section 221(i) of the Social Security Act. Prior to the Social Security Disability Amendments of 1980, Pub. L. 96-265 (the 1980 Disability Amendments), which added section 221(i) to the Act, there was no requirement for a periodic review of disability for all persons who were receiving disability benefits. SSA generally reviewed only those individuals whose conditions were expected to improve. In determining whether such a medical review was appropriate, the nature of the impairment, whether significant medical improvement could be expected, and the individual's age were all considered. An initial medical review diary would generally be set for not less than 6 months or more than 18 months following the most recent decision. A rediary following such a review which resulted in a person's benefits being continued would be established when there was clear reason to expect subsequent improvement and was usually set for a shorter period than the initial diary, generally less than 12 months.

In the 1980 Disability Amendments Congress expressed its concern that looking only at individuals whose conditions were expected to improve was not adequate. Congress, therefore, mandated a review of all individuals receiving disability benefits under title II at least once every 3 years for those whose impairments are not permanent and on a schedule to be determined by the Secretary for those whose impairments are permanent. The 1982 Amendments (Pub. L. 97-455) provided the Secretary flexibility in carrying out CDR's. In determining the number of cases to be reviewed by any given State over a specific period of time, the Secretary may consider backlogs of pending reviews as well as current and projected staffing levels in the Social Security field offices and State agency and the availability of adequate medical resources which are necessary to do a complete and accurate review. In the 1984 amendments Congress required the Secretary to publish regulations which explain the frequency with which the various periodic continuing disability reviews will be conducted. This mandate was in response to Congressional concern that disabled beneficiaries be generally aware of when their claims will be reviewed and that such reviews not be conducted soon after an individual establishes continuing eligibility following a lengthy appeal.

When We Will Conduct a Continuing Disability Review

A continuing disability review may be conducted if one or more of the following events occurs:

(1) The individual has been scheduled for a medical improvement expected diary review;

(2) The individual has been scheduled for a medical improvement possible or medical improvement not expected diary review (formerly called periodic review) in accordance with the provisions of regulation §§ 404.1590(d) or 416.990(d);

(3) We need a current medical or other report to see if the individual's disability continues. (This could happen when, for example, an advance in medical technology, such as improved treatment for Alzheimer's disease or a change in vocational therapy or technology raises a disability issue);

(4) The individuual returned to work and successfully completed a trial work period;

(5) Substantial earnings are reported to the individual's wage record;

(6) The individual tells us that he or she has recovered from his or her disability or has returned to work;

(7) A State vocational rehabilitation agency reports that its services have been completed or that the individual is now working or is able to work;

(8) Someone in a position to know of the individual's physical or mental condition reports that the individual is not disabled, is not following prescribed treatment, has returned to work or is failing to follow the provisions of the Social Security Act and regulations, and it appears the report could be substantially correct;

(9) Evidence we receive raises a question as to whether the individual's disability continues; or

(10) The individual has been scheduled for a vocational reexamination diary review.

Additional Regulatory Provisions

Other than administrative guidelines which provide that medical improvement expected diary cases generally will be reviewed between 6 and 18 months following entitlement and that medical improvement possible diary cases will be reviewed every 3 years, SSA has not published specific rules with respect to frequency of review.

These final regulations apply to persons receiving benefits because of disability or blindness under either title II or title XVI of the Social Security Act. Although section 221(i) of the Act does not mandate periodic eligibility review of persons receiving benefits under title XVI because of disability or blindness, these final regulations extend the periodic continuing disability review procedures to title XVI blind and disabled beneficiaries. This extension is within the Secretary's regulatory authority under title XVI of the Social Security Act, sections 1631(d)(1) and 1633, and is in accord with the legislative history of the 1980 Amendments to the Act which added section 221(i). The report of the Senate Committee on Finance states:

> The committee believes that such [periodic review] procedures should be applied on the same basis to the DI and SSI programs.

We plan to review periodically the eligibility of persons receiving benefits solely under title XVI because of disability or blindness with the same frequency as we review the eligibility of persons receiving disability benefits under title II. This will establish consistency in the operation of the disability programs. When we begin the periodic review of these cases is dependent on such considerations as the backlog of pending reviews, the projected number of new applications, and the availability of resources needed to ensure careful and accurate reviews.

BEST COPY AVAILABLE

VOL 51 ISS 88 MY 7 1986 UMI

Before we begin these periodic reviews, we will notify the public of the beginning date of the review program by publication of a Notice in the Federal Register.

These regulations also reflect sections 6 (a) and (b) of Pub. L. 98-460, which require that when we begin a periodic review of an individual's eligibility to benefits we inform the individual of the nature of the review, the possibility that the review could result in termination of his or her benefits, and his or her right to submit medical evidence for our consideration during the review. We will apply this provision to all continuing disability reviews. Changes to §§ 404.1589 and 416.989 reflect this policy.

In §§ 404.1590 (c), (d) and (e) and 416.990 (c), (d) and (e) we have defined "permanent" (medical improvement not expected) and "nonpermanent" (medical improvement possible) impairments, "vocational reexamination diary" and "medical reexamination diary," discussed the frequency with which we will conduct CDR's, and provided for potential changes in the classification of a person's impairment. We have provided that a nonpermanent impairment that does not require a medical improvement expected diary will be reviewed at least once every 3 years and a permanent impairment at least once every 7 years, but no more frequently than once every 5 years unless a question of continuing eligibility is raised. We also explain in §§ 404.1590(f) and 416.990(f) that we will not conduct a review earlier than 3 years following establishment of continuing eligibility by an administrative law judge, the Appeals Council or a Federal Court, unless the case should be scheduled for medical improvement expected or vocational reexamination diary or a question of continuing eligibility is raised.

Comments Received Following Publication of the Notice of Proposed Rulemaking

These regulations were published as proposed rules on June 18, 1985 (50 FR 25400). Interested parties were given 45 days to submit comments. We received letters from 14 different sources, including some State agencies that make disability determinations, other State agencies such as those concerned with problems of aged and disabled persons, and several legal aid groups. Although most of the commenters expressed more than one concern, many recommended that regulation §§ 404.1589 and 416.989 be amended to provide that the medical improvement review standard be addressed in the notice informing individuals of a continuing disability review. Many commenters also suggested that we clarify the meaning of "erroneous" shown in §§ 404.1590(b)(3) and 416.990(b)(3). We have addressed these comments, as well as the others that we received, below.

Reasons for Continuing Disability Review

Comment: Several commenters stated that the regulations should specifically list all reasons for conducting a continuing disability review, and delete the general reason in § 404.1590(b)(9) (and similar language in § 416.990(b)(9)) which states, "evidence we receive raises a question as to whether your disability continues". They believe that this reason is so broadly written that it may lead to the abuse of reviewing claims at any time without justification.

Response: Although we have listed the principal reasons for conducting a continuing disability review, we cannot identify every possible event which may occur and which may require a CDR.

We must be able to conduct a review when an event occurs that gives a strong indication that the individual's impairment has improved. For example, a physician may submit an unsolicited medical report or evidence may be received in connection with a nondisability issue which raises a question. We are not including this general reason for review in order to permit reviews without justification, but to permit a review when some unforeseen event occurs which reasonably raises a question of continued disability and, therefore, justifies a review. Accordingly, we have decided to retain this reason for starting a continuing disability review.

Comment: One commenter suggested that we revise the reasons for conducting a continuing disability review upon receipt of information from the Vocational Rehabilitation Agency as follows: (1) the services have been completed (instead of "the individual's training has been completed"); (2) you are now working (instead of "the individual has returned to work"); or (3) you are able to work. The basis for this suggestion was that many individuals receive vocational rehabilitation services but are not trained and have never worked.

Response: We agree with the suggestion and have made the appropriate changes in §§ 404.1590(b)(7) and 416.990(b)(7).

Comment: Several commenters urged that we delete from §§ 404.1590(b)(3) and 416.990(b)(3), "it appears that a decision may have been erroneous" as a reason for conducting a continuing disability review. They believe this language is so broad that it will permit a medical review soon after an individual's disability is established following a lengthy appeal. Such a review could result in a determination to reverse the favorable administrative law judge, Appeals Council or court decision.

Response: It is our intent that these regulations fully protect against early disability reviews after favorable appeal decisions and that they will prevent improper reviews. As such, we have decided to delete the questioned phrase because the possible erroneous decision situation is covered in regulation §§ 404.989 and 416.1488, entitled, "Good cause for reopening."

Comment: A number of commenters believe the reason for conducting a CDR because a current medical or other report is needed to see if disability continues is worded too broadly. Generally, these commenters feel these sections could be interpreted to affect almost everyone receiving disability benefits.

Response: We believe we must be able to review the claims of individuals with any impairment in which advances in the medical field may change the severity of the impairment. As we cannot anticipate what changes might occur, we cannot identify what the standards might be for conducting the reviews specified in §§ 404.1590(b)(3) and 416.990(b)(3). However, as illustrated by the example in these regulatory sections, the most likely reason for conducting such reviews will be when advances in medical technology or changes in vocational therapy or technology raise an issue as to whether an individual's disability is continuing.

Comment: One commenter stated that we should delete "you return to work and successfully complete a period of trial work" as a reason for conducting a continuing disability review. The reason given is that the issue is already covered by the rule that we will conduct a review when substantial earnings are reported to an individual's wage record. The commenter believes that listing both reasons will cause confusion and will lead to inappropriate reviews each time there are intermittent periods of work during a trial work period.

Response: The two reasons for conducting a continuing disability review mentioned by the commenter refer to two different issues. When a person returns to work, one of two actions can occur. A trial work period can be established for an individual, and a review will not be conducted until

BEST COPY AVAILABLE

the individual has worked during 9 months. Or, on the other hand, a review can be conducted immediately when substantial earnings are reported to an individual's wage record. Because two different issues are involved, both reasons need to be retained.

Comment: A few commenters objected to providing for CDRs based on information received from a source as described in §§ 404.1590(b)(8) and 416.990(b)(8). One commenter believes that this provision could encourage the filing of nuisance charges against disabled individuals for other than sound medical reasons.

Response: We must investigate reports which raise an issue of continuing disability in order to assure that benefits are being paid only to those who are entitled to them under the law. This reason for conducting a CDR was added when we revised §§ 404.1590(b) and 416.990(b) in 1980. If we are to properly administer the disability program, we cannot ignore unsolicited information such as a medical report or information on work activity which raises a disability issue. However, §§ 404.1590(b)(8) and 416.990(b)(8) state that the report must be from someone in a position to know about the individual and that it could be substantially correct. Thus, CDR's will not be conducted on the basis of rumor or conjecture.

Frequency of Review

Comment: One commenter indicated that the phrase "at least once every 3 years" should be changed to "no more frequently than once every 3 years".

Response: Since the law itself, in addressing this issue, specified "reviews will be conducted at least once every 3 years", we have maintained the language as shown in the proposed regulations.

Comment: A commenter suggested that if no improvement is found after the initial medical improvement expected continuing disability review, the new review should be scheduled for 3 years rather than an "automatic rescheduling." (We assume automatic rescheduling means a 6 to 18 months review diary.)

Response: The regulations do not require "automatic rescheduling." The frequency of reviews as explained in §§ 404.1590(d) and 416.990(d) depends upon whether a person's impairment(s) is: (1) Expected to improve; (2) such that medical improvement cannot be accurately predicted; or (3) permanent. These sections further explain that reviews will generally be done at intervals from 6 months to 18 months if improvement is expected; at least once every 3 years if medical improvement cannot be accurately predicted; and no less than once every 7 years but no more often than once every 5 years if the person's disability is considered permanent. Furthermore, §§ 404.1590(e) and 416.990(e) specify that impairments may be reclassified. If a person's impairment is reclassified, the frequency with which the case will be reviewed will depend upon the new classification. For example, if a person's impairment was previously expected to improve and following a continuing disability review it is determined that medical improvement cannot now be accurately predicted, the frequency of review will convert to at least once every 3 years.

Although we felt the regulations were clear in this area, we have revised §§ 404.1590(e) and 416.990(e) to specify that a change in the classification of an impairment will change the frequency with which a case will be reviewed.

Comment: One commenter objected to assigning review dates from once every 5 years to once every 7 years for permanently impaired individuals. The objection was based on the feeling that the same review period may not be given to all individuals with the same impairment.

Response: All individuals with permanent impairments will be assigned a 7-year review cycle. However, flexibility in the frequency of review has been established to permit assigning different review periods to different permanent impairment categories should future experience indicate it to be more appropriate to review certain impairments on different time cycles than others. Thus, the timeframes for the review of individuals with permanent impairments may vary based on impairment categories, but individuals with the same impairments will be assigned the same review cycle.

Comment: Another commenter believes that after an individual has been reviewed once and no improvement is found, subsequent reviews should not be more frequent than once every 5 years.

Response: We agree that less frequent reviews may be appropriate if evidence continues to show no improvement in an individual's impairment(s). However, frequency of review depends on a variety of factors such as, the expectations for recovery from specific impairments, treatments, breakthroughs in medical science, etc. Sections 404.1590(e) and 416.990(e) of the regulations, which provide for changing an individual's medical classification, will permit us to extend review cycles appropriately. Individuals may be classified after such review as being permanently disabled regardless of the type of impairment. Development of procedures for less frequent reviews will be based on experience with reviews under the schedules established by these regulations.

Comment: One commenter stated that the interval for periodic review of permanent disabilities is too brief.

Response: We recognize that the nature of impairments classified as permanent is such that there is little likelihood of recovery and in many cases there will be progressive worsening of the conditions. Nevertheless, we believe that a flexible review period of no less frequently than once every 7 years but no more frequently than once every 5 years is responsive to the congressional concern for a less frequent review cycle for permanent impairment cases.

Comment: Some commenters voiced their concerns regarding reviews after administrative appeals. One commenter suggested that we state we will not conduct a review earlier than 3 years after a decision resulting from an administrative appeal unless the case is scheduled for a medical reexamination diary review because medical improvement can be expected. Other commenters believe the regulations should be clarified to ensure that a continuing disability review will not be conducted within 3 years of a decision by the Appeals Council or a Federal Court.

Response: The final regulations have been amended to define a medical or vocational reexamination diary review as a review for medical or vocational improvement expected cases. We believe the regulations now address the concerns of these commenters as §§ 404.1590(f) and 416.990(f) now provide that a continuing disability review will not be conducted earlier than 3 years after a favorable decision by an administrative law judge, the Appeals Council, or a Federal Court unless medical or vocational improvement is expected before expiration of a 3-year period or a question of continuing disability is raised under one of the other provisions of the regulations.

Permanent Impairments

Comment: A few commenters requested that the list of impairments considered permanent be stated in the regulations. A related comment suggested that the regulations clearly state that the list of permanent impairments is not limited to the examples provided in the regulation. It was further suggested that we more clearly state that the permanent

VOL 51 ISS 88 MY 7 1986 UMI

impairments are those currently maintained in our Program Operations Manual System instructions.

Response: We decided against publishing a specific list of permanent impairments in the regulations. Such a list would be administratively cumbersome and would limit our ability to respond quickly to required revisions in the classification of an individual's impairment due to changes in medical therapy, technology, and administrative experience, etc. Further, whether an impairment is classified as permanent depends on a variety of factors (age, severity, availability of treatment, etc.). As these factors change and influence the classification of an impairment, we need the flexibility to revise the list of impairments considered permanent without having to go through the regulatory process.

Rather than list the permanent impairments in the regulations, we have revised the regulations to indicate that the list of impairments classified as permanent is contained in our operating instructions (Program Operations Manual System) and that the examples cited in the regulations are taken from this list and are not intended to be all inclusive.

Comment: A few commenters indicated that once an individual has been classified as permanently disabled with no likelihood of improvement, it is unfair to require the person to again prove disability. One commenter noted that it is a serious matter for an individual designated as permanently disabled for many years to suddenly be subjected to a review every 7 years as it could lower the morale and esteem of such an individual. It was further suggested that a physician should perform a folder review of the medical evidence of record for individuals determined to be permanently disabled before the regulations are published, and that only individuals with a strong probability of improvement should be notified of and subjected to a review. No reviews should be required for individuals determined to be permanently disabled with no likelihood of improvement after the regulations are published.

Response: Section 221(i) of the Social Security Act requires that the eligibility of individuals with permanent impairments be reviewed at such times as we determine to be appropriate. We are well aware of the sensitivities involved with the review of this category of impairments and have taken precautions to lessen the effect on individuals. A special process for conducting reviews of individuals classified as permanently disabled is being developed. This process emphasizes paper reviews and telephone contacts to verify that the impairment is continuing. It should eliminate the need for most individuals to visit a Social Security office. Although these are impairments that, by definition, are not expected to improve, we cannot be sure in all instances that a case has been adequately documented or that the condition still exists. Therefore, we must conduct a review as described above. However, regardless of the type of review being conducted, all individuals will receive notice of the review as required by section 221(i)(4) of the Social Security Act.

Comment: One commenter indicated that the definition of permanent impairment should be amended to include a statement that an impairment subject to occasional remission can be included as a permanent classification. The rationale for this is the phrase "and unlikely to improve so as to permit the individual to engage in substantial gainful activity" suggests that conditions subject to temporary remission are not classifiable as permanent.

Response: We agree with the suggestion to amend the definition and have made the necessary change to indicate that temporary remission in the severity of an impairment will not be a factor in deciding if an impairment is permanent. A prime example of such an impairment is multiple sclerosis which has reached the level of severity necessary to meet the medical listing of 20 CFR Part 404, Subpart P, Appendix 1 which our other written guidelines classify as permanent but which has periods of remission.

Comment: One commenter stated §§ 416.990(c) and 404.1590(c) would more clearly define permanent impairments by the use of an example like amputation. The commenter further stated that most individuals believe their impairments are "permanent," and by saying that we might someday review the claims of individuals with Alzheimer's disease and that Parkinsonian Syndrome is "permanent" doesn't clarify to the individual whether or not he or she has a "permanent" impairment. It was also suggested that examples of nonpermanent impairments should be given to help clarify this issue.

Response: We agree with these suggestions and have added "amputation of leg at hip" to the examples in §§ 404.1590(c) and 416.990(c), and have amended these sections to reflect three examples of nonpermenent impairments.

Notices

Comment: Several commenters suggested that the language in the notice to the recipient contained in the proposed revisions to §§ 404.1589 and 416.989 be amended to include information that the beneficiary will be reviewed under the medical improvement review standard, what the standard means and the exceptions to the standards.

Response: We agree with this suggestion and have made the appropriate changes. In most cases, the prereview notice will contain an explanation of the medical improvement review standard and the exceptions to the standard. In SSI blindness cases, however, the medical improvement standard does not apply. Therefore, the notices for those cases will not mention the suggested information.

Comment: One commenter suggested that any notice of termination after a CDR should include a list of legal resources which would enable the individual whose benefits have been curtailed to obtain legal assistance in fighting the termination.

Response: It is not administratively feasible to include such specific information in individual notices. However, Social Security disability termination notices advise individuals that their local Social Security office can provide the names of individuals and groups that can help with appeals. Providing this information at local levels should yield the most helpful, accurate and up-to-date information for these individuals.

Comment: One commenter stated that blind persons need to receive notices in Braille, while many mentally retarded persons must have notices read to them.

Response: Social Security currently offers blind persons the opportunity of receiving notices in Braille translations.

District office staff explain this right to blind individuals during the interview process. If this option is selected, the case is identified for preparation and release of a notice in Braille.

Social Security notices include a statement that a person may call or visit any Social Security office if they have any questions about the notice. If a mentally retarded person does not have a representative selected to receive his or her notice and explain what the notice says, the concluding paragraph of the notice directs the person to request assistance in understanding the notice. This paragraph begins with the following *underlined* statement: *"If you have any questions . . . ."* Instructions are then provided that if an individual has any questions about the notice, he or she should call, write or visit any Social Security office to have the questions resolved. We believe that this information satisfies the concerns expressed by the commenter.

Comment: One commenter questioned how disabled individuals and the public are to know which impairments have been reclassified. The commenters asked, "Will there be brochures available and public affairs announcements, or will it only be made available at the time someone receives a letter indicating a review is imminent?"

Response: We do not anticipate that a change in classification of an impairment would generate the need for a wide-spread media campaign. Generally, the way individuals will be aware of the classification of their impairments is by the notice informing them when they will be scheduled for a continuing disability review. However, a list of impairments which are expected to improve (i.e., impairments for which medical reexamination diaries are established), and a list of impairments which are not expected to improve (i.e., permanent impairments) are published in our Program Operations Manual System instructions. These instructions are available to the public and may be reviewed at any Social Security office.

Comment: Several commenters suggested that the regulations specify that written cessation determination notices sent to the beneficiaries should contain notice of their right to benefit continuation during appeal through the Administrative Law Judge decision.

Response: Written cessation notices will contain information about benefit continuation.

Comment: One commenter suggested that notices must be received at least 60 days in advance to allow individuals sufficient time to make arrangements for transportation and assistance for required physical examinations.

Response: The consultative examination regulations (20 CFR 404.1517 and 416.917) provide regulatory authority for scheduling consultative examinations. We believe our procedures allow sufficient time before a scheduled examination. Notices of these examinations explain that a more suitable examination appointment may be requested if the individual cannot keep a scheduled appointment. The notice tells the person to let the Disability Determination Service know right away if the appointment cannot be kept. We believe that this policy allows for the greatest flexibility in meeting both the administration's case development needs and the individual's personal needs. The prereview notices, which are referenced in 20 CFR 404.1589 and 20 CFR 416.989, are not used to schedule consultative medical examinations.

Comment: One commenter suggested that prereview notices issued under §§ 404.1589 and 416.989 specify that current benefits will not be stopped prior to a final termination that the determination is justified, that the review is periodic (if applicable), and the review is routine (if applicable).

Response: We agree with this commenter, and we believe the prereview notice responds to these concerns.

Waiver of Timeframes

Comment: A number of commenters expressed concern about §§ 404.1590(g) and 416.990(g) regarding waiver of timeframes. Some commenters stated that this provision could result in some individuals being exempt from review and others not. Other commenters stated that the wavier of timefrsmes for conducting CDRs should be based on negotiations with the State agency. It was further stated that any such waiver should take into account the size and financial resources of the agency and the number of claims to be processed in order to prevent unrealistic workloads which could lead to inaccurate determinations.

Response: Our response to each specific comment is:

(1) The waiver of timeframes will not exclude anyone from a CDR. The regulations will only provide that in certain specific circumstances States may take a longer time period to complete a review cycle. This waiver provision is essential to assuring that all reviews are done carefully and accurately as required by Pub. L. 98-460.

(2) Negotiations with State agencies are a vital part of the waiver process. Such negotiations help assure compliance with these regulatory provisions.

(3) We have not adopted the suggestion that the size and financial resources of the state agency be considered a factor when determination whether a state should be given a waiver of the timeframes for conducting CDR's since such factors are not authorized by the statute. However, we believe consideration of the factors authorized by the statute responds to the commenter's concerns.

Miscellaneous Comments

Comment: A few commenters stated that the language concerning the reclassification of impairments is not clear and should be clarified by setting out the standards for making a change. One commenter stated that the beginning of the proposed section should require a regular medical improvement diary for individuals rather than a change in classification. The same commenter stated, "administrative reclassification of types of disabilities for (sic) permanent to nonpermanent or changes in listing or severity should only occur after opportunity for notice and comments on the general reclassification which also notes the CDR impact so that disabled people could properly evaluate the impact of such changes."

Response: Provisions for reclassifying impairments are essential to ensuring that reviews are conducted at correct frequencies. As we are unable to anticipate what changes in medical treatment or technology may occur, we cannot establish more specific regulatory standards for changing the classification of impairments. If we were to wait to reclassify an impairment until individuals were notified and provided an opportunity to comment on the reclassification, we would be unable to conduct reviews at appropriate frequencies. However, as indicated in an earlier response, we have amended §§ 404.1590(e) and 416.990(e) to specify that a change in the classification of an impairment will change the frequency with which a case will be reviewed.

Comment: One commenter suggested that because individuals have already been determined to be disabled, a CDR decision should be called a "redetermination" rather than a "determination."

Response: Each CDR is a new review of a disabled individual with a decision being made as to whether new evidence indicates a determination of medical improvement and whether disability is continuing or has ceased. The term "determination" has been used to describe the written disability decision since the inception of the disability program. On the other hand, the term "redetermination" is used in the Supplemental Security Income Program to describe the written decision covering the review of nondisability factors. We believe that to use the same term for different functions in the two programs would lead to confusion.

Comment: A few commenters raised the issue of who will assign diaries on appeal cases. It was suggested that, to ensure uniformity, administrative law judges establish the medical review diaries on cases which they decide.

Response: Regardless of the level of decisionmaking, diaries are assigned based on the nature and severity of the impairment. Although they are usually

VOL 51 ISS 88 MY 7 1986 UMI

assigned by the decisionmaker at any decision level, there are instances when someone other than the decisionmaker assigns the diary (e.g., the SSA operating component that effectuates the ALJ decision assigns the diary, unless one is specified by the ALJ). When this becomes necessary, the diary is assigned based on the nature and severity of the impairment as reflected in the decision. Considering these factors, we believe we cannot establish regulatory provisions which would restrict a component other than the one that made the decision from establishing a diary. To do so would result in inefficient case processing and ineffective administration of the disability program.

Comment: One commenter stated that in the event a premature review occurs, the review should be stopped as soon as the error is discovered or that any negative determination resulting from such a review be vacated.

Response: Current procedures direct interviewers not to start the CDR if the review category or the date for review is inappropriate. If the review is in progress when the inappropriate category is discovered, ordinarily the review will not be completed. However, should evidence have been secured which shows medical improvement and an ability to engage in substantial gainful activity, we cannot ignore such evidence solely on the basis that we conducted an early review.

Comment: One commenter stated that there is a conflict between the provision for developing at least 12 months of medical history and the need to compare the prior decision to current evidence under the Medical Improvement Review Standard (MIRS).

Response: We believe there is no conflict. The requirement to secure evidence for at least 12 months preceding the review enables us to better assess the individual's impairment at the time of review. Moreover, the requirement is in the statute.

Comment: One commenter recommended that "advances in medical technology which affect eligibility requirements" be clarified.

Response: We refer to an advance in medical technology only as an example to illustrate when we will conduct an unscheduled CDR. This refers to any unforeseen medical discovery which could affect an individual's impairment to the point that it raises a question of whether the individual is still disabled. Since it is used as an example only, we are not defining this further in the regulation.

Comment: One commenter questioned the accuracy of the Regulatory Flexibility Act statement as shown in the proposed rules. This commenter stated, "The Administration's implementation of CDR's for title XVI clients would invariably 'bump from the benefit rolls people who should still be receiving benefits, and this would, in turn, increase the demand for state-funded programs (e.g., Home Relief)."

Response: An individual's payments will be terminated only after he or she has been determined to have medically improved and he or she is able to work or one of the exceptions applies. Therefore, such an individual should not continue to receive SSI benefits based on disability. His/her eligibility for State funded programs would not result directly from SSA's finding that he/she was no longer disabled but from the eligibility requirements for such programs.

Additional Changes in the Regulations

Vocational reexamination diary review has been added to the list of events which will initate a continuing disability review in §§ 404.1590 and 416.990. We have added this event to these final regulations because of the exceptions to the medical improvement standard required by Pub. L. 98-460 that the individual has benefited from advances in vocational therapy or has undergone vocational therapy related to his or her ability to work and is now able to perform substantial gainful activity. Thus, it seemed advisable to add this event to permit a CDR when an individual, at the time of an initial or CDR decision, is in a vocational therapy, training or other educational program which may improve his or her ability to work.

We have also removed blindness from the general SSI review regulation, § 416.989. That section indicates that a medical improvement standard applies in the reviews discussed in that section. The medical improvement standard does not apply in SSI blindness cases. Therefore, we have added a new § 416.989a to explain when we will review SSI blindness cases and describe the notice we will send in these cases.

Regulatory Procedures

Executive Order No. 12291

These final regulations have been reviewed under Executive Order 12291 and we have determined that they do not create costs of $100 million or more yearly, or otherwise meet the threshold of the Executive Order. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act

These final regulations will impose no new reporting or recordkeeping requirements subject to clearance by the Office of Management and Budget.

Regulatory Flexibility Act

We certify that these final regulations will not have a significant economic impact on a substantial number of small entities because they primarily affect only disabled or blind individuals who are receiving title II or title XVI benefits because of disability or blindness. These final regulations should have little or no effect on the States since they reflect the present title II frequency of review cycles. Additionally, the review of title XVI cases (when implemented) should have minimal impact on State-funded programs as individuals whose payments are terminated as a result of such reviews are expected to seek employment rather than assistance from State-funded programs. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required.

Secretary of Health and Human Services.

PART 404—[AMENDED]

Part 404 of Chapter III of title 20 of the Code of Federal Regulations is amended to read as follows:

1. The authority citation for Subpart P of Part 404 is revised to read as follows:

Authority: Secs. 202, 205, 216, 221, 222, 223, 225, and 1102 of the Social Security Act, as amended; 42 U.S.C. 402, 405, 416, 421, 422, 423, 425, and 1302; sec. 505(a) and (c) of Pub. L. 96-265, secs. 2, 5, 6 and 15 of Pub. L. 98-460.

2. Section 404.1589 is revised to read as follows:

§ 404.1589 We may conduct a review to find out whether you continue to be disabled.

After we find that you are disabled, we must evaluate your impairment(s) from time to time to determine if you are still eligible for disability cash benefits. We call this evaluation a continuing disability review. We may begin a continuing disability review for any number of reasons including your failure to follow the provisions of the Social Security Act or these regulations. When we begin such a review, we will notify you that we are reviewing your eligibility for disability benefits, why we are reviewing your eligibility, that in medical reviews the medical improvement review standard will apply, that our review could result in the termination of your benefits, and that you have the right to submit medical and other evidence for our consideration during the continuing disability review. In doing a medical review, we will develop a complete medical history of at least the preceding 12 months in any case in which a determination is made that you are no longer under a disability. If this review shows that we should stop payment of your benefits, we will notify you in writing and give you an opportunity to appeal. In § 404.1590 we describe those events that may prompt us to review whether you continue to be disabled.

3. Section 404.1590 is revised to read as follows:

§ 404.1590 When and how often we will conduct a continuing disability review.

(a) *General.* We conduct continuing disability reviews to determine whether or not you continue to meet the disability requirements of the law. Payment of cash benefits or a period of disability ends if the medical or other evidence shows that you are not disabled as determined under the standards set out in section 223(f) of the Social Security Act.

(b) *When we will conduct a continuing disability review.* A continuing disability review will be started if—

(1) You have been scheduled for a medical improvement expected diary review;

(2) You have been scheduled for a periodic review (medical improvement possible or medical improvement not expected) in accordance with the provisions of paragraph (d) of this section;

(3) We need a current medical or other report to see if your disability continues. (This could happen when, for example, an advance in medical technology, such as improved treatment for Alzheimer's disease or a change in vocational therapy or technology raises a disability issue.);

(4) You return to work and successfully complete a period of trial work;

(5) Substantial earnings are reported to your wage record;

(6) You tell us that you have recovered from your disability or that you have returned to work;

(7) Your State Vocational Rehabilitation Agency tells us that—

(i) The services have been completed; or

(ii) You are now working; or

(iii) You are able to work;

(8) Someone in a position to know of your physical or mental condition tells us that you are not disabled, that you are not following prescribed treatment, that you have returned to work, or that you are failing to follow the provisions of the Social Security Act or these regulations, and it appears that the report could be substantially correct;

(9) Evidence we receive raises a question as to whether your disability continues; or

(10) You have been scheduled for a vocational reexamination diary review.

(c) *Definitions.* As used in this section—

"Medical improvement expected diary"—refers to a case which is scheduled for review at a later date because the individual's impairment(s) is expected to improve. Generally, the diary period is set for not less than 6 months or for not more than 18 months. Examples of cases likely to be scheduled for medical improvement expected diary are fractures and cases in which corrective surgery is planned and recovery can be anticipated.

"Permanent impairment"—medical improvement not expected—refers to a case in which any medical improvement in the person's impairment(s) is not expected. This means an extremely severe condition determined on the basis of our experience in administering the disability programs to be at least static, but more likely to be progressively disabling either by itself or by reason of impairment complications, and unlikely to improve so as to permit the individual to engage in substantial gainful activity. The interaction of the individual's age, impairment consequences and lack of recent attachment to the labor market may also be considered in determining whether an impairment is permanent. Improvement which is considered temporary under §§ 404.1579(c)(4) or 404.1594(c)(3)(iv), as appropriate, will not be considered in deciding if an impairment is permanent. Examples of permanent impairments taken from the list contained in our other written guidelines which are available for public review are as follows and are not intended to be all inclusive:

(1) Parkinsonian Syndrome which has reached the level of severity necessary to meet the Listing in Appendix 1.

(2) Amyotrophic Lateral Sclerosis which has reached the level of severity necessary to meet the Listing in Appendix 1.

(3) Diffuse pulmonary fibrosis in an individual age 55 or over which has reached the level of severity necessary to meet the Listing in Appendix 1.

(4) Amputation of leg at hip.

"Nonpermanent impairment"—refers to a case in which any medical improvement in the person's impairment(s) is possible. This means an impairment for which improvement cannot be predicted based on current experience and the facts of the particular case but which is not at the level of severity of an impairment that is considered permanent. Examples of nonpermanent impairments are: regional enteritis, hyperthyroidism, and chronic ulcerative colitis.

"Vocational reexamination diary"—refers to a case which is scheduled for review at a later date because the individual is undergoing vocational therapy, training or an educational program which may improve his or her ability to work so that the disability requirement of the law is no longer met. Generally, the diary period will be set for the length of the training, therapy, or program of education.

(d) *Frequency of review.* If your impairment is expected to improve, generally we will review your continuing eligibility for disability benefits at intervals from 6 months to 18 months following our most recent decision. Our notice to you about the review of your case will tell you more precisely when the review will be conducted. If your disability is not considered permanent but is such that any medical improvement in your impairment(s) cannot be accurately predicted, we will review your continuing eligibility for disability benefits at least once every 3 years. If your disability is considered permanent, we will review your continuing eligibility for benefits no less frequently than once every 7 years but no more frequently than once every 5 years. Regardless of your classification, we will conduct an immediate continuing disability review if a question of continuing disability is raised pursuant to paragraph (b) of this section.

VOL 51 ISS 88 MY 7 1986 UMI

(e) *Change in classification of impairment.* If the evidence developed during a continuing disability review demonstrates that your impairment has improved, is expected to improve, or has worsened since the last review, we may reclassify your impairment to reflect this change in severity. A change in the classification of your impairment will change the frequency with which we will review your case. We may also reclassify certain impairments because of improved tests, treatment, and other technical advances concerning those impairments.

(f) *Review after administrative appeal.* If you were found eligible to receive or to continue to receive disability benefits on the basis of a decision by an administrative law judge, the Appeals Council or a Federal court, we will not conduct a continuing disability review earlier than 3 years after that decision unless your case should be scheduled for a medical improvement expected or vocational reexamination diary review or a question of continuing disability is raised pursuant to paragraph (b) of this section.

(g) *Waiver of timeframes.* All cases involving a nonpermanent impairment will be reviewed by us at least once every 3 years unless we, after consultation with the State agency, determine that the requirement should be waived to ensure that only the appropriate number of cases are reviewed. The appropriate number of cases to be reviewed is to be based on such considerations as the backlog of pending reviews, the projected number of new applications, and projected staffing levels. Such waiver shall be given only after good faith effort on the part of the State to meet staffing requirements and to process the reviews on a timely basis. Availability of independent medical resources may also be a factor. A "waiver" in this context refers to our administrative discretion to determine the appropriate number of cases to be reviewed on a State by State basis. Therefore, your continuing disability review may be delayed longer than 3 years following our original decision or other review under certain circumstances. Such a delay would be based on our need to ensure that backlogs, reviews required to be performed by the Social Security Disability Benefits Reform Act of 1984 (Pub. L. 98-460), and new disability claims workloads are accomplished within available medical and other resources in the State agency and that such reviews are done carefully and accurately.

PART 416—[AMENDED]

Part 416 of Chapter III of title 20 of the Code of Federal Regulations is amended to read as follows:

1. The authority citation for Subpart I of Part 416 is revised to read as follows:

Authority: Secs. 1102, 1614, 1631, and 1633 of the Social Security Act; 42 U.S.C. 1302, 1382, and 1383; secs. 2, 5, 6, and 15 of Pub. L. 98-460.

2. Section 416.989 is revised to read as follows:

§ 416.989 We may conduct a review to find out whether you continue to be disabled.

After we find that you are disabled, we must evaluate your impairment(s) from time to time to determine if you are still eligible for payments based on disability. We call this evaluation a continuing disability review. We may begin a continuing disability review for any number of reasons including your failure to follow the provisions of the Social Security Act or these regulations. When we begin such a review, we will notify you that we are reviewing your eligibility for payments, why we are reviewing your eligibility, that in medical reviews the medical improvement review standard will apply, that our review could result in the termination of your payments, and that you have the right to submit medical and other evidence for our consideration during the continuing disability review. In doing a medical review, we will develop a complete medical history of at least the preceding 12 months in any case in which a determination is made that you are no longer under a disability. If this review shows that we should stop your payments, we will notify you in writing and give you an opportunity to appeal. In § 416.990 we describe those events that may prompt us to review whether you continue to be disabled.

3. A new § 416.989a is added to read as follows:

§ 416.989a We may conduct a review to find out whether you continue to be blind.

After we find that you are blind, we must evaluate your impairment(s) from time to time to determine if you are still eligible for payments based on blindness. We call this evaluation a continuing disability review. We may begin a continuing disability review for any number of reasons including your failure to follow the provisions of the Social Security Act or these regulations. When we begin such a review, we will notify you that we are reviewing your eligibility for payments, why we are reviewing your eligibility, that our review could result in the termination of your payments, and that you have the right to submit medical and other evidence for our consideration during the continuing disability review. In doing a medical review, we will develop a complete medical history of at least the preceding 12 months in any case in which a determination is made that you are no longer blind. If this review shows that we should stop your payments, we will notify you in writing and give you an opportunity to appeal. In § 416.990 we describe those events that may prompt us to review whether you continue to be blind.

4. Section 416.990 is revised to read as follows:

§ 416.990 When and how often we will conduct a continuing disability review.

(a) *General.* We conduct continuing disability reviews to determine whether or not you continue to meet the disability or blindness requirements of the law. Payment ends if the medical or other evidence shows that you are not disabled or blind as determined under the standards set out in section 1614(a) of the Social Security Act if you receive benefits based on disability or § 416.986 of this subpart if you receive benefits based on blindness.

(b) *When we will conduct a continuing disability review.* A continuing disability review will be started if—

(1) You have been scheduled for a medical improvement expected diary review;

(2) You have been scheduled for a periodic review (medical improvement possible or medical improvement not expected) in accordance with the provisions of paragraph (d) of this section;

(3) We need a current medical or other report to see if your disability continues. (This could happen when, for example, an advance in medical technology, such as improved treatment for Alzheimer's disease, or a change in vocational therapy or technology raises a disability issue);

(4) You return to work and successfully complete a period of trial work;

(5) Substantial earnings are reported to your wage record;

(6) You tell us that you have recovered from your disability or that you have returned to work;

(7) Your State Vocational Rehabilitation Agency tells us that—

(i) The services have been completed; or

(ii) You are now working; or

(iii) You are able to work;

(8) Someone in a position to know of your physical or mental condition tells us that you are not disabled or blind, that you are not following prescribed treatment, that you have returned to work, or that you are failing to follow the provisions of the Social Security Act or these regulations, and it appears that the report could be substantially correct;

(9) Evidence we receive raises a question as to whether your disability or blindness continues; or

(10) You have been scheduled for a vocational reexamination diary review.

(c) *Definitions.* As used in this section—

"Medical improvement expected diary"—refers to a case which is scheduled for review as a later date because the individual's impairment(s) is expected to improve. Generally, the diary period is set for not less than 6 months or for not more than 18 months. Examples of cases likely to be scheduled for medical improvement expected diary are fractures and cases in which corrective surgery is planned and recovery can be anticipated.

"Permanent impairment"—medical improvement not expected—refers to a case in which any medical improvement in a person's impairment(s) is not expected. This means an extremely severe condition determined on the basis of our experience in administering the disability programs to be at least static, but more likely to be progressively disabling either by itself or by reason of impairment complications, and unlikely to improve so as to permit the individual to engage in substantial gainful activity. The interaction of the individual's age, impairment consequences and the lack of recent attachment to the labor market may also be considered in determining whether an impairment is permanent. Improvement which is considered temporary under §§ 416.994(b)(2)(iv)(D) or 416.994(c)(2)(iv), as appropriate, will not be considered in deciding if an impairment is permanent. Examples of permanent impairments taken from the list contained in our other written guidelines which are available for public review are as follows and are not intended to be all inclusive:

(1) Parkinsonian Syndrome which has reached the level of severity necessary to meet the Listing in Appendix 1 of Subpart P or Part 404 of this chapter.

(2) Amyotrophic Lateral Sclerosis which has reached the level of severity necessary to meet the Listing in Appendix 1 of Subpart P of Part 404 of this chapter.

(3) Diffuse pulmonary fibrosis in an individual age 55 or over which has reached the level of severity necessary to meet the Listing in Appendix 1 of Subpart P of Part 404 of this chapter.

(4) Amputation of leg at hip.

"Nonpermanent impairment"—refers to a case in which any medical improvement in the person's impairment(s) is possible. This means an impairment for which improvement cannot be predicted based on current experience and the facts of the particular case but which is not at the level of severity of an impairment that is considered permanent. Examples of nonpermanent impairments are: regional enteritis, hyperthyroidism, and chronic ulcerative colitis.

"Vocational reexamination diary"—refers to a case which is scheduled for review at a later date because the individual is undergoing vocational therapy, training or an educational program which may improve his or her ability to work so that the disability or blindness requirement of the Law is no longer met. Generally, the diary period will be set for the length of the training, therapy, or program of education.

(d) *Frequency of review.* If your impairment is expected to improve, generally we will review your continuing eligibility for payments based on disability or blindness at intervals from 6 months to 18 months following our most recent decision. Our notice to you about the review of your case will tell you more precisely when the review will be conducted. If your disability is not considered permanent but is such that any medical improvement in your impairment(s) cannot be accurately predicted, we will review your continuing eligibility for payments at least once every 3 years. If your disability is considered permanent, we will review your continuing eligibility for payments no less frequently than once every 7 years but no more frequently than once every 5 years. Regardless of your classification we will conduct an immediate continuing disability review if a question of continuing disability is raised pursuant to paragraph (b) of this section.

(e) *Change in classification of impairment.* If the evidence developed during a continuing disability review demonstrates that your impairment has improved, is expected to improve, or has worsened since the last review, we may reclassify your impairment to reflect this change in severity. A change in the classification of your impairment will change the frequency with which we will review your case. We may also reclassify certain impairments because of improved tests, treatment, and other technical advances concerning those impairments.

(f) *Review after administrative appeal.* If you were found eligible to receive or to continue to receive, payments on the basis of a decision by an administrative law judge, the Appeals Council or a Federal court, we will not conduct a continuing disability review earlier than 3 years after that decision unless your case should be scheduled for a medical improvement expected or vocational reexamination diary review or a question of continuing disability is raised pursuant to paragraph (b) of this section.

(g) *Waiver of timeframes.* All cases involving a nonpermanent impairment will be reviewed by us at least once every 3 years unless we, after consultation with the State agency, determine that the requirement should be waived to ensure that only the appropriate number of cases are reviewed. The appropriate number of cases to be reviewed is to be based on such considerations as the backlog of pending reviews, the projected number of new applications, and projected staffing levels. Such waiver shall be given only after good faith effort on the part of the State to meet staffing requirements and to process the reviews on a timely basis. Availability of independent medical resources may also be a factor. A "waiver" in this context refers to our administrative discretion to determine the appropriate number of cases to be reviewed on a State by State basis. Therefore, your continuing disability review may be delayed longer than 3 years following our original decision or other review under certain circumstances. Such a delay would be based on our need to ensure that backlogs, reviews required to be performed by the Social Security Disability Benefits Reform Act (Pub. L. 98-460), and new disability claims workloads are accomplished within available medical and other resources in the State agency and that such reviews are done carefully and accurately.

BILLING CODE 4190-11-M

Food and Drug Administration

21 CFR Part 177

[Docket No. 85F-0109]

Indirect Food Additives; Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations for the use of

styrene block polymers with 2-methyl-1-1,3-butadiene in food-contact articles to include an optional chloroform-soluble extractive limitation and to eliminate the conditions of use limitations. This action responds to a petition filed by Shell Oil Co.

DATES: Effective May 7, 1986. Objections by June 7, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville MD 20857.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of March 18, 1985 (50 FR 10860), FDA announced that a petition (FAP 5B3853) had been filed by Shell Oil Co., 1025 Connecticut Ave. NW., Suite 200, Washington, DC 20036, proposing that the entry for styrene block polymers with 2-methyl-1,3-butadiene in 21 CFR 177.1810 be amended to (1) allow for an increase in the maximum extractable fraction in distilled water and 50 percent ethanol; (2) include chloroform-soluble extractives limitations; and (3) eliminate the conditions of use limitations.

The petitioner requested an increase in the maximum extractable fraction specifications for distilled water and 50 percent ethanol because the processing water it uses in the production of the styrene block polymers causes an accumulation of salts and hydrated salts in the extractable fractions. The level of these salts exceeds the current extraction specifications. In addition, the petitioner requested that chloroform-soluble extractives specifications be established for use with the increased maximum extractable fraction specifications.

FDA has evaluated the data in the petition and believes that the current maximum extractable fraction specifications for distilled water and 50 percent ethanol do not need to be changed. Instead, the agency is adopting optional chloroform-soluble extractives specifications for use when the maximum extractable fraction specifications for distilled water and 50 percent ethanol cannot be met.

Based on the data in the petition, the agency agrees with the petitioner that the reason that the petitioner's polymer does not meet the current specifications for maximum extractives in water and 50 percent ethanol is the presence of salts and hydrated salts in the firm's processing water.

The agency finds that the optional chloroform-soluble extractives specifications requested by the petition will ensure the safe use of these polymers because the chloroform extraction step will extract any residual organic material derived from the polymer while leaving the salts and hydrated salts in the distilled water and 50 percent ethanol extracts. FDA, therefore, concludes that adoption of optional chloroform-soluble extractives specifications obviates the petitioner's request to increase the maximum extractable fraction specifications for distilled water and 50 percent ethanol. The agency consequently is adding optional specifications in § 177.1810(b)(2) for chloroform-soluble extractives that may be used when the specifications for distilled water and 50 percent ethanol cannot be met.

In addition, as the petitioner also requested, the agency is eliminating the conditions of use temperature limitations that have been cross-referenced in the regulation from 21 CFR 176.170(c), Table 2. The agency has reviewed the data submitted in this petition and in previous petitions on this regulation concerning the conditions of use of this additive. The data reveal that the petitioner has carried out extractions on the additive at the time and temperature conditions specified for use condition A, described in Table 2 of § 176.170(c). The petitioner, therefore, has submitted data for the worst-case condition of use of the additive. Consequently, there is no reason to restrict use of the additive to conditions of use D, E, F, and G, as currently provided for in the entry for this additive in § 177.1810(b)(2). The agency is thus removing the conditions of use temperature limitations in this final rule.

FDA concludes that the amendments, as set forth below, will assure the safe use of the additive.

Additionally, FDA is amending the regulation to include both metric and English units in the regulation.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has determined under 21 CFR 25.24(a)(9) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Any person who will be adversely affected by this regulation may at any time on or before June 7, 1986 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objections is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 177 is amended as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

1. The authority citation for Part 177 continues to read as follows:

Authority: Secs. 201(s), 408, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 346); 21 CFR 5.10 and 5.61.

2. In § 177.1810 by revising the table in paragraph (b) and by revising paragraph (c)(3) to read as follows:

§ 177.1810 Styrene block polymers.

* * * * *

(b) * * *

Styrene block polymers	Molecular weight (minimum)	Solubility	Glass transition points	Maximum extractable fraction in distilled water at specified temperatures, times, and thicknesses	Maximum extractable fraction in 50 percent ethanol at specified temperatures, times, and thicknesses
1. (i) Styrene block polymers with 1,3-butadiene; for use as articles or as components of articles that contact food of Types I, II, IV–B, VI, VII–B, and VIII identified in Table 1 in § 176.170(c) of this chapter under conditions of use D, E, F, and G described in Table 2 in § 176.170(c) of this chapter.	29,000	Completely soluble in toluene.	−98 °C (−144 °F) to −71 °C (−96 °F) and 86 °C (187 °F) to 122 °C (252 °F).	0.0039 mg/cm² (0.025 mg/in²) of surface at reflux temperature for 30 min on a 0.19 cm (0.075 in) thick sample.	0.002 mg/cm² (0.01 mg/in²) of surface at 66 °C (150 °F) for 2 hr on a 0.19 cm (0.075 in) thick sample.
(ii) Styrene block polymers with 1,3-butadiene; for use as components of pressure-sensitive adhesives that contact food of Types I, II, IV–B, VI, VII–B, and VIII identified in Table 1 in § 176.170(c) of this chapter under conditions of use C, D, E, F and G described in Table 2 in § 176.170(c) of this chapter, provided the pressure-sensitive adhesives be applied only to closure tapes for sealing containers having a capacity of not less than 160 cc (5.5 fluid ounces) and that the area of the adhesive exposed to food shall not exceed 4.03 cm² (0.625 in²). The pressure-sensitive adhesive may contain terpene resins as identified in § 175.125(b)(2) of this chapter.	29,000	do	do	do	Do.
2. Styrene block polymers with 2-methyl-1,3-butadiene; for use as articles or as components of articles that contact food of Types I, II, IV–B, VI, VII–B, and VIII identified in Table 1 in § 176.170(c) of this chapter.	29,000	do	−85 °C (−85 °F) to −47 °C (−53 °F) and 86 °C (187 °F) to 122 °C (252 °F).	0.002 mg/cm² (0.01 mg/in²) of surface at reflux temperature for 2 hr on a 0.071 cm (0.028 in) thick sample. (Optionally, maximum net residue soluble in chloroform shall not exceed 0.00020 mg/cm² (0.0013 mg/in²) of surface.).	0.002 mg/cm² (0.01 mg/in²) of surface at 66 °C (150 °F) for 2 hr on a 0.071 cm (0.028 in) thick sample. (Optionally, maximum net residue soluble in chloroform shall not exceed 0.00040 mg/cm² (0.0025 mg/in²) of surface.)
3. Styrene block polymers with 1,3-butadiene, hydrogenated; for use as articles or as components of articles that contact food of Types I, II, IV–B, VI, VII–B, and VIII identified in Table 1 in § 176.170(c) of this chapter.	16,000	do	−50 °C (−58 °F) to −30 °C (−22 °F) and 92 °C (198 °F) to 98 °C (208 °F).	0.002 mg/cm² (0.01 mg/in²) of surface at reflux temperature for 2 hr on a 0.071 cm (0.028 in) thick sample.	0.002 mg/cm² (0.01 mg/in²) of surface at 66 °C (150 °F) for 2 hr on a 0.071 cm (0.028 in) thick sample.

(c) * * *

(3) *Maximum extractable fractions in distilled water and 50 percent ethanol and the maximum net residue solubles in chloroform.* The maximum extractable fractions in distilled water and 50 percent ethanol, and the maximum net residue solubles in chloroform, shall be determined in accordance with § 176.170(d)(3) of this chapter using a sandwich form of the finished copolymer of the specified thickness and for the time and temperature specified in paragraph (b) of this section.

* * * * *

Dated: April 29, 1986.

Richard J. Rouk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

---

21 CFR Parts 182 and 186

[Docket No. 78N–0032]

Tall Oil; Affirmation of GRAS Status as Indirect Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is affirming that tall oil is generally recognized as safe (GRAS) as an indirect human food ingredient for use in cotton and cotton fabric used in dry food packaging. The safety of this ingredient has been evaluated under the comprehensive safety review conducted by the agency.

EFFECTIVE DATE: June 7, 1986.

FOR FURTHER INFORMATION CONTACT: Leonard C. Gosule, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of June 2, 1978 (43 FR 24067), FDA published a proposal to affirm that tall oil is GRAS for use in cotton and cotton fabrics used in dry food packaging. FDA published the proposal in accordance with its announced review of the safety of GRAS and prior-sanctioned food ingredients.

Subsequently, in the Federal Register of October 2, 1985 (50 FR 40204), FDA published a tentative final rule in which FDA proposed to affirm that tall oil is GRAS for use in cotton and cotton fabrics used in dry packaging, without the specifications listed in the June 2, 1978, proposal.

No comments were received in response to the tentative final rule on tall oil. The agency is, therefore, adopting § 186.1557 without change.

The agency has previously determined under 21 CFR 25.24(b)(7) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. No new information or comments have been received that would affect the agency's previous determination. Therefore, neither an environmental assessment nor an environmental impact statement is required.

In accordance with the Regulatory Flexibility Act, the agency previously considered the potential effects that this rule would have on small entities, including small businesses. In accordance with section 605(b) of the Regulatory Flexibility Act, the agency has determined that no significant impact on a substantial number of small entities would derive from this action. FDA has not received any new information or comments that would alter its previous determination.

VOL 51 ISS 88 MY 7 1986 UMI

In accordance with Executive Order 12291, FDA has previously analyzed the potential economic effects of this final rule. As announced in the proposal, the agency has determined that the rule is not a major rule as determined by the Order. The agency has not received any new information or comments that would alter its previous determination.

The agency's findings of no major economic impact and no significant impact on a substantial number of small entities, and the evidence supporting these findings, are contained in a threshold assessment which may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

List of Subjects

21 CFR Part 182

Food ingredients, Species and flavorings.

21 CFR Part 186

Food ingredients, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Food Safety and Applied Nutrition, Parts 182 and 186 are amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

1. The authority citation for CFR Part 182 is revised to read as follows:

Authority: Secs. 201(s), 402, 409, 701, 52 Stat. 1046–1047 as amended, 1055–1056 as amended, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 342, 348, 371); 21 CFR 5.10 and 5.61.

§ 182.70 [Amended]

2. In § 182.70 *Substances migrating from cotton and cotton fabrics used in dry food packaging* by removing the entry for "Tall oil."

PART 186—INDIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

3. The authority citations under the sections are removed and the authority citation for 21 CFR Part 186 is revised to read as follows:

Authority: Secs. 201(s), 402, 409, 701, 52 Stat. 1046–1047 as amended, 1055–1056 as amended, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 342, 348, 371); 21 CFR 5.10 and 5.61.

4. Part 186 is amended by adding new § 186.1557 to read as follows:

§ 186.1557 Tall oil.

(a) Tall oil (CAS Reg. No. 8002–26–4) is essentially the sap of the pine tree. It is obtained commercially from the waste liquors of pinewood pulp mills and consists mainly of tall oil resin acids and tall oil fatty acids.

(b) In accordance with § 186.1(b)(1), the ingredient is used as an indirect human food ingredient with no limitation other than current good manufacturing practice. The affirmation of this ingredient as generally recognized as safe (GRAS) as an indirect human food ingredient is based on the following current good manufacturing practice conditions of use:

(1) The ingredient is used as a constituent of cotton and cotton fabrics used for dry food packaging.

(2) The ingredient is used at levels not to exceed current good manufacturing practice.

(c) Prior sanctions for this ingredient different from the uses established in this section, or from those listed in Part 181 of this chapter, do not exist or have been waived.

Dated: April 29, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 86-10168 Filed 5-6-86; 8:45 am]

BILLING CODE 4160-01-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Parts 625, 626, 630, 645, 650, 655, 666, 810, and 922

Design Standards for Highways; Technical Amendments

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: The Federal Highway Administration (FHWA) is updating the list of citations to publications which are incorporated by reference in 23 CFR Part 625 for application on Federal-aid projects. The list includes citations to publications containing standards, specifications, policies, guides, and references which have been approved for application in the geometric and structural design of federally funded highways. The revisions amend the regulations by: (1) Updating citations to reflect current publication dates and titles; (2) removing obsolete documents which are currently cited; (3) relocating citations to the appropriate section; (4) correcting citations to incorporate prior rulemaking actions; and (5) redesignating and adding certain publications that contain guidance and informational material to a new section. While the revisions are nonsubstantive in nature, they will serve to clarify the existing rule which was last completely updated in 1978.

EFFECTIVE DATE: May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Seppo I. Sillan, Chief, Geometric Design Branch, Office of Engineering (202) 426–0312 of Mr. Michael J. Laska, Office of the Chief Counsel (202) 426–0762, Federal Highway Administration, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: The standards, specifications, policies, guides, and references (publications) that have been approved by the FHWA for application on all Federal-aid highway projects have been incorporated by reference in 23 CFR Part 625. Periodically, the publications that are incorporated by reference in Part 625 are reviewed by the initiating organizations. As a result of these reviews, certain publications are updated or replaced with new editions. For publications which are updated or replaced with new editions, the citations to the publications referenced in Part 625 must be revised.

In addition, as the title to § 625.3 indicates, the FHWA has not differentiated, for the purpose of incorporation by reference, between publications that contain standards and policies and those that contain guides and references. In order to accurately reflect a publication list which differentiates between publications establishing Federal standards, and publications containing guidance and informational material, a new section entitled "Guides and references"

(references) is being added to Part 625. As a result, the incorporation by reference will be removed for certain publications which are guidance and informational material. The citations to these publications will be transferred to the new section for references. Other informational publications which are valuable in attaining good design and uniformity will be added to the new section.

In addition to citations being added, updated, or redesignated, other technical amendments to Part 625 are required in order to maintain a current and accurate listing of publications which are approved for application on Federal-aid projects. The technical amendments contained in this document include: The deletion of citations to publications which are obsolete or no longer applicable; the relocation of citations to a more appropriate section; and the correction of citations to incorporate actions which have been the subject of prior rulemaking actions. The following actions are being taken in order to update Part 625 to reflect current practice.

1. General—Former Section 625.3 "Standards, specifications, policies, guides and references."

Section 625.3 has been redesignated to read Section 625.4 "Standards, policies, and standard specifications."

This section will list the citations to those publications that are incorporated by reference and contain specific criteria and controls for the design of highways.

A portion of the introductory text included in former § 625.3 was added at 50 FR 14914, April 15, 1985. The additional text specified where and how copies of the publications cited in Part 625 can be inspected, copied, or purchased. This supplemental information will be placed in the appendix.

A number of publications incorporated by reference in this section have been replaced with updated editions. The reference citations for these publications are being revised to reflect the dates and titles of the most current editions.

2. Revisions—Former § 625.3(a) "Roadway and appurtenances."

Former § 625.3(a)(5) "A Policy on the Accommodation Of Utilities on Freeway Rights-of-Way, AASHO 1969" (Policy) is being replaced to include the current citation to the Policy which is incorporated by reference in the final rule on accommodation of utilities published on May 15, 1985 (50 FR 20351). The reference will now read "Accommodation of Utilities, FHWA, 23 CFR Part 645, Subpart B."

Former § 625.3(a)(10) "AASHTO Interim Guide for Design of Pavement Structures—1972 Chapter III Revised, 1981, AASHTO" (Guide) is being replaced by a reference to 23 CFR Part 626. Part 626 sets forth the pavement design policy for Federal-aid highway projects and currently approves the Guide for Federal application. The reference will now read "Pavement Design, FHWA, 23 CFR Part 626."

3. Deletions—Former § 625.3(a), "Roadway and appurtenances."

Former § 625.3(a)(9), "Policy on Interstate System Projects, FHWA, FHPM 6–3–2–4," is being deleted because enactment of the Federal-aid Highway Act of 1981 redefined the term "Interstate Completion"; therefore, the policy contained in the Federal-aid Highway Program Manual (FHPM) section is no longer required to be applied to Interstate System projects. The section will be retained in the FHPM for informational purposes.

Former § 625.3(a)(16) "Safer Off-System Roads, FHWA, 23 CFR Part 922" is being deleted because the program is no longer being funded. Since the Safer Off-System Road program is no longer being appropriated funding, no new projects have been initiated and existing projects are being completed and closed out. For this reason, the reference is obsolete and being removed.

4. Relocation—Former § 625.3(c) "Traffic control" and Part 655 "Traffic Operations."

The references in former § 625.3(c) "Traffic control" address the subject areas of traffic control, traffic signs, traffic surveillance, motorist aid systems, etc. The primary regulations dealing with these subject areas are located in Part 655 "Traffic Operations." In order to more accurately reflect regulatory material with the appropriate references, the publications listed in § 625.3(c) are transferred to Part 655. Former § 625.3(c)(7), "National Standards for Signs Giving Specific Information in the Interest of the Traveling Public, FHWA, 23 CFR Part 655, Subpart C" is being deleted because the standards have been incorporated in the "Manual on Uniform Traffic Control Devices for Streets and Highways, FHWA, 1978, as amended January 1985" which is incorporated by reference and will be located in § 655.601(a).

5. Redesignations and additions—New § 625.5 "Guides and references."

A new § 625.5 entitled "Guides and references" is being added to Part 625 in order to give notice to the public of those publications used or referred to by the FHWA and the States in the design of highways. The publications listed in this section are not incorporated by reference because they are only guidance in character. After a review of the publications currently incorporated by reference in Part 625, the following are transferred from former § 625.3 and placed in new § 625.5 as a guide or informational reference.

Redesignations to 625.5(a), "Roadway and appurtenances."

—An Informational Guide for Roadway Lighting, AASHTO, 1984.

—Highway Design and Operational Practices Related to Highway Safety, Report of the Special AASHTO Traffic Safety Committee, AASHTO, 1974.

—Guide for Selecting, Locating, and Designing Traffic Barriers, AASHTO, 1977. Barriers classified as either operational or experimental, except Type MB1 median barriers, are acceptable for Federal-aid projects.

—Skid Accident Reduction Program, FHWA, FHPM 6–2–4–3.

—Guidelines for Skid Resistant Pavement Design, AASHTO 1976.

Redesignation to 625.5(b), "Bridges and structures."

—A Guide for Protective Screening of Overpass Structures, AASHO, 1969.

Redesignations to 625.5(d), "Other."

—Transportation Glossary, AASHTO, 1983.

—A Guide on Safety Rest Areas for the National System of Interstate and Defense Highways, AASHO, 1966.

In order for Part 625 to reflect a complete and accurate list of guides and references pertinent to highway design, the following publications are being added to new § 625.5.

Additions to 625.5(a), "Roadway and appurtenances."

—An Informational Guide on Fencing Controlled Access Highways, AASHO, 1967.

—An Informational Guide for Preparing Private Driveway Regulations for Major Highways, AASHO, 1960.

—Highway Capacity Special Report 209, Highway Capacity Manual, Transportation Research Board, 1985.

—Handbook of Highway Safety Design and Operating Practices, FHWA, 1978.

—Guidelines on Pavement Management, AASHTO, 1985.

Additions to 625.5(b), "Bridges and structures."

—Manual for Maintenance Inspection of Bridges, AASHTO, 1983.

—Guide Specifications for Fracture Critical Non-Redundant Steel Bridge Members, AASHTO, 1978, and Interim Specifications, Bridges, AASHTO, 1981.

VOL 51 ISS 88 MAY 7 1986 UMI

—Guide Specifications for Horizontally Curved Highway Bridges, 1980, and Interim Specifications, Bridges, AASHTO, 1981 and 1982.
—Guide Specifications for Seismic Design of Highway Bridges, AASHTO, 1983.
—Highway Drainage Guidelines, Volumes I through VI, AASHTO, 1979, Volume VII, AASHTO, 1982.
Additions to 625.5(c), "Materials."
—Guide Specifications for Highway Construction, AASHTO, 1979.
Additions to 625.5(d), "Other."
—A Guide for Erecting Mailboxes on Highways, AASHTO, 1984.
—Guide for Development of New Bicycle Facilities, AASHTO, 1981.

6. Elimination—Section 625.7 "Special considerations."

This section establishes the requirement for curb ramps on pedestrian crosswalks for physically handicapped persons. Since this provision was added to section 625, regulations on pedestrian and bicycle accommodations contained in Part 652 were extensively revised (March 22, 1984; 49 FR 10682). Because § 652.13(b) contains the curb ramp requirement, § 625.7 is considered duplicative and is deleted.

Regulatory Impact

The FHWA has determined that this document does not contain a major rule under Executive Order 12291 or a significant regulation under the regulatory policies and procedures of the Department of Transportation. The revisions contained in these amendments are primarily editorial in nature. For publications which have become obsolete, the citations have been deleted. For publications which have been replaced with new editions, the citations have been updated to reflect current publication dates and titles. In some cases, the current editions contain minor changes in content, but the overall basic geometric design criteria remains essentially the same. For those publications that are being added, the new material is not in fact a standard or requirement. These new nonregulatory publications simply provide guidance and information for use at the discretion of the designer. Since the revisions included in this document are technical in nature and make no substantive changes to the regulations, the FHWA finds good cause to make the amendments final without the opportunity for comment and without a 30-day delay in effective date required by the Administrative Procedure Act. Notice and opportunity for comment are not required under the regulatory policies and procedures of the Department of Transportation because it is not anticipated that such action would result in the receipt of useful information due to the technical nature of the document. Accordingly, the amendments are effective upon publication.

Since these amendments do not alter the basic design criteria and the burdens imposed on the States are not affected, the impact on the overall highway program is negligible. Therefore, a full regulatory evaluation has not been prepared. For the foregoing reasons, and under the criteria of the Regulatory Flexibility Act, the FHWA hereby certifies that this action will not have a significant economic impact on a substantial number of small entities.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

List of Subjects in 23 CFR Parts 625 and 655

Design standards, Grant programs—transportation, Highways and roads, Incorporation by reference, Signs and symbols, Traffic regulations.

In consideration of the foregoing, the Federal Highway Administration is amending Chapter I of Title 23, Code of Federal Regulations, as set forth below.

Issued on: May 2, 1986.

R.A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

The FHWA hereby amends Chapter I of Title 23, Code of Federal Regulations, as follows:

1. Part 625 is revised to read as follows:

PART 625—DESIGN STANDARDS FOR HIGHWAYS

Sec.
625.1 Purpose.
625.2 Policy.
625.3 Application.
625.4 Standards, policies, and standard specifications.
625.5 Guides and references.

Appendix A—Documents cited in Part 625.

Authority: 23 U.S.C. 109, 315, and 402; 49 CFR 1.48(b).

§ 625.1 Purpose.

To designate those standards, specifications, policies, guides and references that are acceptable to the Federal Highway Administration (FHWA) for application in the geometric and structural design of highways.

§ 625.2 Policy.

(a) Plans and specifications for proposed Federal-aid highway projects shall provide for a facility that will—

(1) Adequately meet the existing and probable future traffic needs and conditions in a manner conducive to safety, durability, and economy of maintenance; and

(2) Be designed and contracted in accordance with standards best suited to accomplish the foregoing objectives and to conform to the particular needs of each locality.

(b) The development and overall management of highway facilities must be considered as a continuing program. This process of highway management commences with planning and extends through design, construction, maintenance, and operation. To assure a continuing acceptable level of safe traffic service, it is essential to provide for adequate maintenance and periodic resurfacing, restoration, and rehabilitation (RRR) throughout the life of the highway. The RRR work is defined as work undertaken to extend the service life of an existing highway and enhance highway safety. This includes placement of additional surface material and/or other work necessary to return an existing roadway, including shoulders, bridges, the roadside, and appurtenances to a condition of structural or functional adequacy. The RRR work may include upgrading of geometric features, such as minor roadway widening, flattening curves, or improving sight distances. The RRR work is an essential part of any highway program, and each State and local agency should provide for these types of improvements in each annual highway program.

(c) An important goal of the FHWA is to provide the highest practical and feasible level of safety for people and property associated with the Nation's highway transportation systems and to reduce highway hazards and the resulting number and severity of accidents on all the Nation's highways. Accordingly, the only constraint on the application of Federal-aid funds to RRR work is that they must be used to provide a facility that adequately meets existing and probable future traffic needs and conditions in a manner conducive to safety, durability, and economy of maintenance, and acceptable levels of community and environmental impact. The RRR projects shall be designed and constructed in a manner that will enhance highway safety and accomplish the foregoing objectives according to the particular needs of each State and locality.

§ 625.3 Application.

(a) The standards, policies, and standard specifications contain specific criteria and controls for the design of highways. Deviations from specific minimum values therein are to be handled in accordance with procedures in paragraph (f) of this section. If there is a conflict between criteria in the documents enumerated in § 625.4 of this part, the latest listed standard, policy, or standard specification will govern.

(b) The guides and references (handbooks, reports, etc.) include information and general controls that are valuable in attaining good design and in promoting uniformity. They are intended to provide general program direction. Project-by-project deviations from the criteria in guides and references do not require handling as exceptions under paragraph (f) of this section.

(c) Application of FHWA regulations, although cited in § 625.4 of this part as standards, policies, and standard specifications, shall be as set forth therein.

(d) This regulation does not establish Federal standards for work that is not federally funded; however, the safety related criteria of the referenced documents are established as goals for developing State and local safety programs for all public highways as required by Highway Safety Program Standard 12, 23 CFR 1204.4.

(e) The Division Administrator shall determine the applicability of the roadway geometric design standards to traffic engineering and safety projects for signing, marking, signal installation, and traffic barriers which include very minor or no roadway work. Formal findings of applicability are expected only as needed to resolve controversies.

(f) Exceptions. (1) Approval within the delegated authority provided by FHWA Order 1-1(2) may be given on a project basis to designs which do not conform to the minimum criteria as set forth in the standards, policies, and standard specifications for:

(i) Experimental features on projects; and

(ii) Projects where conditions warrant that exceptions be made.

(2) The determination to approve a project design that does not conform to the minimum criteria is to be made only after due consideration is given to all project conditions such as maximum service and safety benefits for the dollar invested, compatibility with adjacent sections of roadway and the probable time before reconstruction of the section due to increased traffic demands or changed conditions.

§ 625.4 Standards, policies, and standard specifications.

(a) *Roadway and appurtenances.* (1,2)
(1) A Policy on Geometric Design of Highways and Streets, AASHTO 1984.(3)
(2) A Policy on Design Standards—Interstate System, AASHO 1967.(3)
(3) The geometric design standards for resurfacing, restoration, and rehabilitation (RRR) projects on highways other than freeways shall be the procedures and the design or design criteria established for individual projects, groups of projects, or all nonfreeway RRR projects in a State, and as approved by the FHWA. The other geometric design standards in this section do not apply to RRR projects on highways other than freeways, except as adopted on an individual State basis. The RRR design standards shall reflect the consideration of the traffic, safety, economic, physical, community, and environmental needs of the projects.

5. Transportation Research Board, 2101 Constitution Avenue, NW., Washington, DC 20418.

PART 655—TRAFFIC OPERATIONS

Subpart F—Traffic Control Devices on Federal-Aid and Other Streets and Highways [Amended]

2. The authority citation for Part 655 continues to read as follows:

Authority: 23 U.S.C. 109(d), 114(a), 217, 315, 402(a); 23 CFR 1204.4; and 49 CFR 1.48(b).

3. Part 655, Subpart F is amended by revising § 655.601 to read as follows:

§ 655.601 Purpose.

To prescribe the policies and procedures of the Federal Highway Administration (FHWA) to obtain basic uniformity of traffic control devices on all streets and highways in accordance with the following references that are approved by the FHWA for application on Federal-aid projects:

(a) Manual on Uniform Traffic Control Devices for Streets and Highways, FHWA, 1978, as amended January 1985. (This publication is incorporated by reference and is on file at the Office of the Federal Register in Washington, DC. It may be purchased from the Superintendent of Documents, U.S. Government Printing Office (GPO), Washington, DC 20402 and has Stock No. 050-001-81001-8. It is available for inspection and copying as prescribed in 49 CFR Part 7, Appendix D).

(b) Standard Alphabets for Highway Signs, FHWA, 1986 Edition, Reprinted May 1972. (This publication is incorporated by reference and is on file at the Office of the Federal Register in Washington, DC. This document is available for inspection and copying as provided in 49 CFR Part 7, Appendix D).

(c) Traffic Surveillance and Control, FHWA, 23 CFR Part 655, Subpart D.

(d) Motorist Aid Systems, FHWA, 23 CFR Part 655, Subpart G.

(e) Pavement Marking Demonstration Program, FHWA, 23 CFR Part 920.

Technical Amendments

Due to the revision of 23 CFR Part 625 and the transfer of references from former § 625.3(c) to Part 655, Subpart F, the following technical amendments are necessary to correct citations found in other parts of title 23, CFR, and are set forth below.

PART 626—[AMENDED]

4. In § 626.5, paragraph (a) is amended by removing footnote number one and adding the following parenthetical text after the first full sentence which ends with the words "highway projects.":

§ 626.5 Policy.

(a) * * * (This publication is incorporated by reference and is on file at the Office of the Federal Register in Washington, DC. It is available for inspection from the FHWA Washington Headquarters and all FHWA Division and Regional Offices as prescribed in 49 CFR Part 7, Appendix D.)

* * * * *

PART 630—[AMENDED]

Subpart J—[Amended]

5. In § 630.1004, the citation in the footnote is corrected by removing "23 CFR 625.3" and inserting in lieu thereof "23 CFR 655, Subpart F."

PART 645—[AMENDED]

Subpart B—[Amended]

6. In § 645.207, paragraph (b) is amended by removing the sentence which reads, "This publication is incorporated by reference and is on file at the Office of the Federal Register in Washington, D.C."

PART 650—[AMENDED]

Subpart C—[Amended]

7. In § 650.301, the paragraph is amended by removing the words "Highway Definitions Manual" and inserting in lieu thereof the words "Transportation Glossary."

PART 650—[AMENDED]

Subpart F—[Amended]

8. In § 650.605(a), the references are corrected by removing "23 CFR 625.5" and "23 CFR 625.3" and inserting in lieu thereof "23 CFR 625.3" and "23 CFR 625.4", respectively.

PART 655—[AMENDED]

Subpart F—[Amended]

9. In § 655.603, paragraph (e) is revised to read as follows:

§655.603 Standards.

* * * * *

(e) *Specific information signs.* Standards for specific information signs are contained in the MUTCD.

PART 666—[AMENDED]

§ 666.9 [Amended]

10. In § 666.9, the AASHO publication "Highway Definition" has been superseded and removed from incorporation by reference in title 23, CFR, therefore § 666.9 is amended by removing the title "Highway Definitions" and inserting in its place "Transportation Glossary." Also, in footnote number three, the title is similarly changed and the second sentence concerning incorporation by reference is removed.

PART 810—[AMENDED]

§ 810.4 [Amended]

11. In § 810.4(b)(4), footnote number one is corrected by removing the citation "23 CFR 625.3" and inserting in lieu thereof "23 CFR 655, Subpart F."

PART 922—[AMENDED]

§ 922.13 [Amended]

12. In § 922.13(c), footnote number one is corrected by removing the citation "23 CFR 625.3(c)(1)" and inserting in lieu thereof "23 CFR 655, Subpart F."

[FR Doc. 86-10347 Filed 5-6-86; 8:45 am]

BILLING CODE 4910-22-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Public and Indian Housing

24 CFR Part 990

[Docket No. R-86-1126; FR-1775]

Annual Contributions for Operating Subsidy-Performance Funding System; Determination of Operating Subsidy

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Final rule.

SUMMARY: This final rule establishes new conditions under which a Public Housing Agency (including an Indian Housing Authority) may use a Projected Occupancy Percentage of less than 97% in computing its per-unit Operating Income Level under the Performance Funding System. A PHA that is defined as a low occupancy PHA is required to have a HUD-approved Comprehensive Occupancy Plan in order to use a Projected Occupancy Percentage of less than 97%. The Plan includes yearly, PHA-wide occupancy goals. A PHA that is defined as a low occupancy PHA may use its yearly, PHA-wide occupancy goal, rather than 97%, to compute its Operating Income Level if it has a HUD-approved Comprehensive Occupancy Plan. A PHA with a high occupancy rate (equal to or greater than 97%) may use 97% as its Projected Occupancy Percentage in computing its per-unit Operating Income Level. These changes encourage a PHA to maximize its total income by reducing its vacancies. They eliminate provisions in the the former rule that created disincentives for reducing vacancy rates.

DATES: Effective date: June 13, 1986.

FOR FURTHER INFORMATION CONTACT: Nancy S. Chisholm, Director, Policy Staff, Room 4118, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, DC 20410-5000, telephone (202) 755-6713. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

On June 24, 1985, the Department published an interim rule (50 FR 25951). (A correction and extension of comment period was published at 50 FR 40196 on October 2, 1985.) The interim rule which became effective on August 2, 1985, established new conditions under which a Public Housing Agency (including an Indian Housing Authority) may use a Projected Occupancy Percentage of less than 97% in computing its per-unit Operating Income Level under the Performance Funding System (PFS).

Discussion of Public Comments and Changes Made in the Final Rule

The Department received nine public comments in response to the interim rule. (The interim rule, itself, followed a proposed rule published at 49 FR 22663 on May 31, 1985. For the response to the 43 public comments on the proposed rule see the preamble to the interim rule at 50 FR 25954 to 25957.)

There follows a discussion of the public comments on the interim rule and of the changes in the final rule made in response to the public comment.

General Comments

While most of the commenters perceived the interim rule to be a significant improvement over the proposed rule, certain commenters raised generalized objections to either the substance of the rule or its method of development.

One commenter characterized the rule as a major structural change in the calculation of the PFS which contravened former OMB Director David Stockman's commitment to Senator Jake Garn and Congressman Fernand St Germain that there would be no major changes in the PFS until Congress had the opportunity to draft a new authorization bill (an issue that also was raised with respect to the proposed rule). Some commenters reiterated another objection made to the proposed rule, namely, that the rulemaking constituted a piecemeal approach and should be made as part of a comprehensive revision of the PFS. Certain other changes to the PFS identified as desirable as part of an overall revision to the PFS included: Providing adjustments to the Allowable Expense Level beyond the base year, developing a system for funding costs that are beyond the PHA's control and establishing a "peer review" process of HUD decisions (including PFS-related decisions) that have a major impact on PHAs and the public.

The Department addressed similar issues in the preamble to the interim rule beginning at 50 FR 25954. The Department continues to believe its position on these issues is sound. This rulemaking does not effect fundamental changes or structural program reforms, but rather is designed to correct identified deficiences in existing regulations. As stated in the preamble to the interim rule, "the rule addresses a discrete problem that does not need to be merged with other issues. The Department believes that the public interest is best served by implementing this rule quickly."

One commenter criticized the lack of any specific commitment of money by HUD to match PHA initiatives for reducing vacancies. This commenter also noted that HUD should press PHAs for well-rounded management efforts and not simply for one isolated, albeit important, housing initiative. This rule, it is true, does not provide additional funding for initiatives undertaken by PHAs to reduce vacancies. Establishing a new funding mechanism would be a fundamental change which the Department is committed not to make without seeking authorizing legislation. Furthermore, the Department already provides funding through the Comprehensive Improvement Assistance Program (CIAP) which may be used by PHAs under a comprehensive modernization program to address vacancy problems. CIAP also provides management improvement funds which may be used by PHAs to improve their management.

Comments Addressed to Specific Sections

Section 990.102 Definitions.

Among other changes, the interim rule revised the definition of "Unit Months Available" in § 990.102(q) to provide that, for PHA Requested Budget Years starting on or after July 1, 1991, a unit in a vacant building that is in a project determined by HUD to be nonviable is not considered available for occupancy and is not counted as a unit eligible for subsidy. One commenter objected to including a July 1, 1991, cutoff of subsidy for these units on the grounds that the problem of public housing developments being considered nonviable will not be resolved by eliminating funding for units in these developments. The Department believes that this objection is based on a misunderstanding of the purpose of the cutoff and its relationship to the Department's efforts to modernize units. CIAP funding of projects with serious physical, locational, or other problems is provided when HUD determines that the proposed modernization program will eliminate or effectively mitigate the problems, at a reasonable cost. If the proposed modernization seems unlikely to eliminate or sufficiently mitigate the underlying problems, or if it is not cost reasonable, the project is considered nonviable. Nonviability is a determination that applies to a project in light of a specific modernization application. It is possible that a different modernization program could be

VOL 51 ISS 88 MY 7 1986 UMI

submitted that would determined likely to make the project viable.

Under CIAP, all large and medium sized PHAs are to have submitted a comprehensive plan assessing the modernization needs for each project by early 1987. Before July 1, 1991, HUD will have had an opportunity to review these plans and to identify projects that are not likely to be viable under the treatment proposed in the plans and PHAs will have had time to revise their modernization plans, for these projects or to determine to dispose of the projects. With respect to small PHAs, the Department will make viability determinations for individual projects when application is made for modernization funds.

The Department has adopted the July 1, 1991, cutoff of operating subsidy for units in vacant buildings in projects determined to be nonviable because the Department believes that it should not continue to provide operating subsidy for units that clearly are not providing adequate housing to anyone and for which there are no reasonable plans to create decent living conditions.

The same commenter requester that the regulation specifically state that vacant units in vacant viable buildings will continue to receive subsidy after 1991. The rule defines "unit months available" and creates an exception for one category of vacant units, namely, those that are located in vacant buildings in nonviable projects after July 1, 1991. It would unnecessarily complicate the rule to restate that other vacant units are considered available for occupancy.

Another commenter objected to the cutoff of funds bacause PHAs are not given a voice in the viability decision or in establishing procedures for determining when projects are considered nonviable. This commenter argued that any decision to find a project nonviable should include a review of whether HUD has fulfilled its responsibilities in providing modernization and other funding, of the need for public housing in the community, and of the feasibility of providing replacement housing for lower income families in any other way.

Decisions on whether a project should be funded for modernization are made by HUD under 24 CFR Part 968, which was promulgated through rulemaking (see 47 FR 22315, May 21, 1982). PHAs are involved in the determination of viability in that they design the treatment plans for modernization. Nevertheless, the final viability determinations must be made by HUD, since HUD is responsible for the administration of CIAP. These determinations assess the likely viability of a project if funds were available; lack of MUD rehabilitation funding is not a basis for finding a project nonviable. HUD does an assessment of the feasibility of relocation as a standard part of its viability determination and will provide modernization funds for a nonviable project if relocation of tenants is not feasible.

The Department has not adopted the commenter's suggestion that a determination of nonviability take into consideration an assessment of the need for public housing in the community in deciding whether a project is viable. Such an assessment is not relevant to the issue of viability, since vacant, nonviable projects are not currently contributing to meeting this need nor can they be rehabilitated to provide adequate housing.

Several commenters argued that units that have been approved for nondwelling use should be considered in determining the PHA's Allowable Expense Level (AEL). They argued that such units enhance the quality of life for existing residents and surrounding neighborhoods but usually generate only nominal rents while still generating costs for the PHA. Units approved by HUD for nondwelling use are not considered available for occupancy within the definition of "unit months available" in § 990.102 and, therefore, are not included in the determination of the PHA's Allowable Expense Level. This exclusion of units approved for nondwelling use has been in the PFS definition of "unit months available" since the Performance Funding System regulations were first promulgated on April 16, 1975, at 40 FR 17008. While the interim rule revised the definition, it did not propose to change this exclusion. The Department recognizes that there is a benefit to project residents for units that are used for nondwelling purposes and permits such use, conditioned upon HUD approval. However, this benefit must be measured against the fact that units approved for nondwelling use are no longer available to house families. After considering the public comment, the Department has not adopted the suggestion because it believes that the current rule strikes the appropriate balance by permitting units to be used for nondwelling purposes but not providing operating subsidies for these units.

Several commenters also urged that PHAs be permitted to use their original housing unit configuration for the purpose of calculating their AEL even though the unit configuration has been altered subsequently and reduced by combining smaller bedroom-sized units to create larger bedroom-sized units. This recommendation is outside the scope of the changes made in the interim rule. It involves a basis change in the computation of the Allowable Expense Level which the Department does not consider an appropriate subject matter for this final rule.

The Department has made "Vacant On-Schedule Modernization Units" a defined term to make the regulation text easier to read.

Section 990.109 Projected Operating Income Level.

Section 990.109(b)(3)(i) authorizes a PHA with an Actual Occupancy Percentage equal to or greater than 97% to use 97% as its Projected Occupancy Percentage. One commenter recommended that a PHA in this category be allowed to use a 97% Projected Occupancy Percentage immediately. It was the Department's intent when it published the interim rule to have the revisions apply uniformly to a PHA's first Requested Budget Year beginning on or after July 1, 1986. The Department published a correction document on October 2, 1985, at 50 FR 40196 to add a new § 990.119 to make it clear that the revisions made by the interim rule would not apply to Requested Budget Years beginning October 1, 1985, and January 1, and April 1, 1986. The Department does not believe there is any compelling reason to accelerate implementation of the provisions which would benefit only high occupancy PHAs.

The comments urging the Department to use an Actual Occupancy Percentage of less than 95% (rather than less than 97%) as the threshold for determining when a PHA must do a Comprehensive Occupancy Plan also apply under this section to how a PHA determines its Projected Occupancy Percentage. For the reasons stated in the discussion of § 990.118 below, the Department has retained the 97% criterion.

Section 990.109(b)(3)(iv) has been revised to make it clear that there are three types of PHAs that fall within the category of low occupancy PHAs without an approved Comprehensive Occupancy Plan. The first type is a PHA that has completed the term of a Comprehensive Occupancy Plan but has not, either under the Plan or afterwards, achieved an Actual Occupancy Percentage of 97% or had five or fewer vacant units other than vacant, on-schedule modernization units. The second is a low occupancy PHA that could submit a Comprehensive Occupancy Plan but elects not to submit one. The third is a PHA that submits a Plan that is disapproved by HUD. The reason for these changes are set out in the discussion of related changes to § 990.118(a) below.

Section 990.109(b)(3)(iv) permits the first type of low occupancy PHA described above, in determining its Projected Occupancy Percentage, to discount vacant units that are vacant for reasons beyond the PHA's control, as described in § 990.118(i). This type of PHA, however, is not authorized to do another Comprehensive Occupancy Plan unless it first achieves a 97% Actual Occupancy Rate and subsequently falls below that level. The other two types of low occupancy PHAs can only discount these units if they develop approved Comprehensive Occupancy Plans.

Section 990.117 Determining Actual Occupancy Percentage.

Under the interim rule, PHAs for their first Requested Budget Year on or after July 1, 1986, would determine whether they are required to submit a Comprehensive Occupancy Plan based on their Actual Occupancy Percentage as of September 30, 1984. For subsequent Requested Budget Years, the PHAs would make this determination based on their Actual Occupancy Percentage as of the first day of the month that is six months before the respective Requested Budget Year.

Several commenters questioned the use of the September 30, 1984, date for determining a PHA's Actual Occupancy Percentage for its first Requested Budget Year on or after July 1, 1986, because the data would be stale. They recommended using the same criterion that is used for subsequent Requested Budget Years. The commenters also recommended that HUD either provide exceptions to the so-called "snapshot" approach to determining Actual Occupancy Percentages to account for aberrations in the vacancy rate, or permit the use of an average over time. The Department agrees with these recommendations and has revised § 990.117 to (1) eliminate September 30, 1984, as a date for determining Actual Occupancy Percentage, except as discussed below, and (2) permit a PHA to determine its Actual Occupancy Percentage, at its option, either as of the last day of the month ending six months before the Requested Budget Year or as an average for the month ending six months before the Requested Budget Year. For example, a PHA with a Requested Budget Year beginning October 1, 1986, could determine its Actual Occupancy Percentage either *as of* March 31, 1986, or based on its average occupancy *during* March of 1986. (If a PHA elects to use the average approach, it must maintain records to document its computation of its Actual Occupancy Percentage.)

The Department has recently started the process to change the Report Date for Form HUD–51234, Report on Occupancy for Public and Indian Housing, to coincide with the last day of the month ending six months before the start of the PHA's fiscal year. Currently, the Report Date for this Form, for all PHAs, is September 30th. Since this change is not expected to become effective until after a PHA with a fiscal year beginning July 1, 1986, could submit a Comprehensive Occupancy Plan, the Department has determined that good cause exists and, under § 999.101, waives the requirements of § 990.117 to permit a PHA that has a fiscal year beginning July 1, 1986, and chooses to use the "snapshot" method to determine its Actual Occupancy Percentage, to use any of the following dates: September 30, 1984, as provided in the interim rule; September 30, 1985, the Report Date for Form HUD–51234 as of January 1, 1986; or December 31, 1985, the date provided in this final rule. If a PHA with a fiscal year beginning July 1, 1986 chooses to use a monthly average to determine its Actual Occupancy Percentage, it must determine the average for December 1985.

Section 990.118 Comprehensive Occupancy Plan Requirements.

In the interim rule, paragraph (a) of this section provides that a PHA with an Actual Occupancy Percentage of less than 97% shall prepare and submit a Comprehensive Occupancy Plan to HUD. One commenter recommended revising the paragraph to permit a PHA to elect to use 97% rather than do a Plan. The interim rule already permits a PHA to take this course of action, since a PHA that failed to submit a Comprehensive Occupancy Plan and had an Actual Occupancy Percentage less than 97% would be a "low occupancy PHA without an approved Comprehensive Occupancy Plan" under § 990.109(b)(3)(iv) and would be required to use 97% as its Projected Occupancy Percentage. The Department recognizes, however, that the regulation could be clearer on this point and has made the following revisions: First, § 990.118(a) has been revised to make the preparation of a Comprehensive Occupancy Plan permissive. Second, as discussed above, § 990.109(b)(3)(iv) has been revised to make it explicitly applicable to a PHA that is authorized to submit a Comprehensive Occupancy Plan but elects not to submit one—thereby making it clearer that such a PHA must use 97% as its Projected Occupancy Percentage.

Several commenters argued that the cutoff point for requiring a Comprehensive Occupancy Plan should be an Actual Occupancy Percentage of less than 95%, rather than less than 97%. This issue was also raised by public comments on the proposed rule, and was addressed by HUD in the preamble to the proposed rule at 50 FR 25955. The Department continues to believe that the 97% standard is preferable. It is important that Federal funds provided to house lower income families be used efficiently. The rule is intended to encourage maximum utilization of available units. That purpose is better achieved by having a PHA focus on vacancy problems when there is a vacancy rate in excess of 3%.

One commenter suggested that units that are held vacant as a result of federally required desegregation efforts not be considered vacant units for purposes of determining whether a Comprehensive Occupancy Plan must be prepared, or for determining a PHA's operating subsidy. It was the Department's intent, in creating the interim rule's "litigation category" of units vacant for reasons beyond a PHA's control, to cover only units that are vacant as a result of court-ordered constraints based on a cause of action arising under Title VI of the Civil Rights Act of 1964, or as a result of HUD-approved constraints related to such litigation or potential litigation. The Department has revised § 990.118(i)(3) accordingly. The Department, however, has not adopted the suggestion that these units be disregarded in determining whether a Comprehensive Occupancy Plan must be prepared, since the Comprehensive Occupancy Plan is a logical place for a PHA to address the actions it needs to take to return these units to occupancy.

There were many comments on the approval process for the Comprehensive Occupancy Plan. These comments included requests for criteria governing HUD's approval of the plan and for a procedures manual (including a commenter's request for an opportunity to participate in the development of the manual); and questions concerning how many times HUD would permit a revision of the Comprehensive Operating Plans; under what criteria HUD would approve and extension of a Plan; and who would make final decisions on competing ways to meet goals. More specifically, a commenter inquired whether HUD would force PHAs to repair efficiency and one bedroom units (which would have a

VOL 51 ISS 88 MY 7 1986 UMI

greater effect on vacancy rate) rather than repair 4, 5, and 6 bedroom units (which could house more persons). It was also suggested that the Comprehensive Occupancy Plan be automatically approved if HUD does not respond to it within 60 days of receipt.

With respect to this last issue, the Department intends to review Comprehensive Occupancy Plans promptly. Nonetheless, it does not believe that automatic approval of an entire Comprehensive Occupancy Plan based solely on HUD's failure to meet a review deadline is a sound administrative practice. Balancing the need for review of the Plan against a PHA's need to know what its operating subsidy for the next year will be, the Department has added a new paragraph (f) under which a PHA's PHA-wide yearly occupancy goal for the first year of its Plan will be considered approved for the purpose of calculating its operating subsidy, if HUD fails to approve, disapprove or otherwise substantively comment on the Comprehensive Occupancy Plan within 45 days of receipt of the Plan.

With respect to the questions raised concerning the approval process, the Department, in developing the interim rule, considered and rejected an approach under which it would adjust operating subsidy based upon a PHA's measured progress in completing specific actions, detailed in plan, within an agreed upon time frame. Such a plan would require that HUD and the PHA negotiate the details of the action a PHA must take and provide for yearly revision of the milestones to reflect changing circumstances. Many of the comments received suggest that the commenters perceive the Comprehensive Occupancy Plan to function in this manner.

The Comprehensive Occupancy Plan, however, is not designed to function this way. The primary purpose of the Comprehensive Occupancy Plan is to arrive at a set of yearly occupancy goals which lead to a 97% Actual Occupancy Percentage by the end of the period provided in the Plan. The purpose of the general and specific strategies that are a part of the Comprehensive Occupancy Plan is to enable HUD to assess in its review the reasonableness of the goals, not to dictate to PHA what actions it must take at any given point. Under this approach, it is not necessary for the Comprehensive Occupancy Plan to provide (and the regulation does not require that it provide) for revision of the general or specific strategies. A PHA, at its discretion, may alter its strategies as it believes necessary to meet its goals. In addition, the rule does not provide for revision of the yearly goals. Both the interim rule and the final rule provide for an adjustment to the PHA-wide occupancy goal to discount units vacant for reasons beyond a PHA's control when that goal is used to compute the PHA's projected operating income level (final rule § 990.118(h), interim rule § 990.118(b).

Contrary to the implication of some of the comments, the interim rule does not provide for extending the term of a Comprehensive Occupancy Plan after the Plan has been approved. Rather, § 990.118(c)(3) authorizes a term for a Comprehensive Occupancy Plan that exceeds the normal five- or two-year maximum only on the written approval of the Assistant Secretary for Public and Indian Housing. The decision to allow a period in excess of the normal maximum period is made at the time of approval of the Comprehensive Occupancy Plan.

The Department does not believe that it is either necessary or desirable to set out criteria for the approval of a Comprehensive Occupancy or for when the Plan may exceed the normal maximum term. The determination of whether a particular PHA's Comprehensive Occupancy Plan provides attainable occupancy goals does not lend itself to *a priori* standards. Rather, it must be determined case-by-case based on the particular circumstances of the PHA.

One commenter believed that the rule should be clearer regarding HUD's treatment of a PHA that meets the 97% rate by the end of a five-year Comprehensive Occupancy Plan, but subsequently falls below 97%. The commenter asked whether the PHA would use its Actual Occupancy Percentage, continue to use 97%, or submit a Comprehensive Occupancy Plan with a two-year term. The answer under the interim rule depends upon what the PHA's Actual Occupancy Percentage is for the respective Requested Budget Year. If the PHA would qualify as a high occupancy PHA *but for* on-schedule modernization, it may use its Actual Occupancy Percentage (see interim rule § 990.118(b)(3)(ii)). If it is a low occupancy PHA, it would be required to prepare a Comprehensive Occupancy Plan (interim rule § 990.118(a)), and if the Plan were approved by HUD, it would use the greater of its Actual Occupancy Percentage or its yearly PHA-wide occupancy goal (interim rule § 990.109(b)(3)(iii)). Such a Plan normally would not exceed a period of two years (interim rule § 990.118(c)(2)). If it was a low occupancy PHA without an approved Comprehensive Occupancy Plan, it would be required to use 97% as its Projected Occupancy Percentage (interim rule § 990.109(b)(3)(iv)).

The commenter's question focused attention on another situation, namely, a PHA which, at the expiration of the period covered by the Comprehensive Occupancy Plan, has not achieved an Actual Occupancy Percentage equal to or greater than 97%. Under the interim rule, a PHA in this situation would determine its Projected Occupancy Percentage in the same manner as described above for a PHA that achieves a 97% Actual Occupancy Percentage. Under the interim rule a PHA which, at the completion of a five-year Comprehensive Occupancy Plan, had an Actual Occupancy Rate less than 97% could immediately be eligible for a two-year Comprehensive Occupancy Plan, followed by additional two-year Plans if it still failed to reach 97% Actual Occupancy Percentage. The Department never intended the two-year Comprehensive Occupancy Plan to be used in this manner. Rather, it was intended to be available to a PHA that has had a 97% Actual Occupancy Percentage but later drops below this percentage. The two-year maximum period was established because such a PHA's vacancy problems should normally be less severe than those of a PHA with vacancy problems that would be covered by five-year Comprehensive Occupancy Plans.

The final rule has been revised so that a PHA that has a five-year (or longer) Comprehensive Occupancy Plan and fails to achieve a 97% Actual Occupancy Percentage by the end of the Plan period must use 97% as its Projected Occupancy Percentage, adjusted to discount units that are vacant for reasons beyond its control. Such a PHA may prepare another Comprehensive Occupancy Plan only if it falls below a 97% Actual Occupancy Percentage *after having achieved* a 97% Actual Occupancy Percentage for at least one fiscal year.

On the basis of the above discussion, the Department has revised § 990.118 as follows:

Paragraph (a) is now permissive rather than mandatory, to conform with § 990.109(b)(3)(iv), which, as discussed above, now explicitly provides that a low-occupancy PHA that elects not to submit a Comprehensive Occupancy Plan must use 97% as its Projected Occupancy Percentage. Paragraph (a)(1) in the final rule applies to a PHA's first Requested Budget Year beginning on or after July 1, 1986, and contains the same condition for submitting a Comprehensive Occupancy Plan as in § 990.118(a) of the interim rule, namely, the PHA must have an Actual Occupancy Percentage less than 97% and have more than five vacant units, not solely because of vacant, on-schedule modernization units. For subsequent Requested Budget Years, paragraphs (a)(2) (ii) and (iii) make it clear that, in addition to projecting itself to be a low-occupancy PHA for the Requested Budget Year, a PHA must meet the following conditions: (1) It must have had a 97% Actual Occupancy Percentage (or five or fewer vacant units other than vacant, on-schedule modernization units) in the current year; and (2) it is not currently under a Comprehensive Occupancy Plan.

Paragraph (c) in the interim rule has been restructured as paragraphs (c) and (d) in the final rule. New paragraph (c) now provides that Comprehensive Occupancy Plans are to be submitted with a PHA's budget. New paragraph (d)(1)(i) provides the maximum term for a Comprehensive Occupancy Plan submitted for a PHA's first Requested Budget Year beginning on or after July 1, 1986, and paragraph (d)(1)(ii) provides the maximum term for a Comprehensive Occupancy Plan submitted in a subsequent Requested Budget Year beginning on or after July 1, 1987. Paragraph (d)(2) of the final rule (which is substantially the same as § 990.118(c)(3) of the interim rule) provides that a Comprehensive Occupancy Plan may be approved for a term that exceeds the normal maximum but only with the prior written authorization of the Assistant Secretary for Public and Indian Housing.

Under § 990.118(h) of the final rule (interim rule § 990.118(f)), a PHA under an approved Comprehensive Occupancy Plan uses as its Projected Occupancy Percentage the greater of (1) its Actual Occupancy Percentage or (2) its approved, yearly PHA-wide occupancy goal. Two commenters recommended that a PHA that exceeds its goals should still be allowed to use its goal in determining its Projected Occupancy Percentage. The commenters believed such a change would give PHAs incentive not just to meet their goals but to exceed them. The Department considered this approach in developing the interim rule but decided against it because it creates a strong incentive for establishing very low goals in the early years of a Comprehensive Occupancy Plan.

Section 990.118(i) of the final rule (interim rule § 990.118(g)) identifies three categories of vacant units that are considered vacant for reasons beyond a PHA's control and which may be discounted in determining a PHA's Projected Occupancy Percentage under § 990.118(h) of the final rule. The litigation category in the interim rule has been made more specific in § 990.118(i)(3), as described above. One commenter suggested that HUD should consider the following factors: (1) Location in terms of any conditions in the surrounding neighborhoods that adversely affect the health, life and safety of project residents; (2) social conditions that have seriously affected the marketability of the project; and (3) physical conditions that have continuously hampered the marketability of the project. Another commenter claimed this paragraph did not list other causes of vacancies that may be beyond a PHA's control, e.g., overbuilding of section 8 new construction and section 202 projects; limited money for modernization; need for extraordinary maintenance, betterments and additions; increasing rent to income ratios and elimination of ceiling rents which result in the moveout of higher income families.

The factors enumerated by the commenters are very relevant to a PHA's consideration of what to do to eliminate vacancies. They represent the type of issues a PHA must deal with in a Comprehensive Occupancy Plan to eliminate vacancy problems. The Department does not believe that these market-related considerations, however, are appropriate for adjusting a PHA's Projected Occupancy Percentage, since such adjustments would reduce the incentive to face these issues.

Findings

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332. The Finding of No Significant Impact is available for public inspection and copying during regular business hours in the Office of the Rules Docket Clerk, Room 10276, 451 Seventh Street, SW., Washington, DC 20410-0500.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order on Federal Regulation issued by the President on February 17, 1981. Analysis of the rule indicates that it would not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

In accordance with the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule would not have a significant economic impact on a substantial number of small entities, because a significant number of very small PHAs that have high vacancies are currently using a 97% Projected Occupancy Percentage to compute their Operating Expense Level. Accordingly, the funds available to these PHAs should not be significantly affected.

This rule was listed as Sequence Number 956 in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 14036 at page 14077), under Executive Order 12291 and the Regulatory Flexibility Act.

The information collection requirements contained in § 990.118 of this rule have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520) and assigned OMB control number 2577-0086.

The Catalog of Federal Domestic Assistance program numbers are 14.146 and 14.156.

List of Subjects in 24 CFR Part 990

Housing and community development, Lower-income housing, Public housing.

PART 990—[AMENDED]

Accordingly, the Department amends 24 CFR Part 990 as follows:

1. The authority citation for Part 990 continues to read as follows:

Authority: Sec. 9, United States Housing Act of 1937, 42 U.S.C. 1437g; sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

2. The amendments published on June 24, 1985 (50 FR 25951), and October 2, 1985 (50 FR 40196) are adopted as final, with the following changes.

3. In § 990.102, the definition of "Unit Approved for Deprogramming" is revised and a new defined term "Vacant, On-Schedule Modernization Units" is added in alphabetical order, to read as follows:

§ 990.102 Definitions.

* * * * *

Unit Approved for Deprogramming. (a) A dwelling unit for which HUD has approved the PHA's formal request to remove the dwelling unit from the PHA's

BEST COPY AVAILABLE

inventory and the Annual Contributions Contract but for which removal, *i.e.*, deprogramming, has not yet been completed, or (b) a nondwelling structure or a dwelling unit used for nondwelling purposes which the PHA has determined will no longer be used for PHA purposes and which HUD has approved for removal from the PHA's inventory and Annual Contributions Contract.

* * * * *

Vacant, On-Schedule Modernization Units. Vacant, On-Schedule Modernization Units are vacant units in an otherwise occupiable project that has received funding for modernization through the Comprehensive Improvement Assistance Program (24 CFR Part 968) or other sources; and for which

(a) It is expected that the vacant units will be occupied on completion of modernization work;

(b) The PHA has a schedule for carrying out the modernization which is acceptable to HUD; and

(c) The modernization work is on schedule.

4. In § 990.109, paragraph (b)(3) is revised to read as follows:

§ 990.109 Projected Operating Income Level.

* * * * *

(b) * * *

(3) *Projected Occupancy Percentage.* The PHA shall determine its projected percentage of occupancy for all Project Units (Projected Occupancy Percentage), as follows:

(i) *High occupancy PHAs.* If the PHA's Actual Occupancy Percentage (see § 990.117) is equal to or greater than 97%, the PHA's Projected Occupancy Percentage is 97%.

(ii) *High occupancy PHAs but for on-schedule modernization.* If the PHA's Actual Occupancy Percentage (see § 990.117), is less than 97% solely because of Vacant, On-Schedule Modernization Units, the PHA's Projected Occupancy Percentage is its Actual Occupancy Percentage. A PHA may also use its Actual Occupancy Percentage as its Projected Occupancy Percentage if the PHA has five or fewer vacant units other than Vacant, On-Schedule Modernization Units.

(iii) *Low occupancy PHAs with an approved Comprehensive Occupancy Plan.* If the PHA has an Actual Occupancy Percentage (see § 990.117) less than 97% and more than five vacant units, not solely because of Vacant, On-Schedule Modernization Units; and if the PHA has a HUD-approved Comprehensive Occupancy Plan, the PHA's Projected Occupancy Percentage is determined under § 990.118(h).

(iv) *Low occupancy PHAs without an approved Comprehensive Occupancy Plan.* Except as provided in the next sentence, the PHA shall use 97% as its Projected Occupancy Percentage, if the PHA: (A) has an Actual Occupancy Percentage (see § 990.117) less than 97% and has more than five vacant units, not solely because of Vacant, On-Schedule Modernization Units; and the PHA: (B) (*1*) Has completed the term of its approved Comprehensive Occupancy Plan but has not achieved a 97% Actual Occupancy Percentage or has not had five or fewer vacant units other than Vacant On-Schedule Modernization Units; or (*2*) is authorized to submit a Comprehensive Occupancy Plan but elects not to submit one, or (*3*) submits a Comprehensive Occupancy Plan that is disapproved by HUD. A low occupancy PHA without an approved Comprehensive Occupancy Plan that meets the conditions described in paragraph (B)(*1*) of this paragraph (iv) may adjust the 97% Projected Occupancy Percentage to discount units that are vacant for reasons beyond its control, as provided in § 990.118(i).

* * * * *

5. Section 990.117 is revised to read as follows:

§ 990.117 Determining Actual Occupancy Percentage.

For each Requested Budget Year beginning on or after July 1, 1986, the PHA shall determine the percentage of occupancy for all Project Units included in the Unit Months Available (Actual Occupancy Percentage), at its option, either for the last day of the month that ends six months before the beginning of the Requested Budget Year, or based on the average occupancy during the month ending six months before the beginning of the Requested Budget Year. If the PHA elects to use an average, it shall maintain a record of its computation of its Actual Occupancy Percentage. The Actual Occupancy Percentage shall be adjusted to reflect expected changes in occupancy because of modernization, new development, demolition, or disposition in order to reflect the expected average occupancy rate throughout the year. If, after that date, there are changes, up or down, in occupancy because of modernization, new development, demolition or disposition not reflected in the adjustment, the PHA shall submit a budget revision to reflect the actual change in occupancy due to these actions.

6. Section 990.118 is revised to read as follows:

§ 990.118 Comprehensive Occupancy Plan requirements.

(a) *PHAs that may submit a Comprehensive Occupancy Plan.* A PHA may prepare and submit a Comprehensive Occupancy Plan to HUD in accordance with the provisions of this section:

(1) For its first Requested Budget Year beginning on or after July 1, 1986, if the PHA has an Actual Occupancy Percentage (§ 990.117) less than 97%, and has more than five vacant units, not solely because of Vacant, On-Schedule Modernization Units; or

(2) For a Requested Budget Year beginning on or after July 1, 1987, if:

(i) The PHA projects an Actual Occupancy Percentage (§ 990.117) for the Requested Budget Year of less than 97% and has more than five vacant units, other than Vacant, On-Schedule Modernization Units;

(ii) The PHA is not currently a low occupancy PHA, that is, the PHA had an Actual Occupancy Percentage determined under § 990.117 for the current Requested Budget Year that equalled or exceeded 97% or had five or fewer vacant units other than Vacant, On-Schedule Modernization Units; and

(iii) The PHA is not currently under a Comprehensive Occupancy Plan.

(b) *Comprehensive Occupancy Plan content.* A Comprehensive Occupancy Plan shall provide a general PHA-wide strategy for returning to occupancy or deprogramming all vacant units and a specific strategy for returning to occupancy or deprogramming vacant units for each project that has an occupancy percentage of less than 97%.

(1) The general PHA-wide strategy for returning to occupancy or deprogramming all vacant units shall specify management actions the PHA is taking or intends to take to eliminate vacancies, such as revised occupancy policies, actions to reduce time to return vacated units to occupancy, and identification of the need to use the exception for nonelderly tenants in elderly projects, and shall include a schedule for completing these actions.

(2) The project-specific strategy shall:

(i) Identify each project that has a percentage of occupancy less than 97%;

(ii) State the project-specific actions the PHA is taking or intends to take to eliminate vacancies, such as (A) modernization, (B) demolition, (C) disposition, (D) change in occupancy policy, or (E) physical or management improvements; and

(iii) For each project identified, include a schedule for completing these actions and returning the units to occupancy.

BEST COPY AVAILABLE

(3) The Comprehensive Occupancy Plan shall also include yearly PHA-wide occupancy goals and yearly occupancy goals for each project with an occupancy rate below 97% stated for each year until there is a projected PHA-wide occupancy rate of at least 97% or an estimate that the PHA will have five or fewer vacant units, excluding units that are Vacant, On-Schedule Modernization Units. These goals should reflect the average occupancy percentage for each year. The yearly occupancy goals (both PHA-wide and project specific) for the first year of a Comprehensive Occupancy Plan that is submitted with a PHA's budget for its first Requested Budget Year beginning on or after July 1, 1986, shall take into account actions taken by the PHA from August 2, 1985, to reduce vacancies.

(c) *Time for submitting a Comprehensive Occupancy Plan.* A PHA that submits a Comprehensive Occupancy Plan to HUD for approval in accordance with paragraph (a) of this section shall submit the Comprehensive Occupancy Plan with its budget.

(d) *Maximum term of a Comprehensive Occupancy Plan.* (1) Except as provided in paragraph (d)(2) of this section, a Comprehensive Occupancy Plan:

(i) For a Comprehensive Occupancy Plan submitted for a PHA's first Requested Budget Year beginning on or after July 1, 1986, shall be for a period approved by HUD as reasonable which, shall not exceed five years; or

(ii) For a Comprehensive Occupancy Plan submitted for a Requested Budget Year beginning on or after July 1, 1987, shall be for a period of one or two years, as approved by HUD.

(2) A Comprehensive Occupancy Plan that exceeds the maximum period provided in paragraphs (d)(1) (i) or (ii) of this section may be approved only if the Assistant Secretary for Public and Indian Housing has given written authorization for such longer period before the approval of the Plan.

(e) *Local governing body review.* The PHA shall have the Comprehensive Occupancy Plan reviewed by the local governing body for comment and shall submit any comments from the local governing body to HUD with the Comprehensive Occupancy Plan.

(f) *HUD review of Comprehensive Occupancy Plan.* If HUD fails to approve, disapprove or otherwise substantively comment on a Comprehensive Occupancy Plan within 45 days of receipt of the Plan, the PHA-wide yearly occupancy goal for the first year of the Comprehensive Occupancy Plan shall be considered approved for the purpose of determining the PHA's Projected Occupancy Percentage under paragraph (h) of this section.

(g) *Financially or Operationally Troubled PHA.* If a PHA is a Financially or an Operationally Troubled PHA (see HUD Handbook 7475.14 (April 1984), Chapter 3) and has an approved Workout Plan, the Comprehensive Occupancy Plan shall be made an addendum to the Workout Plan.

(h) *Projected Occupancy Percentage (Comprehensive Occupancy Plan PHA).* A PHA that has a HUD-approved Comprehensive Occupancy Plan shall use as its Projected Occupancy Percentage for computing its projected operating income level under § 990.109 the greater of (1) its Actual Occupancy Percentage, as determined under § 990.117 or (2) its approved, yearly PHA-wide occupancy goal, adjusted, as necessary, to discount units that are vacant for reasons beyond the PHA's control, as provided in paragraph (i) of this section.

(i) *Units vacant for reasons beyond a PHAs control.* A vacant unit is considered vacant for reasons beyond a PHA's control only if the unit is located in a project that meets one of the following conditions:

(1) The PHA has applied for modernization, HUD cannot fund the project because of lack of sufficient funding, and it is expected that the units will be occupied when the units are modernized.

(2) The vacant units are Vacant, On-Schedule Modernization Units.

(3) The units are vacant because of natural disasters or as a result of a court-ordered, or HUD-approved, constraints relating to Title VI of the Civil Rights Act of 1964.

(Information collection requirements contained in this section have been approved by the Office of Management and Budget under control number 2577-0088.)

10. Section 990.119 is revised to read as follows:

§ 990.119 Transition provision.

In determining operating subsidy for Requested Budget Years beginning October 1, 1985, January 1, 1986, and April 1, 1986, the definition of "Unit Approved for Deprogramming" in § 990.102 and the provisions of §§ 990.117, and 990.118 do not apply, and the provisions of §§ 990.101(c)(4), 990.102(g), 990.108(b), and 990.109(e) and (b)(3) apply as they were in effect on August 1, 1985 (*see* 24 CFR Part 990, rev. April 1, 1985).

Dated: April 21, 1986.

James E. Baugh,

General Deputy Assistant, Secretary for Public and Indian Housing.

BILLING CODE 4210-27-M

DEPARTMENT OF JUSTICE

28 CFR Part 0

[Tax Division Directive No. 55]

Redelegation of Authority to Release Rights of Redemption in Certain Cases

AGENCY: Justice.

ACTION: Final rule.

SUMMARY: This directive increases the United States Attorneys' authority to release rights of redemption in certain cases to $200,000. This directive supersedes Tax Division Directive No. 30.

EFFECTIVE DATE: This directive shall become effective on May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Milan Karlan, Tax Division, Department of Justice, Washington, DC 20530 (202) 724-6567.

SUPPLEMENTARY INFORMATION: The Acting Assistant Attorney General for the Tax Division has determined that this directive is not a rule within the meaning of Executive Order 12291 or the Regulatory Flexibility Act.

List of Subjects in 28 CFR Part 0

Authority delegations (Government Agencies), Government employees, Organization and functions (Government Agencies).

PART 0—[AMENDED]

1. The authority citation for Part 0 continues to read as follows:

Authority: 5 U.S.C. 301; 28 U.S.C. 509, 510, unless otherwise noted.

2. In the appendix to Part 0, Subpart Y, under Tax Division, remove Directive No. 30 and add Directive No. 55 to read as follows:

[Directive No. 55]

By virtue of the authority vested in me by Part 0 of Title 28 of the Code of Federal Regulations, particularly §§ 0.70, 0.160, 0.162, 0.164, 0.166, and 0.168, it is hereby ordered as follows:

Section 1. The U.S. Attorney for each district in which is located real property, which is subject to a right of redemption of the United States in respect of Federal tax liens, arising under section 2410(c) of Title 28 of the United States Code, or under State law when the United States has been joined as a party to a suit, is authorized to release the

VOL 51 ISS 88 MY 7 1986 UMI

right of redemption, subject to the following limitations and conditions—

(1) This redelegation of authority relates only to real property on which is located only one single-family residence, and to all other real property having a fair market value not exceeding $200,000. That limitation as to value or use shall not apply in those cases in which the release is requested by the Veterans Administration or any other Federal agency.

(2) The consideration paid for the release must be equal to the value of the right of redemption, or fifty dollars ($50), whichever is greater. However, no consideration shall be required for releases issued to the Veterans Administration or any other Federal agency.

(3) The following described documents must be placed in the U.S. Attorney's file in each case in which a release is issued—

(A) The favorable recommendation of the appropriate Regional Counsel of the Internal Revenue Service.

(B) Appraisals by two disinterested and well-qualified persons. In those cases in which the applicant is a Federal agency, the appraisal of that agency may be substituted for the two appraisals generally required.

(C) Such other information and documents as the Tax Division may prescribe.

Section 2. This directive supersedes Tax Division Directive No. 30, effective August 1, 1978.

Section 3. This directive shall become effective on the date of its publication in the **Federal Register.**

Roger M. Olsen,

Acting Assistant Attorney General, Tax Division.

Approved: April 2, 1986.

D. Lowell Jensen,

Deputy Attorney General.

28 CFR Part 0

[Tax Division Directive No. 54]

Redelegation of Authority to Compromise and Close Civil Claims

AGENCY: Justice.

ACTION: Final rule.

SUMMARY: This directive gives the Chief of the Office of Special Litigation authority to accept and reject offers in compromise and approve administrative settlements and concessions in the same manner, and subject to the same limitations, as the Chiefs of the Civil Trial Sections and the Claims Court Section, and increases the United States Attorneys' authority to compromise and close judgments referred to them to judgments which do not exceed $200,000. This directive supersedes Tax Division Directive No. 47.

EFFECTIVE DATE: This directive shall become effective on May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Milan Karlan, Tax Division, Department of Justice, Washington, DC 20530 (202) 724-6567.

SUPPLEMENTARY INFORMATION: The Acting Assistant Attorney General for the Tax Division has determined that this directive is not a rule within the meaning of Executive Order 12291 or the Regulatory Flexibility Act.

List of Subjects in 28 CFR Part 0

Authority delegations (Government Agencies), Government employees, Organization and functions (Government Agencies).

PART 0—[AMENDED]

1. The authority citation for Part 0 continues to read as follows:

Authority: 5 U.S.C. 301; 28 U.S.C. 509, 510, unless otherwise noted.

2. In the appendix to Part 0, Subpart Y, under Tax Division, remove Directive No. 47 and add Directive No. 54 to read as follows:

[Directive No. 54]

By virtue of the authority vested in me by Part 0 of Title 28 of the Code of Federal Regulations, particularly §§ 0.70, 0.160, 0.162, 0.164, 0.166, and 0.168, it is ordered as follows:

Section 1. The Chiefs of the Civil Trial Sections, the Claims Court Section, the Appellate Section, the Office of Special Litigation, and the Attorney-in-Charge of the Dallas Field Office are authorized to reject offers in compromise, regardless of amount, provided that such action is not opposed by the agency or agencies involved.

Section 2. Subject to the conditions and limitations set forth in Section 8 hereof, the Chiefs of the Civil Trial Sections, the Claims Court Section and the Office of Special Litigation are authorized to:

(A) Accept offers in compromise in all civil cases in which the amount of the Government's concession, exclusive of statutory interest, does not exceed $200,000,

(B) Approve administrative settlements not exceeding $100,000,

(C) Approve concessions (other than by compromise) of civil claims asserted by the Government in all cases in which the gross amount of the original claim does not exceed $100,000,

(D) Accept offers in compromise in injunction or declaratory judgment suits against the United States in which the amount of the related liability, if any, does not exceed $200,000, and

(E) Accept offers in compromise in all other non-monetary cases,

provided that such action is not opposed by the agency or agencies involved, and provided further that the case is not subject to reference to the Joint Committee on Taxation.

Section 3. Subject to the conditions and limitations set forth in Section 8 hereof, the Chief of the Appellate Section is authorized to:

(A) Accept offers in compromise with reference to litigating hazards of the issues on appeal in all civil cases in which the amount of the Government's concession, exclusive of statutory interest, does not exceed $200,000,

(B) Accept offers in compromise in declaratory judgment suits against the United States in which the amount of the related liability, if any, does not exceed $200,000, and

(C) Accept offers in compromise in all other nonmonetary cases which do not involve issues concerning collectibility,

provided that such action is not opposed by the agency or agencies involved or the chief of the section in which the case originated, and provided further that the case is not subject to reference to the Joint Committee on Taxation.

Section 4. Subject to the conditions and limitations set forth in Section 8 hereof, the Attorney-in-Charge of the Dallas Field Office is authorized to accept offers in compromise in all civil cases in which the amount of the Government's concession, exclusive of statutory interest, does not exceed $10,000, provided that such action is not opposed by the agency or agencies involved, and provided further that the case is not subject to reference to the Joint Committee on Taxation.

Section 5. Subject to the conditions and limitations set forth in Section 8 hereof, the Chief of the Office of Review is authorized to:

(A) Accept offers in compromise in all civil cases in which the amount of the Government's concession, exclusive of statutory interest, does not exceed $500,000,

(B) Approve administrative settlements not exceeding $500,000,

(C) Approve concessions (other than by compromise) of civil claims asserted by the Government in all case in which the gross amount of the original claim does not exceed $500,000,

(D) Accept offers in compromise in all nonmonetary cases, and

(E) Reject offers in compromise, or disapprove administrative settlements or concessions, regardless of amount,

provided that the action is not opposed by the agency or agencies involved or the chief of the section to which the case is assigned, and provided further that the case is not subject to reference to the Joint Committee on Taxation.

Section 6. Subject to the conditions and limitations set forth in Section 8 hereof, the Deputy Assistant Attorneys General and the Special Counsel to the Assistant Attorney General each is authorized to:

(A) Accept offers in compromise of claims against the Government in all cases in which the amount of the Government's concession, exclusive of statutory interest, does not exceed $750,000,

(B) Approve administrative settlements not exceeding $750,000,

(C) Accept offers in compromise of claims in behalf of the Government th all cases in which the difference between the gross amount of the original claim and the proposed settlement does not exceed $750,000 or 10 percent of the original claim, whichever is greater,

(D) Approve concessions (other than by compromise) of civil claims asserted by the Government in all cases in which the gross amount of the original claim does not exceed $750,000,

(E) Accept offers in compromise in all nonmonetary cases, and

(F) Reject offers in compromise, or disapprove administrative settlements or concessions, regardless of amount,

provided that such action is not opposed by the agency or agencies involved, and provided further that the case is not subject to reference to the Joint Committee on Taxation.

Section 7. Subject to the conditions and limitations set forth in Section 8 hereof, United States Attorneys are authorized to:

(A) Reject offers in compromise of judgments in favor of the Government, regardless of amount,

(B) Accept offers in compromise of judgments in favor of the Government where the amount of the judgment does not exceed $200,000, and

(C) Terminate collection activity by that office as to judgments in favor of the Government which do not exceed $200,000 if the United States Attorney concludes that the judgment is uncollectible,

provided that such action has the concurrence in writing of the agency or agencies involved, and provided further that this authorization extends only to judgments which have been formally referred to the United States Attorney for collection.

Section 8. The authority redelegated herein shall be subject to the following conditions and limitations:

(A) When, for any reason, the compromise or administrative settlement or concession of a particular claim, as a practical matter, will control or adversely influence the disposition of other claims totalling more than the respective amounts designated in Sections 2, 3, 4, 5, 6, and 7 the case shall be forwarded for review at the appropriate level.

(B) When, because of the importance of a question of law or policy presented, the position taken by the agency or agencies or by the United States Attorney involved, or any other considerations, the person otherwise authorized herein to take final action (or the Chief of the Office of Review, in cases which have been considered by such office) is of the opinion that the proposed disposition should be reviewed at a higher level, the case shall be forwarded for such review.

(C) If the Department has previously submitted a case to the Joint Committee on Taxation leaving one or more issues unresolved, any subsequent compromise or concession in that case must be submitted to the Joint Committee, whether or not the overpayment exceeds the amount specified in Section 6405 of the Internal Revenue Code.

(D) Nothing in this Directive shall be construed as altering any provision of Subpart Y of Part O of Title 28 of the Code of Federal Regulations requiring the submission of certain cases to the Attorney General, the Deputy Attorney General, or the Solicitor General.

(E) Authority to approve recommendations that the Government confess error, or make administrative settlements, in cases on appeal, is excepted from the foregoing redelegations.

(F) The Assistant Attorney General, at any time, may withdraw any authority delegated by this Directive as it relates to any particular case or category of cases, or to any part thereof.

Section 9. This Directive supersedes Tax Division Directive No. 47, effective March 29, 1984.

Section 10. This Directive shall become effective on the date of its publication in the **Federal Register.**

Approved: April 1, 1986.

Roger M. Olsen,

Acting Assistant Attorney General, Tax Division.

D. Lowell Jensen,

Deputy Attorney General.

BILLING CODE 4410-19-M

DEPARTMENT OF TRANSPORTATION

Saint Lawrence Seaway Development Corporation

33 CFR Part 402

Tariff of Tolls

AGENCY: Saint Lawrence Seaway Development Corporation, DOT.

ACTION: Final rule.

SUMMARY: The Tariff of Tolls for the use of the St. Lawrence Seaway which is established and administered jointly by the Saint Lawrence Seaway Development Corporation, United States, and The St. Lawrence Seaway Authority, Canada, was formally revised on April 11, 1986, by means of an international agreement in the form of an exchange of diplomatic notes between the Governments of the United States and Canada. This agreement further amended the agreement dated March 9, 1959, between these two governments.

The effect of this revision is to raise the level of tolls assessed on all commodities and vessels transiting the Welland Canal section of the St. Lawrence Seaway. Increases are scheduled to become effective at the beginning of the 1986 navigation season and are necessary because of the increased costs encountered by the St. Lawrence Seaway Authority.

Under the terms of the 1986 exchange of notes the Corporation will receive, during the 1986 navigation season, 27% of the revenues generated on the Montreal-Lake Ontario section of the Seaway.

EFFECTIVE DATE: May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Frederick A. Bush, Chief Counsel, Saint Lawrence Seaway Development Corporation, 400 Seventh Street SW., Washington, DC 20590, (202) 426-3325.

SUPPLEMENTARY INFORMATION: On December 19, 1985, the Saint Lawrence Seaway Development Corporation published in the **Federal Register** (50 FR 244) a notice of the proposed changes to the commodity and vessel charges for the use of the Welland Canal which are prescribed in 33 CFR Part 402.

The proposed action was to raise the level of the tolls at the Welland Canal and the proposal included the level of tolls which were to be assessed starting at the beginning of the 1986 navigation season.

In the notice of December 19, 1985, interested parties were invited to submit written views and data regarding the proposal on or before February 21, 1986, and to present oral testimony at a public hearing held in Washington, DC, on February 5, 1986. As a result, several comments were received regarding the proposed revision to the joint Tariff of Tolls.

After consideration of the proposal, the comments of interested parties and other relevant material, the Administrator of the Corporation and the President of the Authority held further discussions. These discussions led to an agreement between the Saint Lawrence Seaway Development Corporation of the United States and The St. Lawrence Seaway Authority of Canada on February 21, 1986, in which the two Seaway agencies recommended to their governments that the St. Lawrence Seaway Tariff of Tolls be modified as proposed in the December 19, 1985 notice.

As a result of this modification to the Tariff of Tolls, the average charge for moving a metric ton of cargo through the Welland Canal will increase approximately 15 percent.

Although the charges and tolls applicable to the Montreal-Lake Ontario section are not changed by this revision, § 402.6 is revised by removing from the Schedule of tolls the column headed "1982" and changing the "1983" heading to "1986", both of which are presently contained under the heading "Montreal to or from Lake Ontario."

Regulatory Evaluation

This revision involves a foreign affairs function of the United States, and therefore, Executive Order 12291 does not apply. This regulation has also been evaluated under the Department of Transportation's Regulatory Policies and Procedures and the regulation is not considered significant under those procedures and its economic impact is

VOL 51 ISS 88 MY 7 1986 UMI

expected to be so minimal that a full economic evaluation is not warranted.

Regulatory Flexibility Act Determination

The Saint Lawrence Seaway Development Corporation certifies that this regulation does not have a significant economic impact on a substantial number of small entities. The St. Lawrence Seaway Tariff of Tolls relates to the activities of commercial users of the Seaway, the vast majority of whom are foreign vessel operators. Therefore, any resulting costs will be borne by foreign vessels.

Environmental Impact

This regulation does not require an environmental impact statement under the National Environmental Policy Act (49 U.S.C. 4321, *et seq.*) because it is not a major federal action significantly affecting the quality of human environment.

List of Subjects in 33 CFR Part 402

Vessels, Waterways.

PART 402—[AMENDED]

Accordingly, Part 402—Tariff to Tolls (33 CFR Part 402) is amended as follows:

1. The authority citation for 33 CFR Part 402 continues to read as follows:

Authority: 60 Stat. 93–96, 33 U.S.C. 981–990, as amended.

2. Section 402.6 is revised to read as follows:

§ 402.6 Schedule of tolls.

	Tolls	
	Montreal to or from Lake Ontario	Lake Ontario to or from Lake Erie (Welland Canal)
	1986	1986
(a) For transit of the Seaway, a composite toll, comprising:		
(1) A charge in dollars per registered ton, according to national registry of the vessel, applicable whether the vessel is wholly or partially laden, or is in ballast. (All vessels shall have an option to calculate gross registered tonnage according to prescribed rules for measurement in either Canada or the United States)	$0.08	$0.08
(2) A charge in dollars per metric ton of cargo as certified on ship's manifest or other document, as follows:		
—Bulk cargo	0.85	0.36
—General cargo	2.06	0.58
—Containerized cargo	0.85	0.36
—Government aid cargo	0.52	0.36
—Food grains	0.52	0.36
—Feed grains	0.52	0.36
(3) A charge in dollars per passenger per lock	1.00	1.00
(4) A charge in dollars per lock for complete or partial transit of the Welland Canal in either direction by cargo or passenger vessels, which may be shared by vessels in tandem:		
(i) loaded: Per Lock	NA	280.00
(ii) in ballast: Per Lock	NA	215.00
(b) For partial transit of the Seaway:		
(1) Between Montreal and Lake Ontario, in either direction 15 percent per lock of the applicable toll		
(2) Between Lake Ontario and Lake Erie, in either direction (Welland Canal), 13 percent per lock of the applicable toll		
(c) Minimum charge in dollars per vessel per lock transited for full or partial transit of the Seaway:		
—Pleasure craft	5.00	6.00
—Other vessels	10.00	11.00

Issued at Washington, DC on April 28, 1986.

Saint Lawrence Seaway Development Corporation.

James L. Emery,

Administrator.

[FR Doc. 86-10151 Filed 5-6-86; 8:45 am]

BILLING CODE 4910-61-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 166

[OPP-250075; FRL-3012-3]

Exemption of Federal and State Agencies for Use of Pesticides Under Emergency Conditions; Effective Date

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; effective date.

SUMMARY: As required by section 25(a)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA submitted a final regulation under FIFRA to both Houses of Congress for review prior to the regulation taking effect. This regulation was published in the **Federal Register** of January 15, 1986 (51 FR 1696). The minimum 60-day period for Congressional review ended on April 14, 1986.

EFFECTIVE DATE: The regulation is effective on May 7, 1986.

FOR FURTHER INFORMATION CONTACT: By mail: Franklin Gee, Registration Division (TS–767C), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 1120B, CM#2, 1921 Jefferson Davis Highway, Arlington, VA (703–557–0592).

SUPPLEMENTARY INFORMATION: EPA issued a final regulation, which was published in the **Federal Register** of January 15, 1986 (51 FR 1696), under section 16 of FIFRA, as amended. The regulation, under 40 CFR Part 180, exempts Federal and State agencies for use of pesticides under emergency conditions. However, as required by section 25(a)(4) of FIFRA, the regulation could not take effect until it had been submitted to both Houses of Congress for a period of 60 days of continuous Congressional session, as defined by section 25(a)(4). Since it was not possible to predict an exact date on which the Congressional review period would end, the preamble to the final regulation stated that EPA would issue a separate **Federal Register** notice after the review period was over announcing the effective date of the regulation. On April 14, 1986, the 60 days of continuous Congressional session elapsed.

Accordingly, the final regulation published on January 15, 1986 (51 FR 1696) is effective on May 7, 1986.

Authority: 7 U.S.C. 136w.

List of Subjects in 40 CFR Part 166

Environmental protection, Pesticides and pests.

Dated: April 25, 1986.

Victor J. Kimm,

Deputy Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 4F2968/R634 FRL-3012-2]

Pesticide Tolerance; Amitraz

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes a tolerance for residues of the insecticide amitraz in or on the following commodities: cattle, fat; cattle, meat, cattle, meat; by-products (mbyp); milk; and milk, fat. This rule to establish the maximum permissible level for residues of amitraz in or on the above-named commodities was requested by the Nor-Am Chemical Co.

EFFECTIVE DATE: Effective on May 7, 1986.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110),

Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Jay Ellenberger, Product Manager (12), Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office location and telephone number: Rm. 202, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2386).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the **Federal Register** of December 14, 1983 (48 FR 55622), that Nor-Am Chemical Co., 3509 Silverside Rd., P.O. Box 7495, Wilmington, DE 19803, had filed a petition proposing to amend 40 CFR 180.287 by establishing tolerances for the combined residues of the insecticide amitraz (*N*-(2,4-dimethylphenyl)-*N*-[[(2,4-dimethylphenyl) imino]methyl]-*N*-methylmethanimidamide) and its metabolites containing the 2,4-dimethyl aniline moiety (calculated as the parent compound) in or on the following commodities: Cattle, fat at 0.1 part per million (ppm); cattle, kidney at 0.3 ppm; cattle, liver at 0.02 ppm; cattle, meat and mbyp at 0.05 ppm; milk at 0.02 ppm; and milk, fat at 0.2 ppm. No comments were received in response to the notice of filing.

The petition was later amended by increasing the cattle mbyp from 0.05 to 0.3 ppm, increasing milk from 0.02 to 0.03 ppm, and increasing milk, fat from 0.2 to 0.3 ppm.

In April 1977, the Agency initiated a Special Review for amitraz because an 80-week mouse oncogenicity study showed a significant increase in the incidence of lymphoreticular tumors in mice. Proposed uses for amitraz pending with the Agency were for apples and pears. To determine the risks, the Agency conducted a dietary and occupational risk assessment. In reviewing the benefits and risks, the Agency determined that there would be significant benefits from the use on pears with little or no benefits from the use on apples since there were suitable alternatives. After weighing the benefits and risks, the Agency determined that the registration of amitraz for use on pears would not cause unreasonable adverse effects and would be in the public interest because it would result in substantial benefits and very small risks. Therefore, the Agency issued a conditional registration for 4 years for use of amitraz on pears. Recently, this decision was reevaluated and reaffirmed via the Registration Standard process.

One of the conditions under which amitraz was conditionally registered was the requirement that an additional mouse oncogenicity study be submitted. This study was submitted and referred to the Agency's Carcinogen Assessment Group (CAG) for evaluation. The results of this study show an increase in the incidence of hepatocellular tumors (both benign and malignant) in female mice. Based on this study and the first mouse study, CAG has determined that amitraz has carcinogenic activity in the mouse. The second study did not appreciably change the Agency's quantitative assessment of the potency of amitraz from the first mouse study. Based on the weight of evidence of analysis, CAG concluded that amitraz should be considered a possible human (a Group "C") carcinogen. The qualitative designation "C" refers to EPA's weight-of-the-evidence classification, which in this case shows amitraz to be a "possible human carcinogen." This classification is based on the Agency's published Proposed Guidelines for Carcinogen Risk Assessment (**Federal Register** of November 23, 1984 (49 FR 46294)).

In reaching this conclusion, CAG considered the following information:

1. The positive carcinogenic effects were found in only one species, the mouse;

2. Tumors were discovered mostly in animals at the scheduled terminal sacrifice;

3. The rat was negative for oncogenic effects at doses as high as 200 ppm; and,

4. There are no positive epidemiological carcinogenicity data for amitraz.

In addition, the mutagenic potential of amitraz has been determined to be negative in the gene mutation, host-mediated and dominant-lethal test systems. Studies including the Ames bacterial test, a mouse lymphoma assay, and an unscheduled DNA synthesis in human embryonic cells have been conducted with amitraz with negative results.

From the mouse oncogenicity data, the Agency has calculated upper-bound estimates of risks from the use of amitraz on cattle. The risk from dietary exposure is approximately 10^{-5}, i.e., 1 chance in 100,000. It should be noted that this number represents the upper bound estimate of excess oncogenic risk at the 95-percent confidence level and that the actual risk may be lower.

The assessment is also based on the following assumptions:

1. The metabolic pathway of amitraz in humans is presumed to be the same as that found in test animals;

2. The highest value of risk obtainable from the animal data is applicable to humans.

3. All cattle raised in the United States will be treated with amitraz; and,

4. All edible cattle tissue and milk will contain amitraz at the full tolerance levels.

As stated above, however, EPA believes that the actual risks will be less than 10^{-5}.

For the proposed use of cattle, the Agency has also calculated a risk estimate from dermal exposure to applicators. The risk to applicators is between 10^{-6} and 10^{-5}.

As previously stated in this document, the Agency conducted a dietary and applicator risk assessment to determine the risks from the pear use. The risks were reassessed during the development of the registration standard for amitraz using the results of the second mouse oncogenicity study. The dietary risk from consuming amitraz-treated pears, using the same conservative assumptions described above, is estimated to be 10^{-5}, and the applicator risk is between 10^{-4} and 10^{-6}. The Agency also assessed the dietary and applicator risks associated with the use on pears using more realistic assumptions. These assumptions were as follows: Only 40 to 50 percent of the pears acreage is treated annually with amitraz and that the residues present average only 1.0 ppm instead of the full tolerance of 3.0 ppm. Also, applicators, mixers, and loaders are required to wear protective clothing. This more realistic approach leads of risks to 10^{-6} for dietary and 10^{-5} to 10^{-6} for applicator exposure.

The dietary risk estimated to occur from the use of amitraz on cattle is the same level as the risk estimated from the use of amitraz on pears, using the most conservative approach of calculating risk. The risk estimated for applicators from the proposed cattle use is very similar to risks expected from the use on pears. Therefore, the Agency expects little if any incremental increase in risk to occur as the result of the use of amitraz on cattle.

The chronic toxicology data base for amitraz is complete. The toxicological data considered in support of this petition include a 2-year rat feeding/oncogenicity study which was negative for oncogenic effects with a no-observed-effect level (NOEL) of 200 ppm; a three-generation rat reproduction study with a NOEL of 15 ppm; rat and rabbit teratology studies which were negative; and a 2-year mouse oncogenicity study which demonstrated an increase in the incidence of

VOL 51 ISS 88 MY 7 1986 UMI

hepatocellular tumors in female mice. Based on a 2-year dog feeding study with a NOEL of 10 ppm and using a safety factor of 100, the acceptable daily intake (ADI) for humans is calculated to be 0.0025 mg/kg of body weight (bw) day. The theoretical maximum residue contribution (TMRC) resulting in the human diet from this and previously established tolerances utilizes 37.8 percent of the ADI.

On the basis of the available data on amitraz, the Agency has concluded that the human risk posed by the use of amitraz on cattle does not raise prudent concerns of unreasonable adverse effects.

The nature of the residue is adequately understood, and an adequate analytical method, gas chromatography, is available for enforcement purposes.

There are no regulatory actions pending against the continued registration of this chemical.

Based on the above information considered by the Agency, it is concluded that the pesticide is considered useful for the purpose for which the tolerances are sought, and it is concluded that the establishment of the tolerances will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

(Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)))

BILLING CODE 6560–50–M

COUNCIL ON ENVIRONMENTAL QUALITY

40 CFR Part 1502

National Environmental Policy Act Regulations; Incomplete or Unavailable Information; Correction

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Final rule correction.

SUMMARY: On Friday, April 25, 1986, the Council on Environmental Quality (CEQ) published a final rule which amended 40 CFR 1502.22, "Incomplete or unavailable information." 51 FR 15,618. The preamble to the regulation contained five textual errors which we correct with this notice.

FOR FURTHER INFORMATION CONTACT: Dinah Bear, General Counsel, Council on Environmental Quality, 722 Jackson Place NW., Washington, DC 20006. (202) 395–5754.

SUPPLEMENTARY INFORMATION:

At page 15619, top of second column: Delete first two lines of text. In the same column, in the paragraph beginning with the word "Because": at line ten, insert a space and the word "The" between "(1978)." and "Council."

At page 15620, last paragraph of third column: Delete beginning at the word "environment" in the eleventh line through the end of the third column, except for the footnote.

At page 15621, first full paragraph of the first column, beginning with "Subsection (b)", substitute the following paragraph:

"Subsection (b) is amended to require federal agencies to include four items in an EIS if the information relevant to reasonably foreseeable significant adverse impacts remains unavailable because the overall costs of obtaining it are exorbitant or the means to obtain it are not know. The first step is disclosure of the fact that such information is incomplete or unavailable; that is, "a statement that such information is incomplete or unavailable." The second step is to discuss why this incomplete or unavailable information is relevant to the task of evaluating reasonably foreseeable significant adverse impacts; thus, "a statement of the relevance of the imcomplete or unavailable information to evaluating reasonably foreseeable significant adverse impacts on the human environment." Third, the agencies must state what existing credible scientific evidence says about such impacts; therefore, "a summary of existing credible scientific evidence which is relevant to evaluating the reasonably foreseeable significant adverse impacts on the human environment." Fourth, the agency must use sound scientific methods to evaluate the potential impacts; or in the words of the regulation, "the agency's evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community."

At page 15625, the first full paragraph of the second column, beginning with *"Response:* CEQ", subsitute the following paragraphs:

"Response: CEQ manifests its oversight of the NEPA process in a number of ways on a daily basis; for example, reviews agency NEPA procedures, resolves referrals of proposals for major federal actions, and assists parties on an individual basis in resolving difficulties with the NEPA process.

"In the course of reviewing the regulation, considering the need for amendment of the regulation, and development of the proposed amendment, CEQ consulted with all federal agencies.

Such consultation is a normal part of developing or amending the NEPA regulations, which are binding on all federal agencies. CEQ also expended considerable efforts to consult with all interested parties outside of the federal government.

"Collateral estoppel is a doctrine by which a party may be barred from relitigating a question decided in a prior case. It does not bar an agency from changing a regulation that the courts have interpreted."

Dated: May 1, 1986.

A. Alan Hill,

Chairman.

[FR Doc. 86–10172 Filed 5–6–86; 8:45 am]

BILLING CODE 3125–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 2

[General Dockets 84–689 and 84–690; FCC 86–163]

Amendment of the Commission's Rules To Allocate Spectrum for, and To Establish Other Rules and Policies Pertaining to, a Radiodetermination Satellite Service; and Policies and Procedures for the Licensing of Space and Earth Stations in the Radiodetermination Satellite Service

AGENCY: Federal Communications Commission.

ACTION: Memorandum opinion and order granting in part and denying in part three petitions for reconsideration and a petition for clarification of final order.

SUMMARY: This action responds to petitions filed by four parties requesting reconsideration and clarification of the Commission's decision to allocate spectrum for a Radiodetermination-Satellite Service (RDSS). RDSS is a new service whereby accurate position information will be provided via statellite to terrestrial receivers. This action addresses issues raised in the petitions, in particular, the question of need for a specrum allocation for RDSS in view of other available systems. The Commission, in this document, affirms its initial decision and clarifies certain points.

EFFECTIVE DATE: June 6, 1986.

ADDRESS: Federal Communications Commission, 1919 M Street N.W. Washington, DC. 20554.

FOR FURTHER INFORMATION CONTACT: Julius P. Knapp, Office of Engineering and Technology, Spectrum Engineering Division, Frequency Allocations Branch, Telephone: (202) 653–8113.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order in General Dockets 84–689 and 84–690, FCC 86–163, Adopted April 10, 1986, and Release April 28, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 837–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

In this *Memorandum Opinion and Order* (MO&O), we are considering petitions for reconsideration filed by Omninet Corporations, Wismer and Becker Contracting Engineers/Transit Communications Inc. and the National Academy of Sciences, and a petition for clarifications filed by Rockwell International Corp., with regard to the *Report and Order* (*R&O*) in the above captioned proceeding (50 FR 39101). The R&O allocated frequencies for a radiodetermination satellite service (RDSS).

The Commission confirms, as requested by Omninet, that the earlier decision did not specifically limit the services that RDSS licensees may provide nor was any finding made with regard to comparative accuracies of RDSS technologies.

The Commission finds that the existence of the federal government's Global Positioning Service (GPS) does not make superfluous that allocation of spectrum for GPS. Transit's petition presents no new information and lacks merit.

As requested by Rockwell, the Commission clarifies that it did not intend to imply that an enhanced GPS system could not provide the same degree of accuracy as RDSS.

The National Academy of Sciences request to establish a primary allocation status in one of the bands allocated to RDSS was denied. Primary allocation status has not been shown to be necessary at this time.

Ordering Clause

Accordingly, it is ordered that the petition for reconsideration filed by Omninet Corporation and petition for limited clarification filed by Rockwell International Corporation are granted to the extent indicated herein; and, the petition for reconsideration filed by Wisemer and Becker/Transit Communications, Incorporated and the petition for partial reconsideration filed by the National Academy of Sciences are denied. Authority for this action is contained in 47 U.S.C. 4(i) and 303(r).

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 86–10104 Filed 5–6–86; 8:45 am]

BILLING CODE 6712–01–M

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 81–11; Notice 16]

Federal Motor Vehicle Safety Standards; Lamps, Reflective Devices, and Associated Equipment

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: *Changes in Replaceable Light Source Specifications.* This notice amends Safety Standard No. 108 to modify the specifications for the standardized replaceable light source. This will allow a manufacturer to determine the diameter of the glass capsule, while specifying the location of the black cap for assuring the interchangeability of the standardized light source in different lamp designs to achieve the required photometric performance. The amendment relieves certain design restrictions currently in effect, and achieves greater interchangeability for the light source. A notice of proposed rulemaking was published on September 18, 1985.

EFFECTIVE DATES: The effective date for the amendment to Figure 3–2 is November 3, 1986. The effective date for the remaining amendments is May 7, 1986.

ADDRESS: Petitions for reconsideration should be addressed to: Administrator, NHTSA, 400 Seventh Street SW., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Richard Van Iderstine, Office of Rulemaking, National Highway Traffic Safety Administration, Washington, DC 20590 (202–426–2720).

SUPPLEMENTARY INFORMATION: On September 18, 1985, NHTSA proposed certain modifications to the standardized replaceable light source which is specified by Motor Vehicle Safety Standard No. 108 for use in headlamps (50 FR 37882). The purpose of the proposal was to allow a manufacturer more flexibility in

VOL 51 ISS 88 MY 7 1986 UMI

specifying the diameter of the glass capsule of the light source, and to revise the method for specifying the location of the black cap.

The proposal incorporated the following elements: a revised "interchangeability drawing" for the headlamp bulb assembly's halogen capsule (Figure 3–5) with certain angles and dimensions different than those presently specified; a revised lumen test necessitated by testing the light source with the black cap in place, requiring amendments to paragraph S4.1.1.38 (the test being currently performed without the black cap); finally, a modification in the allowable tolerances of the light source with a view towards a more accurate orientation of beam pattern, while permitting greater headlamp styling freedom. Here NHTA proposed tolerances petitioned for by General Motors, and NHTSA's own alternative values.

Comments were received on the proposal from vehicle manufacturers (Chrysler Corporation, American Motors Coporation, SAAB-Scania of North America, Volkswagen of America, General Motors Corporation, Ford Motor Company), lighting equipment manufacturers (Koito Manufacturing Co., GTE/Sylvania, General Electric Company, North American Philips Lighting Corporation), the Department of California Highway Patrol, and the SAE Replaceable Headlamp Bulb Task Force. The proposal was supported, with suggested modifications.

The purpose of the rulemaking with respect to the location of the black cap was to relieve a burden to manufacturers of having to build a light source with a narrowly specified glass cap diameter. To accomplish this, the location of the black cap and that of the undistorted glass must be specified in a manner which would be tolerant of changes in diameter while assuring that photometric performance was maintained. This led to the angular method used in the Notice of Proposed Rulemaking for specifying these locations. The method of dimensioning used the light source base as a reference because this would provide the easiest measurement reference for determining compliance of these parameters, and measurements could be more easily performed using vernier calipers rather than the more difficult optical comparator.

The proposed method of specifying the black cap location assumed that it would be installed on the light source after the capsule was installed on the base, but as commenters pointed out, this is not always the way that a light source is manufactured. Sylvania, for example, first installs the black cap on the capsule, then determines for what application the completed capsule will be used. This, the method NHTSA proposed would impose a burden of tolerance stackup which has the potential of creating noncompliances or possible photometric errors if the assembly procedure remained unchanged. Therefore, Sylvania and other commenters recommended using the actual location of the lower beam filament as a reference. NHTSA considers this a reasonable alternative, and in view of the fact that some manufacturers are already producing light sources in the fashion, the agency is amending Figure 3–5 to accommodate this comment.

Commenters also suggested that NHTSA adopt other changes for Figure 3–5 which would help clarify it, namely the revisions put forth by the SAE Replaceable Headlamp Bulb Task Force. These involve deletion of certain dimensions and redrawing of others, and changes in Notes. NHTSA has made appropriate modifications in line with the comments.

The September 1985 notice proposed alternative tolerances for the lower beam filament, one based upon a set of tolerances petitioned for by General Motors, and the other developed by NHTSA. Commenters objected to both alternatives, and recommended the tolerances developed by the SAE Task Force. These tolerances are based upon those that industry believes are consistently achievable with today's state-of-the-art in production machinery and quality assurance equipment. Ford and VW commented that the SAE tolerances would help improve the maintenance of beam pattern after bulb replacement. Tighter filament tolerances will also permit greater freedom in headlamp styling and manufacture. Judging by the comments received on the notice, there is little support for retaining the existing tolerances, and little support for either the GM or NHTSA alternative tolerances that were proposed. The SAE tolerances lie between the current ones and those proposed; since this represents a consensus among those who chose to comment, NHTSA has adopted it, and is amending the dimensions in Figure 3–2 appropriately. The new tolerances for the lower beam ahead/behind are plus or minus 0.010 inch, and plus or minus 0.015 inch for up/down and left/right. For the upper beam, the tolerance is 0.025 inch for ahead/behind and up/down, and 0.032 inch for left/right.

Comments about lumen values generally accorded with the proposal, to test with the black cap on, rather than without. SAAB argued that the values were too low while the California Highway Patrol thought that there was a large disparity in making the conversion from values without a black cap to those with a cap. NHTSA believes that a number of factors must be considered when making such a conversion. The black cap blocks off light to the front of the capsule and causes a drop in light output, but the filament still emits the same amount of light as it did without the cap. The location of the cap may vary plus or minus 1 mm. Filament variances plus cap location will cause a greater variation of light output from a capped bulb, than one that has no cap, where only the filament variances affect light output. These two factors cause a drop in measured light output from capped bulbs and cause the tolerance to increase. However, the light source is still the same one that had previously been tested without the black cap, and is still designed to conform to the other requirements so that the headlamp will perform in accordance with the requirements of the standard, and thus the lumen values have been adopted as proposed.

Koito requested that a more detailed specification be provided for the "opaque white colored cover" that is to be used in the lumen test (S4.1.1.38(b)(7)). The agency has added this clarification to the language otherwise proposed and adopted: "This cover shall be used to eliminate the likelihood of incorrect lumen measurement that would occur should the reflectance of the light source base and electrical connector be low."

The agency had proposed that the amendments be effective upon publication of the final rule in the **Federal Register**. Ford commented that this would be impracticable in that it would not allow enough time for both vehicle and light source manufacturers to prepare for building complying hardware, and it asked for lead time of one year. No other vehicle or light source manufacturer requested such an extension, and the agency has concluded that no need has been shown for a delay of the nature Ford requested.

Therefore, amendments that reduce an industry burden (those pertaining to capsule diameter, black cap placement, and revised lumen values) are made effective on the publication date of the final rule, as proposed. However, the amendment that places tighter tolerances on the filaments, and thus which has the potential of increasing an industry burden, will become effective six months following the publication of the rule.

Except for the amendment to Figure 3–2, the amendments are effective upon publication of the final rule in the **Federal Register**. Because the rule would relieve a restriction and create no additional burden, it is hereby found for good cause shown that an effective date earlier than 180 days after issuance of the final rule is the public interest. The amendment to Figure 3.2 is effective November 3, 1986.

NHTSA has considered this rule and has determined that it is not major within the meaning of Executive Order 12291 "Federal Regulation" or significant under Department of Transportation regulatory policies and procedures, and that neither a regulatory impact analysis nor a full regulatory evaluation is required. While the rule does impose minor additional requirements and costs, it also permits manufacturers greater flexibility in the styling and design of headlighting systems.

NHTSA has analyzed this rule for the purposes of the National Environmental Policy Act. The rule would have no effect on the human environment since the weight and quantity of materials used in the manufacture of headlamps would not be changed.

The agency has also considered the impacts of the rule in relation to the Regulatory Flexibility Act. I certify that this rule will not have a significant economic impact on a substantial number of small entities. Accordingly, no regulatory flexibility analysis has been prepared. Manufacturers of motor vehicles and headlamps, those affected by the rule are generally not small businesses within the meaning of the Regulatory Flexibility Act. Finally, small organizations and governmental jurisdictions will not be significantly affected since the price of new vehicles and headlamps will be minimally impacted.

The engineer and lawyer primarily responsible for this proposal are Richard Van Iderstine and Taylor Vinson, respectively.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—[AMENDED]

In consideration of the foregoing, 49 CFR 571.108, Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment*, is amended as follows:

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.108 [Amended]

2. The first sentence of paragraph (b) of paragraph S4.1.1.38 is revised to read:

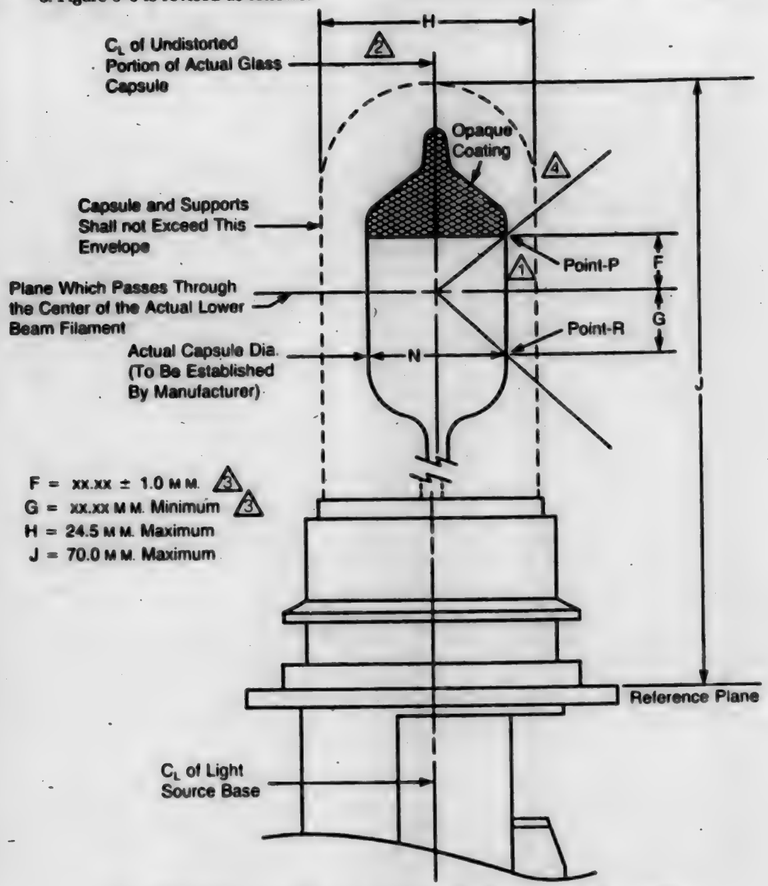
(b) The standardized replaceable light source shall meet the requirements in paragraphs (b)(1) through (b)(7) of this section.

3. In paragraph (b)(1) of paragraph S4.1.1.38 the tabular portion of the general specifications is amended by revising the entry for lumens to read as follows:

	Lower beam	Upper beam
Lumens (with black cap at 12.8V design voltage)	700+/−15%	1200+/−15%

4. A new paragraph (b)(7) is added to paragraph S4.1.1.38 to read:

(b)(7) Lumens shall be measured in accordance with the Illuminating Society of North America, LM–45: IES Approved Method for Electrical and Photometric Measurements of General Service Incandescent Filaments Lamps (April 1980), and with that electrical connector and light source base (except for the portion normally located within the interior of a lamp housing) shrouded with an opaque white colored cover. This cover shall be used to eliminate the likelihood of incorrect lumen measurement that would occur should the reflectance of the light source base and electrical connector be low.



5. Figure 3–2 is revised as follows:

FIGURE 3-2
INTERCHANGEABILITY DRAWING
HEADLAMP BULB ASSEMBLY

[Dimensional specifications for Figure 3-1]

DIMENSION	INCHES	MILLIMETERS

BILLING CODE 4910–59–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1011

Delegation of Authority to the Motor Carrier Board

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is exercising its authority under 49 U.S.C. 10305(a) to delegate the processing of certain types of finance transactions from Divisions of the Commission to the Office of Proceedings' Motor Carrier Board. These transactions include the transfer of brokers' licenses and Certificates of Registration, and the change in control of brokers. The Commission has determined that these proceedings can be processed more efficiently by the Office of Proceedings. Appropriate revisions in the Code of Federal Regulations will be made to reflect this action.

EFFECTIVE DATE: This decision is effective May 8, 1986.

FOR FURTHER INFORMATION CONTACT:
Howell I. Sporn, (202) 275–7691
or
Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: By action of July 26, 1984, 49 FR 31070 (August 3, 1984), the Commission recalled certain types of finance transactions that were previously handled by the Office of Proceedings' Review Board and delegated the processing of these transactions to Divisions of the Commission. These transactions included applications seeking the transfer of brokers' licenses and Certificates of Registration and applications for approval of the change in control of brokers. See 49 CFR 1011.6(e)(3).

We have determined that these proceedings can be processed more efficiently by the Office of Proceedings' Motor Carrier Board. Accordingly, under 49 U.S.C. 10305(a), we shall revise the regulations at 49 CFR 1011.6(e)(3) and 1011.6(k), as set forth in the Appendix, to reflect this action. Because the rule revisions only affect internal Commission procedures, they are issued here in final form. Public comment is not required. 5 U.S.C. 553(b)(A).

This action does not significantly affect the quality of the human environment or the conservation of energy resources.

List of Subjects in 49 CFR Part 1011

Administrative practice and procedure, Authority delegations.

Dated: April 4, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre and Lamboley.

James H. Bayne,

Secretary.

Appendix

PART 1011—[AMENDED]

Part 1011 of Title 49 of the CFR is amended as follows:

1. The authority citations following §§ 1011.4, 1011.5, 1011.6, 1011.7 and 1011.8 are removed, and the authority citation for 49 CFR Part 1011 continues to read as follows:

Authority: 49 U.S.C. 10301, 10302, 10304, 10305, 10321; 31 U.S.C. 9701; 5 U.S.C. 553.

2. Paragraph (e)(3) of § 1011.6 is removed, and paragraphs (e)(4), (5), and (6) are redesignated as (e)(3), (4), and (5), respectively.

3. Section 1011.6 is amended by removing the word "and" at the end of paragraph (k)(2).

4. Section 1011.6 is amended by replacing the period at the end of paragraph (k)(3) with a comma.

5. Section 1011.6 is amended by replacing the period at the end of paragraph (k)(4) with a comma and by adding the word "and" to follow that comma.

6. Section 1011.6 is amended by revising the heading and by adding a new paragraph (k)(5) to read as follows:

§ 1011.6 Employee Boards and Divisions of the Commission.

49 CFR Parts 1105 and 1152

[Ex Parte No. 274 (Sub-13)]

Rail Abandonments—Use of Rights-of-Way as Trails

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: The Commission is adopting final rules to implement section 208 of the National Trails System Act Amendments of 1983, Pub. L. No. 98–11, [codified at 16 U.S.C. 1247(d)]. The rules give interested persons the opportunity to negotiate voluntary agreements to use, for recreational trails, rights-of-way of railroad lines approved for abandonment. Trail use is subject to future restoration and reconstruction of the right-of-way for railroad purposes. In addition, trail use is not to be treated as an abandonment of the right-of-way for railroad purposes. Therefore, any law that would otherwise result in reversion of the right-of-way is preempted. The regulations at 49 CFR Parts 1105 and 1152 are amended as set forth in the Appendix.

DATE: The rules will be effective on June 6, 1986.

FOR FURTHER INFORMATION CONTACT:
Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free (800) 424–5403.

This action will not have a significant economic impact on a substantial number of small entities.

This action will enhance the quality of the human environment and energy conservation.

VOL 51 ISS 88 MY 7 1986 UMI

List of Subjects in 49 CFR Parts 1105 and 1152

Administrative practice and procedure, Environmental protection, National trails systems, Natural resources, Recreation, Recreation areas, Railroads.

Decided: April 16, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Commissioner Lamboley commented with a separate expression.

James H. Bayne,
Secretary.

Appendix

Title 49, Subtitle B, Chapter X, Parts 1152 and 1105 of the Code of Federal Regulations are amended as follows:

PART 1152—[AMENDED]

1. The authority citation for 49 CFR Part 1152 is revised to read as follows:

Authority: 49 U.S.C 10321, 10326, and 10905; 16 U.S.C. 1247(d); and 5 U.S.C. 553.

2. The notice form in § 1152.21 is amended by: (1) Removing the word "and" in item (iv) of the form; (2) changing the period to a semicolon at the end of item (v) of the form and adding the word "and" after that semicolon; and (3) adding a new item item (vi) to the form at the end of the list of terms preceded by the words: "In addition, a commenting party or protestant may provide a statement of position and a summary of evidence regarding:" to read as follows:

§ 1152.21 Form of notice.

* * * * *

(vi) prospective use of the right-of-way for interim trail use and rail banking under 16 U.S.C. 1247(d) and 49 CFR 1152.29.

* * * * *

3. Section 1152.25 is amended by: (1) removing the word "and" in paragraph (a)(2)(iv); (2) changing the period to semicolon at the end of paragraph (v) and adding the word "and" after the semicolon and (3) adding a new paragraph (vi) to read as follows:

§ 1152.25 Participation in abandonment or discontinuance proceedings.

(a) * * *

(2) * * *

(vi) prospective use of the right-of-way for interim trail use and rail banking under 16 U.S.C. 1247(d) and 49 CFR 1152.29.

* * * * *

4. Part 1152 is amended by adding new § 1152.29 to read as follows:

§ 1152.29 Prospective use of rights-of-way for interim trail use and rail banking.

(a) If any state, political subdivision, or qualified private organization is interested in acquiring or using a right-of-way of a rail line proposed to be abandoned for interim trail use and rail banking pursuant to 16 U.S.C. 1247(d), it must file a comment (in a regulated abandonment proceeding) or a petition (in an exemption proceeding) indicating that it would like to do so. The comment or petition must include:

(1) A map depicting, and an accurate description of, the right-of-way, or portion thereof (including mileposts), proposed to be acquired or used;

(2) A statement indicating the user's willingness to assume full responsibility: for managing the right-of-way; for any legal liability arising out of the use of the right-of-way (unless the user is immune from liability, in which case it need only indemnify the railroad against any potential liability); and for the payment of all taxes assessed against the right-of-way; and

(3) An acknowledgment that interim trail use is subject to the user's continuing to meet its responsibilities described in paragraph (a)(2) of this section, and subject to possible future reconstruction and reactivation of the right-of-way rail service. The statement must be in the following form:

Statement of Willingness to Assume Financial Responsibility

In order to establish interim trail use and rail banking under 16 U.S.C. 1247(d) and 49 CFR 1152.29, _____ (Interim Trail User) is willing to assume full responsibility for management of, for any legal liability arising out of the transfer or use of (unless the user is immune from liability, in which case it need only indemnify the railroad against any potential liability), and for the payment of any and all taxes that may be levied or assessed against the right-of-way owned by _____ (Railroad) and operated by _____ (Railroad). The property, known as _____ (Name of Branch Line), extends from railroad milepost _____ near _____ (Station name), to railroad milepost _____ near _____ (Station name), a distance of _____ miles in _____ County(ies), _____ (State(s)). The right-of-way is part of a line of railroad proposed for abandonment in Docket No. AB–_____ (Sub-No. _____)

A map of the property depicting the right-of-way is attached.

_____ (Interim Trail User) acknowledges that use of the right-of-way is subject to the user's continuing to meet its responsibilities described above and subject to possible future reconstruction and reactivation of the right-of-way for rail service. A copy of this statement is being served on the railroad(s) on the same date it is being served on the Commission.

(b) (1) In regular (regulated) abandonment proceedings under 49 U.S.C. 10903–04, interim trail use statements must be filed within the 30-day protest and comment period following the date the abandonment application is filed. *See* § 1152.25(c).

(2) In exemption proceedings, a petition containing an interim trail use statement must be filed within 10 days after the date the Notice of Exemption is published in the **Federal Register.**

(3) If the regular abandonment or exemption request is investigated, comments will be accepted at any time during the time provided for making evidentiary filings in the investigation.

(4) In Conrail abandonment proceedings under NERSA, interim trail use statements must be filed within 60 days after the date that Conrail's abandonment application is filed.

(5) When an interim trail use comment(s) or petition(s) is filed, the railroad must submit a reply to the Commission within 10 days after the date the Commission issues a Notice of Findings in regular abandonment proceedings, and within 10 days after the date a petition requesting interim trail use is filed in an exemption or NERSA proceeding indicating whether and with whom it intends to negotiate an agreement.

(c) *Regular and NERSA Abandonment Proceedings.* (1) If continued rail service does not occur pursuant to § 1152.27, and a railroad intends to enter into an interim trail use/rail banking agreement, then the Commission will issue a Certificate of Interim Trail Use or Abandonment (CITU) to the railroad and to the interim trail user for that portion of the right-of-way to be covered by the agreement. The CITU will: permit the railroad to discontinue service, cancel tariffs, and salvage track and material consistent with interim trail use and rail banking, as long as it is consistent with any other Commission order, 30 days after the date it is issued (10 days after issuance in Conrail proceedings); and permit the railroad to fully abandon the line if no agreement is reached 180 days after it is issued, subject to appropriate conditions, including labor protection, and environmental matters.

(2) The CITU will indicate that interim trail use is subject to future restoration of rail service, and subject to the user continuing to meet the financial obligations for the right-of-way. The CITU will also indicate that, if the user intends to terminate trail use, it must send the Commission a copy of the CITU and request that it be vacated on a specified date. The owner of the right-of-way will be permitted to abandon it on that date.

(3) If an application to construct and operate a rail line over the right-of-way is authorized under 49 U.S.C. 10901 and 49 CFR 1150, or exempted under 49 U.S.C. 10505, then the CITU will be vacated accordingly.

(d) *Exempt Abandonment Proceedings.* (1) If a railroad intends to enter into an interim trail use/rail banking agreement, then the Commission will issue a Notice of Interim Trail Use or Abandonment (NITU) to the railroad and to the interim trail user for the portion of the right-of-way to be covered by the agreement. The NITU will permit the railroad to discontinue service, cancel tariffs, and salvage track and materials, consistent with interim trail use and rail banking, 30 days after the date it is issued, and permit the railroad to fully abandon the line if no agreement is reached 180 days after it is issued, subject to appropriate conditions, including labor protection, and environmental matters.

(2) The NITU will indicate that interim trail use is subject to future restoration of rail service, and subject to the user continuing to meet the financial obligations for the right-of-way. The NITU will also indicate that if the user intends to terminate trail use, it must send the Commission a copy of the NITU and request that it be vacated on a specific date. The Commission will reopen the exemption proceeding, vacate the NITU, and reissue a Notice of exemption for that portion of the right-of-way. Copies of the reissued Notice of exemption will be sent to the owner of the right-of-way and the former trail user.

(3) If an application to construct and operate a rail line over the right-of-way is authorized under 49 U.S.C. 10901 and 49 CFR Part 1150, or exempted under 49 U.S.C. 10505, then the NITU will be vacated accordingly.

4. Section 1152.50(d)(4) is revised to read as follows:

§ 1152.50 Exempt abandonments and discontinuances of service and trackage rights.

* * * * *

(d) * * *

(4) Exempt abandonments and discontinuances of service and trackage rights. To address: (i) environmental issues; (ii) whether the right-of-way is suitable for other public purposes under 49 U.S.C. 10906; and (iii) in abandonment proceedings only, prospective use of the right-of-way for interim trail use and rail banking under 16 U.S.C. 1247(d), interested persons must submit evidence and comments within 10 days of publication in the **Federal Register.** [Follow § 1152.28(a)(2) for public use conditions under section 10906, and follow § 1152.29(a) and (d) for interim trail use and rail banking under section 1247(d).] A notice to the parties will be issued if use of the exemption is subject to environmental or public use conditions, and if interim trail use and rail banking is feasible.

PART 1105—[AMENDED]

5. The authority citation for 49 CFR Part 1105 is revised to read as follows:

Authority: 49 U.S.C. 10321, 10505, and 10903–10905; 16 U.S.C. 1247(d); 42 U.S.C. 4332; and 5 U.S.C. 553 and 559.

6. The Form For Environmental Notice in § 1105.11 is amended by adding a new item (11) at the end of the list of issues proceded by the words: "Areas of concern, which you and other interested State and local agencies are invited to address, include but are not limited to the following:" to read as follows:

§ 1105.11 Environmental notice.

* * * * *

(11) Prospective use of the right-of-way for interim trail use and rail banking under 16 U.S.C. 1247(d) and 49 CFR 1152.29.

* * * * *

Proposed Rules

Federal Register
Vol. 51, No. 88
Wednesday, May 7, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Part 300

Coal Loan Guarantee Program

AGENCY: Department of Energy.

ACTION: Proposed Suspension of Activity Under the Coal Loan Guarantee Program.

SUMMARY: This is notice that the Department of Energy (DOE) proposes to suspend activity under the Coal Loan Guarantee Program, 10 CFR Part 300, for loan guarantees for the purposes of developing, expanding, or reopening underground coal mines, and to terminate the acceptance of applications thereunder. This action is being taken in view of the fact that no loan guarantees have been granted since the program's implementation in 1978.

DATE: Comment must be received no later than June 6, 1986.

ADDRESS: Address comments to the Office of Coal Utilization Systems, FE–23, Department of Energy, Washington, DC 20545. The envelope must also display the following designation: "CLGP activity suspension."

FOR FURTHER INFORMATION CONTACT:

Mr. Peter Muchunas, Department of Energy, Office of Coal Utilization Systems, FE–23, Room C–156, Washington, DC 20545, Telephone 301–353–2603.

Mr. Lawrence R. Oliver, Department of Energy, Office of General Counsel, GC–43, Room 6B–190, Washington, DC 20585, Telephone 202–252–2440.

SUPPLEMENTARY INFORMATION: The Coal Loan Guarantee Program (the Program) was designed to encourage and assist relatively small coal producers to increase the Nation's coal production from low-sulfur underground coal mines; to enhance competition within the coal industry; to encourage new market entry by small coal producers who, historically, have been unable to obtain adequate long-term project financing; and to encourage the construction of coal preparation plants designed to reduce the sulfur content of coal.

The Program was authorized by Congress in 1975, by section 102 of the Energy Policy and Conservation Act (EPCA) (Pub. L. 94–163). EPCA gave the Federal Energy Administration—and ultimately DOE [1]—authority to guarantee loans to develop new underground coal mines. This authority was enlarged in 1976 to cover guarantees for underground coal mine expansions and reopenings.[2] The regulations governing the Program were published in the Federal Register on November 7, 1978 (43 FR 51956).

Throughout the Program's 6-year existence, only 30 applications have been received, and only one within the past 4 years. Because no applicants have been able to satisfy the law's requirements, no loan guarantees have been granted; and only two applicants have qualified for DOE conditional commitments, which have since expired. Therefore, in light of the lack of public interest in the Program, DOE proposes to suspend activity under the Program.

Review Under Executive Order 12291

Today's proposal was reviewed under Executive Order 12291 (February 17, 1981). DOE has concluded that it is not a "major rule" because suspension of activity under the Coal Loan Guarantee Program will not result in (1) an annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, Federal, State of local government agencies, or geographic regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprised to compete in domestic or export markets.

In accordance with requirements of the Executive Order, this rulemaking has been reviewed by OMB.

Review Under the Regulatory Flexibility Act

This proposed rule was reviewed under the Regulatory Flexibility Act of 1980, Pub. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have a significant economic impact on a substantial number of small entities. Pursuant to section 605 of the Regulatory Flexibility Act, the Department certifies that this proposal is not a regulation which will have significant economic impact on a substantial number of small entities within the meaning of the Act, and, therefore, does not require preparation of an initial regulatory flexibility analysis. DOE has transmitted that certification to the Small Business Administration. The basis for certification is that, since its implementation in 1978, DOE's activities under the Coal Loan Guarantee Program have not resulted in the opening of any new underground coal mines, or the expansion or reopening of any existing underground coal mines.

Review Under the National Environmental Policy Act

DOE has determined that this proposal does not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, does not require the preparation of an Environmental Impact Statement.

Review Under the Paperwork Reduction Act

This proposal does not impose a collection of information requirement. It therefore, is not necessary to submit this proposal to the Office of Management and Budget for review under the Paperwork Reduction Act.

(44 U.S.C. 3501–3520).

Comment Procedures

Section 501 of the DOE Act provides that if the Secretary determines that a substantial issue of fact or law exists or that a proposed rule is likely to have a substantial impact on the Nation's economy or on large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be provided. For the reasons discussed above, DOE has concluded that this proposal does not involve a substantial issue of fact or law, and that it should not have a substantial impact on the Nation's economy or large numbers of individuals or businesses. Therefore, DOE does not plan to hold a public hearing. Interested persons are invited to submit data, views, or arguments with respect to the proposal set forth in this notice. Three copies of written comments should be submitted by June 6, 1986, to the address indicated in the "Address" section above and should be identified on the outside envelope and on the document with the designation "CLGP activity suspension." If any information is considered proprietary or confidential, it should be marked accordingly, and only one copy of that information should be submitted. DOE shall make a determination of any such claim in accordance with 10 CFR 1004.11.

[1] The 1977 DOE Act (Pub. L. 95–91) transferred, inter alia, the functions vested by law in the Administrator of the Federal Energy Administration to the Secretary of Energy.

[2] Energy Conservation and Production Act (ECPA) (Pub. L. 94–385), section 104, dated August 14, 1976.

List of Subjects in 10 CFR Part 300

Coal, Loan programs/energy, Mines.

Catalog of Federal Domestic Assistance Number

The Coal Loan Guarantee Program of the Department of Energy is listed as number 81.056 in the Catalog of Federal Domestic Assistance, which is available for inspection at the DOE Public Information Office, Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, and available for purchase from the Superintendent of Documents, Government Printing Office, Washington, DC 20402.

Authority: Sections 501 and 644 of the DOE Organization Act (Pub. L. 95–91) (42 U.S.C. 7191; 7254), section 102 of the Energy Policy and Conservation Act (Pub. L. 94–163) (42 U.S.C. 6211), as amended by section 164 of the Energy Conservation and Production Act (Pub. L. 94–385), and by section 802 of the Powerplant and Industrial Fuel Use Act (Pub. L. 95–620).

Issued in Washington, DC, May 2, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450–01–M

FEDERAL RESERVE SYSTEM

12 CFR Part 204

[Regulation D; Docket No. R–0571]

Definition of Deposit

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Request for public comment on proposed rules.

SUMMARY: Pursuant to its authority under section 19 of the Federal Reserve Act, as amended, the Board requests comment on proposed amendments to 12 CFR Part 204 (Regulation D—Reserve Requirements of Depository Institutions). After considering several requests for interpretations of Regulation D regarding the reservability of certain types of transactions, particularly sales of assets by depository institutions where the depository institution retains conditional liability for the assets sold and certain transactions with affiliates, the Board is proposing these amendments in order to clarify when such transactions give rise to deposits for purposes of the regulation.

Under the proposed amendments, the reservability of such transactions generally would depend upon the nature of the liability of the depository institution. Currently, the Board's Regulation D provides that the term "deposit" includes any liability of a depository institution on any promissory note, acknowledgment of advance, bankers' acceptance, or similar obligation (written or oral), including mortgage-backed bonds, that is issued or undertaken as a means of obtaining funds. The regulation currently excludes from this general rule certain of these liabilities, most notably repurchase agreements involving federal government and federal agency securities and certain interbank obligations. The regulation also excludes from the definition of "deposit" an obligation that represents a conditional, contingent or endorser's liability. Under the current regulation, most asset sales in which the depository institution retains some risk of loss are considered deposits, but the regulation is not clear or several technical points. The proposal is intended primarily to clarify the application of reserve requirements to these and related situations.

The proposal would amend the definition of "deposit" specifically to include sales of assets where the depository institution issues or undertakes a liability supporting the assets sold or retains a reversionary interest in these assets, regardless of whether the liability or interest is conditional, unconditional or contingent or whether the liability covers all or a portion of the assets sold. Transactions in which the depository institution's liability on any particular asset is shared with the purchaser as the loss is realized and is less than 75 percent of the loss would not give rise to a deposit. Where the depository institution's share of risk is 75 percent or more of losses realized, the transaction would give rise to a deposit. Generally, transactions in which the depository institution's only liability is to reimburse a third-party guarantor of the assets sold also would not give rise to a deposit under the proposal.

Under the current regulation, obligations of affiliates are reservable when they are used to supply or maintain funds to a depository institution, provided the affiliate's obligation would have been considered a reservable liability if it had been issued by the depository institution itself. The proposal would exclude obligations of affiliates from the definition of deposit if the proceeds of an affiliate's obligation are used to purchase assets from a depository institution without recourse; that is, if the depository institution retains no interest in, or liability for, the assets sold. The proposal would include as a deposit an affiliate's obligation if the depository institution undertakes a liability, conditional or otherwise, to support the affiliate's obligation even if the depository institution does not receive the proceeds of the obligation. In addition, the proposal would amend the definition of "affiliate" to include any organization that a depository institution effectively manages or controls even if it does not meet the formal requisites for ownership or control of the organization. Finally, the proposal seeks to clarify how maturities of deposits should be measured for the purposes of Regulation D.

DATE: Comments on the proposed rule should be submitted no later than July 11, 1986.

ADDRESS: Interested parties are invited to submit written data, views, or comments concerning the proposal to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW., Washington, DC 20551, or to deliver such comments to the Guard Station in the Eccles Building Courtyard on 20th Street, NW. (between Constitution Avenue and C Street, NW.) between 8:45 a.m. and 5:15 p.m. on business days. Submissions shall refer to Regulation D Docket No. 0571. Comments may be inspected in room B–1122 between 8:45 a.m. and 5:15 p.m. on business days, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information (12 CFR 261.6(a)).

FOR FURTHER INFORMATION CONTACT: John Harry Jorgenson, Senior Attorney (202/452–3778), or Patrick J. McDivitt, Attorney (202/452–3818), Legal Division; Frederick H. Jensen, Economist (202/452–3022), Division of Research and Statistics; for Telecommunications Device for the Deaf (TDD) users, Earnestine Hill or Dorothea Thompson (202/452–3544); Board of Governors of

VOL 51 ISS 88 MAY 7 1986 UMI

the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Section 19(b) of the Federal Reserve Act, 12 U.S.C. 461(b), provides the Board with the authority to impose reserve requirements on deposits held by depository institutions, and section 19(a) of that Act, 12 U.S.C. 461(a), gives the Board the authority to define terms used in section 19 and to prevent evasions of section 19. Pursuant to this authority, the Board promulgated its current Regulation D.

Generally, the Board's current Regulation D provides that the term "deposit" includes liabilities of a depository institution that are issued or undertaken as a means of obtaining funds. The regulation excludes from the definition of "deposit" certain obligations that represent a conditional, contingent, or endorser's liability.

Increasingly, depository institutions are selling assets by means of transactions under which the institution guarantees, may be required to repurchase, or retains a reversionary interest in, all or a portion of the assets sold. These transactions take various forms, and the guarantee or interest may be conditional (as in the case of a standby letter of credit) or partial (by limiting liability to some percentage of the assets sold). Under the current Regulation D and the proposal, these transactions give rise to deposits for reserve requirement purposes because they are the functional equivalent of conventional deposits; that is, they raise funds for the depository institution, and the purchaser looks to the depository institution as the source of creditworthiness.

The Board is proposing these amendments to its Regulation D in order to clarify the types of transactions and attendant liabilities that give rise to a deposit under the regulation. The proposal provides that, generally, a transaction that involves a conditional liability or reversionary interest of a depository institution will be considered a deposit if the transaction is undertaken to obtain funds for the depository institution other than fee income. Thus, a sale of assets involving a guarantee by a depository institution in which the depository institution retains the risk of borrower default after the asset is sold gives rise to a deposit. In addition, under the proposal, the term "deposit" would include liabilities issued by affiliates and captive organizations when backed by conditional obligations of a depository institution. These organizations may act as an arm of the depository institution which would otherwise have to fund the lending activities with reservable liabilities.

The proposal also would clarify how maturities of deposits are measured for purposes of Regulation D. These proposed amendments concerning asset sales and other transactions are discussed below.

Clarification of Current Definition of "Deposit"

1. Subject to specified exceptions, Regulation D treats any liability of a depository institution undertaken as a means of obtaining funds, other than fee income, as a deposit. Thus, a sale of assets with recourse generally will be regarded as a deposit. "With recourse" in this context includes undertaking a conditional obligation to repurchase or to guarantee against loss all or a portion of the assets sold. The proposal also would clarify that reversionary or residual interests give rise to a deposit. Thus, when the depository institution sells a pool of assets but retains an interest in the principal or interest on these assets that will revert to the depository institution after a specified period of time or after losses have been deducted from the reverting assets, a deposit would be created. The proposal also would clarify that obligations representing a conditional or endorser's liability, other than fee income, are excluded from the definition of deposit only where they rise in the ordinary course of business, such as from the collection of checks. Other transactions involving similar liabilities on the part of the depository institution may be considered to be deposits.

The Board previously created an exception to the definition of "deposit" for obligations arising from the sales with recourse of pools of one to four-family mortgages provided that the recourse is limited to no more than a ten percent interest in the pool. The Board created this exclusion in order to encourage the growth of the secondary mortgage market so that institutions holding long-term mortgages could more easily sell their relatively illiquid assets. The proposal would not extend this exception to other types of assets.

In the case of a guarantee or other conditional liability provided to support a pool of assets sold, the full value of the assets sold generally would be considered a deposit whether the guarantee or other conditional liability applies to all or only a portion of the loss. For example, in the case of a sale of a pool or automobile loans where the depository institution guarantees or agrees to repurchase up to ten percent of the total value of the pool in the event of default, all proceeds of the sale of the pool would be considered a deposit. However, if a guarantee represents an agreement with the purchaser to share in losses arising from defaults on or claims against the individual assets sold as the losses occur, no deposit would result where the risk borne by the purchaser of the assets is 25 percent or more of any loss on individual assets in the pool of assets sold.

2. Regulation D currently treats an obligation of an affiliate, as defined by Regulation D, as a deposit of the depository institution to the extent that the proceeds are used to supply or to maintain funds (other than capital) to the depository institution, provided the affiliate's obligation would have been a deposit if it had been issued by the depository institution itself. Thus, under the current regulation, an affiliate's obligation issued in connection with the affiliate's purchase of assets from a depository institution is considered a deposit regardless of whether the assets are sold to the affiliate without recourse or are sold with a depository institution's guarantee or other conditional liability.

The Board proposes to change the current treatment of an affiliate's liability to provide that the sale of assets without recourse to an affiliate by the depository institution does not give rise to a deposit. However, if the depository institution provides a guarantee or otherwise assumes a conditional liability in connection with the sale of assets to the affiliate, either to support the assets or to support obligations of the affiliate issued to acquire the assets, the affiliate's obligation would continue to be considered a deposit. If such a guarantee or other conditional liability is issued by a nondepository affiliate of a depository institution to support assets sold without recourse by the depository institution to another affiliate, the Board would continue to view the transaction as not giving rise to a deposit. An obligation of a depository institution's subsidiary (50 percent or more owned by the depository institution) would continue to be regarded as a deposit, regardless of whether the proceeds are passed to the depository institution.

The proposal also provides that an affiliate's obligation is a deposit if that obligation is supported directly by a guarantee or other conditional liability of the depository institution or indirectly by supporting the affiliate's assets, regardless of whether the proceeds of the obligation are channelled to the depository institution. The maturity of such a deposit would be the maturity of the affiliate's obligation. Under these circumstances, the affiliate's reliance on the credit support of the depository institution enables the affiliate to operate as an arm of the depository institution. For example, affiliates have been established to lend money to customers of the depository institution with the affiliate relying on a letter of credit or other form of credit support from the depository institution to back the affiliate's loans or market obligations. These arrangements, while not directly channeling funds to the depository institution, use the creditworthiness of the depository institution to circumvent the need to fund assest on the books of the depository itself with reservable liabilities.

3. Currently, under staff interpretations, the term "deposit" does not include a sale of assets without recourse where the assets are guaranteed by a third party and the depository institution, in turn, is obligated to reimburse or indemnify the third party for any loss on the assets. Under the proposal, the Board would not consider such an arrangement to give rise to a deposit unless the claims under the guarantee or relating to or arising out of the assets sold could be made against the depository institution as well as, or instead of, the third party guarantor. The Board solicits comment on the benefits of excepting such indirect obligations from definition of deposit and the potential for abuse of such an exception.

4. The Board also proposes to amend the definition of "affiliate" in Regulation D to include any organization that does not meet the definition of "affiliate" in the current Regulation D but that nevertheless functions as an arm of the depository institution. For example, depository institutions have entered into transactions with organizations whose sole function is to issue obligations, such as commercial paper or collaterized securities, in order to finance the acquisition of assets from, or to place long-term nonreservable time deposits in, or to fund loans to customers of, the depository institution. In such a case, the assets or liabilities of the organization are backed by a letter of credit or other obligation of the depository institution. The proposal would include such transactions in the definition of "deposit" by amending the definition of "affiliate" in Regulation D specifically to include these "captive" organizations which are effectively managed by or under the control of the depository institution or that are formed to engage primarily in transactions with the depository institution or its customers even though not formally affiliated under the current definition.

Measuring Maturities on Deposits

If a liability is a deposit under section 204.2(a) of Regulation D, its maturity must be established in order to determine whether it is a transaction account or a time deposit, and if it is a nonpersonal time deposit, whether its maturity is less than one and one-half years. Transaction accounts are subject to a twelve percent reseve requirement and nonpersonal time deposits with maturities of less than one and one-half years have a three percent reserve requirement. Nonpersonal time deposits with a longer maturity have a zero percent reserve requirement. The term "maturity" is not defined in Regulation D, although the issue is addressed, in part, with respect to obligations of affiliates. With respect to the proceeds of a sale of assets and related transactions, the Board proposes to determine the maturity by looking to the remaining maturity of the assets sold unless the maturity is effectively shortened by the nature of the assets or the guarantee. For example, an obligation calling for amortized repayments of principal could be treated as a multiple maturity time deposit with each portion of the principal having its own maturity date established by the required date of repayment.

With regard to underlying guarantees, the Board is considering viewing any provision allowing a "put" by the depositor or a "call" by the depository institution resulting in any principal payment prior to the original maturity as setting that maturity at the earliest time the put or call could be exercised. Provisions in these and other types of deposits may also require the depository institution to disburse funds prior to the original maturity date. The Board prefers to allow the parties to include usual acceleration clauses (such as events of default, prepayments, and events outside the control of the parties) in the obligation without affecting the maturity of the deposit. One difficulty with this approach is deciding what are "usual" acceleration clauses. The Board requests comment on the issue of the appropriate method for determining maturity in asset sales and other transactions including, but not limited to, prepayments (expected and unexpected), guarantees against default (whether full or partial), escrow accounts, sinking funds, accruals, and put and call options.

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires the Board to consider the impact of this proposal on small entities. In this regard, it is the Board's view that the proposal would not impose any additional reporting or recordkeeping requirements. The purpose of this proposal is to request comment on any alternatives that the public believes may be preferable to the Board's proposed amendment of its Regulation D set out below. Suggested alternatives will be considered when comments are analyzed. The proposed rule would apply to all depository institutions. It is not anticipated that the proposal will have a negative impact on the ability of small depository institutions to attract deposits.

List of Subjects in 12 CFR Part 204

Banks, Banking, Federal Reserve System, Foreign banking.

Pursuant to its authority under section 19(a) of the Federal Reserve Act (12 U.S.C. 461(a)), the Board proposes to amend Regulation D (12 CFR Part 204) as follows:

1. The authority citation for 12 CFR Part 204 would continue to read:

Authority: Secs. 19, 25, 25(a) of the Federal Reserve Act (12 U.S.C. 461, 601, 611); and sec. 7 of the International Banking Act of 1978 (12 U.S.C. 3105), unless otherwise noted.

2. Section 204.2 would be amended by revising paragraphs (a)(1)(v), (a)(1)(vi), (a)(1)(vii), (a)(2)(ii), and (q)(5) to read:

§ 204.2 Definitions.

For purposes of this part, the following definitions apply unless otherwise specified:

(a)(1) "Deposit" means:

* * * * *

(v) Any liability of a depository institution's affiliate that is not itself a depository institution on any promissory note, acknowledgment of advance, due bill, or similar obligation (written or oral), with a maturity of less than one and one-half years, except any such obligation that, had it been issued directly by the depository institution, would not constitute a deposit. Such a liability includes any affiliate's liability:

(A) The proceeds of which are used to supply or to maintain the availability of funds (other than capital) to the depository institution, except any such obligation issued to purchase assets from the depository institution where the depository institution retains no interest in and is not obligated directly or conditionally on the assets sold; or

(B) The proceeds of which are not used to supply or maintain the

VOL 51 ISS 88 MY 7 1986 UMI

availability of funds to the depository institution but that is supported by an obligation of the depository institution, regardless of whether such obligation is conditional, unconditional, contingent, complete, partial, or supports the affiliate's obligation directly (as with a letter of credit backing the affiliate's liability) or indirectly by supporting the affiliate's assets.

If a liability of an affiliate of a depository institution is regarded as a deposit because the proceeds are used to purchase assets from the depository institution, then the maturity of the deposit shall be the shorter of the maturity of the obligation issued or the remaining maturity of the assets purchased. If a liability of an affiliate is regarded as a deposit because it is supported by an obligation of the depository institution and the proceeds are not used to purchase assets from the depository institution, then the maturity of the deposit shall be maturity of the obligation of the affiliate. If the proceeds from an affiliate's obligation are placed in the depository institution in the form of a reservable deposit, than no reserves are required on the obligation of the affiliate because reserves are required to be maintained against the deposit issued by the depository institution, but the maturity of the deposit shall be the shorter of the maturity of the affiliate's obligation or the maturity of the deposit itself;

(vi) Credit balances;

(vii) Any liability of a depository institution on any promissory note, acknowledgment of advance, bankers' acceptance, or similar obligation (written or oral), including mortgage-backed bonds and borrowings in the form of sales of assets where the depository institution retains an interest in or is liable for the assets sold (whether the interest or liability retained is conditional, unconditional, contingent, complete, or partial), provided that the liability, obligation, or borrowing is issued or undertaken by a depository institution as a means of obtaining funds other than fee income, except any such liability, obligation, or borrowing that:

(A) Is issued or undertaken and held for the account of:

(1) An office located in the United States of another depository institution, foreign bank, Edge or agreement corporation, or New York Investment (Article IXX) Company;

(2) The United States Government or an agency thereof; or

(3) The Export-Import Bank of the United States, Minbanc Capital Corporation, the Government Development Bank for Puerto Rico, a Federal Reserve Bank, a Federal Home Loan Bank, or the National Credit Union Administration Central Liquidity Facility;

(B) Arises from a transfer of direct obligations of, or obligations that are fully guaranteed as to principal and interest by, the United States Government or any agency thereof that the depository institution is obligated to repurchase;

(C) Is not insured by a Federal agency, is subordinated to the claims of depositors, have a weighted average maturity of seven years or more, is considered to be capital by its primary Federal supervisor, and is issued by a depository institution with the approval of, or under the rules and regulations of, its primary Federal supervisor;

(D) Arises from borrowing by a depository institution from a dealer in securities, for one business day, or proceeds of a transfer of deposit credit in a Federal Reserve Bank or other immediately available funds (commonly referred to as "Federal funds"), received by such dealer on the date of the loan in connection with clearance of securities transactions;

(E) Arises from the creation, discount and subsequent sale by a depository institution of its bankers' acceptance of the type described in paragraph 7 of section 13 of the Federal Reserve Act (12 U.S.C. 372);

(F) Arises from a sale of assets that are held by the depository institution for a short period of time as part of the depository institution's ordinary underwriting, trading, or private placement activities;

(G) Arises from a sale of assets where the depository institution is liable only for a specified portion or share in any losses that arise from individual assets sold as the losses are realized, provided the depository institution's liability does not exceed 75 percent of any losses; or

(H) Arises from a sale of assets: (*1*) Where a third party is directly liable on the assets sold; (*2*) the depository institution's only obligation is to indemnify the third party guarantor; and (*3*) the claims under the guarantee relating to or arising out of the assets sold cannot be made against the depository institution by the purchaser of the assets.

* * * * *

(2) "Deposit" does not include:

* * * * *

(ii) An obligation, such as an endorser's liability on an item in process of collection, that represents a conditional, contingent, or endorser's liability arising from a transaction in the ordinary course of business and that is not incurred for the primary purpose of obtaining or maintaining the availability of funds (other than fee income).

* * * * *

(q) "Affiliate" includes any corporation, association, or other organization:

* * * * *

(5) Which the depository institution effectively manages or controls, directly or indirectly, or which is formed for the purpose of engaging primarily in transactions with the depository institution or its customers even if such organization is not formally owned or controlled by the depository institution.

* * * * *

By order of the Board of Governors of the Federal Reserve System,

William W. Wiles,

Secretary of the Board.

[Airspace Docket No. 86-AWA-10]

Proposed Subdivision of R-6412, Camp Williams, UT

Correction

In FR Doc. 86-9011, beginning on page 15349, in the issue of Wednesday, April 23, 1986, make the following correction:

On page 15350, third column, in the "Authority", second line, "49 U.S.C. 1089(g)" should read "49 U.S.C. 106(g)".

BILLING CODE 1505-01-M

INTERNATIONAL TRADE COMMISSION

19 CFR Part 211

Advance Notice of Intent To Revise Enforcement Procedures Applicable to Investigations of Unfair Practices in Import Trade

AGENCY: U.S. International Trade Commission.

ACTION: Advance notice of proposed rulemaking and request for comments.

SUMMARY: The U.S. International Trade Commission is considering revision of its rules concerning enforcement procedures applicable to investigations of unfair practices in import trade conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). These rules are contained in 19 CFR Part 211. The Commission requests comments regarding in what respects, if at all, the Part 211 rules should be amended.

DATE: Comments must be received no later than July 7, 1986.

ADDRESS: Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436.

FOR FURTHER INFORMATION CONTACT: Tim Yaworski, Esq., or Wayne Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436, telephone 202-523-0311 and 202-523-3395, respectively.

SUPPLEMENTARY INFORMATION: The Commission's Part 211 rules concern procedures for the settlement by consent of matters which involve alleged violations of section 337 and for the enforcement, modification, and revocation of final Commission actions. The rules were promulgated in final form on March 18, 1981 (46 FR 17531) and have been amended subsequently only in minor aspects.

Issued: April 30, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Parts 731, 732, 761, 772, 773, 779, 780, 783, and 784

Protecting Historic Properties From Surface Coal Mining Operations

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice of Public Hearing.

SUMMARY: On March 11, 1986, the Office of Surface Mining Reclamation and Enforcement (OSMRE) of the U.S. Department of the Interior (DOI) proposed to amend its rules with respect to the consideration of cultural and historic properties to clarify existing provisions in its regulatory program (51 FR 8466 March 11, 1986). Provisions addressing the definition of cemetery, collection of information on known historic properties by applicants for permits to conduct coal mining operations, consideration of historic properties by State regulatory authorities, collection of environmental information by applicants for permits to conduct coal mining operations, and preparation of reclamation plans by applicants for plans by applicants for permits to conduct coal mining operations were proposed.

In response to a request from interested citizens a public hearing on the proposed Historic properties rules revisions is hereby scheduled at the location and time given below.

DATE: June 3, 1986, 9:00 a.m. to 1200 p.m.

ADDRESS: Office of Surface Mining reclamation and Enforcement, Columbus Field Office, 2242 South Hamilton, Room 200, Columbus, Ohio 43232.

FOR FURTHER INFORMATION CONTACT: Dr. Annetta I. Cheek, Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior, 1951 Constitution Ave., NW., Washington, DC 20240; telephone: 202-343-7951.

SUPPLEMENTARY INFORMATION:

I. Public Hearing
II. Background

I. Public Hearing

The public hearing will continue until all persons wishing to testify have been heard. To assist the transcriber and ensure an accurate record, OSM requests that persons who testify at the hearing give the transcriber a written copy of their testimony. OSMRE also requests that persons who plan to testify submit to OSMRE an advance copy of their testimony at the following address: Office of Surface Mining, Administrative Record, Room 5124B-L, 1951 Constitution Avenue, NW., Washington, DC 20240.

II. Background

Consideration of historic properties is required by the Surface Mining Control and Reclamation Act of 1977, 30 U.S.C. 1201 *et seq.* (the Act), as well as by other Federal statutes. Historic properties are addressed in sections 507(b)(13), 522(a)(3)(B) and 522(e)(3) of the Act. Additional requirements applicable to OSMRE's programs are found in sections 106 and 110 of the National Historic Preservation Act of 1966, as amended, 16 U.S.C. 470 *et seq.*

Section 507(b)(13) of the Act requires applicants for permits to conduct coal mining operations to include in their applications accurate maps showing all manmade features and significant known archeological sites existing on the date of application.

Section 522(a)(3)(B) of the Act authorizes regulatory authorities to determine that a surface area is unsuitable for all or certain types of coal mining if it would affect fragile or historic lands on which such operations could result in significant damage to important historic, cultural, scientific, and esthetic values and natural systems.

Section 522(e) of the Act lists several property types on which mining is prohibited. Specifically, this section states that no surface coal mining operations will be permitted "within one hundred feet of a cemetery" or "which will adversely affect any publicly owned park or places included in the National Register of Historic Sites (sic) unless approved jointly by the regulatory authority and the Federal, State, or local agency with jurisdiction over the park or the historic site." Exceptions exist for valid existing rights and operations existing on August 3, 1977.

Section 106 of the National Historic Preservation Act, as amended, required Federal agency heads, prior to authorizing expenditure of Federal funds on a Federal or federally assisted undertaking, or prior to issuing a Federal license for such an undertaking, to consider the effect of the undertaking on historic resources and to provide the Advisory Council on Historic Preservation with a reasonable opportunity to comment on the undertaking. Under the NHPA, OSMRE reviews State program provisions as well as its own operations to ensure that appropriate consideration is being given to important historic properties.

The revisions to the existing regulations proposed respond to three basic concerns. First, opinions issued by the District Court of the District of Columbia require certain changes to the existing language. Second, the petition for rulemaking on this issue, submitted by SOPA, was determined to have merit and OSMRE has decided to propose regulations to respond to the issues raised in that petition. See the discussion of the Director's decision on this petition at 51 FR 3802, January 30, 1986, which is part of the basis and purpose for this rule. Third, OSMRE's experience with the process as it now operates, and comments from various interest groups, both suggest that greater clarity and specificity in the regulations is required so that the regulatory authorities can better assist the Secretary of the Interior in implementing his responsibilities concerning historic resources.

A detailed discussion of these issues is set forth in the preamble to the proposed rule (51 FR 8466 March 11, 1986).

Dated: May 2, 1986.

H. Leonard Richason,

Acting Assistant Director, Program Operations.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW-FRL-3012-8]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Proposed Exclusions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) today is proposing to exclude the solid wastes generated at seven facilities from the list of hazardous wastes contained in 40 CFR 261.31 and 261.32. This action responds to delisting petitions submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of Parts 260 through 265, 124, 270, and 271 of Title 40 of the Code of Federal Regulations, and 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific basis" from the hazardous waste list. The effect of this action, if promulgated, would be to exclude certain wastes generated at particular facilities from listing as hazardous wastes under 40 CFR Part 261.

The Agency has previously evaluated five of the petitions which are discussed in today's notice. Based on our review at that time, five of these petitioners were granted a temporary exclusion. Due to changes to the delisting criteria required by the Hazardous and Solid Waste Amendments of 1984, however, these petitions as well as the other two petitions for which we propose to grant an exclusion have been evaluated both for the factors for which the wastes were originally listed, as well as all other factors and toxicants which might reasonably cause the wastes to be hazardous.

DATES: EPA will accept public comments on these proposed exclusions until June 6, 1986. Any person may request a hearing on these proposed exclusions by filing a request with Eileen B. Claussen, whose address appears below, by May 22, 1986. The request must contain the information prescribed in 40 CFR 260.20(d).

ADDRESSES: Send two copies of your comments to EPA. One copy should be sent to the Docket Clerk, Office of Solid Waste (WH-562), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. A second copy should be sent to Jim Kent, Delisting Section, Waste Identification Branch, CAD/OSW (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460. Identify your comments at the top with this statement: "Section 3001—Delisting Petition: Proposed Exclusions Beginning with Arco Building Products; May 7, 1986."

Requests for a hearing should be addressed to Eileen B. Claussen, Director, Characterization and Assessment Division, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

The public docket for these proposed exclusions is located in Room S-212, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, and is available for viewing from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding holidays.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424-9346, or at (202) 382-3000. For technical information, contact Lori DeRose, Office of Solid Waste (WH-562B), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 382-5096.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1981, as part of its final and interim final regulations implementing section 3001 of RCRA, EPA published an amended list of hazardous wastes from non-specific and specific sources. This list has been amended several times, and is published in 40 CFR 261.31 and 261.32. These wastes are listed as hazardous because they typically and frequently exhibit any of the characteristics of hazardous wastes identified in Subpart C of Part 261 (*i.e.*, ignitability, corrosivity, reactivity, and extraction procedure [EP] toxicity) or meet the criteria for listing contained in 40 CFR 261.11 (a)(2) or (a)(3).

Individual waste streams may vary, however, depending on raw materials, industrial processes, and other factors. Thus, while a waste that is described in these regulations generally is hazardous, a specific waste from an individual facility meeting the listing description may not be. For this reason, 40 CFR 260.20 and 260.22 provide an exclusion procedure, allowing persons to demonstrate that a specific waste from a particular generating facility should not be regulated as a hazardous waste.

To be excluded, petitioners must show that a waste generated at their facility does not meet any of the criteria under which the waste was listed. (See 40 CFR 260.22(a) and the background documents for the listed wastes.) In addition, the Hazardous and Solid Waste Amendments of 1984 (HSWA) require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Accordingly, a petitioner also must demonstrate that the waste does not exhibit any of the hazardous waste characteristics, as well as present sufficient information for the Agency to determine whether the waste contains any other taxicants at hazardous levels. (See 40 CFR 260.22(a); section 222 of the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. 6921(f); and the background documents for the listed wastes.) Although wastes which are "delisted" (*i.e.*, excluded) habe been evaluated to determine whether or not they exhibit any of the characteristics of a hazardous waste, generators remain obligated to determine whether their waste remains non-hazardous based on the hazardous waste characteristics.

In addition to wastes listed as hazardous in 40 CFR 261.31 and 261.32, residues from the treatment, storage, or disposal of listed hazardous wastes also are eligible for exclusion and remain hazardous wastes until excluded. (See 40 CFR 261.3 (c) and (d)(2).) Again, the substantive standard for "delisting" is: (1) That the waste not meet any of the criteria for which it was listed originally; and (2) that the waste is not hazardous after considering factors (including additional constituents) other than those for which the waste was listed, if there is a reasonable basis to believe that such additional factors could cause the waste to be hazardous. Where the waste is derived from one or more listed hazarous waste, the demonstration may be made with respect to each constituent or the waste mixture as a whole. (See 40 CFR 260.22(b).) Generators of these excluded treatment, storage, or disposal residues remain obligated to determine whether these residues exhibit any of the hazardous waste characteristics on a periodic basis.

Approach Used To Evaluate Delisting Petitions

The Agency first will evaluate the petition to determine whether the waste (for which the petition was submitted) is non-hazardous based on the criteria for which the waste was originally listed. If the Agency believes that the waste is still hazardous (based on the original listing criteria), it will propose to deny the petition. If, however, the Agency agrees with the petitioner that the waste is non-hazardous with respect to the criteria for which the waste was listed, it then will evaluate the waste with respect to other factors or criteria, if there is a resonable basis to believe that such additional factors could cause the waste to be hazardous.

The Agency is using a hierarchical approach in evaluating petitions for the other factors or contaminants (*i.e.*, those listed in Appendix VIII of Part 261). This approach may, in some cases, eliminate the need for additional testing. The petitioner can choose to submit a raw materials list and process descriptions. The Agency will evaluate this information to determine whether any Appendix VIII hazardous constitutents are used or formed in the manufacturing and treatment process and are likely to be present in the waste at significant levels. If so, the Agency then will request that the petitioner perform additional analytical testing. If the petitioner disagrees, he may present arguments on why the toxicants would not be present in the waste, or, if present, why they would pose no toxicological hazard. The reasoning may include descriptions of closed or segregated systems, or mass balance arguments relating volume of raw materials used to the rate of waste generation. If the Agency finds that the arguments presented by the petitioner are not sufficient to eliminate the reasonable likelihood of the toxicant's presence in the waste, the petition would be tentatively denied on the basis of insufficient information. The petitioner then may choose to submit the additional analytical data on representative samples of the waste during the public comment period.

Rather than submitting a raw materials list, petitioners may test their waste for any additional toxic constituents that may be present and submit this data to the Agency. In this case, the petitioner should submit an explanation of why any constituents from Appendix VIII of Part 261, for which no testing was done, would not be present in the waste or, if present, why they would not pose a toxicological hazard.

In making a delisting determination, the Agency evaluates each petitioned waste against the listing criteria and factors cited in 40 CFR 261.11 (a)(2) and (a)(3). Specifically, the Agency considers whether the waste is acutely toxic, as well as the toxicity of the constitutents, the concentrations of the constitutents in the waste, their tendency to migrate and bioaccumulate, their persistence in the environment once released from the waste, plausible types of management of the waste, and the quantities of waste generated. In this regard, the Agency has developed an analytical approach to the evaluation of wastes that are landfilled and land treated. See 50 FR 7882 (February 26, 1985), 50 FR 48886 (November 27, 1985), and 50 FR 48943 (November 27, 1985). The overall approach, which includes a ground water transport model, is used to predict reasonable worst-case contaminant levels in ground water in nearby receptor wells (*i.e.*, the model estimates the ability of an aquifer to dilute the toxicant from a specific volume of waste). The land treatment model also has an air component and predicts the concentration of specific toxicants at some distance downwind of the facility. The compliance point concentration determined by the model then is compared directly to a level of regulatory concern. If the value at the compliance point predicted by the model is less than the level of regulatory concern, then the waste could be considered non-hazardous and a candidate for delisting. If the value at the compliance point is above this level, however, than the waste probably still will be considered hazardous, and not excluded from Subtitle C control.[1]

This approach evaluates the petitioned wastes by assuming reasonable worst-case land disposal scenarios. This approach has resulted in the development of a sliding regualtory scale which suggestes that a large volume of waste exhibiting a particular extract level would be considered hazardous, while a smaller volume of the same waste could be considered non-hazardous.[2] The Agency believes this to be a reasonable outcome since a larger quantity of the waste (and the toxicants in the waste) might not be diluted sufficiently to result in compliance point concentrations that are less than the level of regulatory concern. The selected approach predicts that the larger the waste volume, the higher the level of toxicants at the compliance point. The mathematical relationship (with respect to ground water) yields at least six-fold dilution of the toxicant concentration initially entering the aquifer (*i.e.*, any waste exhibiting extract levels equal to or less than six times a level of regulatory concern will generate a toxicant concentration at the compliance point equal to or less than the level of regulatory concern). Depending on the volume of waste, an additional five-fold dilution may be imparted, resulting in a total dilution of up to thirty-two times..

The Agency is using this approach as one factor in determining the potential impact of the unregulated disposal of petitioned waste on human health and the environment. The Agency has used this approach in evaluting each of the waste proposed for exclusion in today's publication. As a result of this evaluation, the Agency is proposing to grant the petitions discussed in this notice.

It should be noted EPA has not verified the submitted test data before proposing to grant these exclusions. The sworn affidavits submitted with each petition bind the petitioners to present truthful and accurate results. The Agency, however, has initiated a spot sampling and analysis program to verify the representative nature of the data for some percentage of the submitted petitions before final exclusions will be granted.

Finally, before the Hazardous and Solid Waste Amedments of 1984, the Agency granted temporary exclusion without first requesting public comment. The Admendments specifically require the Agency to provide notice and an opportunity for comment before granting a final exclusion. Thus, a final exclusion will not be granted for any of the petitions proposed today until all public comments (including those at requested hearings, if any) are addressed.

Petitioners

The proposed exclusions published today involve the following petitioners:

Arco Building Products, Sugarcreek, Ohio;

Hanover Wire Cloth Division, Hanover, Pennsylvania;

International MInerals and Chemical Corporation, Terre Haute, Indiana;

[1] The Agency recently proposed a similar approach, including a ground water transport model, as part of the land disposal restrictions rule (see 51 *FR* 1602, January 14, 1986). The Agency, however, has not yet evaluated the comments on this proposal. If this approach is promulgated, the Agency will consider revising the delisting analysis at the time.

[2] Other factors may result in the denial of a petition, such as actual ground water monitoring data or spot check verification data.

Monsanto Industrial Chemicals Company, Sauget, Illinois;
Square D Company, Oxford, Ohio;
Vulcan Materials Company, Port Edwards, Wisconsin;
Whirlpool Corporation, Danville, Kentucky.

I. Arco Building Products

A. Petition for Exclusion

Arco Building Products (Arco), located in Sugarcreek, Ohio, fabricates a variety of aluminum extrusions into prime replacement windows, storm doors, and storm windows for distribution to residential home builders and other contractors. Arco has petitioned the Agency to exclude its wastewater treatment sludge, presently listed as EPA Hazardous Waste No. F019—Wastewater treatment sludge from the chemical conversion coating of aluminum. The listed constituents of concern for EPA Hazardous Waste No. F019 are hexavalent chromium and complexed cyanide.

Based upon the Agency's review of their petition, Arco was granted a temporary exclusion on January 13, 1983.[3] The Agency's basis for granting the informal exclusion was the low migration potential of the constituents of concern; namely hexavalent chromium and complexed cyanide. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) As a result, the Agency has re-evaluated Arco's petition to: (1) Determine if the petition should be granted based on the original listing criteria; and (2) evaluate the waste for additional factors (other than those for which the waste was listed) to determine whether or not the waste is hazardous. Today's notice is the Agency's re-evaluation of this petition.

In support of their petition, Arco submitted a detailed description of its manufacturing and treatment processes, including schematic diagrams; total constituent analyses and EP toxicity test results of the sludge for chromium; and analytical test results for total, amenable, and leachable cyanide.[4] Arco also submitted total constituent analyses and EP toxicity test results for arsenic, barium, cadmium, lead, mercury, nickel, selenium, and silver; and total oil and grease analyses on representative waste samples. Arco further submitted a list of raw materials used in the manufacturing process to demonstrate that no other hazardous constituents are present in the waste at levels of regulatory concern. As noted above, the Agency requested this information to determine if toxicants, other than those for which the waste was listed, are present in the waste at levels of regulatory concern.

Arco's manufacturing process includes washing and conversion coating of aluminum extrusions in preparation for painting with turbine disks, oven curing and cutting, and fabricating the extrusions into window and door products. Arco claims that cyanide is not used in their process. Treatment of the wastewater from the chemical conversion coating process involves ferric sulfate addition to aid phosphate removal. Sodium bisulfite is added to the treatment tank to reduce hexavalent chromium to the trivalent state. The reduced solution is neutralized with calcium hydroxide lime. A flocculent is then added to the suspended solids to precipitate chromic hydroxide. The supernatant is pumped to the Sugarcreek publicly owned treatment works, and the sludge is passed through a filter press to achieve a 30 percent solids content.

Four weekly composite samples were collected from the sludge storage drums. Each composite sample was composed of five sample cores from each drum. The samples were collected over a 1-month period (November, 1985) to reflect process changes. ARCO claims that the samples collected are representative of any variation of the listed and unlisted constituent concentrations in the waste. ARCO further claims that although the facility could be considered a job shop, the manufacturing processes used at the facility are predictable and the use of raw materials only increases during September, October, and November. In addition, the petitioner claims that the sampling period was long enough to cover any scheduled changes in the product line and, therefore, all raw materials used in the process are represented by the samples collected.

Total constituent and EP toxicity analyses of the sludge for the listed constituents revealed the maximum concentrations reported in Table 1.

TABLE 1.—MAXIMUM CONCENTRATIONS (ppm)

Constituent	Total constituent analysis	EP leachate analysis
Cr (total)	91,000	[1] 0.43
CN	<0.5	[2] 0.03

[1] Hexavalent chromium is listed as the constituent of concern for this waste; however, the concentration of total chromium in the EP extract is low enough to make a determination of hexavalent chromium unnecessary.
[2] From distilled water leach test.

The total constituent and EP toxicity analyses of the sludge for the non-listed EP toxic metals and nickel revealed the maximum concentrations reported in Table 2.

TABLE 2.—MAXIMUM CONCENTRATIONS (ppm)

Constituent	Total constituent analysis	EP leachate analysis
As	5.8	<0.01
Ba	34	0.1
Cd	2.1	0.01
Pb	50	0.13
Hg	0.27	0.0006
Ni	180	0.45
Se	<1	<0.01
Ag	<0.1	<0.01

The maximum total oil and grease value reported was 0.41 percent. Arco also submitted a list of all raw materials used in their manufacturing and wastewater treatment processes. This list indicates that no Appendix VIII hazardous constituents (other than those tested for) are used in the process and that formation of any of these constituents is highly unlikely. Arco also provided test data indicating that the sludge is not ignitable, corrosive, or reactive. Arco claims to generate a maximum of 30 tons of sludge per year.

B. Agency Analysis and Action

Arco has demonstrated that its waste treatment system produces a non-hazardous sludge. The Agency believes that the four composite samples collected from the drums over a one-month period were non-biased and adequately represent any variations that may occur in the waste stream petitioned for exclusion. The key factor that could vary toxicant concentrations in the waste would be the use of different raw materials due to changes in the product line being manufactured. The Agency believes that Arco's sampling period was long enough to cover any scheduled changes in the product line since the petitioner has verified that all of the process lines were in operation during the sampling period.

[3] This exclusion was not published in the Federal Register. Since the Assistant Administrator for Solid Waste and Emergency Response approved the decision however, we have concluded that Arco was granted a temporary exclusion. See public docket for specific documentation.

[4] Leachable cyanide was determined using a distilled water extractant. Distilled water is used rather than the normal acidic EP extraction medium to avoid the destruction of cyanide during the extraction procedure.

We believe, therefore, that the samples are representative of the waste Arco generated.

The Agency has evaluated the mobility of the listed constituents from Arco's waste using a vertical and horizontal spread (VHS) model.[5] The compliance point values were calculated using a minimum waste generation rate of 475 cubic yards per year as specified by the VHS model [6] and the maximum reported extract levels as input parameters. These compliance point concentrations are exhibited in Table 3.

TABLE 3.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (ppm)

Constituent	Compliance-point concentration	Regulatory standard
Cr (total)	0.004	0.05
CN	0.0008	0.2

The sludge exhibited chromium levels (at the compliance point) below the National Interim Primary Drinking Water standard and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[7] The total cyanide levels in the waste are also below the air threshold limit set by the American Conference of Governmental Hygienists.[8] These constituents therefore are not of regulatory concern.

The Agency also concluded, through the use of the VHS model, that no other toxic metals are present in the sludge at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point in the VHS model). The compliance point values generated from these extract levels are displayed in Table 4. (Where concentrations were below detection limits, the detection limit was used in the VHS calculations.)

[5] See 50 *FR* 7882, Appendix I, February 26, 1985, for a detailed explanation of the development of the VHS model for use in the delisting program. See also the final version of the VHS model, 50 *FR* 48890, Appendix, November 27, 1985.

[6] Arco generates 30 tons of sludge per year of waste; however, the VHS model uses a minimum waste generation rate of 475 cubic yards. The Agency assumes the density of the waste to be 1 ton/cu. yd. unless otherwise specified. See 50 *FR* 46900 (November 27, 1985) for a discussion of the minimum waste generation rate.

[7] Drinking Water Standards, U.S. Public Health Service, Publication 956, 1962 (0.2 ppm).

Ag	<0.0009	0.05

The Agency also reviewed Arco's raw materials lists and Material Safety Data Sheets for each component in the raw materials lists. The Agency has concluded from this review that no other Appendix VIII hazardous constituents are present in the waste.

The Agency believes that ARCO's treatment process generates a non-hazardous waste. The Agency therefore proposes to grant an exclusion to Arco's Sugarcreek, Ohio facility for its dewatered wastewater treatment sludge, as described in its petition. (The Agency notes that any changes to Arco's manufacturing or treatment processes will require Arco to file an addendum to their petition or a new petition.[9] Any future changes to these processes that could affect the physical or chemical characteristics of the sludge will require a redemonstration of the hazard of the waste).

II. Hanover Wire Cloth.

Petition for Exclusion

A.

Hanover Wire Cloth (Hanover), located in Hanover, Pennsylvania, manufactures wire cloth or screen material. Hanover has petitioned the Agency to exclude its treated sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum.[10] The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed).

Based upon the Agency's review of their petition, Hanover was granted temporary exclusion on January 13, 1983.[11] The Agency basis for granting the informal exclusion was the low migration potential of the constituents of concern, namely hexavalent chromium, cadmium, nickel, and cyanide. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).). As a result, the Agency has re-evaluated Hanover's petition to: (1) Determine if the petition should be granted based on the original listing criteria; and (2) evaluate the waste for additional factors (other than those for which the waste was listed) to determine whether or not the waste is hazardous. Today's notice is our re-evaluation of this petition.

In support of their petition, Hanover submitted a detailed description of their manufacturing and wastewater treatment processes, including schematic diagrams; total constituent and EP toxicity analyses of the waste for chromium, cadmium, and nickle; and total analyses for cyanide. Hanover also submitted total constitutent and EP toxicity analyses for arsenic, barium, lead, mercury, selenium, and silver; and total oil and grease analyses on representative waste samples. Hanover further submitted a list of raw materials used in their processes that contribute to the petitioned waste. The Agency requested this information, as noted above, to determine whether hazardous constituents, other than those for which the waste is listed, are present in the waste at levels of regulatory concern.

Hanover's manufacturing processes are divided into three categories; wire drawing, weaving, and screen finishing. The wire drawing operation involves annealing coils of steel, dipping in sulfuric acid, and copper coating with a copper sulfate solution. The wire

[9] Once a final decision on this petition is made, a significant process change would require submission of a new petition or treatment of the waste as hazardous.

[10] The original petition submitted by Hanover also requested that the Agency exclude EPA Hazardous Waste No. F019—Wastewater treatment sludges from the chemical conversion coating of aluminum. Since that time, the source for the F019 Waste has been eliminated. Hanover is therefore requesting a final exclusion only for the F006 waste.

[11] This exclusion was not published in the Federal Register. Since the Assistant Administrator for Solid Waste and Emergency Response approved the decision, however, we have concluded that Hanover was granted a temporary exclusion. See public docket for specific documentation.

produced is woven into screen material (cloth). Steel Cloth is then cleaned and painted or Zinc plated; bronze and aluminum cloth are also cleaned and painted. Wastewaters from the drawing and finishing operations are sent to the wastewater treatment system. There are no wastewaters generated from the painting process (after the paint is applied, it is cured and the cloth is packaged for sale; water does not contact the product after coating).

Wastewater from the wire drawing and finishing operations are sent to a flash mix tank where excess lime and a coagulant are added to control pH and enhance sedimentation. The waste then flows to a flocculant tank and into a clarifier. The sludge is collected in the clarifier hopper and pumped to a disc vacuum filter. Filter cake accumulates in a drum, and once the drum is filled, the waste is dumped into a container. The filter cake accumulates in the container for approximately one month before disposal.

Hanover collected, in total, 12 samples that were generated from the vacuum filter.[12] Four grab samples were collected in January, April, June, and July 1985, and were used for the metals analyses, while four grab samples were collected in October, 1985, and analyzed for total oil and grease, pH, and percent solids. Four additional samples were collected, over a 15 day period in December, 1985, and also analyzed for the toxic metals. Hanover states that the manufacturing processes used at the facility are operated in a consistent manner, and that the use of raw materials does not vary over time. Hanover claims, therefore, that the samples collected are representative of any variation of the listed and non-listed constitutent concentrations of the waste.

Total constituent analyses and EP toxicity test results of the treatment sludge for the listed constituents, as well as the other EP toxic metals, revealed the maximum concentrations reported in Tables 1 and 2.

TABLE 1.—MAXIMUM CONCENTRATIONS

	Total constituent analyses (mg/kg)	EP leachate results (mg/l)
Cd	0.5	0.05
Cr (total)	47	[1]0.12
Ni	31.2	0.53
CN (total)	0.29	

[12] In Hanover's original petition, four composite samples were analyzed for chromium content, and one composite sample was analyzed for the remainder of the metals. This information, however, included the F019 wastestream and is, therefore, not considered in this evaluation.

[1] Hexavalent chromium is listed as the constituent of concern for this waste; however, the concentration of total chromium is low enough to make a determination of hexavalent chromium unnecessary.

TABLE 2.—MAXIMUM CONCENTRATIONS [1]

	Total constituent analyses (mg/kg)	EP leachate results (mg/l) [1]
As	0.25	<0.02
Ba	6	0.4
Pb	5.8	0.18
Hg	0.6	0.0023
Se	<0.02	0.11
Ag	1.1	0.03

[1] The EP leachate values and maximum constituent analyses reported in Table 2 represent the maximum levels reported for particular metal and do not necessarily represent the same sample.

The maximum total oil and grease content of Hanover's waste was 0.05 percent. This list of raw materials Hanover provided indicates that no Appendix VIII hazardous constituents, other than those tested for, are used in the process, nor are any other toxicants expected to enter or be formed in the sludge. Further, Hanover claims that the maximum amount of waste generated in 255 tons annually.

B. Agency Analysis and Action

Hanover has demonstrated that its wastewater treatment system generates a non-hazardous sluge. The Agency believes that the samples collected by Hanover were non-biased and adequately reflect and variations that may occur in the waste stream petitioned for exclusion. The key factor that could vary toxicant concentrations in the waste would be the use of different raw materials due to a change in the product line being manufactured. Hanover is not a job shop nor are there seasonal product variations. The Agency believes Hanover's claim that manufacturing and treatment processes are uniform and consistent. The Agency, therefore, believes that the samples collected are representative of the waste generated by Hanover.

The Agency has evaluated the mobility of the listed constituents from Hanover's waste using a vertical and horizontal spread (VHS) model.[13] The Agency's evaluation of Hanover's waste, using the maximum values for estimated annual sluge generation [14] and reported leachate concentrations as input parameters, has resulted in the maximum predicted compliance point concentrations exhibited in Table 3.

[13] See footnote 5.

[14] Hanover generates 255 tons of sludge per year of waste; however, the VHS model specifies a minimum waste generation rate of 475 cubic yards. The Agency assumes the density of the waste to be 1 ton/cu. yd. unless otherwise specified. See 50 *FR* 48900 (November 27, 1985) for a discussion of the minimum waste generation rate.

TABLE 3.—COMPLIANCE POINT CONCENTRATIONS (mg/l)

	Predicted Compliance point concentration	Regulation standard
Cd	0.002	0.01
Cr (total)	0.004	0.05
Ni	0.016	0.35
CN [1]	0.008	0.2

[1] The maximum total concentration of cyanide found in the waste was used in the VHS calculation because even if all of the cyanide were to leach out of the waste, the resultant level at the compliance point would still be below the regulatory standard.

The vacuum filter sludge exhibited cadmium and chromium levels (at the compliance point) below the National Interim Primary Drinking Water standards, and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[15] The predicted maximum nickel value is also below the Agency's interim standard.[16] These constituents are, therefore, not of regulatory concern.

The Agency also has concluded that no other inorganic hazardous constituents are present in the filter cake at levels of regulatory concern (*i.e.*, none are above any regulatory standard at the compliance point in the VHS model, see Table 4; where concentrations were below the detection limit, the detection limit was used in the VHS calculations). In addition, we also find that no hazardous organic constituents are present in the waste based on our review of the list of raw materials used by Hanover in the processes that contribute to the petitioned waste.

TABLE 4.—COMPLIANCE POINT CONCENTRATIONS (mg/l)

	Compliance point concentration	Regulatory standard
As	<0.001	0.05
Be	0.012	1
Pb	0.006	0.05
Hg	<0.001	0.002
Se	<0.001	0.01
Ag	<0.001	0.05

The Agency believes that, based upon the constituents and factors evaluated, Hanover's waste is non-hazardous and should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Hanover Wire Cloth, located in

[15] See footnote 7.

[16] In previous notices, the Agency has used 632 ppb as the regulatory standard for nickel. Pending the completion of current EPA studies on the health effects of nickel, the Agency is using 350 ppb for the purpose of evaluating delisting petitions. The basis for this standard and its intended use are explained at 50 FR 20239–20348, May 15, 1985.

Hanover, Pennsylvania, for its dewatered electroplating wastewater treatment sludge, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Hanover to file an addendum to their petition or a new petition.[17] Any future changes that could effect the physical and chemical characteristics of the filter cake will require a redemonstration of the hazard of the waste.)

III. International Minerals and Chemical Corporation

A. Petition for Exclusion

International Minerals and Chemical Corporation (IMC), located in Terre Haute, Indiana, is involved in the manufacture of pharmaceutical bacitracin. IMC has petitioned the Agency to exclude its still botton waste, listed as EPA Hazardous Waste No. F003—The following spent non-halogenated solvent: n-butyl alcohol (n-butanol) and the still bottoms from the recovery of this solvent. IMC has petitioned to exclude its waste because it does not meet the criteria for which it was listed.

Based upon our review of their petition, IMC was granted a temporary exclusion on August 6, 1981 (see 46 *FR* 40155). The Agency's basis for granting the exclusion was the low percentage of n-butanol (<1.0%) present in the distillation still bottoms; this is well below the limit (24 percent alcohol by volume) set in § 261.21(a)(1) of the RCRA regulations for ignitable wastes which contain alcohol. In addition, flash point tests run on IMC's distillation still bottoms indicated that the flash point for the waste was greater than 210°F. (*i.e.*, was not ignitable pursuant to 40 CFR 261.21(a)(1)).

Since that time, the Hazardous and Solid Waste Amendments (HSWA) of 1984 were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either the enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from IMC. (This additional information was submitted by IMC on June 7, 1985 and January 13, 1986.) As a result, the Agency has reevaluated IMC's petition to determine whether the temporary exclusion should be made final. This evaluation was based on the original listing criteria as well as other factors.

IMC submitted a detailed description of its bacitracin production and n-butanol recovery processes, including schematic diagrams; total constituent analyses of the distillation bottoms for n-butanol; and flash point tests for this material.[18] In addition, IMC has submitted EP toxicity test results for arsenic, barium, cadmium, chromium, lead, silver, mercury, and selenium; analyses for reactive cyanide and sulfide; and a list of the raw materials used in the production and recovery processes. The Agency requested this information, as noted above, to determine if hazardous constituents other than those for which the waste was originally listed are present in the waste.

IMC produces bacitracin from bacterial cultures, and recovers this bacitracin after fermentation using n-butanol. IMC's n-butanol recovery process involves steam distillation, condensation, azeotropic separation, and re-circulation. The still bottoms produced are largely water (>99%), with n-butanol, suspended biological solids, and fermentative enzymes comprising the balance. The still bottoms are routed to a spray irrigation system, where they are diluted with water to a concentration of 0.2 percent and sprayed over a 100 acre lot. IMC claims that its distillation process generates a non-hazardous waste with the listed constituent of concern not present at levels of regulatory concern. IMC also claims that this waste is not hazardous for any other reason.

Twenty grab samples of the still bottoms were collected by IMC during the period from October 1980 to February 1981. In order to obtain representative samples of individual batches, the still bottoms were circulated in the still for several hours, then routed to a storage tank where 10–20 gallons of still bottoms were bled off and mixed to ensure homogenity. A quart sample was taken from the large sample, sealed, and subsequently analyzed for total n-butanol content, flash point determinations, and EP toxicity. The 20 single grab samples were taken from 20 individual samples. Two additional samples were also taken in this way in December 1984 for additional EP toxicity analyses. Testing was not conducted for the other constituents of F003 (acetone, ethyl acetate, ethyl benzene, ethyl ether, methyl isobutyl ketone, cyclohexanone, and methanol) since they are not used in IMC's processes and are reasonably not expected to be present in the waste. Due to the uniformity with which the fermentation and distillation processes operate, and because no raw materials containing hazardous constituents are used in the processes, IMC claims that the samples collected and analyzed are representative of the variations in constituent concentrations of the waste.

Ignitability tests using the Pensky-Martens closed cup tester revealed a flash point of at least 210 °F for all samples. The analytical data indicated that n-butanol was present at concentrations of less than 0.5 percent.

EP toxicity analyses of the still bottoms for the EP toxic metals revealed the maximum concentrations reported in Table 1.[19]

TABLE 1.—MAXIMUM CONCENTRATIONS

	EP leachate test results (mg/l)
As	0.004
Be	<0.01
Cd	<0.1
Cr	0.24
Pb	0.62
Hg	0.0046
Se	0.023
Ag	0.006

Based upon the Agency's review of the raw materials lists provided by IMC, the Agency concludes that no other hazardous constituents are likely to be present or subsequently formed in the waste. Reactive cyanide and sulfide were identified at the following levels, respectively: 0.2 mg/l and 0.52 mg/l. Oil and grease content of the waste reached a maximum of 280 mg/l. IMC claims that the maximum volume of waste generated per year at their facility is 4200 cubic yards.

B. Agency Analysis and Action

IMC has demonstrated that its solvent recovery system produces a non-hazardous waste. The Agency believes that the twenty two samples collected from the still bottoms over a four-month period (October 1980–February 1981) and in December 1984 were non-biased and more than adequately represent any variations which may occur in the waste stream petitioned for exclusion. Each sample is indicative of a waste produced by a batch process which is

[17] See Footnote 9.

[18] IMC has determined, through testing of a series of spiked still bottom samples, that up to two percent of n-butanol in the still bottoms would still maintain a flash point of greater than 140 °F.

[19] Since the waste is less than 0.5% solids by weight, the total constituent concentrations of the waste serve as the EP leachate concentrations. (See 40 CFR 261, Appendix I, for the EP toxicity test procedure.)

conducted regularly (up to four times a week) and which is highly consistent from batch to batch. The chosen sampling method is believed by the Agency to adequately characterize the waste, and does not mask the variability of the waste. Due to the nature and consistency of the manufacturing operations involved (*i.e.*, the facility is not a job shop and production does not vary seasonally), the Agency believes that the samples are representative of the waste generated by IMC.

This waste was listed solely for ignitability. The waste does not exhibit any of the characteristics of hazardous waste, including ignitability.[20]

The Agency has evaluated the mobility of the EP toxic metals from the still bottom wastes using the vertical and horizontal spread (VHS) model.[21] The Agency's evluation of the 4200 cubic yards of waste generated annually and the corresponding maximum extract levels, using the VHS model, generated the compliance point concentrations given in Table 2.

TABLE 2.—VHS MODEL: COMPLIANCE POINT CONCENTRATIONS (mg/l)

	Still bottom	Regulatory standard
As	0.0008	0.05
Ba	<0.0015	1.0
Cd	0.015	0.01
Cr	0.037	0.05
Pb	0.095	0.05
Hg	0.0007	0.002
Se	0.0035	0.01
Ag	0.0009	0.05

The still bottom exhibited arsenic, barium, chromium, mercury, selenium, and silver levels below their respective National Interim Primary Drinking Water Standards (NIPDWS). These constituents, therefore, are not of regulatory concern.

The maximum values produced for cadmium and lead both exceed their respective NIPDWS. Based on further testing, however, we believe the levels of cadmium and lead are not of concern. In particular, the cadmium value can be traced to a relatively high detection limit (<0.1 mg/l) used in early analyses; subsequent analyses with a lower detection limit produced maximum EP leachate values of <0.001 mg/l for Cd, yielding a maximum VHS value of <0.00015 mg/l at the compliance point. The maximum value for lead was found to be due to the presence of soldered pipes in the solvent recovery apparatus. These pipes have since been replaced with stainless steel pipes, and subsequent analyses produced maximum EP values of <0.01 mg/l Pb, which yield a maximum VHS value of <0.0015 mg/l. Cadmium and lead, therefore, are not of regulatory concern.

Since this waste is being land applied, the waste was also evaluated using the Agency's proposed land application VHS model.[22] This model, which allows approximately a three-fold dilution in the aquifer, yielded the following constituent concentrations.

TABLE 3.—VHS MODEL FOR LAND APPLICATION (mg/l)

	Still bottom	Regulatory standard
As	0.001	0.05
Ba	0.003	1.0
Cd	<.0003	0.01
Cr	0.077	0.05
Pb	0.003	0.05
Hg	0.0015	0.002
Se	0.007	0.01
Ag	0.002	0.05

Of all the EP toxic metals tested with the land application model, only chromium was found to exceed its National Interim Primary Drinking Water Standard (*i.e.*, all the EP metals, except chromium, are not of regulatory concern). This leachate value was generated in early analyses of the waste, however; subsequent analyses produced maximum EP values of <0.001 mg/l Cr, which yield a compliance point concentration of <0.0003 mg/l. Since no metal-containing compounds are used in IMC's process, and none are expected to be present in the waste, we believe the source of chromium was the soldered pipes formerly present in the solvent recovery apparatus. Since these pipes have been replaced with stainless steel pipes, and additional analyses for chromium show it to be present in the waste at levels below the National Interim Primary Drinking Water Standard, we believe that chromium is not of regulatory concern.

Reactive cyanide and sulfide in the waste are not considered to be of environmental concern. Cyanide is not used in IMC's process, and the total concentration of reactive cyanide in the waste (0.2 mg/l) does not exceed the U.S. Public Health Service's suggested drinking water standard.[23] Reactive cyanide and sulfide levels in the waste are also below the air threshold limits of 10 ppm set by the American Conference of Governmental Industrial Hygienists.[24] These constituents are, therefore, not of regulatory concern. Furthermore, the Agency believes that no other hazardous constituents are present in the waste based on our review of the raw materials used by IMC in their production processes.

The Agency believes that this waste is non-hazardous (for all reasons) and as such should be excluded from hazardous waste control. The Agency proposes, therefore, to grant a final exclusion to International Minerals and Chemical Corporation, located in Terre Haute, Indiana, for its still bottom residues from its bacitracin production process. The Agency also believes that IMC should be allowed to continue to handle their waste as non-hazardous under their existing temporary exclusion. (The Agency notes that any changes to the manufacturing or treatment processes will require IMC to file an addendum to their petition.[25] Any future changes to these processes that could affect the physical or chemical characteristics of the sludge will require a re-demonstration of the non-hazardousness of the waste.).

IV. Monsanto Industrial Chemicals Company

A. Petition for Exclusion

Monsanto Industrial Chemicals Company's (Monsanto), W.C. Krummich facility located in Sauget, Illinois, produces chlorine from the electrolysis of aqueous sodium chloride or potassium chloride in DeNora mercury cells. In October, 1981, Monsanto petitioned the Agency to exclude its treated brine purification muds presently listed as EPA Hazardous Waste No. K071—Brine purification muds from the mercury cell process in chlorine production, where separately prepurified brine is not used. The listed constituent of concern is mercury.

Based upon the Agency's review of their petition, Monsanto was granted an informal conditional exclusion in March, 1982.[26] The basis for granting the informal exclusion was the low total concentration and the immobile form of the constituent of concern (mercury) in the waste. On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) As a result, the Agency has re-evaluated Monsanto's petition to: (1) Determine if the petition should be granted based on the original listing criteria, and (2) evaluate the waste for factors (other than those for which the waste was originally listed) to determine whether the waste is non-hazardous. Today's notice summarizes and gives the results of our re-evaluation of their petition.

Monsanto has submitted a detailed description of its manufacturing and treatment processes, including schematic diagrams; total constituent analyses and EP toxicity teat results of the treated brine purification muds for mercury. Monsanto also submitted total constituent analyses of the waste for arsenic, barium, cadmium, chromium, cyanide, lead, nickel, selenium, and silver; EP toxicity test results of the treated brine purification muds for lead;[27] and total oil and grease analyses on repreentative waste samples. Monsanto further submitted a list of raw materials used in the manufacturing process. The Agency requested this information, as noted above, to determine whether hazardous constituents, other than those for which the waste was originally listed, are present in the waste at levels of regulatory concern.

Monsanto produces chlorine gas and either sodium hydroxide or potassium hydroxide using a mercury cell (DeNora) process (i.e., electrolysis of sodium chloride brine or potassium muriate). Depleted brines are dechlorinated and resaturated with rock salt for the sodium system or chemical grade potassium muriate for the potassium system. These purified brines are then fed, on a continuous basis, to the mercury cells. The DeNora cells contain metal anodes and flowing mercury cathodes. Mercury amalgams of either sodium or potassium, formed in the cells, react with soft water in the decomposers to form hydrogen and caustics.

The chlorine gas is cooled, dried, compressed, and distributed to on-site users; the hydrogen gas is also cooled and distributed to on-site users; and the caustic is filtered, cooled, and stored for both on-site use and off-site sale. Process waste liquors and rain water are collected and treated in a sodium hydrosulfide process and Akzo resin to remove mercury prior to discharge.

Brine purification muds are discharged from the bottom of the sodium chloride saturator once per week. The material is collected in a dumpster/drain box. The brine purification muds are kept in the dumpster/drain box for 24 hours, during which time, the liquid portion drains through the screen partitions to a lower level of the box. The wet solids remain above the screen partitions. The liquid portion is combined with make-up water, sodium hydroxide, and chlorine gas, and the mixture is agitated and sparged in the NaOCl tank. This liquid is used to leach the mercury from the solids retained inthe top layer of the dumpster/drainer box.

The leaching solution is pumped into the dumpster/drainer box until all solids are covered. After a period of 24 hours, the leaching solution is drained from the box and the brine purification muds are then water washed twice for a period of two hours each. The leaching solution and spent water washes are discharged from the bottom of the dumpster/drainer box to the liquids treatment (sulfide precipitation/Akzo resin process) area. Monsanto claims that the treated brine purification muds contained in the dumpster/drainer box are non-hazardous due to the immobile nature and negligible level of mercury in the waste. Monsanto also believes that their waste is not hazardous for any other reason.

Six random samples of the treated brine purification muds were collected from the dumpster/drainer box each week (generated once weekly). The six samples were placed in a one gallon jar and sent to the laboratory for complete compositing and analyses. Monsanto's original petition was based on 15 composite samples collected between October 28, 1980 and September 22, 1981. The brine purification mud, composed mainly of insolubles ($ClSO_4$, $CaCO_3$ and Na_2SO_4), rocks dirt, and trace amounts of carbon, was analyzed for total and EP concentrations of mercury. The total concentration of mercury ranged from a low of 2 ppm to a high of 15 ppm, with the average value being 7.8 ppm. The EP toxicity concentration of mercury ranged from a low of 0.0005 ppm to a high of 0.037 ppm. The average value and 95 percent confidence level for the EP toxicity concentration of mercury was 0.0123 ppm, and 0.0170 ppm, respectively.

Monsanto sampled another 8 batches from the dumpster/drainer box (2 on September 12, 1983, and 3 each on September 19 and 26, 1983) in order to analyze for total oil and grease (TOG) content. The TOG content of the treated brine purification muds ranged from a low of 1.5 ppm to a high of 42 ppm, with the average total oil and grease concentration of 9.31 ppm.[28] On February 6, 1984 and January 21, 1985, Monsanto collected an analyzed an additional five composite samples of the treated brine purification muds for total constituent analysis of the non-listed EP toxic metals, nickel, and cyanide; these samples were randomly collected from the dumpster/drain box. The maximum total constituent concentrations are presented in Table 1.

Monsanto elected not to perform leachate analyses on the non-listed metals due to the low total constituent concentrations (see footnote 19). Upon Agency review of this data, however, Monsanto was requested to provide a minimum of four representative samples tested for lead using the EP toxicity test. The agency requested this analysis because ½oth of the total concentration of lead (55.0 ppm) exceeded the level of regulatory concern for lead in drinking water.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT CONCENTRATIONS BRINE PURIFICATION MUDS (mg/kg)

As	Ba	Total [1]		CN	Pb	Ni	Se	Ag
		Cd	Cr					
0.5	40	1.5	4.8	1.0	55	131	0.38	1.0

[1] Hexavalent chromium is the listed constituent of concern; however, the concentration of total chromium is low enough to make a determination of hexavalent chromium unnecessary.

Monsanto collected, using the above methodology (*i.e.*, one composite sample

---

[20] The Agency has not evaluated this waste in terms of the toxicity of n-butanol, since the basis for listing was only ignitability and since n-butanol is not an Appendix VIII hazardous constituent.

[25] See footnote 9.

[26] On March 11, 1982, a memorandum was sent from the Acting Deputy Associate Enforcement Counsel to the Regions indicating, among other things, that the Office of Solid Waste had made a peliminary determination to grant the delisting petition submitted by Monsanto for the K071 wastes generated at their Sauget, Illinois plant. The memo suggested that the Region use discretion when dealing with this waste until our decision was published in the Federal Register. Since that time, however, another letter was sent to the company indicating that the informal exclusion has been withdrawn and that Monsanto would have to handle this waste as hazardous until a final decision was granted.

[27] EP toxicity analyses for the treated brine purification muds were not required for arsenic, barium, cadmium, chromium, cyanide, nickel, selenium, and silver due to the low total constituent concentrations of these contaminants in the waste (*i.e.*, assuming a 20-fold dilution when extracting 100 grams of solids into 2 liters of water and a theoretical 100% leaching, the maximum possible EP extract concentration was below the constituents' level of regulatory concern).

[28] The one sample which resulted in 42 ppm of TOG, was the only sample stored in a sample bottle having a cap with a wax paper lining. The remaining 7 sample bottles had aluminum lined caps.

Continued

per week), an additional five samples of the treated brine purification muds between June 7, and July 27, 1985, and analyzed them for lead using the EP toxicity test. All five values were below the detection limit of 0.5 mg/l. Table 2 presents the maximum EP toxicity concentrations of the non-listed metals and cyanide.[29]

TABLE 2.—MAXIMUM EP TOXICITY CONCENTRATIONS BRINE PURIFICATION MUDS (mg/l)

As	Ba	Cd	Cr	CN	Pb	Hl	Se	Ag
0.025	2.0	0.075	0.240	0.05	0.5	0.5	0.010	0.05

Monsanto believes that all of the samples collected during the following periods, October 28, 1980 to September 22, 1981; September 12, 1983 to September 26, 1983; February 6, 1984 to January 21, 1985; and June 7, 1985 to July 27, 1985, are representative of both the listed and non-listed constituent concentrations in the waste. The petitioner further states that the manufacturing process used at the facility is operated in a consistent manner and that the use of raw materials does not vary over time. Consequently, they believe that the samples collected adequately characterize their brine muds.

Monsanto also submitted a complete list of all raw materials used in their production process and treatment process. This list indicates that no Appendix VIII hazardous constituents, other than those tested for, are used in the process and that formation of any of these constituents is highly unlikely. Monsanto also provided data indicating that the treated brine muds are not ignitable, corrosive, or reactive as defined in 40 CFR Part 261.21–23. The Monsanto petition states that a maximum of 480 tons of treated brine purification muds are generated per year.

B. Agency Analysis and Action

Monsanto has sufficiently demonstrated that its waste treatment system produces a non-hazardous brine purification mud. The Agency believes that the batch composite samples tested for total constituent analyses and EP toxicity concentrations of mercury; the batch composite samples tested for total constituent concentrations of the non-listed metals and cyanide; and the batch composite samples tested for EP toxicity concentrations of lead, collected from the dumpster/drainer box were not biased and adequately represent any variations that may occur in the waste stream petitioned for exclusion. The key factor that could vary toxicant concentrations in the waste would be the use of different raw materials due to changes in the product line being manufactured. Monsanto is not a job shop nor does it have seasonal product variations; therefore, the Agency believes Monsanto has substantiated their claim that the manufacturing and treatment processes are uniform and consistent and believes that the samples collected are representative of the waste generated and treated by Monsanto.

The Agency has evaluated the mobility of the constituents from Monsanto's waste using the vertical and horizontal spread (VHS) model.[30] The Agency's evaluation of Monsanto's treated brine purification muds, using the maximum values for estimated annual muds generation and reported/calculated EP leachate concentrations as input parameters, has resulted in the maximum predicted compliance point concentrations for both the listed and non-listed constituents exhibited in Tables 3 and 4, respectively.

TABLE 3.—COMPLIANCE POINT CONCENTRATION FOR THE LISTED CONSTITUENTS (mg/l)

Constituent	Compliance point concentration	Regulatory standard
Hg (maximum)	0.0011	0.002

The treated brine purification muds exhibited mercury levels below the National Primary Drinking Water Standard. Mercury is, therefore, not of regulatory concern.

TABLE 4.—COMPLIANCE POINT CONCENTRATION FOR THE NON-LISTED CONSTITUENTS (mg/l)

Constituent	Compliance point concentration	Regulatory standard
As	0.0008	0.05
Be	0.065	1.0
Cd	0.002	0.01
Cr	0.0008	0.05
CN	0.002	0.2
Ni	0.201	0.350
Pb	0.075	0.05
Se	0.0008	0.01
Ag	0.002	0.05

The Agency has also concluded that no other inorganic hazardous constituents are present in the treated brine purification muds at levels of regulatory concern (*i.e.*, none of the non-listed constituents exhibit compliance point concentrations exceeding the regulatory standard (see Table 4)). In particular, the VHS model predicted that the treated brine purification muds would exhibit levels of arsenic, barium, cadmium, chromium, lead, selenium, and silver (at the compliance point) significantly below the National Primary Drinking Water Standard, as well as nickel levels below the interim standard currently being used by the Agency.[31] These constituents, therefore, are not of regulatory concern.

The total cyanide levels in the treated brine purification muds would not exhibit free cyanide at levels expected to create a health hazard through exposure to contaminated ground water. This conclusion is based on the VHS model, using the total cyanide content of the wastes as the input to the aquifer (0.006 mg/l).[32] The cyanide concentration predicted at the compliance point is well below the U.S. Public Health Service's suggested drinking water standard.[33]

The free cyanide levels in the treated waste are also not expected to create a health hazard through inhalation. The level of total cyanide and the levels of free cyanide and photodegradable cyanide are not sufficient to generate cyanide vapors at levels exceeding the workroom air threshold limit of 10 ppm set by the American Conference of Governmental Industrial Hygienists (ACHIH).[34]

In addition, the Agency finds no hazardous organic constituents (listed in Appendix VIII) present in the waste. The Agency's review of the list of raw materials used by Monsanto in their production process shows that Monsanto does not use any other Appendix VIII constituents in their processes.

The Agency believes that, based upon the constituents and factors evaluated, Monsanto's treated brine purification muds are non-hazardous and should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Monsanto Industrial Chemicals Company's W.C. Krummich facility, located in Sauget, Illinois, for its treated brine purification muds, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Monsanto to file an addendum to their petition or a new petition.[35] Any future changes to these processes that could affect the physical or chemical characteristics of the sludge will require a re-demonstration of the non-hazardousness of the waste.)

V. Square D Company

A. Petition for Exclusion

Square D Company (Square D), located in Oxford, Ohio, is involved in the manufacture of products that distribute and control electricity (*e.g.*, ducts, junction boxes, and service fittings). Square D has petitioned the Agency to exclude its treated sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. Square D has petitioned to exclude its waste because it does not meet the criteria for which it was listed.[36]

The listed constituents of concern for EPA Hazardous Waste No. F006 are cadmium, hexavalent chromium, nickel, and cyanide (complexed). Square D claims that its wastewater treatment process generates a non-hazardous sludge because the constituents of concern, although present in the waste, are in essentially an immobile form. They further believe that this waste is not hazardous for any other reason.

Square D has submitted a detailed description of its electroplating and wastewater treatment processes, including schematic diagrams; total constituent analyses and EP toxicity test results of the sludge for cadmium, total chromium, and nickel; and total constituent analysis and a distilled water leach test for total cyanide. Free cyanide concentrations in the sludge were also determined. In addition, Square D submitted total constitutent analyses and EP toxicity test results for arsenic, barium, lead, mercury, selenium, and silver; and total oil and grease analyses on representative waste samples. Furthermore, Square D submitted detailed descriptions of all raw materials used in the manufacturing process and test results on representative waste samples for methyl ethyl ketone, 1,1,1-trichloroethane, xylene, and polychlorinated biphenyls. These organic contaminants were analyzed since they were identified as components of materials used in the process. The Agency requested this information, as noted above, to determine if hazardous constituents other than those for which the waste was originally listed are present in the waste.

Square D manufactures electrical distribution and control equipment, including junction boxes, ducts, and service fittings. This equipment is plated and/or painted in two plating lines and a paint line. One of the plating lines consists of a steel cycle and a copper cycle and involves alkaline and acid cleaning, non-cyanide zinc plating, and tin plating. The other plating line consists of an aluminum cycle and a copper cycle and involves alkaline and acid cleaning, tin immersion, copper cyanide plating, and tin plating. The paint line involves two iron phosphate pretreatment systems which use alkaline cleaners, acid phosphate cleaners, and non-chromic sealers.

Square D's waste treatment system involves chlorine destruction of cyanide, sodium metabisulfite reduction of hexavalent chromium, neutralization, polymer addition, and clarification. The clarified sludge is then pumped to a 5,000 gallon holding cell, air agitated into a homogeneous mixture, and pumped to a filter press for dewatering. The resultant sludge has a solids content of between 30 and 50 percent.

A total of 17 filter press sludge samples were collected and analyzed. Square D's initial demonstration was based upon four grab samples collected during a three-month period in 1982. Samples were collected twice from random areas of the filter press on each sampling day and placed, unpreserved, into polyethylene containers. The sealed samples were shipped to a labgratory and analyzed within 30 days of sampling. These grab samples were subjected to EP leachate analysis for all EP toxic metals and a distilled water leach test for cyanide, and a total constituent analysis for the listed constituents of concern. An additional four samples were collected from the filter press over a one-week period and analyzed for total and free cyanide. A composite of these four samples also analyzed for leachable cyanide. In addition, Square D collected four composite samples over a two-month period in 1983. Random grab samples were taken from the filter press plate daily between June 17 and 27, 1983, July 1, and 26, 1983, July 29 and August 10, 1983, and August 10 through August 24, 1983. The samples were composited per period and subsequently analyzed for leachable and total concentrations of all the EP toxic metals, nickel, and cyanide; these samples were also analyzed for their oil and grease content. A final set of samples was collected in 1984. Four of the samples were analyzed for methyl ethyl ketone, 1,1,1-trichloroethane, xylene, and polychlorinated biphenyls; a fifth sample was analyzed for leachable concentrations of all the EP toxic metals, nickel, and cyanide. Square D claims that the samples collected are representative of any variation of the listed and unlisted constituent concentrations in the waste. The petitioner further claims that the manufacturing processes used at the facility are operated on a 16-hour per day schedule, 260 days per year and that during all times the inputs to the treatment plant remain constant. Consequently, they believe that the samples collected and analyzed fully characterize their waste.

Total constituent analyses of the filter press sludge for the listed constituents revealed the maximum concentrations reported in Table 1. EP toxicity analyses for these same constituents revealed the maximum concentrations reported in Table 2.

TABLE 1.—MAXIMUM TOTAL CONSTITUENT ANALYSES FOR THE LISTED CONSTITUENTS (mg/kg)

	Cd	Cr	Ni	CN total	CN free
Filter press sludge	5.06	1600	102.5	7.4	6.06

TABLE 2.—MAXIMUM EP LEACHATE CONCENTRATIONS FOR THE LISTED CONSTITUENTS (mg/1)

	Cd	Cr total[1]	Ni	CN total
Filter press sludge	0.18	1.1	0.67	[2] 0.27

[1] Hexavalent chromium is listed as the constituent of concern for this waste; however, since the concentration of total chromium is low, a determination of the concentration of hexavalent chromium is unnecessary.
[2] From distilled water leach test.

Total constituent and EP toxicity analyses for the non-listed metals revealed the maximum concentrations reported in Table 3. Total oil and grease

[29] All values were calculated by taking 1/20 of the total constituent concentration, except for lead which are actual extraction results.

[30] See footnote 5.

[31] See footnote 10.

[32] Although an EP extraction for cyanide was not done, the total constituent concentration was used. If one were to assume 100 percent leaching and the 20X dilution allowed by the EP extraction test, the EP leachate value would be 0.01 mg/l.

[33] See footnote 7.

[34] See footnote 8.

[35] See footnote 9.

[36] Square D originally submitted their petition on November 12, 1982. On November 8, 1984, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) In anticipation of either enactment of this legislation or regulatory changes by the Agency, EPA requested additional information from Square D. This information was submitted by Square D on July 5, 1984, and December 12, 1985.

content reported for the filter press sludge did not exceed 0.56 percent. Square D also submitted a list of raw materials used in their process. This list indicated that methyl ethyl ketone, 1,1,1-trichloroethane, and xylene are used in their processes. Polychlorinated biphenyls (PCBs) were also indicated as possible constituents of the waste stream.

TABLE 3.—MAXIMUM CONCENTRATIONS FOR THE NON-LISTED CONSTITUENTS

	Total constituent analysis (mg/kg)	EP Leachate Analysis (mg/l)
As	<0.05	<0.05
Ba	49.1	[1]15.0
Pb	50.1	2.2
Hg	0.09	<0.005
Se	1.95	<0.1
Ag	9.70	0.18

[1] The Agency considers this value as an outlier since it is outside of the calculated 95% confidence interval (3.6 mg/l) using a sample population of 17. The next highest leachate value is <1.0 mg/l. Additionally, a total constituent analysis for barium was not processed for this sample.

Square D therefore, was asked to analyze for these contaminants; the maximum concentrations of these organics found in the filter press sludge are reported in Table 4. The list of raw materials submitted by Square D indicated that no other Appendix VIII hazardous constituents, other than those tested for, are used in their processes and that formation of any of these constituents is highly unlikely. Square D also provided test data indicating that the sludge is not ignitable, corrosive, or reactive. Square D claims to generate a maximum of 120 tons per year of filter press sludge.

TABLE 4.—MAXIMUM TOTAL CONCENTRATIONS OF THE ORGANIC CONSTITUENTS

Filter press sludge	Total constituent analysis (ppm)
Methyl ethyl ketone	<1
1,1,1-trichloroethane	<1
Xylene	<1
Polychlorinated biphenyls	<1

B. Agency Analysis and Action

Square D has demonstrated that its waste treatment system produces a non-hazardous sludge. The Agency believes that the seventeen samples collected from the filter press were non-biased and more than adequately represent any variations which may occur in the waste stream petitioned for exclusion. Manufacturing process wastes are discharged to the wastewater treatment facility according to the chemical composition of the stream. Spent acid and alkali, hexavalent chromium-bearing solutions, acid and alkaline rinses, and cyanide-bearing solutions are discharged to separate pits for treatment. These reaction pits are controlled automatically by pH and or REDOX equipment. The treated waste streams are combined, neutralized, and dewatered. The Agency is satisfied that the sampling methods conducted by Square D are valid since samples collected on any day would not be expected to vary widely from any other day based upon process engineering considerations. The Agency believes Square D's claim that the manufacturing and treatment processes are uniform and consistent are well substantiated, since this facility does not perform as a job shop or have seasonal product variations. The Agency's conclusion was confirmed by a comparison of the total constituent analyses of each sample as well as a statistical analysis of the EP toxicity data from each sample. This analysis would have detected any significant variability in the waste, however, no significant variability was detected (i.e., the standard deviation was low).[37]

The Agency has evaluated the mobility of the constituents from Square D's waste using a vertical and horizontal spread (VHS) model.[38] The Agency's evaluation of Square D's 120 tons of filtered sludge[39] and the maximum extract levels for the listed constituents of concern using the VHS model has generated the compliance point concentrations shown in Table 5.

TABLE 5.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS FOR THE LISTED CONSTITUENTS (ppm)

	Cd	Cr total	Ni	Cn
Filter press sludge	0.006	0.034	0.021	0.008
Regulatory standard	0.010	0.050	0.350	0.200

The filter press sludge exhibited cadmium and chromium levels (at the compliance point) below the National Interim Primary Drinking Water Standards, nickel levels below the Agency's interim standard,[40] and cyanide levels below the U.S. Public Health Service's suggested drinking water standard.[41]

The free cyanide levels in the treated waste are also not expected to create a health hazard through inhalation. The level of total cyanide, and the levels of free cyanide and photodegradable cyanide are not sufficent to generate cyanide vapors at levels exceeding the workroom air threshold limit of 10 ppm set by the American Conference of Government Industrial Hygienists (ACGIH).[42] These constituents, therefore, are not of regulatory concern.

The Agency has also evaluated the mobility of the non-listed EP toxic metals from Square D's waste using the VHS model. The model generated compliance point concentrations below the National Interim Primary Drinking Water Standards for each metal as shown in Table 6. We believe, therefore, that these contaminants are not of regulatory concern.

TABLE 6.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS FOR THE NON-LISTED CONSTITUENTS (ppm)

	As	Ba	Pb	Hg	Se	Ag
Filter press sludge	0.0015	0.49	[1] 0.028	0.0015	0.003	0.006
Regulatory standards	0.05	1.0	0.05	0.002	0.01	0.05

[1] Although the maximum EP leachate concentration for lead was reported as 2.2 ppm, the Agency chose to use the 95 percent confidence level instead, based partly on the large number of samples analyzed. The Agency believes that the 2.2 ppm value was an outlier (non-representative) value, and this conclusion is supported by the calculated 95 percent confidence value of 0.898 ppm.

Furthermore, the Agency concludes that no organic hazardous constituents are present in the waste at levels of regulatory concern (*i.e.*, none are above their respective regulatory standard at the compliance point). In particular, the raw materials used by Square D in their manufacturing process indicate that methyl ethyl ketone, polychlorinated biphenyls, 1,1,1-trichloroethane, and xylene are either used in the process, or although not used, may be present in the filtered press sludge. In analyzing for these contaminants, we found no detectable levels of these contaminants in the waste.

To confirm that the detection limits are not too high, the Agency has evaluated the mobility of the toxic organic constituents from Square D's filter press sludge using the methods outlined in Appendix I of the November 27, 1985, Federal Register notice (50 FR 48953–87).[43] Compliance point concentrations of the constituents of concern are calculated and presented in Table 7. In all cases, the concentration of these contaminants at the compliance point is below the regulatory standard. We, therefore, believe that these contaminants are not of regulatory concern.

TABLE 7.—VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS OF ORGANIC CONTAMINANTS (PPM)

Constituent	Filter press sludge [1]	Regulatory standard [2] (mg/l)
Methyl ethyl ketone	0.018	2.0
1,1,1-trichloroethane	0.001	1.0
Polychlorinated biphenyls	1.32×10^{-7}	8×10^{-5}

[1] Maximum total concentrations were assumed to be the detection limit (i.e., detection limits—1 ppm, thus maximum total concentration—1 ppm).
[2] See the public docket for an explanation of the derivation of these regulatory standards.

The Agency believes that this waste is non-hazardous (for all reasons) and as such should be excluded from hazardous waste control. The Agency, therefore, proposes to grant an exclusion to Square D Company (Oxford Plant) located in Oxford, Ohio, for its filter press sludge generated by its electroplating operations, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Square D to file an addendum to their petition or anew petition.[44] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazard of the waste.)

VI. Vulcan Materials Company

A. Petition For Exclusion

Vulcan Materials Company (Vulcan), located in Port Edwards, Wisconsin, produces chlorine and caustics for commercial use. In March 1981, Vulcan petitioned the Agency to exclude its brine purification muds and saturator insolubles, presently listed as EPA Hazardous Waste No. K071—Brine purification muds from the mercury cell process in chlorine production where separately prepurified brine is not used. The listed constituent of concern is mercury.

Based upon the Agency's review of their petition, Vulcan was granted a temporary exclusion in December 1981 (See 46 *FR* 61283). The Agency's basis for granting the temporary exclusion was the low migration potential of the constituent of concern, namely mercury. Due to the inherent variability of the waste, however, the exclusion was conditioned to ensure that each batch of brine muds exhibited acceptable levels (less than 50 ppb) of leachable mercury.

On November 8, 1984, the Hazardous and Solid Waste Amendments were enacted. In part, the Amendments require the Agency to consider factors (including additional constituents) other than those for which the waste was originally listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (See section 222 of the Amendments, 42 U.S.C. 6921(f).) As a result, the Agency, has re-evaluated Vulcan's petition to: (1) Determine whether the temporary exclusion should be made final based on the original listing criteria, and (2) evaluate the waste for factors other than those for which the waste was originally listed to determine whether the waste is non-hazardous. Today's notice presents the results of the Agency's re-evaluation of this petition.

Vulcan has submitted a detailed description of its production and treatment processes, including schematic diagrams; total constituent and EP toxicity analyses of the wastes for all the EP toxic metals and nickel; total constituent and distilled water leachate analysis for cyanide; total oil and grease content of the waste; and ignitability, corrosivity, and reactivity data. Vulcan also submitted a list of all raw materials and feed stocks (and Material Safety Data Sheets for all trade name materials) used in the production processes. The Agency requested this information, as noted above, to determine whether constituents other than those for which the waste was listed are present in the waste at levels of regulatory concern.

Vulcan produces chlorine and muriatic acid using a mercury cell process (*i.e.*, electrolysis of sodium chloride brine). Rock salt is dissolved and purified to form sodium chloride brine. The brine flows into one of 24 electrolytic cells containing metal anodes and flowing mercury cathodes. Sodium chloride is removed from the brine by electrolysis and the depleted brine is pumped back to the brine system, where additional rock salt is added. The brine is purified and pumped to the electrolytic cells, as a recirculating system. As the brine goes through the electrolytic cells, it is contaminated with mercury; thus, the brine purification muds contain mercury. The depleted brine is then pumped to the brine treatment tanks.

During the brine manufacturing process, rock salt is dissolved in the depleted brine. Approximately 97 percent of the rock salt dissolves, while the remaining three percent is removed as brine saturator insolubles. These insolubles consist of calcium, magnesium, sulfates, dirt, and rocks originating from the salt mining process. The brine saturator insolubles, resulting from the brine system, necessarily come into contact with the depleted brine, and thus, also contain mercury. The saturator insolubles are purged and pumped to the saturator purge pit for treatment.

Soda ash is added to the brine treatment tanks in order to precipitate calcium as calcium carbonate, while sodium hydroxide is added to precipitate magnesium as magnesium hydroxide. The resulting slurry is pumped to a clarifier, where the precipitates are removed as brine purification solids, and the wastewater is sent to the wastewater treatment unit (which is not considered in Vulcan's petition). The resulting brine purification solids are pumped to the clarifier purge pit.

In a smaller reactor, sulfates are removed from the brine by adding calcium chloride. The sulfates precipitate out as calcium sulfate. The slurry is then separated in the clarifier, and the resulting solids are pumped to the clarifier purge pit.

The saturator insolubles are pumped from the saturator purge pit once every two weeks, and the brine purification solids are pumped from the clarifier purge pit once every one to three days and are treated separately. The brine purification solids are pumped to a surge tank where sulfuric acid is added, thus converting calcium carbonate to calcium sulfate, and also increasing mercury solubility. The acidified calcium sulfate is then nuetralized with sodium hypochlorite to completely solubilize the mercury. The slurry is pumped to a vacuum drum filer where a filter cake is generated. The filter cake is then washed with a two stage pH water spray and is then neutralized with an additional water spray to further reduce the mercury content. The resulting filtrate is routed to the liquids treatment facility.

The saturator insolubles are treated by complete submergence in a low pH dechlorinated brine, which also reduces

[37] See standard T-test in Biometry: The Principles and Practices of Statistics in Biological Research; Sokal, R. and Rohlf, F.J., 1980.
[38] See footnote 8.
[39] Square D generate 120 tons of sludge per year of waste; however, the VHS model specifies a minimum waste generation rate of 475 cubic yards. The Agency assumes the density of the waste to be 1 ton/cu/ yd. unless otherwise specified. See 50 *FR* 46900 (November 27, 1985) for a discussion of the minimum waste generation rate.
[40] See footnote 18.
[41] See footnote 7.
[42] See footnote 8.
[43] Xylene is considered hazardous only because it is ignitable (*i.e.*, xylene is not considered toxic). Since the waste is not ignitable, any xylene that may be present in the waste is not of regulatory concern.
[44] See footnote 8

the leachable mercury content of the waste. The liquid portion is pumped back to the brine system. In both cases, the treated brine purification muds and treated saturator insolubles are batch tested for leachable mercury concentration. If acceptable levels of leachable mercury are determined, the dewatered brine purification muds and saturator insolubles are shipped to a sanitary landfill. If higher than permissible levels of leachable mercury are found, however, the waste is either reworked or disposed of as a hazardous waste.

Vulcan sampled each batch of saturator insolubles by taking a single four ounce sample from the center of eah 2–4 cubic foot batch. The rationale for this sampling procedure ws that treatment from submergence is least effective in treating the geometric center of the mound. Vulcan also sampled each treated batch of the brine purification muds. Vulcan took one four ounce grab sample directly from the filter wheel every two hours. The grab samples were then composited and analyzed each day. A total of 286 batch composites were analyzed.

Vulcan believes that by testing each batch of treated brine purification muds and saturator insolubles they were able to detect any day to day variations in waste composition. Also, by sampling from the center of each saturator insolubles pile, a relatively small pile (2–4 cubic feet), they were able to characterize the worst case constituent concentrations of the waste. Vulcan believes that these daily samples (saturator insolubles) and daily composites (brine clarification needs) are representative of the waste because: (1) The production and treatment processes are uniform; and more importantly (2) sampling every batch allows for the detection of unacceptable leachate concentrations due to unexpected variations in raw materials, production process, and treatment process.

When the Agency requested analyses of the wastes for the other EP toxic metals, cyanide, and nickel, Vulcan, using the same sampling procedures as above, took four additional samples of the saturator insolubles and brine purification muds.

Vulcan submitted the EP extraction results from 1985 for each batch of the treated brine purification muds and the treated saturator insolubles. Using the 0.05 ppm cut-off level, as conditioned by their temporary exclusion (for mercury), 218 of the 286 (82.0%) batches of treated brine purification muds and 96 of the 101 (95.%) batches of treated saturator insolubles exhibited EP leachate levels of mercury at 0.012 ppm or less. Only one batch of treated brine purification muds exhibited an EP leachate concentration for mercury at the 0.05 ppm cut-off level. The highest EP leachate concentration for mercury, exhibited by the treated saturator insolubles, was 0.021 ppm.

The results of total constituent analyses for the non-listed metals and cyanide are presented in Table 1. Table 2 presents maximum leachate concentrations detected for the non-listed metals and cyanide contained in the treated brine purification muds, and saturator insolubles. Results from the analyses of the waste for total oil and grease ranged from 62 mg/kg to 92 mg/kg in both the treated brine purification muds and saturator insolubles.

TABLE 1.— MAXIMUM TOTAL CONSTITUENT CONCENTRATIONS (mg/kg)

Process wastes	Ag	As	Ba	Cd	Total Cr	Ni	Pb	Se	CN
Brine clarifier muds	6.7	51.2	41.0	0.074	1.8	2.0	0.661	2.6	0.2
Saturator insolubles	7.1	41.8	639	0.61	1.9	4.0	0.53	0.01	0.2

TABLE 2.—MAXIMUM EP LEACHATE CONCENTRATIONS (mg/l)

Process waste	Ag	As	Ba	Cd	Cr[1]	Ni	Pb	Se	CN
Brine purification muds	0.006	0.003	0.731	.001	0.004	[2] ND	[2] ND	0.012	[2] ND
Saturator insolubles	0.005	0.006	0.498	0.005	0.027	[2] ND	[2] ND	0.014	[2] ND

[1] Hexavalent chromium is listed as the constituent of concern; however, the low total chromium concentration indicates that hexavalent chromium would not be present at levels of regulatory concern.
[2] ND—Not Done. Analysis not completed because of low total constituent concentrations in waste (*i.e.*, assuming a theoretical 100 percent leaching of the constituent and a 20 times dilution factor when extracting 100 grams of solids into 2 liters of water, the concentration was less than the interim standard).

None of the samples exhibited any of the characteristics of ignitability, corrosivity, or reactivity as specified in 40 CFR Part 261.21-23. In addition, examination of the Material Safety Data Sheets for all materials used, which could possibly enter the petitioned wastes, did not identify any other Appendix VIII hazardous constituents. Vulcan generates a maximum of 4463 tons of treated materials (4074 tons of treated clarifier brine muds and 389 tons of treated saturator insolubles) a year.

B. Agency Analysis and Action

Vulcan has sufficiently demonstrated that the treated clarifier brine muds and saturator insoluables are non-hazardous. Based on the data presented in Vulcan's petition, the Agency believes that the petitioner has adequately characterized the treated brine clarifier muds and saturator insolubles, and that the samples analyzed reflect the day to day variation in production. The Agency believes Vulcan's claim that the manufacturing and treatment processes can be operated in a uniform manner, since this facility does not perform as a job shop and there are no seasonal product variations. We also agree with Vulcan that the sampling procedure used represents a relatively worst-case. Thus, the Agency considers the sampling procedures used by Vulcan to be adequate, and as such, no significant day-to-day variation in constituent concentrations was detected. A comparison of the total constituent concentration with the EP leachate concentration of each constituent, as well as an evaluation of the QA/QC data (spike concentrations and percent recovery data) did not detect any significant variability in the waste (*i.e.*, the standard deviation was very low).[45] The Agency, therefore, concludes that the samples collected by Vulcan are representative of the treated brine clarifier muds and saturator insolubles.

The Agency has evaluated the mobility of the constituents from Vulcan's treated brine clarifier muds and saturator insolubles using the vertical and horizontal spread (VHS) model.[46] The Agency's evaluation of Vulcan's 4,463 tons of waste and the maximum EP leachate extracts levels for the non-listed constituents of concern using the VHS model generated the

[45] See footnote 37.
[46] See footnote 5.

compliance point concentrations presented in Table 3. The VHS model predicted that both the treated brine clarifier muds and saturator insolubles would exhibit levels of arsenic, barium, cadmium, chromium, lead, selenium, and silver (at the compliance point) significantly below the National Primary Drinking Water Standards, as well as nickel levels [47] below the interim standard. These constituents therefore, are not of regulatory concern.

TABLE 3.—CALCULATED COMPLIANCE POINT CONCENTRATIONS (mg/l)

Constituents	Brine clarifier muds	Saturator insolubles	Regulatory standard (mg/l)

Se	.0019	.0022	0.01
CN	[1] ND	[1] ND	0.2

[1] See footnote 2 of Table 2.

The total cyanide levels in the treated brine clarifier muds and saturator insolubles would not exhibit levels expected to create a health hazard through exposure to contaminated ground water. This conclusion is based on the calculated compliance point concentration from the VHS model, using the total cyanide content of the wastes as the input (0.2 ppm).[48] The cyanide concentration predicted at the compliance point was well below the U.S. Public Health Service's suggested drinking water standard.[49]

In addition, the free cyanide levels in the treated waste are not expected to create a health hazard through inhalation. In particular, the level of total cyanide, and free cyanide and photodegradable cyanide are not sufficient to generate cyanide vapors at levels exceeding the workroom air threshold limit of 10 ppm set by the American Conference of Governmental Industrial Hygienists (ACGIH).[50]

The Agency has also concluded that there are no organic constituents present in the treated waste. The Agency's conclusions are based on the examination of Vulcan's raw materials, knowledge of the process, and analytical test results provided by Vulcan.

Using Vulcan's maximum annual waste generation rate of 4463 tons and the VHS model, the Agency computed the maximum allowable EP extract concentration of mercury in the waste.[51] In order for Vulcan's waste to be considered non-hazardous, the maximum EP leachate concentration for mercury has to be 0.0129 ppm or less. The EP extraction data for mercury provided by Vulcan was when they were required to assure that no batch exhibited an EP leachate concentration above 0.05 ppm. Analyis of the 1985 batch treatment records for both the brine clarifier and saturator insolubles revealed that 82 percent of the brine clarifier muds and 95 percent of the saturator insolubles exhibited EP leachate concentrations at 0.012 ppm or less. Additionally, 52.6 percent of the treated brine clarifier muds and 66 percent of the treated saturator insolubles exhibited EP leachate levels of 0.002 ppm or less.

Vulcan asserts that if they reprocessed all batches exhibiting EP leachate concentrations exceeding 0.0129 ppm, instead of the presently stipulated level of 0.05 ppm, they would significantly reduce the number of treated batches exceeding the cut-off level. The Agency agrees with Vulcan, in that if the maximum allowable EP extract level of mercury was 0.0129 ppm, instead of the current 0.05 ppm level, Vulcan would have reprocessed those batches, thereby reducing both the EP leachate concentration of mercury and the number of failing batches. The Agency is still concerned, however, with the possible batch to batch variation in EP leachate mercury levels. We will continue to require, therefore, that each and every batch be analyzed for EP leachable mercury.

The Agency believes that Vulcan has submitted data indicating that the concentration of leachable mercury can be controlled by its treatment system. To assure that the level of mercury in the leachate is maintained at an acceptable level, the Agency will continue to require Vulcan to test each batch of treated brine clarifier muds and saturator insolubles prior to disposal. If EP analyses indicate that the leachate concentration of mercury exceeds 0.0129 ppm, the waste must be re-treated or disposal of as a hazardous waste and will be subject to the regulatory requirements of 40 CFR Parts 262 through 267.

The Agency, therefore, concludes pursuant to this condition, that the treated brine clarifier muds and saturator insolubles, are non-hazardous (for all reasons), and as such, should continue to be excluded from hazardous wastes controls, if conditions permit. The Agency, therefore, proposes to grant a final conditional exclusion to the Vulcan Materials Company located in Port Edwards, Wisconsin, for its treated brine clarification muds and its treated saturator insolubles, as described in its petition. (The Agency notes that any changes to the manufacturing or treatment processes will require Vulcan to file an addendum to their petition or a new petition.[52] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazard of the waste.)

VIII. Whirlpool Corporation.

A. Petition for Exclusion

Whirlpool Corporaion (Whirlpool), located in Danville, Kentucky, is involved in the production of trash compactors, refrigerator ice makers, refrigerator compressor electric motors, and miscellaneous electrical wiring components. Whirlpool has petitioned the Agency to exclude its wastewater treatment sludge, presently listed as EPA Hazardous Waste No. F006—Wastewater treatment sludges from electroplating operations except from the following processes: (1) Sulfuric acid anodizing of aluminum; (2) tin Plating on carbon steel; (3) zinc plating (segregated basis) on carbon steel; (4) aluminum or zinc-aluminum plating on carbon steel; (5) cleaning/stripping associated with tin, zinc, and aluminum plating on carbon steel; and (6) chemical etching and milling of aluminum. Whirlpool has petitioned to exclude its waste because it does not meet the criterial for which it was listed.

Based upon the Agency's review of their petition, Whirlpool was granted a temporary exclusion in August 1981 (see 46 FR 40158). The Agency's basis for granting the temporary exclusion was the low migration potential of the constituents of concern, namely cadmium, hexavalent chromium, cyanide (complexed), and nickel. Since that time, the Hazardous and Solid Waste Amendments of 1984 were enacted. In part, the Amendments require the Agency to consider factors

[47] See footnote 10.
[48] The total constituent concentration was used in calculating the leachate concentration since an extraction for cyanide was not conducted. If one were to assume 100 percent leaching and the 20X dilution allowed by the leachate test, the EP leachate value would be 0.01 mg/L.
[49] See footnote 7.
[50] See Footnote. 8.
[51] The VHS model allows a dilution factor of 6.43 when evaluating 4463 tons of waste. The maximum allowable EP extraction level of mercury, therefore, would be: 0.083 (NIPDW Standard) X 6.43 (dilution factor), or 0.0129 ppm.
[52] See footnote 9.

(including additional constituents) other than those for which the waste was listed, if the Agency has a reasonable basis to believe that such additional factors could cause the waste to be hazardous. (see section 222 of the Amendments, 42 U.S.C. 6921(f).) The Agency, therefore, has re-evaluated Whirlpool's petition to: (1) Determine whether the temporary exclusion should be made final based on the original listing criteria; and (2) evaluate the waste for factors (other than those for which the waste was listed) to determine whether the waste is non-hazardous. This notice presents the results of the Agency's re-evaluation of this petition.

Whirlpool has submitted a detailed description of its manufacturing and treatment processes, including schematic diagrams; total constituent and oily EP toxicity analyses of the waste for all the EP toxic metals and nickel; total constituent analyses for total cyanide and cyanide amenable to chlorination; the total oil and grease content of the waste; and ignitability, corrosivity, and reactivity data. Whirlpool also submitted a list of raw materials and feed stocks (and material safety data sheets for all trade name materials) used in the manufacturing processes. The Agency requested this information, as noted above, to determine whether constituents other than those for which the waste was listed are present in the waste at levels of regulatory regualtory concern.

Whirlpool assembles residential trash compactors, vacuum cleaners, refrigerator ice makers, refrigerator compressor electric motors, and miscellaneous electrical wiring components. At this facility Whirlpool also manufactures the parts for the trash compactors, as well as assembles them. The remaining products are assembled from parts (manufactured elsewhere) on an assembly line. In the first phase, cold rolled steel is cut, formed, and welded. The welded parts are then carried by conveyor through a seven stage phosphating system: (1) And (2) alkaline cleaning; (3) water rinse; (4) iron phosphating; (5) water rinse; (6) sealing; and (7) deionized water rinse. The parts are then air dried in a cool down tunnel.

Next, trash compactor parts are electronically charged and conveyed through an electrodepositing tank in order to deposit a uniform coating of epoxy-brown anionic paste primer on the part. This paint system uses a solvent containing 0.3 percent paraffins, 0.3 percent naphthenes, and 99.4 percent aromatic hydrocarbons (C_9 or larger). The parts are then rinsed and conveyed through an oven for drying.

When the rinsate from the electrodepositing process is contaminated, it is recycled back into the electrodepositing tank as make-up, and fresh deionized water in added in its place. In the last phase, a final coat of paint is sprayed onto the parts using electrostatic semi-airless hand sprayers or electrostatic automatic Ransbury disks (xylene is the solvent used in this process). In the hand spraying process, the electronically charged parts are sprayed over a continually recirculating water wash spray booth. Over spray, if any, is chemically floculated and skimmed from the tank daily. The collected paint material is then drum and disposed, separately, as a hazardous waste. In the automatic spraying process, parts are again electronically charged and sprayed, only this time, the over-spray is caught by disposable cardboard walls. The parts are then oven dried and sent to final assembly.

The contaminated rinse waters (from stages 3, 5, and 7), the spent alkaline cleaners (neutralized with HCL) and the spent phosphating/sealing baths are all sent to a collection tank, where they are held prior to treatment. These waters account for 99 percent of the generated wastewaters. The remaining one percent of total wastewater generated, arise from annual discharges of (1) the electrodeposition spent rinse water (when the tank is cleaned); (2) the decant water from the water paint touch-up booths (used to catch over-spray from the electrostatic semi-airless hand spraying process); (3) infrequent floor washing; (4) discharge from a small alkaline parts washer and associated rinse water used in stages 1 and 2; and (5) water soluble oils generated from coolant fluid replacement. Over spray and gun cleaning solvent (xylene) never enter the waste water treatment system. The over spray is collected and disposed of as a hazardous waste, as described earlier; and solvent used for cleaning spray guns are sprayed directly into a drum for disposal.

The annual cleaning of the water wash tanks, used in the final paint application process, results in the discharge of approximately 10,000 gallons of wastewater containing no more than one percent xylene to the wastewater treatment system. This discharge becomes mixed with another 40,000 to 50,000 gallons of normal process wastewater. Whirlpool believes that this dilution is sufficient to render the mixture non-ignitable.

The Agency has reviewed the material safety data sheets for all trade name raw materials and has not identified any organic constitutents listed in Appendix VIII and, therefore, concludes that no organic hazardous constitutents enter the wastewater treatment system.

The wastewater from the collection tank and miscellaneous wastewaters flow to an automated pH adjustment unit. The pH of the wastewater is maintained at 8.0. If the pH exceeds 8.1, however, aluminum sulfite is added, and should the pH fall below 7.9, hydrated lime is added. The neutralized wastewater is then pumped from the holding tank to a clarifier. In the pumping process, a liquid polymer is added to the stream. In the clarifier, the solids (aided by the polymer) settle to the bottom, and the supernatant is discharged directly to the municipal treatment plant. The sludge is removed from the clarifier every 2–3 working days and sent to the rotating vacuum filter press. The resulting filter cake is passed through a cake of amorphous diatomaceous earth and sent by conveyor to a dumpster for shipment to a sanitary landfill. The supernatant resulting from the vacuum filter is routed to the pH adjustment unit and reworked.

Filter cake samples were taken one day a week for four weeks.[53] These samples were collected every half hour, and between 7 and 9 samples were composited for each daily sample. Since only one total constituent analysis for arsenic, barium, lead, mercury, selenium, and silver was performed, an additional three samples were requested. Three grab samples were taken randomly from the filter press on January 27, 29, and 31, 1986. Whirlpool claims that these composites are representative of the waste because of the uniformity of the manufacturing and treatment process, and because the sampling from the filter press allows a consistent and un-biased sampling of daily filter cake production. Whirlpool claims that these samples reflect any variation of constitutent concentration in the waste, and that the raw materials do not change over time. Whirlpool, therefore, believes that the samples collected are representative and thus adequately characterize the waste filter cake.

Total constituent analysis for the listed and non-listed constitutents in the sampled filter-cake resulted in the concentrations shown in Table 1.

[53] Whirlpool's initial demonstration for EP leachate was not considered (since the total oil and grease content of the waste exceeded one percent, and thus, were invalidated).

TABLE 1.—FILTER CAKE, TOTAL CONSTITUENT ANALYSIS (mg/kg)

As	Ba	Cd	Cr	Pb	Hg	Se	Ag	Ni	Total CN
1.98	51	0.3	67	120	0.075	0.48	2.3	5.5	<0.2

Analyses for total oil and grease content were completed and the oil and grease content of the waste ranged from 6.0 to 7.6 percent. Due to the waste's high oil and grease content, Whirlpool completed the EP extraction on a minimum of four representative samples using the oily waste methology. Table 2 presents the maximum oily-EP leachate concentrations detected for both the listed and non-listed constitutents.

TABLE 2.—FILTER CAKE, MAXIMUM OILY EP EXTRACTION ANALYSIS, MOBILE METAL CONCENTRATION (mg/l)

As	Ba	Cd	Cr	Pb	Hg	Se	CN[1]	Ag	Ni
0.017	1.37	<0.006	0.436	0.086	<0.004	<0.013	ND	0.388	2.89

[1] An analysis for leachable cyanide was not completed because of the low total concentration of cyanide in the waste (*i.e.*, total and free cyanide were less than 20 times the drinking standard for cyanide 0.2 mg/l).

Examination of the Material Safety Data Sheets, as stated earlier, did not detect any other Appendix VIII compounds. It is possible for the solvent containing 0.3 percent naphthenes, 0.3 percent paraffins, and 99.4 percent aromatic hydrocarbons (C_9 or larger), and xylene to enter the wastestream; however, it is expected that these solvents would flash off in the clarifier and not be present in the dewatered filter cake.[54] Additionally, the solvent's only access to the wastewater treatment system is through a annual discharge which only contributes one percent of the overall total wastewater generated and thus, would be rendered non-ignitable by dilution. Furthermore, none of the samples exhibited any of the characteristics of ignitability, corrosivity, or reactivity as specified in 40 CFR Part 261.21-.23. Whirlpool claims to generate a maximum of 294 tons of sludge per year.

B. Agency Analysis and Action

Whirlpool has demonstrated that the filter cake generated at their Danville, Kentucky facility is non-hazardous. Based on the data presented in Whirlpool's petition, the Agency believes that the petitioner has adequately characterized the waste filter cake, and that the samples analyzed reflect the day to day variation in production. The Agency believes Whirlpool's claim that the manufacturing and treatment process are uniform and consistent are well substaniated, since this facility does not perform as a job shop and there are no seasonal product variations. Thus, we consider the sampling procedures used by Whirlpool to be adequate, and as such, no significant day-to-day variation in constituent concentrations were detected. A comparison of the total constituent concentration with the oily-EP leachate concentration of each constituent, as well as an evaluation of the QA/QC data (spike concentrations and percent recovery data) did not detect any significant variability in the waste (*i.e.*, the standard deviation was very low).[55] The Agency, therefore, concludes that the analytical information provided by Whirlpool is representative of the waste filter cake.

The Agency has evaluated the mobility of the constituents from Whirlpool's waste filter cake using the vertical and horizontal spread (VHS) model.[56] The Agency's evaluation of Whirlpool's 294 tons of filter cake using the maximum oily EP extract levels for the constituents of concern in the VHS model generated the compliance point concentrations presented in Table 3.[57]

TABLE 4.—VHS Model: Calculated Compliance Point Concentrations (ppm)

	Cd	Cr	Ni	CN
Filter cake	<0.0002	0.013	0.089	<0.006
Regulatory standards (ppm)	0.01	0.05	0.350	0.20

The VHS model predicted that the waste filter cake material would exhibit cadmium and chromium levels (at the compliance point) significantly below the National Interim Primary Drinking Water Standards, as well as nickel levels[58] below the interim standard. These constituents, therefore, are not of regulatory concern.

The total cyanide levels in the waste filter cake would not exhibit free cyanide at levels expected to create a health hazard through exposure from contaminated ground water. This conclusion is based on the VHS model using the free cyanide content of the waste as the input. Although a leachate test for cycnide was not performed, the total constituent concentration was used (*i.e.*, if one were to assume 100 percent leaching and only dilution permitted by the oily-EP extraction test, the leachate value would be 0.01 mg/l). The cyanide concentration predicted at the compliance point was well below the U.S. Public Health Service's suggested drinking water standard.[59]

In addition, the free cyanide levels in the filter cake are also not expected to create a health hazard through inhalation. In particular, the level of total cyanide, an thus free cyanide and photodegradable cyanide, is not present in sufficient concentrations in order to volatilize at concentrations exceeding the workroom air threshold limit of 10 ppm set by the American Conference of Government Industrial Hygienists (ACGIH).[60]

The Agency has also concluded that there are no other hazardous inorganic or organic constituents present in the waste filter cake at levels of regulatory concern. The Agency's conclusions are based on the examination of Whirlpool's raw materials, knowledge of the process, and analytical test results provided by Whirlpool. In particular, the non-listed EP toxic metals' Oily-EP extraction concentrations (Table 3) were evaluated using the VHS model. Using these values, the Agency predicts levels at the compliance point to be significantly below the applicable regulatory standards, as seen in Table 5.

Table 5.— VHS MODEL: CALCULATED COMPLIANCE POINT CONCENTRATIONS (ppm)

	As	Ba	Pb	Hg	Se	Ag
Filter cake	0.0005	0.042	0.002	<0.0002	<0.0004	0.012
Regulatory standards	0.05	1.0	0.5	0.002	0.01	0.05

[54] The aromatic hydrocarbon solvent has a measured 100 percent evaporation rate of 65 minutes.

[55] See footnote 37.

[56] See footnote 5.

[57] Whirlpool generates 294 tons of sludge per year of waste; however, the VHS model specifies a minimum waste generation rate of 475 cubic yards. The Agency assumes the density of the waste to be 1 ton/cubic yard unless otherwise specified. (See 50 FR 49800, (November 27, 1985) for a discussion of the minimum waste generation rate.)

[58] See footnote 18.

[59] See footnote 7.

[60] See footnote 6.

VOL 51 ISS 88 MY 7 1986 UMI

The Agency also has reviewed each of the chemical components used in each raw material, as supplied by raw material lists, and material safety data sheets. The Agency has concluded from this review that no other Appendix VIII hazardous constituents are present in the petitioned waste. We also agree with Whirlpool that neither solvents, aromatic hydrocarbon, nor xylene, could be present in the waste at sufficient levels since the waste is not ignitable.

The Agency concludes that the waste filter-cake is non-hazardous (for all reasons), and as such, should continue to be excluded from hazardous waste control. The Agency, therefore, proposes to grant a final exclusion to Whirlpool Corporation's Danville division located in Danville, Kentucky for its dewatered phosphating filter cake, as described in their petition. [The Agency notes that any changes to the manufacturing or treatment processes will require Whirlpool to file an addendum to their petition or a new petition.[61] Any future changes to these processes that could effect the physical or chemical characteristics of the sludge will require a redemonstration of the hazard of the waste.]

Effective Date

This rule, if promulgated, will become effective immediately. The Hazardous and Solid Waste Amendments of 1984 amended Section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here since this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense which would be imposed on the petitioners by an effective date six months after promulgation and the fact that such a deadline is not necessary to achieve the purpose of section 3010, we believe that these rules should be effective immediately. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedure Act, pursuant to 5 U.S.C. 553(d).

Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposal to grant exclusions is not major since its effect is to reduce the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at specific facilities from EPA's list of hazardous wastes, thereby enabling the facility to treat its waste as non-hazardous.

Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an Agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions). The Administrator may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations. Accordingly, I hereby certify that this proposed regulation will not have a significant economic impact on a substantial number of small entities.

This regulation, therefore, does not require a regulatory flexibility analysis.

List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling.

Dated: April 29, 1986.

Marcia Williams,

Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR Part 261 is proposed to be amended as follows:

PART 261—INDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation of Part 261 continues to read as follows:

Authority: Secs. 1006, 2002(a), 3001, and 3002 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1970, as amended [42 U.S.C. 6905, 6912(a), 6921, and 6922].

2. In Appendix IX, add the following wastestreams in alphabetical order:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NON-SPECIFIC SOURCES

Facility	Address	Waste Description
Acro Building Products.	Sugarcreek OH	Dewatered wastewater treatment sludge (EPA Hazardous Waste No. F019) generated from the chemical conversion coating of aluminum after [insert date of final publication].
Hanover Wire Cloth Division.	Hanover, PA	Dewatered filter cake (EPA Hazardous Waste No. F006) generated from electroplating operations after [insert date of final publication].
International Minerals and Chemical Corp.	Terre Haute, IN	Spent non-halogenated solvents and still bottoms (EPA Hazardous Waste No. F003) generated from the recovery of n-butyl alcohol after [insert date of final publication].
Square D Co	Oxford, OH	Dewatered filter press sludge (EPA Hazardous Waste No. F006) generated from electroplating operations after [insert date of final publication].
Whirlpool Corp	Danville, KY	Dewatered filter cake (EPA Hazardous Waste No. F006) generated from electroplating operations after [insert date of final publication].

TABLE 2.—WASTES EXCLUDED FROM SPECIFIC SOURCES

Monsanto Industrial Chemicals Co.	Suget, IL	Brine purification muds (EPA Hazardous Waste No. K071) generated from the mercury cell process in chlorine production, where separately prepurified brine is not used after [insert date of final publication].
Vulcan Materials Co.	Port Edwards, WI	Brine purification muds (EPA Hazardous Waste No. K071) generated from the mercury cell process in chlorine production, where separately prepurified brine is not used after [insert date of final publication]. To assure that mercury levels in this waste are maintained at acceptable levels, the following conditions apply to this exclusion: Each batch of treated brine clarifier muds and saturator insolubles must be tested (by the extraction procedure) prior to disposal and the leachate concentration of mercury must be less than or equal to 0.0129 ppm. This exclusion does not apply to wastes for which either of these conditions is not satisfied.

[FR Doc. 86-10099 Filed 5-6-86; 8:45 am]

BILLING CODE 6560-50-M

[61] See footnote 9.

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1312

[Ex Parte No. MC-170 (Sub-No. 1)]

Short Notice Effectiveness for Independently Filed Single-Factor Motor-Water Rates

AGENCY: Interstate Commerce Commission.

ACTION: Supplemental request for comments to notice of proposed rules.

SUMMARY: The Commission held an open voting conference on March 12, 1986, to consider the issues in this proceeding. Notice of the proposed rule change was published at 50 FR 20920 (1985). At the conference, the Commission voted to request comments from the Federal Maritime Commission (FMC) on the merits of the proposal. In light of this action, and in an effort to develop a more complete record, the record has been reopened for additional comments from the parties as well as any other interested persons on the merits of the proposed rule. Comments are sought specifically with regard to the effect of the proposal on port-to-port water carrier operations under the jurisdiction of the FMC, on the degree and type of competition within the various markets involved, and on the various competitive relationships that exist in this trade, including the effect of the different notice periods and tariff filing requirements. Comments are also invited on TOTE's request in No. MC-C-10924, *Sea-Land Freight Service, Inc., and Sea-Land Service, Inc.—Alaskan Trade Substituted Service—Petition for Declaratory Order*, for a broad investigation of the Alaska trade, as it relates to this proceeding.

DATE: Comments are due June 6, 1986.

ADDRESS: The original and, if possible, 10 copies of comments should be sent to: Ex Parte No. MC-170 (Sub-No. 1), Case Control Branch, Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Ardith M. Horne, (202) 275-1764

or

Howell I. Sporn, (202) 275-7691.

SUPPLEMENTARY INFORMATION: Pursuant to a petition filed by Carolina Freight Carriers Corporation (Carolina), the Commission proposed amending 49 CFR 1312.39 to reduce the notice period for independently filed single-factor domestic motor-water property rates. Rate reductions and new rates would become effective on 1-day's notice and rate increases would become effective on 7-workdays' notice, rather than on the 30-days' notice currently required. Comments supporting the proposal were filed by Carolina, Foss L&T Co., Matson Navigation Company, and William J. Monheim. Comments in opposition were filed by Crowley Maritime Corporation and its subsidiary, Trailer Marine Transport Corporation, Sea-Land Service, Inc., Totem, Ocean Trailer Express, Inc. (TOTE), and the Puerto Rico Maritime Shipping Authority.

Additional information is contained in the Commission's decision. To purchase a copy of the decision, write to T. S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll free (800) 424-5403.

The Commission certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. To the extent that small entities will be affected, the effects should be positive. Regulatory lag will be reduced, and small carriers will be able to price their services more competitively, to their benefit and the benefit of their shippers.

This action will not significantly affect either the quality of the human environment or conservation of energy resources.

List of Subjects in 49 CFR Part 1312

Motor carriers, Freight forwarders, Maritime carriers, Freight, exports, Imports, and intermodal transportation.

Decided: April 24, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne

Secretary.

Appendix

Part 1312 of Title 49 of the Code of Federal Regulations is proposed to be amended as follows:

PART 1312—[AMENDED]

1. The authority citation for 49 CFR Part 1312 continues to read as follows:

Authority: 49 U.S.C. 10762; 5 U.S.C. 553.

2. Paragraph (h)(4) of § 1312.39 would be revised to read as follows:

§ 1312.39 Miscellaneous provisions which may be filed on less than statutory notice.

* * * * *

(h) * * *

(4) *Joint intermodal traffic.* This paragraph (h) applies to single-factor, motor-water property rates, charges, rules and other provisions, but does not apply to any other single-factor rate, charge, rule, or other provision having application over any segment of the lines of another transportation mode.

VOL 51 ISS 88 MY 7 1986 UMI

Notices

Federal Register
Vol. 51, No. 88
Wednesday, May 7, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

May 2, 1986.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, DC 20250, (202) 447–2118

Comments on any of the items listed should be submitted directly to:

Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for USDA

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Extension

• Food and Nutrition Service

Food Safety and Inspection Service

[Docket No. 86–018N]

SLD Policy Memoranda; Semi-Annual Listing

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document lists and makes available to the public memoranda issued by the Standards and Labeling Division (SLD), Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service (FSIS), which contain significant new applications or interpretations of the Federal Meat Inspection Act, the Poultry Products Inspection Act, the regulations promulgated thereunder, or departmental policy concerning labeling.

FOR FURTHER INFORMATION CONTACT: Margaret O'K. Glavin, Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 447–6042.

SUPPLEMENTARY INFORMATION: FSIS conducts a prior approval program for labels or other labeling (specified in 9 CFR 317.4, 317.5, 381.132, and 381.134) to be used on federally inspected meat and poultry products. Pursuant to the Federal Meat Inspection Act (21 U.S.C. 601 *et seq.*) and the Poultry Products Inspection Act (21 U.S.C. 451 *et seq.*), and the regulations promulgated thereunder, meat and poultry products which do not bear approved labels may not be distributed in commerce.

FSIS' prior label approval program is conducted by label review experts within SLD. A Variety of factors, such as continuing technological innovations in food processing and expanded public concern regarding the presence of various substances in food, has generated a series of increasingly complex issues which SLD must resolve as part of the prior label approval process. In interpreting the Acts or regulations to resolve these issues, SLD may modify its policies on labeling or develop new ones.

Significant or novel interpretations or determinations made by SLD are issued in writing in memorandum form. This document lists those SLD policy memoranda issued from October 1, 1985, through April 1, 1986.

Persons interested in obtaining copies of any of the following SLD policy memoranda, or in being included on a list for automatic distribution of future SLD policy memoranda, may write to: Printing and Distribution Section, Paperwork Management Branch, Administrative Services Division, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250.

Memo No.	Title and date	Issue	Reference
081A	Rescindment of Policy Memo 081, October 22, 1985	What processing procedures must be used for a meat or poultry product to be labeled as "marinated"?	(Replaces Policy Memo 081).
018A	Dual Weight Requirements for Stuffed Poultry Labels, December 20, 1985.	When must the label on consumer size retail packages of stuffed poultry and other poultry products declare the total net weight of the product and the minimum weight of the poultry in the product?	9 CFR 381.121(b). (Replaces Policy Memo 018).
50–B	Canadian Style Bacon, December 19, 1985	Appropriate labeling and standards of identity for "Canadian Style Bacon"?	(Replaces Policy Memo 50A).
070A	Fat and Lean Claims, March 31, 1986	What are the guidelines for the review and approval of labeling claims relating to the fat and lean content of meat and poultry products?	(Replaces Policy Memo 070).
071A	Lite and Similar Terms, March 31, 1986	What are the guidelines for the review and approval of labeling terms such as "Lite," "Light," "Lightly" and similar terms?	(Replaces Policy Memo 071).
092	Veal Parmagiana Made With Veal Patties, December 16, 1985	What is the appropriate labeling for Veal Parmagiana made with Veal Patties?	N/A
093	Adjusting for Protein Fat Free (PFF) Controlled Pork, December 19, 1985.	What formula adjustments are necessary when using protein fat free (PFF) controlled pork to meet minimum meat content standards in other products?	9 CFR 319.104, 9 CFR 319.105, and 9 CFR 301.2(ll).
094	Sulfiting Agents, February 19, 1986	Whether sulfiting agents present in processed fruits or vegetables used as ingredients of meat food products or poultry food products need to be declared on the label of the finished product	9 CFR 381.7(d)(2).
094–A	Sulfiting Agents, March 13, 1986	Whether sulfiting agents present in processed fruits or vegetables used as ingredients of meat food products or poultry food products need to be declared on the label of the finished product	9 CFR 318.7(d)(2). (Replaces Policy Memo 094).
095	Colored Casings-Labeling of Meat and Poultry Products, February 27, 1986.	What are the labeling requirements for meat and poultry products in colored casings that do not transfer color to the products?	9 CFR 301.2(ll)(4), 9 CFR 381.1(b)(30)(iv), and 9 CFR 317.2(ll).

The SLD policies specified in these memoranda will be uniformly applied to all relevant labeling applications unless modified by future memoranda or more formal Agency action. Applicants retain all rights of appeal regarding decisions bases upon these memoranda.

Done at Washington, DC, on May 2, 1986.

Margaret O'K. Glavin,
Director, Standards and Labeling Division, Meat and Poultry Inspection Technical Services, Food Safety and Inspection Service.

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party as defined in section 771(9) of the Tariff Act of 1930 may request, in accordance with § 553.53a of 335.10 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity to Request a Review

Not later than May 31, 1986, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in May, for the following periods:

	Period
Antidumping Duty Proceeding	
Portland cement from the Dominican Republic	05/01/85–04/30/86
Circular pipes & tubes from Taiwan	05/01/85–04/30/86
Portable electric typewriters from Japan	05/01/85–04/30/86
Impression fabric from Japan	05/01/85–04/30/86
Countervailing Duty Proceeding	
Bricks from Mexico	01/01/85–12/31/85
Ceramic tile from Mexico	01/01/85–12/31/85
Viscose rayon staple fiber from Sweden	01/01/85–12/31/85

A request must conform to the Department's interim final rule published in the **Federal Register** (50 FR 32556) on August 13, 1985. Seven copies of the request should be submitted to the Deputy Assistant Secretary for Import Administration, International Trade Administration, Room B–099, U.S. Department of Commerce, Washington, DC 20230.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review," for requests received by May 31, 1986.

If the Department does not receive by May 31, 1986 a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute but is published as a service to the international trading community.

Dated: April 30, 1986.

Gilbert B. Kaplan,
Deputy Assistant Secretary, Import Administration.

Bars and Shapes From Mexico; Final Results of Changed Circumstances Administrative Review and Revocation of Countervailing Duty Orders

AGENCY: International Trade Administration, Import Administration Commerce.

ACTION: Notice of Final Results of Changed Circumstances Administrative Review and Revocation of Countervailing Duty Orders.

SUMMARY: On February 21, 1986, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty orders on bars and shapes from Mexico and announced its tentative determination to revoke the order. The review covers the period from October 1, 1984.

We gave interested parties an opportunity to comment. We received no comments. We determine that domestic interested parties are no longer interested in continuation of the orders. Therefore, we will revoke the orders in accordance with the petitioner's notification, the revocation will apply to all bars and shapes entered, or withdrawn from warehouse, for consumption on or after October 1, 1984.

EFFECTIVE DATE: October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Richard Carreau or Stephen Nyschot, Office of Compliance, International Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On February 21, 1986, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 6292) the preliminary results of its changed circumstances administrative review of the countervailing duty orders on bars and shapes from Mexico (49 FR 32887, August 17, 1984). The Department has now completed that administrative review, in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of Mexican certain deformed concrete reinforcing bars, hot-rolling carbon steel bars, and hot-rolled carbon steel bar-size shapes. For a further description of these products, see Appendix A of this notice. The review covers the period from October 1, 1984.

Final Results of Review and Revocation

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke. We received no comments.

As a result of our review, we determine that domestic interested parties are no longer interested in continuation of the countervailing duty orders on bars and shapes from Mexico and that the orders should be revoked on this basis.

Therefore, we are revoking the orders on bars and shapes from Mexico effective October 1, 1984. We will instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn for warehouse, for consumption on or after October 1, 1984 without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to those entries.

This notice does not cover unliquidated entries of bars and shapes from Mexico which were entered, or withdrawn from warehouse, for consumption prior to October 1, 1984. The Department will cover any entries not covered in a prior administrative review and entered, or withdrawn from warehouse, for consumption before October 1, 1984 in a separate review, if one is requested.

This administrative review, revocation, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675 (b), (c)) and §§ 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42).

Dated: April 30, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

Appendix A—Product Description

1. The term "certain deformed concrete reinforcing bars" covers hot-rolled steel bars, of solid cross-section, having deformations of various patterns on their surfaces, as currently provided for in items 606.7900 and 606.8100 of the Tariff Schedules of the United States Annotated (TSUSA).

2. The term "hot-rolled carbon steel bars" covers hot-rolled carbon steel products of solid section not conforming completely to the respective specifications given in the headnotes to Schedule G, Part 2, Subpart B of the TSUSA for blooms, billets, slabs, sheet pads, wire rods, plates, sheets, strip, wire, rails, joint bars or tie plates which have cross-sections in the shape of circles, segments of circles, ovals, triangles, rectangles, hexagons or octagons, as currently provided for in items 606.8310, 606.8330, 606.8350, and 606.8600 of the TSUSA. This description includes flat hot-rolled carbon steel products in coils or cut to length with a width of 8 inches or less and a thickness of 0.1875 inch or more.

3. The term "hot-rolled carbon steel bar-size shapes" covers hot-rolled carbon steel angles, shapes and sections, not drilled, not punched and not otherwise advanced, and not conforming completely to the specifications given in the headnotes to Schedule G, Part 2, Subpart B of the TSUSA for blooms, billets, slabs, sheet bars, bars, wire rods, plates, sheets, strip, wire, rails, joint bars, tie plates or any tubular products set forth in the TSUSA having a maximum cross-sectional dimension of less than 3 inches, as currently provided for it items 609.8050, 609.8070, and 609.8090. This definition includes carbon steel angles, channels, special sections and other assorted carbon steel shapes with a maximum cross-sectional dimension of less than 3 inches.

Carbon Steel Products From Austria; Final Results of Changed Circumstances; Administrative Review and Revovation of Countervailing Duty Order

AGENCY: International Trade Administration, Import Administration Commerce.

ACTION: Notice of final results of changed circumstances; administrative review and revocation of countervailing duty order.

SUMMARY: On March 14, 1986, the Department of Commerce published the preliminary results of its administrative review of the countervailing duty order on carbon steel products from Austria and announced its tentative determination to revoke the order. The review covers the period from March 20, 1985.

We gave interested parties an opportunity to comment. We received no comments. We determine that domestic interested parties are no longer interested in continuation of the order. Therefore, we will revoke the order. In accordance with the petitioner's and the domestic interested parties; notifications, the revocation will apply to all carbon steel products entered, or withdrawn from warehouse, for consumption on or after March 20, 1985.

EFFECTIVE DATE: March 20, 1985.

FOR FURTHER INFORMATION CONTACT: Cynthia Gozigian or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On March 14, 1986, the Department of Commerce ("the Department") published in the **Federal Register** (51 FR 8866) the preliminary results of its changed circumstances administrative review of the countervailing duty order on carbon steel products from Austria (50 FR 41546, October 11, 1985). The Department has now completed that administrative review, in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of Austrian cold-rolled carbon steel flat-rolled products. For a further description of these products, see Appendix A of this notice. The review covers the period from March 20, 1985.

Final Results of Review and Revocation

We gave interested parties an opportunity to comment on the preliminary results and tentative determination to revoke. We received no comments.

As a result of our review, we determine that the domestic interested parties are no longer interested in continuation of the countervailing duty order on carbon steel products from Austria and that the order should be revoked on this basis.

Therefore, we are revoking the order on carbon steel products from Austria effective March 20, 1985. We will instruct the Customs Service to proceed with liquidation of all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after March 20, 1985 without regard to countervailing duties and to refund any estimated countervailing duites collected with respect to those entries.

This administrative review, revocation, and notice are in accordance with sections 751 (b) and (c) of the Tariff Act (19 U.S.C. 1675(b), (c)) and §§ 355.41 and 355.42 of the Commerce Regulations (19 CFR 355.41, 355.42).

Dated: April 30, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

Appendix A

The term "cold-rolled carbon steel flat-rolled products" covers cold-rolled carbon steel products, whether or not corrugated or crimped; whether or not painted or varnished and whether or not pickled; not cut, nor pressed, and not stamped to non-rectangular shape; not coated or plated with metal and not clad; over 12 inches in width and 0.1875 inch or more in thickness, as currently provided for in item 607.8320 of the Tariff Schedules of the United States Annotated ("TSUSA"); or over 12 inches in width and under 0.1875 inch in thickness, whether or not in coils, as currently provided for in items 607.8350, 607.8365, or 607.8390 of the TSUSA.

Certain High Capacity Pagers From Japan; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration, Import Administration; Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On August 2, 1984, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on certain high capacity pagers from Japan. The review covered the three known manufacturers and/or exporters of this merchandise to the United States and the period November 1, 1982 through August 31, 1983.

We gave interested parties an opportunity to comment on the preliminary results. After review of the one comment we received, the final results of review are unchanged from those in the preliminary results for the two firms covered by these final results.

EFFECTIVE DATE: May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Laurie A. Lucksinger or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–1130/5255.

SUPPLEMENTARY INFORMATION:

Background

On August 2, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 30866) the preliminary results of its administrative review of the antidumping duty order on certain high capacity pagers from Japan (48 FR 37058, August 16, 1983). The preliminary results covered the three known manufacturers and/or exporters of certain Japanese high capacity pagers to the United States and the period November 1, 1982 through August 31, 1983. In accordance with 353.53a(a) of the Commerce Regulations the petitioner, Motorola Corporation, requested that we complete the administrative review for two firms. The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of the Review

Imports covered by the review are shipments of Japanese tone-only high capacity pagers. This merchandise is currently classifiable under items 685.1600 and 685.7030 of the Tariff Schedules of the United States Annotated.

The review covers two of the three known manufacturers and/or exporters, Matsushita Communication Industrial Co. and NEC Corporation, and the period November 1, 1982 through August 31, 1983.

Analysis of Comment Received

We invited interested parties to comment on the preliminary results. We received one written comment from the petitioner.

Comment: Motorola contends that NEC may be continuing to import large numbers of tone-only pagers, in unfinished condition, but identifying them as component parts rather than as "pagers". As a result, such pagers may be escaping from the coverage of the antidumping duty order. Motorola urges the Department to request certain items in the next review questionnaire: (1) Specific information on the nature of the tone-only pager components which NEC America imports; (2) the nature of the additional work NEC America performs on those components in the United States; and (3) the extent of the U.S. facilities involved in the operations. Motorola requests that the Department then verify the response.

Department's Position

We intend to act on Motorola's request in the next review.

Final Results of the Review

After review of the comment, the final results of our review are unchanged from those we presented in the preliminary results. We determine that the following margins exist for the period November 1, 1982 through August 31, 1983:

Manufacturer/exporter	Margin (percent)
Matsushita Communication Industrial Co.	109.00*
NEC Corporation	70.35

*No shipments during the period.

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

VOL 51 ISS 88 MY 7 1986 UMI

Further, the Department will instruct the Customs Service to collect a cash deposit of estimated antidumping duties for each firm based upon the above margins as provided in section 751(a)(1) of the Tariff Act. For any shipments from the remaining known manufacturer and exporter, not covered by this review, the cash deposit will continue to be at the rate for "other manufacturers" published in the antidumping duty order. For any shipments from a new exporter not covered by this or prior administrative reviews, whose first shipment of certain Japanese high capacity pagers occurred after August 31, 1983, and who is unrelated to any covered firm, a cash deposit of 89.97 percent shall be required. These deposit requirements are effective for all shipments of certain Japanese high capacity pagers entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53a of the Commerce Regulations (19 CFR 353.53a; 50 FR 32556, August 13, 1985).

Dated: April 30, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

Export Trade Certificate of Review

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Application.

SUMMARY: The Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, has received an application for an Export Trade Certificate of Review. This notice summarizes the conduct for which certification is sought and requests comments relevant to whether the certificate should be issued.

FOR FURTHER INFORMATION CONTACT: James V. Lacy, Director, Office of Export Trading Company Affairs, International Trade Administration, 202/377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (Pub. L. 97-290) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. A certificate of review protects its holder and the members identified in it from private treble damage actions and from civil and criminal liability under Federal and state antitrust laws for the export conduct specified in the certificate and carried out during its effective period in compliance with its terms and conditions. Section 302(b)(1) of the Act and 15 CFR 325.6(a) require the Secretary to publish a notice in the Federal Register identifying the applicant and summarizing its proposed export conduct.

Request for Public Comments

Interested parties may submit written comments relevant to the determination whether a certificate should be issued. An original and five (5) copies should be submitted not later than May 27, 1986 to: Office of Export Trading Company Affairs, International Trade Administration, Department of Commerce, Room 5618, Washington, DC 20230. Information submitted by any person is exempt from disclosure under the Freedom of Information Act (5 U.S.C. 552). Comments should refer to this application as "Export Trade Certificate of Review, application number 86-00003."

Applicant: International Shippers Association, 821 Second Avenue, Suite 1400, Seattle, Washington 98104.

Application #: 86-00003.

Date Deemed Submitted: April 22, 1986.

Members (in addition to applicant): Alaska Canada Fisheries, Inc., Renton, WA; Booth Fisheries Corporation, Seattle, WA, and its controlling entity, Sara Lee Corporation, Park Ridge, IL; George S. Bush Export, Inc., Seattle, WA, and its parent company, George S. Bush & Company, Seattle, WA; Gwin, White & Prince, Inc., Wenatchee, WA; Interocean Seafoods Co., Seattle WA; Merco Intertrade, Inc., Seattle, WA; National Food Corporation, Walnut Creek, CA; Northern Products Corp., Seattle, WA; Pacific Salmon Company, Seattle WA; Pelican Seafoods, Inc., Seattle, WA; E.C. Phillips & Son, Inc., Ketchikan, AK; Rushton & Co., Oakland, CA; Seafood Producers Cooperative, Bellingham, WA; Seafood Sales, Seattle, WA; Sitka Sound Seafoods, Inc., Seattle, WA.

Summary of the Application:

International Shippers Association ("ISA") seeks certification for the following export-related activities:

A. Export Trade and Export Markets

ISA intends to negotiate, procure, and administer Transportation Services for its Members to export finfish, shellfish, hatchery products, agricultural produce, and processed food products worldwide. Transportation Services include inland freight transportation for export shipments to a U.S. export terminal, port, or gateway; overseas freight transportation; wharfage and handling; stevedoring; storage and warehousing; insurance; forwarder services; trade documentation and services; leasing of transportation equipment and facilities; and customs clearance.

B. Export Trade Activities and Methods of Operation

ISA intends to procure and administer Transportation Services on behalf of its Members, including the negotiation of advantageous freight contracts with individual carriers, and conferences of carriers. These Export Trade Activities will be conducted for shipper Members by George S. Bush Export, Inc., an independent administrative organization. ISA Members may, independently of ISA, negotiate for and secure Transportation Services.

Membership in ISA is subject to a majority vote of the Board of Directors, and to the credit-worthiness and ability of the potential member to pay a pro-rata share of assessments to cover costs and expenses of ISA. Any Member of ISA may be removed by a majority vote, with prior notice of the vote given to the Member. Removal shall be for due cause including, but not limited to, violation of ISA Bylaws and loss of credit-worthiness. Any member may withdraw or resign from ISA, subject to obligations to pay previous assessments and to pay for services arranged by or through ISA.

Dated: May 1, 1986.

George Muller,

Deputy Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

[C-580-602 and C-583-604]

Extension of the Deadline Dates for the Final Countervailing Duty Determinations and Rescheduling of the Public Hearings; Certain Stainless Steel Cooking Ware From Korea and Taiwan

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: Based upon the request of petitioner, the Fair Trade Committee of the Cookware Manufacturers Association, we are extending the deadline dates for the final determinations in the countervailing duty investigations of certain stainless steel cooking ware from Korea and Taiwan to correspond to the dates of the final determinations in the antidumping investigations of the same product pursuant to section 705(a)(1) of the Tariff Act of 1930, as amended by section 606 of the Trade and Tariff Act of 1984 (Pub. L. 98-573). In addition, we are rescheduling the public hearings.

EFFECTIVE DATE: May 7, 1986.

FOR FURTHER INFORMATION CONTACT: Gary Taverman or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0161 or 377-2438.

SUPPLEMENTARY INFORMATION:

Case Histories

On January 21, 1986, we received antidumping and countervailing duty petitions filed by the Fair Trade Committee of the Cookware Manufacturers Association on certain stainless steel cooking ware from Korea and Taiwan.

In compliance with the filing requirements of § 353.36 of our regulations (19 CFR 353.36), the antidumping petitions alleged that imports of certain stainless steel cooking ware from Korea and Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petitions contained sufficient grounds on which to initiate antidumping duty investigations, and on February 11, 1986, we initiated such investigations (51 FR 6018 and 51 FR 6019). The preliminary determinations in these antidumping investigations will be made on or before June 30, 1986.

In compliance with the filing requirements of §355.26 of our regulations (19 CFR 355.26), the countervailing duty petitions alleged that manufacturers, producers, or exporters in Korea and Taiwan of certain stainless steel cooking ware directly or indirectly receive benefits which constitute subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petitions contained sufficient grounds on which to initiate countervailing duty investigations, and on February 11, 1986, we initiated such investigations (51 FR 6019 and 51 FR 6020). On April 16, 1986, we issued preliminary negative determinations in the countervailing duty investigations on Korea (51 FR 15520) and on Taiwan (51 FR 15523).

On April 23, 1986, petitioner filed a request for extension of the deadline dates for the final determinations in the countervailing duty investigations to correspond with the dates of the final determinations in the antidumping investigations.

Section 705(a)(1) of the Tariff Act of 1930, as amended by section 606 of the Trade and Tariff Act of 1984, provides that when a countervailing duty investigation is "initiated simultaneously with an (antidumping) investigation . . . which involves imports of the same class or kind of merchandise from the same or other countries, the administering authority, if requested by the petitioner, shall extend the date of the final determination (in the countervailing duty investigation) to the date of the final determination" in the antidumping investigation (19 U.S.C. 1671(a)(1). Pursuant to this provision, we are granting an extension of the deadline dates for the final determinations in the countervailing duty investigations of certain stainless steel cooking ware from Korea and Taiwan to September 15, 1986, the current deadline for the final determinations in the antidumping investigations.

In addition, due to the extension of the final determinations in the countervailing duty investigations, we are rescheduling the dates of the public hearings, originally set for May 29, 1986 (Taiwan), and June 4, 1986 (Korea). These hearings, which were requested by the petitioner will now be held at 10:00 a.m. on June 13, 1986 (Korea), and August 6, 1986 (Taiwan), at the U.S. Department of Commerce, Room 1413, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearings must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, at the above address within 10 days of the publication of this notice.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, at least 10 copies of pre-hearing briefs must be submitted to the Deputy Assistant Secretary by June 6, 1986 (Korea), and July 30, 1986 (Taiwan). Oral presentations will be limited to issues raised in the briefs.

In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received within 10 days after the hearing transcript is available.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 30, 1986.

[A-429-101]

Unrefined Montan Wax From the German Democratic Republic; Final Results of Antidumping Duty Administrative Review and Revocation of Antidumping Duty Order

AGENCY: International Trade Administration, Import Administration Commerce.

ACTION: Notice of Final Results of Antidumping Duty Administrative Review and Revocation of Antidumping Duty Order.

SUMMARY: On February 21, 1986, the Department of Commerce published the preliminary results of its administrative review and intent to revoke the antidumping duty order on unrefined montan wax from the German Democratic Republic. The review covers the one known exporter of this merchandise to the United States and the period September 1, 1983 through April 30, 1984.

We gave interested parties an opportunity to submit comments on the preliminary results and intent to revoke. We received no comments. Based on our analysis, the final results of our review are the same as the preliminary results, and we revoke the antidumping duty order on unrefined montan wax from the German Democratic Republic.

FOR FURTHER INFORMATION CONTACT: Laurie A. Lucksinger or Robert J. Marenick, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-1130/5255.

SUPPLEMENTARY INFORMATION:

Background

On February 21, 1986, the Department of Commerce ("the Department") published in the Federal Register (51 FR 6292) the preliminary results of its administrative review and intent to revoke the antidumping duty order on unrefined montan wax from the German Democratic Republic ("GDR") (46 FR 45177, September 10, 1981). The Department has now completed that administrative review.

VOL 51 ISS 88 MY 7 1986 UMI

Scope of the Review

Imports covered by the review are shipments of unrefined montan wax, which is a non-oxidized mineral extracted from lignite, not advanced beyond extraction or cleaning by solvent. This product is primarily used as a flow agent in one-time carbon ink formulas. It is also used for producing polishes, mold release agents and for casting, and is currently classifiable under item 494.2000 of the Tariff Schedules of the United States Annotated.

The review covers the one known exporter of unrefined montan wax from the GDR to the United States, VEB Braunkohlenwerk "Gustav Sobottka," and the period September 1, 1983 through April 30, 1984, the date of our tentative determination to revoke the antidumping duty order.

Final Results of the Review and Revocation

We invited interested parties to comment on the preliminary results and intent to revoke. We received no comments or requests for a hearing. Based on our analysis, the final results of our review are the same as those we presented in the preliminary results.

For the reasons set forth in the preliminary results we are satisfied that there is no likelihood of resumption of sales at less than fair value. Accordingly, we revoke the antidumping duty order on unrefined montan wax from the GDR. This revocation applies to all unliquidated entries of unrefined montan wax from the GDR entered, or withdrawn from warehouse, for consumption on or after April 30, 1984.

The administrative review, revocation, and notice are in accordance with sections 751 (a)(1) and (c) of the Tariff Act of 1930 (19 U.S.C. 1675 (a)(1), (c)) and §§ 353.53a and 353.54 of the Commerce Regulations (19 CFR 353.53a; 50 FR 32556, August 13, 1985; 353.54).

Dated: April 30, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Deep Seabed Mining—Proposed Revision of Exploration License

AGENCY: National Oceanic and Atmospheric Administration.

ACTION: Notice of receipt of application by Ocean Management, Inc., to revise exploration plan incorporated into exploration license issued August 29, 1984 and request for comments.

SUMMARY: On November 19, 1985, Ocean Management, Inc. (OMI), c/o INCO Limited, One New York Plaza, New York, New York 10004 submitted to the National Oceanic and Atmospheric Administration (NOAA) a proposal to change the exploration plan incorporated into the deep seabed mining exploration license issued to OMI by NOAA on August 29, 1984, pursuant to the Deep Seabed Hard Mineral Resources Act (DSHMRA) and 15 CFR Part 970. The Ocean Minerals and Energy Division of the Office of Ocean and Coastal Resources Management conducted a preliminary review of the OMI request to determine the appropriate procedures for processing this license modification. In a letter of January 9, 1986, OMI was informed of NOAA's preliminary determination to process the change as a revision to the license in accordance with § 970.513 of the NOAA regulations. Supplemental information was also requested and was submitted on March 27 and April 3. Following review of the supplemented application, NOAA has determined that this proposal constitutes an application for revision of the license under 15 CFR 970.513 and is commencing appropriate public review procedures prescribed in 15 CFR 970.514(b).

In essence, OMI proposes two principal changes in the exploration plan. First a revised strategy would adopt a two-stage approach wherein "prime areas" identified using available data, are selected and intensively explored. Subsequently exploration of non-prime areas would be undertaken to establish a resource base adequate for a commercial minesite and upon which an application for a commercial recovery permit could be based. The goal of the revised exploration program would be to complete, within the license term, such exploration as is needed to define a logical mining unit, as required by the DSHMRA. OMI proposes to postpone to the subsequent commercial permit phase, those aspects of detailed exploration of the non-prime areas which are not essential to OMI's determination of the feasibility of commercial mining.

Secondly, OMI proposes to reduce its level of projected expenditures during the license term from $21 million (1981 dollars) to $4.6–$6.6 million (1981 dollars). The revised estimates of projected expenditures take into account the resource knowledge possessed by OMI acquired during many years of exploration prior to the DSHMRA, augmented by information obtained as a result of the conflict-resolution agreement between international consortia, as well as the use of state of the art technology already developed. According to OMI the increased efficiency of this technology, as well as the acquired data, will reduce the amount of at-sea exploration needed. Therefore, OMI is proposing to reduce projected ship time from 310 days to a maximum of 180 days. No at-sea testing of new survey systems is proposed. No change is proposed in the objective of filing for a deep seabed mining commercial recovery permit within the 10 year license period.

Subject to 15 CFR 970.902, which excludes confidential information from public disclosure, interested persons will be permitted to examine the application for revision and to provide comments by July 7, 1986.

These documents may be examined in Suite 704, 1825 Connecticut Avenue NW., Washington, DC

FOR FURTHER INFORMATION CONTACT: Ms. Nancy Carter or John W. Padan, Ocean Minerals and Energy Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, 2001 Wisconsin Avenue NW., Washington, DC 20235.

Dated: May 1, 1986.

James P. Blizzard,

Acting Director, Office of Ocean and Coastal Resource Management.

BILLING CODE 3510-12-M

Issuance of General Permit

A general permit was issued to the China National Marine Fisheries Corporation, Anchorage, Alaska, to take marine mammals incidental to commercial fishing operations under Category 1: Towed or Dragged Gear, pursuant to 50 CFR 216.24.

The general permit allows the taking of not more than 24 cetaceans and 70 pinnipeds annually by certificate holders operating under this permit within the U.S. fishery conservation zone of the North Pacific Ocean. The permit is valid until December 31, 1986.

This general permit is available for public review in the Office of the Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC.

Dated: May 2, 1986.

Samuel W. McKeen,

Chief, Management & Budget Staff, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Software: Meeting

ACTION: Notice of Advisory Committee Meeting.

SUMMARY: The Defense Science Board Task Force on Software will meet in open session on 27 May 1986 at the Software Engineering Institute, Pittsburgh, Pa.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense. The May meeting will consist of discussion by the Task Force members on various software issues.

Persons interested in attending should contact Major Susan Swift, Task Force Executive Secretary, approximately one week prior to the scheduled meeting times. Space is limited and will be awarded on a first come first served basis. Telephone (202) 695-7181.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

May 2, 1986.

BILLING CODE 3810-01-M

Per Diem, Travel and Transportation Allowance Committee

AGENCY: Per Diem, Travel and Transportation Allowance Committee.

ACTION: Publication of Changes in Per Diem Rates.

SUMMARY: The Per Diem, Travel and Transportation Allowance Committee is publishing Civilian Personnel Per Diem Bulletin Number 132. This bulletin lists changes in per diem rates prescribed for U.S. Government employees for official travel in Alaska, Hawaii, Puerto Rico and possessions of the United States. Bulletin Number 132 is being published in the Federal Register to assure that travelers are paid per diem at the most current rates.

EFFECTIVE DATE: May 1, 1986.

SUPPLEMENTARY INFORMATION: This document gives notice of changes in per diem rates prescribed by the Per Diem, Travel and Transportation Allowance Committee for non-foreign areas outside the continental United States. Distribution of Civilian Per Diem Bulletins by mail was discontinued effective June 1, 1979. Per Diem Bulletins published periodically in the Federal Register now constitute the only notification of change in per diem rates to agencies and establishments outside the Department of Defense.

The text of the Bulletin follows:

CIVILIAN PERSONNEL PER DIEM BULLETIN NUMBER 132

TO THE HEADS OF THE EXECUTIVE DEPARTMENTS AND ESTABLISHMENTS

SUBJECT: TABLE OF MAXIMUM PER DIEM RATES IN LIEU OF SUBSISTENCE FOR UNITED STATES GOVERNMENT CIVILIAN OFFICERS AND EMPLOYEES FOR OFFICIAL TRAVEL IN ALASKA, HAWAII, THE COMMONWEALTH OF PUERTO RICO AND POSSESSIONS OF THE UNITED STATES

1. This bulletin is issued in accordance with Memorandum for Heads of Executive Departments and Establishments from the Deputy Secretary of Defense dated 17 August 1966, subject: Executive Order 11294, August 4, 1966, "Delegating Certain Authority of the President to Establish Maximum Per Diem Rates for Government Civilian Personnel in Travel Status; in which this Committee is directed to exercise the authority of the President (5 U.S.C. 5702 (a)(2)) delegated to the Secretary of Defense for Alaska, Hawaii, the Commonwealth of Puerto Rico, the Canal Zone, and possessions of the United States. When appropriate, and in accordance with regulations issued by competent authority, lesser rates may be prescribed.

2. The maximum per diem rates shown in the following table are continued from the preceding Bulletin Number 131 except for the cases identified by asterisks which rates are effective on the date of this Bulletin.

3. Each Department or establishment subject to these rates shall take appropriate action to disseminate the contents of this Bulletin to the appropriate headquarters and field agencies affected thereby.

4. The maximum per diem rates referred to in this Bulletin are:

[1] Commercial facilities are not available. The per diem rate covers charges for meals in available facilities plus an additional allowance for incidental expenses and will be increased by the amount paid for Government quarters by the traveler. For Adak, Alaska—when Government quarters are not utilized, and quarters are obtained at the Simone

Construction, Inc. camp, a daily travel per diem allowance of $71.50 is prescribed to cover the cost of lodging, meals and incidental expenses at the facility.

² Commercial facilities are not available. Only Government-owned and contractor operated quarters and mess are available at this locality. This per diem rate is the amount necessary to defray the cost of lodging, meals and incidental expenses.

³ On any day when US Government or contractor quarters and US Government or contractor messing facilities are used, a per diem rate of $13 is prescribed to cover meals and incidental expenses at Shemya AFB and the following Air Force Stations: Cape Lisburne, Cape Newenham, Cape Romanzof, Clear, Cold Bay, Fort Yukon, Galena, Indian Mountain, King Salmon, Kotzebue, Murphy Dome, Sparrevohn, Tatalina and Tin City. This rate will be increased by the amount paid for US Government or contractor quarters and by $4 for each meal procured at a commercial facility. The rates of per diem prescribed herein apply from 0001 on the day after arrival through 2400 on the day prior to the day of departure.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Deputy Under Secretary for Management invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATES: Interested persons are invited to submit comments on or before June 6,1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title: (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: May 2, 1986.

George P. Sotos,

Director, Information Resources Management Service.

Secretary's Discretionary Fund; Critical Foreign Languages Program

AGENCY: Department Of Education.

ACTION: Application notice for new awards under the Secretary's Discretionary Program for Mathematics, Science, Computer Learning, and Critical Foreign Languages for fiscal year 1986.

Programmatic And Fiscal Information

The Secretary of Education, under the Secretary's Discretionary Program for Mathematics, Science, Computer Learning, and Critical Foreign Language (Critical Foreign Language Program), announces a grant competition for fiscal year 1986 and invites applications from institutions of higher education for projects designed to improve and expand instruction in critical foreign languages.

The Secretary invites a broad range of approaches designed to improve and expand foreign language instruction. For fiscal year 1986, the Secretary invites applications for projects in the following foreign languages: Arabic, Cambodian, Chinese, French, German, Haitian Creole, Italian, Korean, Japanese, Polish, Portuguese, Russian, Spanish, and Vietnamese. However, these language categories (chosen from the final List of Critical Foreign Languages published in the Federal Register on August 2, 1985) and the types of projects and activities suggested below are invitational only and will receive no competitive advantage.

While only public and private institutions of higher education are eligible to apply for assistance under this program, the Secretary strongly believes that the greatest and most urgent need to improve and expand foreign language instruction is at the elementary and secondary school levels. Therefore, the Secretary especially encourages institutions of higher education to propose activities that will benefit directly both students and teachers at the elementary and secondary school levels.

Further, the Secretary is interested in programs that demonstrate the capacity not only to serve an individual school, institution, or school district, but that can be adapted to statewide and regional interests and needs.

The Secretary is particularly interested in projects that will:

- Provide opportunities to upgrade and strengthen the knowledge and proficiency of foreign language teachers currently in the classroom;
- Provide opportunities to recruit and train individuals who are proficient in a foreign language, but who lack pedagogical preparation in that language;
- Increase the opportunities for foreign language instruction at the elementary school level;
- Provide opportunities to extend instruction in foreign languages and culture to historically underserved and underrepresented populations;
- Strengthen existing foreign language programs to improve and increase language proficiency; or
- Develop new instructional approaches or broaden existing approaches to increase access to and effectiveness of foreign language study and instruction.

Activities

The following examples are offered to illustrate the types of activities an institution could propose and that the Secretary is interested in supporting.

Project activities may include, but are not limited to:

- The establishment of collaborative efforts between institutions of higher education and State and local educational agencies to develop both short and long-term teacher training programs.

VOL 51 ISS 88 MY 7 1986 UMI

• The development of programs to recruit and prepare individuals for teaching who are proficient in a foreign language, but who lack pedagogical training, through such means as exchange programs or accelerated training programs.

• The development of intensive foreign language summer programs for exceptional secondary school students and teachers.

• The development of programs that provide outstanding foreign language teachers with research opportunities, sabbaticals, or advanced training in their second language.

• The review of textbooks and other foreign language instructional materials to identify specific weaknesses such as inadequate scholarship, poor writing, or lack of challenging material.

• The establishment of collaborative efforts between individual schools, State and local educational agencies, and institutions of higher education to develop new approaches to upgrading foreign language instructional methods and materials.

• The establishment of joint efforts between State and local educational agencies, communities, and institutions of higher education to develop innovative approaches to increase student interest in foreign language study.

• The development of guidelines or criteria to review and establish the curriculum and course contant in foreign languages.

• The establishment of collaborative efforts between local school districts and institutions of higher education to develop approaches for introducing foreign language instruction to the elementary school curriculum.

Approximately $1,600,000 is available in fiscal year 1986 for awards under the Critical Foreign Languages Program. The Secretary urges applicants to limit the amount of Federal assistance requested, since resources available under this competition are limited. The Secretary anticipates that no award will exceed $125,000.

Because of the limited available resources, the Secretary encourages applicants to propose projects that would use the funds awarded under this competition to supplement other sources of funding and that will have the potential for support from other sources upon completion of the grant period. These estimates of the approximate funds available and of the maximum amount of an award, do not bind the U.S. Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

Projects supported under this program will be for a period of up to 12 months.

Selection Criteria

The program regulations at § 755.30(b) authorize the Secretary to distribute an additional 15 points among the criteria described in the regulations at § 755.32 to bring the total to a maximum of 100 points. For the purposes of this competition, the Secretary will distribute the additional points as follows:

Improvement of expansion of instruction in critical foreign languages. Ten (10) additional points will be added for a possible total of 30 points.

Applicant's commitment and capacity. Five (5) additional points will be added for a possible total of 20 points.

Closing Date for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before July 1, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: CFDA No. 84.168F, 400 Maryland Avenue SW., Washington, DC. 20202.

Each late applicant will be notified that its application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building 3, 7th and D Streets SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC time) daily, except Saturdays, Sundays, and Federal holidays. Applications that are hand delivered will not be accepted by the Application Control Center after 4:30 p.m. on he closing date.

Applicable regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Secretary's Discretionary Program for Mathematics, Science, Computer Learning, and Critical Foreign Languages in 34 CFR Part 755.

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, and 78.

(c) The list of Critical Foreign Languages published on August 2, 1985 (50 FR 31412).

Application Forms

Application forms and program information packages are expected to be available by May 16, 1986. They may be obtained by writing to: Secretary's Discretionary Fund, (Attn: Critical Foreign Languages Program), U.S. Department of Education, 1200 19th Street NW., Room 722, Washington, DC 20208.

Further Information

For further information contact Patricia L. Alexander, Secretary's Discretionary Fund, U.S. Department of Education, 1200 19th Street NW., Room 722, Washington, DC 20208. Telephone: (202) 254–8227.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 86–28–NG]

NHP Energy, Inc.; Application To Import Natural Gas From Canada

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Application for Blanket Authorization to Import Natural Gas from Canada for Short-Term and Spot Sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on April 18, 1986, of an application filed by NHP Energy, Inc. (NHP), a Minnesota corporation, for a blanket authorization to import from Canada up to 50 MMcf of natural gas per day and a maximum of 3 Bcf over a two-year period beginning on the date of first delivery. NHP anticipates that it will contract with a number of Canadian suppliers and marketers for available supplies. Under the proposal, NHP will import natural gas for its own account as well as for the accounts of Canadian suppliers and U.S. purchasers. NHP proposes to file quarterly reports to the ERA showing the specific terms of each import and sale, including the price and volumes.

NHP also requests expedited treatment of its application given the fact that the authorization requested is identical to existing import authorizations and the granting of its request will serve the public interest by providing competitively priced imported gas supplies to U.S. markets.

The application was filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204–111. Protests, motions to intervene, or notices of intervention, and written comments are invited.

DATE: Protests, motions to intervene, or notices of intervention, as applicable, and written comments are to be filed no later than June 6, 1986.

FOR FURTHER INFORMATION CONTACT:

John Glynn, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–076, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9482

Diane Stubbs, Office of General Counsel, Natural Gas and Mineral Leasing, U.S. Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–6667

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive.

Parties opposing the arrangement bear the burden of overcoming this assertion.

In making its request for expedited treatment of its application to import natural gas from Canada, NHP states that prompt ERA action will serve the public interest by allowing competitively priced gas supplies to be imported into U.S. markets for the benefit of U.S. consumers. NHP further states that its requested authorization duplicates existing authorizations granted by the ERA; consequently, its application should be reviewed on an expedited basis, including the dispensing of any procedure providing for additional comments. The ERA has determined that the reasons cited by NHP in requesting expedited treatment of its application do not justify limiting the opportunity for parties to request additional procedures.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA–076, RG–23, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252–9478. They must be filed no later than 4:30 p.m. June 6, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trail-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of NHP's application is available for inspection and copying in the Natural Gas Divison Docket Room, GA–076, (202) 252–9478, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, April 29, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 86–14–NG]

Yankee International Co.; Order Approving an Amendment to an Authorization To Export Natural Gas to Canada on a Short-Term Basis

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Order Approving an Amendment to an Authorization To Export Natural Gas to Canada on a Short-Term Basis.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order approving an amendment to an existing authorization of Yankee International Company (Yankee) to export natural gas to Canada on a short-term basis. The order issued in ERA Docket No. 86–14–NG extendes the term of Yankee's existing export authorization from April 30, 1986, to February 4, 1988, and increases the maximum export levels to 65 MMcf per day and up to 10 Bcf for the duration of the term.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA–076, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252–9478. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays.

Issued in Washington, DC, April 30, 1986.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. RP83-34-006]

Great Lakes Gas Transmission Co.; Tariff Filing To Implement Court Mandate

April 30, 1986.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes") on April 22, 1986 tendered for filing Ninth Revised Sheet No. 151, Original Volume 2 of Great Lakes' FERC Gas Tariff to be effective January 1, 1984.

Great Lakes states that on December 16, 1983, it filed certain tariff sheets with the Commission in compliance with a "Stipulation and Agreement in Settlement of Rate Proceeding" in Docket No. RP83-34 and in compliance with Commission Opinions 179 and 179-A. Such tariff sheets implemented on a prospective basis, effective January 1, 1984, rates based upon the new ratemaking methodology established by Opinions 179 and 179-A. However, on September 4, 1984 the Commission reversed its acceptance of and rejected Ninth Revised Sheet No. 151, Original Volume No. 2 relating to Great Lakes' T-6 Rate Schedule. On January 29, 1986, the United States Court of Appeals for the District of Columbia Circuit issued its judgment in *Great Lakes Gas Transmission Company* v. *FERC*, No. 85-1035, which reversed the Commission's September 4, 1984 order and remanded the case to the Commission for proceedings not inconsistent with the Court's opinion. On March 20, 1986, the Court forwarded to the General Counsel of the Commission a certified copy of the Court Judgment with Memorandum in lieu of formal mandate.

By its filing Great Lakes seeks to reinstate Ninth Revised Sheet No. 151, Original Volume 2 of its FERC Gas Tariff effective January 1, 1984 consistent with the Court Judgment.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC, 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 8, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. EL86-26-001]

San Diego Gas and Electric Co. v. Alamito Co.; Amended Complaint and Motion for Summary Judgment of San Diego Gas and Electric Co.

May 1, 1986.

Take notice that on April 23, 1986, San Diego Gas and Electric Company (SDG&E) submitted for filing an amended complaint and motion for summary judgment pursuant to sections 206 and 306 of the Federal Power Act ("Act"), 16 U.S.C. 824e and 825e, and Rules 206, 212, 215, and 217 of the rules of practice and procedure of the Federal Energy Regulatory Commission ("Commission"), 18 CFR 385.206, 385.212, 385.217. This amended complaint and motion are submitted as the result of the answer filed by Alamito Company ("Alamito") to the original complaint and motion for summary judgment filed herein on February 28, 1986. Alamito's answer consists of a claim that SDG&E's original complaint and motion for summary judgment are moot.

According to the Commission's rules of practice and procedure, the Commission would be authorized to take Alamito's failure to respond on the merits as a concession of each material point raised in SDG&E's motion, and accordingly grant summary judgment. However, because Alamito has raised a claim of mootness, which claim the Commission may credit, SDG&E amends its complaint to encompass specifically the Osceola Energy, Inc. ("Osceola") merger proposal that may now take place, or any other like transaction, that is based upon the substitution of debt for equity as the capital used to finance rate base assets used to make sales to SDG&E.

SDG&E's complaint is not concerned with the identity of the owners of Alamito, but with the financing of the assets used to make sales to SDG&E. Under the proposed management leveraged buyout, either as originally proposed or as later amended during the bidding for Alamito, and under the apparent winning proposal reflected in an Agreement of Merger between Osceola, Alamito Holdings, Inc. ("Subco"), and Alamito, debt will be substituted for equity and Alamito's assets will be financed with substantially more leverage, and therefore at lower cost, than is reflected in the rates that SDG&E is required to pay under Alamito Rate Schedule No. 1. Accordingly, the Commission should grant immediate rate relief upon the consummation of the merger.

Any person desiring to be heard or to protest the application should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 2, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-10158 Filed 5-6-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL86-34-000]

San Diego Gas and Electric Co. v. Alamito Co., Osceola Energy, Inc., and Alamito Holdings, Inc.; Complaint of San Diego Gas and Electric Co.

May 1, 1986.

Take notice that on April 23, 1986, San Diego Gas and Electric Company tendered for filing a complaint pursuant to sections 204, 306, 309, and 314 of the Federal Power Act ("FPA"), 16 U.S.C. 824c, 824e, 825h, and 825m, and Rules 206 of the Commission's rules of practice and procedure. The complaint relates to an existing agreement to merger between Osceola Energy, Inc. ("Osceola"), Alamito Holdings, Inc. ("Subco"), and Alamito Company ("Alamito"). The agreement of merger, to which SDG&E has no opposition, could result in an increase in capital costs and other expenses charged to SDG&E under Alamito Rate Schedule No. 1, unless the Commission grants the relief requested in the instant complaint, namely that any authority granted to Osceola pursuant to Section 204 of the FPA relating to its financing of the proposed merger be conditioned upon the collection of revenues from SDG&E subject to refund from and after closing of the merger agreement, pending a Commission decision on whether and how the increased leverage used to finance Alamito's assets should be reflected in Alamito's Rate Schedule No. 1, and whether other costs associated with this transaction may properly be charged to SDG&E under Alamito Rate Schedule No. 1.

Specifically, SDG&E respectfully requests that the Commission, if it approves the transaction, grant immediate and simultaneous rate relief, and authorize the transaction on condition that any collections by Alamito or Osceola after the consummation of the merger be subject to refund, with interest, as prescribed in the Commission's regulations pending hearings and decision to consider the cost recovery issues in this complaint.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's rules of practice and procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 2, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Issuance of Proposed Decision and Order; Office of Hearings and Appeals Week of April 14, Through April 18, 1986

During the week of April 14 through April 18, 1986, the proposed decision and order summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person receives actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this proposed decision and order are available in the Public Reference Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

George B. Breznay,

Director, Office of Hearings and Appeals.

April 28, 1986.

Warrior Asphalt Company of Alabama, Inc., Cities Service Co., Washington, D.C., Tulsa, OK; BYX-0197, HER-0052, Crude Oil

On April 15, 1981, the Warrior Asphalt Company of Alabama, Inc. (Warrior) submitted financial and operating data to the Office of Hearings and Appeals (OHA) for a review of the *Delta/Beacon* entitlements exception relief that the firm had received for the period April 1, 1980 through January 31, 1981. On March 14, 1983, the Cities Service Company (Cities) filed an Application for Modification in which it stated that Warrior's financial results for the firm's 1980 fiscal year should be adjusted to exclude an expense item which reflected the monies paid by Warrior to the DOE in settlement of various alleged violations. According to Cities, by including the settlement payment as an expense, Warrior had artificially increased its apparent need for *Delta/Beacon* entitlements relief by the same amount, and thus had transferred the cost of the settlement agreement to other entitlements program participants. On April 18, 1986, the OHA issued a Proposed Decision and Order (PDO) consolidating the two proceedings. With regard to Warrior's partial year-end review, the OHA determined (1) that the review period of Warrior's partial fiscal year-end review be limited to the period from April 1, 1980 through December 31, 1980, and (2) that Warrior received $102,394 of excessive entitlements relief during that period. In response to the Cities Service submission, the OHA determined that Cities claim was correct and that Warrior had improperly reduced its 1980 fiscal year profitability—and increased its apparent need for entitlements exception relief—by including as an expense item monies paid to the DOE in connection with a consent order. As Cities claimed, Warrior had improperly burdened other entitlements program participants with the cost of the settlement agreement and Warrior itself bore *no* cost. As a result, the DOE proposed that Warrior had an additional dispense obligation of $407,224 and thus a total final net dispense obligation of $599,618. The DOE noted, however, that in accordance with the current policy of the DOE, 50 Fed. Reg. 1919 (1985), Warrior's additional dispense obligation would not be effectuated.

Certain Chemicals Premanufacture Notices

Correction

In FR Doc. 86-8835, beginning on page 15681, in the issue of Friday, April 25, 1986, make the following corrections:

1. On page 15682, second column, under "P86-846", thirteenth line, "up to hrs" should read "up to 6 hrs."

2. On the same page, under "P86-848", first line, "Confidential" was misspelled and on the second line, "Pol" should read "Poly".

3. On page 15683, third column, under "P86-866", fifth line, "41000" should read "4,000".

4. On page 15684, second column, under "P86-872", sixth line, "5" should read "2".

BILLING CODE 1505-01-M

[OPP-30263A; FRL-3011-2]

ICI Americas, Inc.; Approval of a Pesticide Product Registration

AGENCY: Enviromental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces Agency approval of an application submitted by ICI Americas, Inc. to register the pesticide product Demon™ WP containing an active ingredient involving a changed use pattern pursuant to the provision of section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended. This notice also corrects an error in the notice of filing.

FOR FURTHER INFORMATION CONTACT:

By mail: George LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460

Office location and telephone number: Rm. 204, TS-767C, Environmental Protection Agency, 1921 Jefferson

Davis Hwy, Arlington, VA 22202, (703–557–2400)

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of February 12, 1986 (51 FR 5247), which announced that ICI Americas, Inc., Agricultural Chemicals Div., Wilmington, DE 19897, had submitted an application to register the peaticide product Demon™ WP containing the active ingredient cypermethrin (±)alpha-cyano-(3-phenoxyphenyl) methyl (±)-*cis, trans*-3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate at 40.0 percent; involving a changed use pattern of the product.

In the notice the Agency announced receipt of an application to conditionally register a pesticide product involving a changed use pattern. The notice should have stated that ICI Americas, Inc., had submitted an application to unconditionally register the pesticide product "Demon™ WP" containing the active ingredient cypermethrin. This notice corrects that error.

The application was approved on March 20, 1986 for Demon™ WP, for indoor non-agricultural use. The product was assigned EPA Registration No. 10182–71.

In accordance with section 3(c)(2) of FIFRA, a copy of the approved label and the list of data references used to support registration are available for public inspection in the office of the Product Manager. The data and other scientific information used to support registration, except for material specifically protected by section 10 of FIFRA, are available for public inspection in the Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 236, CM#2, Arlington, VA 22202 (703–557–3262). Request for data must be made in accordance with the provisions of the Freedom of Information Act and must be addressed to the Freedom of Information Office (A–101), 401 M St., SW., Washington, DC 20460.

Such requests should: (1) Identify the product name and registration number and (2) specify the data or information desired.

Authority: 7 U.S.C. 136.

Dated: April 21, 1986.

Susan H. Sherman,

Acting Director, Office of Pesticide Programs.

SUMMARY: This notice announces the withdrawal by Shell Oil Co., of pesticide tolerance petitions for residues of the insecticide cyano (3-phenoxyphenyl) methyl-4-chloro-alpha-(methylethyl) benzeneacetate in on certain commodities.

ADDRESS: By mail, submit comments identified by the document control number [PF–451] and the petition number, attention Product Manager (PM–15), at the following address:

Information Services Section (TS–757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Information Services Section (TS–757C), Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: George T. LaRocca, (PM–15), Registration Division (TS–767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460

Office location and telephone number: Rm. 204, CM#2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703–557–2400)

SUPPLEMENTARY INFORMATION: EPA issued notices cited below, which announced filing of petitions by the Shell Oil Co., 1025 Connecticut Ave., NW., Washington, DC 20036, proposing tolerances for residues of the insecticide cyano (3-phenoxyphenyl) methyl-4-chloro-alpha-(1-methylethyl) benzeneacetate in or on certain commodities as follows:

Petition ID	Pub. Date (FR citation)	CFR affected	Commodities	Parts per million
PP 4F3022	Feb. 23, 1984 (49 FR 6794)	40 CFR 180.379	Citrus fruits	2.0
FAP 4H5424	...do...	21 CFR Part 561	Dried citrus pulp	20.0
PP 2F2599	Dec. 5, 1984 (49 FR 47548)	40 CFR 180.379	Head lettuce	25.0

Shell Oil Co. has withdrawn these petitions without prejudice to future filing in accordance with 40 CFR 160.8.

Authority: 21 U.S.C. 346a and 348.

Dated: April 29, 1986.

James W. Akerman,

Acting Director, Registration Division, Office of Pesticide Programs.

BILLING CODE 6560–50–M

FEDERAL DEPOSIT INSURANCE CORPORATION

Privacy Act of 1974; New System of Records and Amendment to Existing System of Records

AGENCY: Federal Deposit Insurance Corporation ("FDIC").

ACTION: Notice of Proposed New System of Records and Amendment to Existing System of Records.

SUMMARY: The FDIC proposes to establish a new system of records under the Privacy Act of 1974 pertaining to an automated case management system. The FDIC also proposes to amend a routine use of information contained in the FDIC's system of records concerning consummated changes in bank control (30–60–0004).

DATE: Comments on the changes to the systems of records must be received on or before June 6, 1986.

ADDRESS: Comments may be addressed to Hoyle L. Robinson, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429, or hand delivered to Room 6108, 550 17th St. NW, Washington, DC between 9:00 a.m. and 5:00 p.m., Monday through Friday. Comments received may also be inspected during work days in Room 6108 between 9:00 a.m. and 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Gail K. Jensen, Attorney, Federal Deposit Insurance Corporation, 550 17th St., NW, Washington, DC 20429, (202) 898–3758.

SUPPLEMENTARY INFORMATION: Due to the expansion of the FDIC's liquidation activities in handling insured bank failures and the ensuing increased volume of litigation, a number of internal procedures are planned within the FDIC's Legal Division to manage the increased work load. Included in these changes is the need to establish a system of records under the Privacy Act of 1974 (5 U.S.C. 552a).

The proposed system of records pertains to an automated case management system developed within the Legal Division. The case management system will track legal fees generated by law firms and lawyers retained by the FDIC as well as the costs of in-house FDIC attorneys. The case management system will also provide the ability to track specific cases by the type of case, the issue in the case, and the status of the case.

There will be various means of access to the information contained in the automated case management system. The principal means of access will be the names listed in the headings to lawsuits. Information in the system, however, also will be accessed by the name of an in-house FDIC attorney assigned to the case. Similarly, the system will provide access by the name of outside counsel retained by the FDIC to handle a case. Access to records by the name of a sole practitioner and by name of an in-house FDIC attorney establishes a system of records for purposes of the Privacy Act. There would be records under the FDIC's control that are retrieved by reference to an individual's name.

Access to records by the names of parties to lawsuits would not establish a system of records for Privacy Act purposes. The names listed in the heading to a lawsuit would not be complete names. The records in the system would not be retrieved by reference to an individual's complete name. In the context of a data base that contains entries from some 20,000 lawsuits, access by a party's last name and not complete name does not satisfy the criterion that the records be retrieved by reference to an individual's name. Similarly, access to records by the name of a law firm retained by the FDIC does not establish a "system of records." Partnerships and corporations are excluded from the Privacy Act's coverage.

The FDIC also proposes to amend its existing system of records titled "Changes in Bank Control Ownership Records" (30–60–0004). The FDIC has proposed disclosing publicly notices of acquisition of control filed under the Change in Bank Control Act of 1978 (12 U.S.C. 1817(j)). As a result, the FDIC proposes an amendment that will expand a "routine use" of the records maintained in the system of records on changes in bank control.

The proposed systems of records and amendment are set forth below.

30–64–0019

SYSTEM NAME:

Legal Case Management System.

SYSTEM LOCATION:

Data base located at Office of the General Counsel, FDIC, 550 17th St., NW., Washington, DC 20429 with access from FDIC offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

FDIC staff attorneys, individuals practicing law as sole proprietors who are providing or have provided legal services to the FDIC, and certain individuals who have made inquiries for administrative and legal responses from the FDIC's Legal Division.

CATEGORIES OF RECORDS IN THE SYSTEM:

Consists of information as to certain individuals who have made inquiries for administrative and legal responses from the FDIC's Legal Division; the names of the lawsuits involving the FDIC; court/docket numbers; forum/venue; the subject matter of the lawsuit; status of the case; with respect to administrative actions, the name of the administrative law judge, address, and telephone number; with respect to litigation involving an FDIC-owned asset, asset numbers; bank or opposing counsel name, address, and telephone number; name of the bank involved; an open bank's insurance certificate number; claim amount of lawsuit; cumulative in-house expense, fees, and hours; cumulative outside expense and fees; various dates pertaining to litigation activity; estimated cost of litigation; litigation analysis; estimated time to completion of litigation; names of FDIC attorney and FDIC reviewing attorney; name of law firm or lawyer retained by the FDIC and identifying number.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Section 9 of the Federal Deposit Insurance Act (12 U.S.C. 1819).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

(1) In the event that information contained in this system indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records may be referred to the appropriate agency, whether Federal or State, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

(2) In the event of litigation, the appropriate records may be presented to the appropriate court, magistrate, or administrative tribunal as evidence, or to counsel for the presentation of evidence and/or in the course of discovery.

(3) Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.

(4) Disclosure may be made to the appropriate state banking authority and the appropriate Federal financial institution regulatory agency that has or has had a supervisory concern for the financial institution that is the subject of the complaint.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored on computer discs and tapes.

RETRIEVABILITY:

Indexed by FDIC staff attorney names and names of sole practitioners retained by FDIC.

SAFEGUARDS:

Access to the system is limited to authorized personnel. Entry into the computer is by password.

RETENTION AND DISPOSAL:

Indefinitely.

SYSTEM MANAGER AND ADDRESS:

Office of the General Counsel, FDIC, 550 17th St., NW., Washington, DC 20429.

VOL 51 ISS 88 MAY 7 1986 UMI

NOTIFICATION PROCEDURE:
Executive Secretary, FDIC, 550 17th St., NW., Washington, DC 20429.

RECORD ACCESS PROCEDURES:
Same as "Notification" above.

CONTESTING ACCESS PROCEDURES:
Same as "Notification" above.

RECORD SOURCE CATEGORIES:
Information is obtained from attorneys handling the cases.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:
None.

30-64-0004

In the Changes in Bank Control Ownership Records System (30-64-0004) subparagraph (1) of the paragraph entitled "Routine uses of records maintained in the system, including categories of uses and the purposes of such uses" is revised to read as follows:

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

(1) The name of the bank whose control is changing, the seller and purchaser, the number of shares involved, the number of outstanding shares, the date that a notice of acquisition of control (filed under the Change in Bank Control Act) has been accepted by the FDIC, and the date of acquistion will be released to the public upon request.

* * * * *

By order of the Board of Directors, April 30, 1986.

Hoyle L. Robinson,
Executive Secretary.

FEDERAL HOME LOAN BANK BOARD

[No. 86-457]

Agency Information Collection Activities Under OMB Review; Monthly Survey of Rates on Conventional 1-Family Nonfarm Mortgage Loans

Dated: May 1, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Board") has submitted for extension, without revision, an information collection request, "Monthly Survey of Rates on Conventional 1-Family Nonfarm Mortgage Loans" to the Office of Management and Budget for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Comments

Comments on the information collection request are welcome and should be submitted within 15 days of publication of this notice in the Federal Register. Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503. Attention: Desk Officer for the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed information collection request and supporting documentation are obtainable at the Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552, Phone: 202-377-6933.

FOR FURTHER INFORMATION CONTACT: Steven Zabremski, Office of Policy and Economic Research, (202) 377-6780, Federal Home Loan Bank Board, 1700 G Street NW., Washington, DC 20552.

By the Federal Home Loan Bank Board.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreements pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in §572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 212-009847-014.
Title: U.S. Atlantic Coast/Brazil Agreement.
Parties:
Companhia de Navegacao Lloyd Brasileiro
Companhia de Navegacao Maritime Netumar
United States Lines (S.A.) Inc.

Synopsis: The proposed amendment would modify the agreement to change the date from March 31, 1986 to August 31, 1986, in order to extend the temporary adjustments necessitated by the integration of alternate coast service into the pooling arrangements.

Agreement No.: 212-009848-016.
Title: U.S. Gulf Ports/Brazil Agreement.
Parties:
Companhia de Navegacao Lloyd Brasileiro
Companhia Maritima Nacional
United States Lines (S.A.) Inc.

Synopsis: The proposed amendment would extend until August 31, 1986 previously approved adjustments necessitated by the integration of alternate coast service into the pooling arrangements.

Agreement No.: 212-010320-011.
Title: Brazil/U.S. Gulf Ports Agreement.
Parties:
Companhia de Navegacao Lloyd Brasileiro
Companhia Maritimas Nacional
United States Lines (S.A.) Inc.
Empresa Lineas Maritimas Argentinas S.A.
A. Bottacchi S.A. de Navegacion C.F.I.I.
Transportacion Maritima Mexicana S.A.

Synopsis: The proposed amendment would modify the agreement to change the date from March 31, 1986 to August 31, 1986, in order to extend the temporary adjustments necessitated by the integration of alternate coast service into the pooling arrangements.

Agreement No.: 212-010362-009.
Title: Argentina/U.S. Gulf Ports Agreement.
Parties:
A. Bottacchi S.A. de Navegacion C.F.I.I.
Cia. de Navegacao Lloyd Brasileiro
Companhia Maritima Nacional
Empresa Lineas Maritimas Argentinas S.A.
Reefer Express Lines Pty, Ltd.
Transportacion Maritima Mexicana S.A.
United States Lines (S.A.) Inc.

Synopsis: The proposed amendment would modify the agreement to increase the amount of iron and steel articles exempted from the pooling requirements.

Agreement No.: 212-010366-008.
Title: Argentina/U.S. Atlantic Coast Agreement.
Parties:
A. Bottacchi S.A. de Navegacion C.F.I.I.
Cia. de Navegacao Lloyd Brasileiro
Empresa Lineas Maritimas Argentinas S.A.
United States Lines (S.A.) Inc.
Reefer Express Lines Pty, Ltd.
Van Nievelt, Goudriaan & Co.

Synopsis: The amendment would add "open rated iron and steel articles" to the list of commodities not subject to the pool. Under the terms of the agreement the amendment may become effective upon filing.

Agreement No.: 217-010823-003.
Title: Canadian Transport Company/C.M.B. n.v. Joint Container Service Agreement.
Parties:
Canadian Transport Company (CTCO)
C.M.B. n.v. (CMB)

Synopsis: The proposed amendment would enlarge the scope of the agreement to include ports and points in Italy, Alaska and Hawaii. It would also permit CTCO to provide additional container space to the joint container service by chartering space at CTCO's expense from other vessel operators and

would authorize CTCO and CMB to agree upon the amounts of such vessel space to be chartered by CTCO for the service.

Agreement No.: 24–010921.

Title: Port of Portland Terminal Agreement.

Parties:

The Port of Portland (Port)
The EAC Lines Transpacific Service, Ltd. (Lines)
Kawasaki Kisen Kaisha, Ltd. (Lines)
Mitsui O.S.K. Lines, Ltd. (Lines)

Synopsis: The proposed agreement would provide for the preferential use by the Lines of 7 acres of container yard, a berth, and two container cranes. The preferential berthing period shall be for a fixed 48-hour period each week. The Port will perform all terminal and stevedoring services at the premises, and the Lines agree to pay for these services in accordance with the Port's terminal tariff. The Lines will compensate the Port at a minimum annual fee of $500,000 for the first year and escalating on an annual basis thereafter. Revenues from dockage, wharfage, wharf demurrage, and storage paid by the Lines on their vessels and cargoes will be applied against the minimum annual guarantee. The term of the agreement is three years, with the option to renew for an additional two-year term.

Agreement No.: 213–010922.

Title: Convoy Intercontinental Container Transport/Canadian Transport Company Space Charter Agreement.

Parties:

Canadian Transport Company (CTCO)
Convoy Intercontinental Container Transport GmbH & Co. KG (Convoy)

Synopsis: The proposed agreement would permit CTCO to charter space on Convoy's vessels for the carriage of cargo in the trades between ports on the West Coast of the United States and ports in the United Kingdom and North Europe (Bordeaux-Hamburg range). It would also permit the parties to agree upon the sailing schedules of their vessels.

By Order of the Federal Maritime Commission.

Dated May 2, 1986.

John Robert Ewers,

Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 86F–0158]

Betz Laboratories, Inc.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Betz Laboratories, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of 2-bromo-2-nitropropane-1,3-diol as a slimicide in the manufacture of paper and paperboard for food-contact use.

FOR FURTHER INFORMATION CONTACT: Marvin D. Mack, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6B3915) has been filed by Betz Laboratories, Inc., Somerton Rd., Trevose, PA 19047, proposing that § 176.300 *Slimicides* of the food additive regulations (21 CFR 176.300) be amended to provide for the safe use of 2-bromo-2-nitropropane-1,3-diol as a slimicide in the manufacture of paper and paperboard for food-contact use.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c), as published in the **Federal Register** of April 26, 1985 (50 FR 16636).

Dated: April 29, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Radiation Technology, Inc. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of a source of gamma radiation to control spoilage bacteria and/or pathogens and parasites in seafoods.

FOR FURTHER INFORMATION CONTACT: Clyde A. Takeguchi, Center for Food Safety and Applied Nutrition (HFF–330), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 6M3907) has been filed by Radiation Technology, Inc., Lake Denmark Rd., Rockaway, NJ 07860, proposing that Part 179 (21 CFR Part 179) of the food additive regulations be amended to provide for the safe use of a cobalt 60 or cesium 137 source of gamma radiation to control spoilage bacteria and/or pathogens and parasites in seafoods, including fishes, molluscs, crustaceans, and amphibians, at doses not to exceed 3 kilogray (300 kilorad).

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c), as published in the **Federal Register** of April 26, 1985 (50 FR 16636).

Dated: April 29, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

The Goodyear Tire & Rubber Co.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that The Goodyear Tire & Rubber Co. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of ethylene terephthalate-isophthalate copolymers containing a minimum of 97 weight percent of polymer units derived from ethylene terephthalate for use as components of food-contact articles.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C Street SW., Washington, DC 20204, 202–426–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348(c)(5))), notice is given that a petition (FAP 5B3884) has been filed by The Goodyear Tire & Rubber Co., 130 Johns Ave., Akron, OH 44316–0001, proposing that § 177.1630 *Polyethylene phthalate polymers* (21 CFR 177.1630) be amended to provide for the safe use of ethylene terephthalate-isophthalate copolymers containing a minimum of 97 weight percent of polymer units derived from ethylene terephthalate for use as components of food-contact articles.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c), as published in the **Federal Register** of April 26, 1985 (50 FR 16636).

Dated: April 29, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–M

Health Resources and Services Administration

Health Education Assistance Loan Program; Maximum Interest Rates for Quarter Ending June 30, 1986 and Rate of Insurance Premium

Section 727 of the Public Health Service Act (42 U.S.C. 294) authorizes the Secretary of Health and Human Services to establish a Federal program of student loan insurance for graduate students in health professions schools.

A. Section 60.13(a)(4) of the program's implementing regulations (42 CFR Part 60, previously 45 CFR Part 126) provides that the Secretary will announce the interest rate in effect on a quarterly basis.

The Secretary announces that for the period ending June 30, 1986, three interest rates are in effect for loans executed through the Health Education Assistance Loan (HEAL) program.

1. For loans made before January 27, 1981, the variable interest rate is 10¾ percent. Using the regulatory formula (45 CFR 126.13(a) (2) and (3)), in effect prior to January 27, 1981, the Secretary would normally compute the variable rate for this quarter by finding the sum of the fixed annual rate (7 percent) and a variable component calculated by subtracting 3.50 percent from the average bond equivalent rate of 91-day U.S. Treasury bills for the preceding

VOL 51 ISS 88 MY 7 1986 UMI

calendar quarter (7.06 percent), and rounding the result (10.56 percent) upward to the nearest ⅛ percent (10⅝ percent). However, the regulatory formula also provides that the annual rate of the variable interest rate for a 3-month period shall be reduced to the highest one-eighth of 1 percent which would result in an average annual rate not in excess of 12 percent for the 12-month period concluded by those 3 months. Because the average rate of the 4 quarters ending March 31, 1986 is not in excess of 12 percent, there is no necessity for reducing the interest rate. For the previous 3 quarters the variable interest at the annual rate was as follows: 11⅜ percent for the quarter ending September 30, 1985; 10⅞ percent for the quarter ending December 31, 1985; and 11 percent for the quarter ending March 31, 1986.

2. For variable rate loans executed during the period of January 27, 1981 through October 21, 1985, the interest rate is 10⅝ percent. Using the regulatory formula (42 CFR 60.13(a)(3)) in effect since January 27, 1981, the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (7.06 percent); adding 3.50 percent (10.56 percent); and rounding that figure to the next higher one-eighth of 1 percent (10⅝ percent).

3. For fixed rate loans executed during the period of April 1, 1986 through June 30, 1986, and for variable rate loans executed on or after October 22, 1985, the interest rate is 10⅛ percent. The Health Professions Training Assistance Act of 1985 (Pub. L. 99–129), enacted October 22, 1985, amended the formula for calculating the interest rate by changing 3.5 percent to 3 percent. Using the regulatory formula (42 CFR 60.13(a)(2) and (3)) and substituting the new statutory change of 3 percent, the Secretary computes the maximum interest rate at the beginning of each calendar quarter by determining the average bond equivalent rate for the 91-day U.S. Treasury bills during the preceding quarter (7.06 percent); adding 3.0 percent (10.06 percent) and rounding that figure to the next higher one-eighth of 1 percent (10⅛ percent).

B. Pub. L. 99–129 also contains modifications to the insurance premium calculation that become effective 9 months after enactment of the statute (July 21, 1986). Until that date, § 60.14(b) of the regulations remains in effect.

It provides that the rate of the insurance premium shall not exceed 2 percent per year of the loan principal and that the Secretary will announce the rate of the insurance premium on a quarterly basis through a notice published in the **Federal Register**.

The Secretary announces that for the period ending June 30, 1986, the rate of the insurance premium continues to be 2 percent per year of the loan principal for loans executed through the HEAL program.

BILLING CODE 4160–15–M

National Institutes of Health

National Cancer Advisory Board and Board Subcommittees; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Cancer Advisory Board, May 19–21, 1986, National Cancer Institute, Building 31C, Conference Room 6, 6th floor, National Institutes of Health, Bethesda, Maryland 20892. Meetings of Subcommittees of the Board will be held at the times and places listed below. Portions of the Board meeting and its Subcommittees will be open to the public to discuss committee business as indicated in the notice. Attendance by the public will be limited to space available.

Portions of these meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

The Subcommittee on Planning and Budget will be closed to the public as indicated below in accordance with the provisions set forth in Section 552b(c)(9)(B), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, to discuss the 1988 preliminary budget.

Mrs. Winifred Lumsden, the Committee Management Officer, NCI, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5708) will provide summaries of the meetings and rosters of Board members, upon request.

Mrs. Barbara S. Bynum, Executive Secretary, National Cancer Advisory Board, National Cancer Institute, Building 31, Room 10A03, National Institutes of Health, Bethesda, Maryland 20892 (301/496–5147) will furnish substantive program information.

Name of committee: *National Cancer Advisory Board*
Dates of Meeting: May 19–21, 1986
Place of Meeting: Building 31C, Conference Room 6, 6th floor, National Institutes of Health
Open:
May 19, 8:30 a.m.—recess
May 21, 8:00 a.m.—adjournment
Agenda: Reports on activities of the President's Cancer Panel and the Director's Report on the National Cancer Institute; Subcommittee Reports and New Business.
Closed Session: May 20, 8:30 a.m.—recess
Closure Reason: To review grant applications.
Name of committee: *Subcommittee on Planning and Budget*
Dates of Meeting: May 19, 1986
Place of Meeting: Building 31, A Wing, Conference Room 11A10, 11th Floor National Institutes of Health
Closed: May 19, 7:30 p.m.—adjournment
Closure Reason: To discuss the preliminary FY 88 budget.
Name of committee: *Subcommittee on Special Actions for Grants*
Dates of Meeting: May 20, 1986
Place of Meeting: Building 31, C Wing, Conference Room 6, 6th Floor, National Institutes of Health
Closed: May 20, 8:30 a.m.—adjournment
Closure Reason: To review grant applications.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

President's Commission on Americans Outdoors

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amendd, notice is hereby given that a meeting of the President's Commission on American Outdoors (Commission) will be held Wednesday, May 14, 1986, starting at 10:30 am, in the Ballroom of the Brown Palace Hotel/ Denver Inn, 310–17th Street, Denver, CO 80202. Due to heavy demand for presentations to the Commission this second site has been selected for the Commission hearing to be held in Denver on this date.

This will be a hearing to obtain information on the kinds of programs that are provided and opportunities afforded in recreation programs in this country. Attendees have been invited by the Commission for this public hearing; however interested parties may request time to testify by contacting the Commission.

This meeting is opened to the public, interested persons may attend. The Commission contact is Mr. James Gasser, and he may be contacted at the President's Commission on Americans Outdoors, P.O. Box 18547, 1111—20th Street, NW, Washington, DC 20036–8547, (202) 634–7310.

Dated: May 2, 1986.

Victor H. Ashe,

Executive Director, President's Commission on Americans Outdoors.

Notice of Conveyance; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of conveyance of public land in Fergus, Hill, Valley, and Chouteau Counties, Montana.

SUMMARY: This notice informs the public and interested state and local governmental officials of the transfer of certain public lands to private ownership pursuant to the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701.

FOR FURTHER INFORMATION CONTACT: Edward H. Croteau, Chief, Lands Adjudication Section, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, Phone (406) 657–6062.

SUPPLEMENTARY INFORMATION:

1. Notice is hereby given that pursuant to Sec. 206 of FLPMA, the following described surface estate was conveyed to the parties shown:

Principal Meridian, Montana

Honrud Enterprises, Inc.:
T. 34 N., R. 40 E.,
Sec. 4, lot 1, SE¼NE¼.
80.15 acres.
Ted Solomon:
T. 31 N., R. 16 E.,
Sec. 25, lot 4.
3.90 acres.
Steve and Wanda McIntosh:
T. 37 N., R. 10 E.,
Sec. 24, NE¼NE¼.
T. 37 N., R. 11 E.,
Sec. 19, lot 1.
80.31 acres.
Richard W. Cook:
T. 28 N., R. 15 E.,
Sec. 34, SE¼SE¼.
40 acres.
James C. Taylor:
T. 19 N., R. 21 E.,
Sec. 6, S½SE¼, SE¼SW¼.
120 acres.
Robert E. Lee Ranch Co.:
T. 11 N., R. 17 E.,
Sec. 13, SW¼NE¼.
40 acres.
Robert Bold:
T. 20 N., R. 20 E.,
Sec. 8, NE¼NE¼, W½NE¼, NW¼.
280 acres.
Total 644.36 acres.

2. In exchange for the above selected land, the United States acquired the surface estate of the following described land in Chouteau County, Montana:

Principal Meridian, Montana

An island in the Missouri River more particularly described as follows:
T. 24 N., R. 9 E.,
Sec. 9, lot 5 and all accretions thereto;
Sec. 10, lot 3 and all accretions thereto.
Containing 38.30 acres, more or less.
and
T. 24 N., R. 13 E.,
Sec. 23, lots 3 and 5 and all accretions thereto;
Sec. 25, lots 6, 7, 8 and all accretions thereto, NW¼SW¼, SE¼SW¼, SW¼SE¼;
Sec. 26, lots 2 and 3 and all accretions thereto; N½NW¼.
Containing 398.16 acres, more or less.
Total acreage acquired—436.46 acres.

3. The values of federal public land were appraised at $76,680 and the nonfederal land was appraised at $75,700. A cash equalization payment of $980 was made to the United States.

Edward H. Croteau,

Chief, Lands Adjudication Section, Montana State Office.

April 29, 1986.

T. 13 N., R. 18 E.,
Sec. 25: All.

Containing 18,993.02 acres of non-Federal land.

The purpose of the exchange is to acquire the non-Federal lands for use in Federal recreation programs in the southern California Desert. The exchange is consistent with the Bureau's planning for the lands involved and has been discussed with San Bernardino County officials. The public interest will be well served by making the exchange.

The values of the lands to be exchanged are approximately equal. Full equalization of values will be achieved by acreage adjustments. The surface and mineral estates will be exchanged on both the non-Federal and public lands, subject to valid existing rights.

Lands to be transferred from the United States will be subject to the following reservations, terms and conditions:

1. A right-of-way will be reserved for ditches and canals constructed by the authority of the United States. Act of August 30, 1890 (43 U.S.C. 945; 26 Stat. 391).

2. Right-of-way for a communication site granted to the Atchinson, Topeka and Santa Fe Railroad by LA 0168288 under Act of March 4, 1911 (43 U.S.C. 961) in Sec. 26, and 35 of T. 5N., R. 14 E. SBM.

BEST COPY AVAILABLE

3. Right-of-way for cathodic protection granted to Four Corners Pipeline Company by LA 0169486 under Act of February 25, 1920 show U.S. code also (41 Stat. 437, 30 U.S.C. 181) in Sec. 35 of T. 5 N., R. 14 E., SBM.

4. Existing oil and gas leases granted to Harper Oil Company, its successor and assigns, by leases CA–9302 and CA 9305 under the authority of the Act of February 25, 1920 (41 Stat. 437, 30 U.S.C. 181).

5. An existing railroad right-of-way granted to Arizona and California Railroad Company, its successors and assigns, by right-of-way grant LA–011100 under the authority of the Act of March 3, 1875 (43 U.S.C. 934–939) in Secs. 22, 23 and 26 of T. 5 N., R. 14 E., SBM.

6. An existing electric powerline right-of-way granted to Southern California Edison Company, its successors and assigns, by right-of-way grant LA–0166523 under the authority of the Act of March 4, 1911 (43 U.S.C. 961) in Secs 22, 26, 27, and 35 of T. 5 N., R. 14 E., SBM.

7. An existing telephone line right-of-way granted to Pacific Bell, its successors and assigns, by right-of-way grant LA–047694 under authority of the Act of March 4, 1911 (43 U.S.C. 961) in Secs. 22, 23, 27 and 28 of T. 5 N., R. 14 E., SBM.

8. An existing telephone line right-of-way granted to Southern California Telephone Company, its successors and assigns, by right-of-way grant LA–055377 under authority of the Act of March 4, 1911 (43 U.S.C. 961) in Sec. 8 of T. 5 N., R. 14 E., SBM.

9. An existing gas pipeline right-of-way granted to Four Corners Pipeline Company, its successors and assigns, by right-of-way grant LA–0152777 under authority of the Act of February 25, 1920 (41 Stat. 437, 30 U.S.C. 181) in Secs. 3 and 4 of T. 4 N., R. 14 E., SBM, and Sec. 26, 34, and 35 of T. 5 N., R. 14 E., SBM.

10. An existing oil pipeline right-of-way granted to Celeron/All American Pipeline Company, its successors and assigns, by right-of-way grant CA–14013 under the authority of Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185) in Secs. 18, 20, 22, 26, and 27 of T. 5 N., R. 14 E., SBM.

Publication of this notice in the **Federal Register** segregates the public lands from the operation of the public land laws and the mining laws, except for mineral leasing. The segregative effect will end upon issuance of patent or two (2) years from the date of publication, whichever occurs first. Detailed information concerning the exchange, including the environmental assessment, is available for review at the California Desert District Office, 1695 Spruce Street, Riverside, California 92507, and at the Needles Resource Area Office, 901 Third Street, Needles, California 92363.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, California Desert District, 1695 Spruce Street, Riverside, California 92507. Objections will be reviewed by the State Director, who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: April 30, 1986.

H. W. Riecken,

Acting District Manager.

BILLING CODE 4310-40-M

Fish and Wildlife Service

Receipt of Application for Permit; Janmark, Inc.

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals. (50 CFR Part 18).

Applicant:
Name: Janmark, Inc., File no. PRT–706641.
Address: 236 Third Ave., Suite E, Chula Vista, CA 92010
Type of Permit: Scientific Research
Name and Number of Animals: polar bear (*Ursus maritimus*); 15
Summary of Activity to be Authorized: The applicant proposes to Import (elaborate on reasons) one blood sample from each of these animals to determine their reproductive condition at the time of sampling.
Source of Marine Mammals for Research: Northwest Territories Wildlife Service, Rankin Inlet, N.W.T., CANADA XOC OGO
Period of Activity: 2 yrs.

Concurrent with the publication of this notice in the **Federal Register**, the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (FWPO), 1000 North Glebe Road, Room 611, Arlington, Virginia 22201, within 30 days of the publication of this notice. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such hearing is at the discretion of the Director.

Documents submitted in connections with the above application(s) are available for review during normal business hours (7:45 am to 4:15 pm) in Room 601 N. Glebe Road, Arlington, Virginia.

Dated: April 30, 1986.

Larry LaRochelle,

Chief, Branch of Permits, Federal Wildlife Permit Office.

Geological Survey

Consolidation of Eastern/Western Distribution Branches

Notice is hereby given that the U.S. Geological Survey's two regional branches responsible for distributing USGS maps and text products are being consolidated and will operate from a single location at the Federal Center in Denver, Colorado.

As a result of the consolidation of the Eastern Distribution Branch and the Western Distribution Branch, the Eastern Branch in Northern Virginia will be permanently closed in order to bring about a more cost-efficient operation from a single facility. Products presently distributed by the Eastern Distribution Branch include USGS topographic quadrangle and other maps for the area east of the Mississippi River, including Minnesota, Puerto Rico, and the Virgin Islands, and all Geological Survey books, leaflets, and other text products. On the following effective dates, all U.S. Geological Survey products will be available at the Denver location.

Maps:
Over-the-counter.....May 1, 1986
Mail orders.....July 1, 1986
Text Products:
Leaflets, etc., over-the-counter and mail order.....April 21, 1986
Books.....September 1, 1986

Addresses for the consolidated facilities are:
Maps:
U.S. Geological Survey, Map Distribution, Box 25286 Federal Center, Denver, Colorado 80225
Text Products:
U.S. Geological Survey, Books and Open-File Reports, Box 25425 Federal Center, Denver, Colorado 80225.

VOL 51 ISS 88 MY 7 1986 UMI

Dated: April 30, 1986.

Lowell E. Starr,

Chief, National Mapping Division, U.S. Geological Survey.

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Tenneco Oil Exploration and Production has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 4231, Block 181, Ship Shoal Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on April 25, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: April 30, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

[DES 86-22]

Gulf of Mexico Region; Availability of the Draft Environmental Impact Statement and Intent To Hold a Public Hearing Regarding Proposed Central and Western Gulf of Mexico Lease Sales 110 (April 1987) and 112 (August 1987)

Pursuant to section 102(2)(C) of the National Evironmental Policy Act of 1969, the Minerals Management Service (MMS) has prepared a draft environmental impact statement (EIS) relating to proposed 1987 Outer Continental Shelf (OCS) oil and gas lease sales of available unleased blocks in the Central and Western Gulf of Mexico (GOM). The proposed Central Gulf Sale 110 will offer for lease approximately 31.4 million acres, and the Western Gulf Sale 112 will offer approximately 27.3 million acres. Single copies of the draft EIS can be obtained from the Minerals Management Service, Gulf of Mexico Region, 3301 N. Causeway Blvd., Post Office Box 7944, Metairie, Louisiana 70010.

Copies of the draft EIS will be available for review by the public in the following libraries: Austin Public Library, 402 West Ninth Street, Austin Texas; Houston Public Library, 500 McKinney Street, Houston, Texas; Dallas Public Library, 1513 Young Street, Dallas, Texas; Brazoria County Library, 410 Brazoport Boulevard, Freeport, Texas; LaRatama Library, 505 Mesquite Street, Corpus Christi, Texas; Texas Southmost College Library, 1825 May Street, Brownsville, Texas; Rosenburg Library, 2310 Sealy Street, Galveston, Texas; New Orleans Public Library, 219 Loyola Avenue, New Orleans, Louisiana; Louisiana State Library, 760 Riverside, Baton Rouge, Louisiana; Lafayette Public Library, 301 W. Congress, Lafayette, Louisiana; Calcasieu Parish Library, Downtown Branch, 411 Pujo Street, Lake Charles, Louisiana; Nicholls State Library, Nicholls State University, Thibodaux, Louisiana; Harrison County Library, 14th and 21st Avenue, Gulfport, Mississippi; Mobile Public Library, 701 Government Street, Mobile, Alabama; Montgomery Public Library, 445 South Lawrence Street, Montgomery, Alabama; St. Petersburg Public Library, 3745 Ninth Avenue North, St. Petersburg, Florida; West Florida Regional Library, 200 West Gregory Street, Pensacola, Florida; Northwest Regional Library System, 25 West Government Street, Panama City, Florida; Leon County Public Library, 127 North Monroe Street, Tallahassee, Florida; Lee County Library, 3355 Fowler Street, Fort Myers, Florida; Charlotte-Glades Regional Library System, 2280 NW Aaron Street, Port Charlotte, Florida; Tampa-Hillsborough County Public Library System, 600 North Ashley Street, Tampa, Florida.

In accordance with 30 CFR 256.26, a public hearing pertaining to these lease sales will be held at the following location and time: Minerals Management Service, Gulf of Mexico Region, Imperial Office Building, Conference Room 437, 3301 North Causeway Boulevard, Metairie, Louisiana 70010, June 19, 1986, 9:00 a.m.

The purpose of the public hearing is to provide the Department of the Interior and the Minerals Management Service with information from individuals, public and private groups, and Government Agencies to further evaluate the potential effects of the proposed lease sales. Pertinent testimony and comments will be addressed in the final EIS for Sales 110 and 112.

Persons who wish to testify at this hearing are rquested to contact the Regional Supervisor, Leasing and Environment (LE-2), Gulf of Mexico Region, at the above address, or by telephone (504) 838-0775 no later than 3:30 p.m., June 13, 1986. Others may have an opportunity to speak following testimony of those who have made arrangements in advance, if time permits. Oral testimony should be limited to 10 minutes. Testimony may be supplemented by a written statement which, if submitted at a hearing, will be considered as part of the hearing record. Those unable to attend the hearing may submit written statements until the close of the comment period, July 3, 1986. Written statements will receive the same degree of consideration in the final EIS as oral testimony presented at the hearing.

John B. Rigg,

Acting Director, Minerals Management Service.

Approved:

Dated: May 1, 1986.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 4310-MR-M

National Park Service

Intention to Negotiate Concession Contract; Island Packers, Inc.

Pursuant to the provisions of Section 5 of the Act of October 9, 1965, (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Island Packers, Inc. authorizing it to continue to provide tourboat transportation facilities and services for the public at Channel Islands National Park for a period of ten (10) years from January 1, 1987 through December 31, 1996.

This contract renewal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act, and no environmental document with be prepared.

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing permit which expires by limitation of time on December 31, 1986, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract as defined in 36 CFR 51.5.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand-delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, Western Regional Office, 450 Golden Gate Avenue, San Francisco, California 94102, for information as to the requirements of the proposed contract.

Dated: April 8, 1986.

W. Lowell White,

Acting Regional Director, Western Region.

BILLING CODE 4310-70-M

Environmental Impact Statement Preparation for Mining In Three National Park Service Units in Alaska

AGENCY: Nationa Park Service, Interior.

ACTION: Notice of Intent.

SUMMARY: The National Park Service (NPS) is beginning preparation of environmental impact statatements (EIS) for three national parks and preserves in the State of Alaska. The affected NPS units are Denali National Park and Preserve, Wrangell-St. Elias National Park and Preserve, and Yukon-Charley Rivers National Preserve. The purpose of the environmental impact statements is to evaluate the management of mineral development activities within these parks and to assess the cumulative environmental effects of mining operations on park resources. These studies will be used to guide future management of mineral operations in the three units.

From previsous studies and observations over the last few years the NPS has become increasingly aware of and concerned about the combined effects of several mining operations on park resources. The proposed EIS's have been designed to address these concerns by evaluating the cumulative effects of all past, present, and reasonably forseeable future mining and mineral development activities in each park. From this analysis of potential maximum impacts under current regulations, alternative mineral activity management proposals will be developed. A proposed action will be selected comprised of a mineral management plan which provides guidance to the affected park unit for the management of mineral activities and a cumulative environmental impact analysis to which future environmental assessments on specific mining proposals can be tiered. In addition, these environmental impact statements will meet the requirements imposed by the U.S. District Court pursuant to the injunction of July 22, 1985, as amended on December 4, 1985 (Northern Alaska Environmental Center v. Hodel, Case No J85-009 CIV).

Interested groups, organizations, individuals, and government agencies will be kept informed of the progress of the efforts and any proposals developed. Scoping meetings will be scheduled with interested parties to solicit input regarding cumulative environmental impacts from mining operations on park resources and to identify major issues of concern. Those not interested in attending a scoping meeting are encouraged to submit their ideas and suggestions in writing to the address below, so that they may be considered in preparation of the environmental impact statements.

FOR FURTHER INFORMATION CONTACT: Floyd Sharrock, Chief of Land Resources, National Park Service, Alaska Region, 2525 Gambell St., Room 107, Anchorage, Alaska 99503-2892, Telephone: (907) 271-2618 or (907) 271-2690.

Dated: April 28, 1986.

Boyd Evison,

Regional Director, Alaska Region.

Kobuk Valley National Park Subsistence Resoruce Commission and Cape Krusenstern National Monument Subsistence Resource Commission; Meeting

AGENCY: National Park Service, Alaska Region, Interior.

ACTION: Joint Meeting of the Kobuk Valley National Park Subsistence Resource Commission and Cape Krusenstern National Monument Subsistence Resource Commission.

SUMMARY: The Alaska Regional Office of the National Park Service announces a forthcoming meeting of the Cape Krusenstern National Monument and Kobuk Valley National Park Subsistence Resource Commissions. The following agenda items will be discussed:

1. Discussion of Resolution #86-001.
2. Subsistence Management in the parks.
3. National Park Service enforcement policies for commercial and subsistence activities.
4. National Park Service general management plan.
5. Review of federal/state game regulations.

DATE: The meeting will begin at 9:00 a.m. on June 6, 1986, and will conclude at 5:00 p.m. on June 6, 1986.

ADDRESS: The meeting will be held in the NANA Conference Room, Drift Inn Building, Kotzebue, Alaska.

FOR FURTHER INFORMATION CONTACT: Mack Shaver, Superintendent, Northwest Alaska Areas, P.O. Box 287, Kotzebue, Alaska 99752.

SUPPLEMENTARY INFORMATION: The Cape Krusenstern National Monument and Kobuk Valley National Park Subsistence Resource Commissions are authorized under Title VIII, section 808, of the Alaska National Interest Lands Conservation Act Pub. L. 96-487.

BILLING CODE 4310-70-M

National Capital Memorial Advisory Committee Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the National Capital Memorial Advisory Committee will be held on Thursday, May 22, 1986, at 1:00 p.m., in the Meeting Room of the National Capital Planning Commission, 1325 G Street, NW., Washington, DC.

The Committee was established, by the Secretary of the Interior, for the purpose of preparing and recommending to the Secretary broad criteria, guidelines and policies for memorializing persons and events on Federal lands in the National Capital Region (as defined in the National Capital Planning Act of 1952, as amended), through the media of monuments, memorials and statues. It is to examine each memorial proposal for adequacy and appropriateness, make recommendations to the Secretary with respect to site location on Federal land in the National Capital Region and to serve as an information focal point for those seeking to erect memorials on Federal land in the National Capital Region.

The members of the Committee are as follows:

William Penn Mott, Chairman, Director, National Park Service, Washington, DC

Glen Urquhart, Chairman, National Capital Planning Commission, Washington, DC

George H. White, Architect of the Capitol, Washington, DC

Andrew J. Goodpaster, Chairman, American Battle Monuments Commission, Washington, DC

J. Carter Brown, Chairman, Commission of Fine Arts, Washington, DC

Marion S. Barry, Jr., Mayor of the District of Columbia, Washington, DC

William Sullivan, Commissioner, Public Buildings Service, Washington, DC.

The purpose of the meeting will be to review the following memorial legislative proposals and other matters pertaining to memorials.

1. H.J. Res. 463—Establishment of a memorial to honor members of the American Press and other news media who have been killed as a result of hostilities while covering a war or other armed conflict.

2. H.R. 3764—Establishment of a memorial to honor Native American members of the Armed Forces who served during periods of war or national conflict in defense of our nation.

3. H.J. Res. 504—Establishment of a memorial to honor America's astronauts.

4. H.R. 3785—Establishment of a memorial to honor Hispanic American members of the Armed Forces who served during periods of war or national conflict in defense of our nation.

5. H.R. 3629—To establish an American Slavery Memorial Council and to provide for the construction of a permanent museum memorializing the victims of slavery.

6. H.R. 4378—To govern the establishment of commemorative works within the National Capital Region of the National Park System.

7. H.R. 4467—Establishment of a "Peace Garden".

Also, the Committee will review its "Criteria and Guidelines" which were published in the Federal Register on April 1, 1985, Vol. 50, No. 62).

Persons who wish to file a written statement or testify at the meeting or who want further information concerning the meeting may contact Mr. John G. Parsons, Associate Regional Director, Land Use Coordination, National Capital Region, at 202-426-7750. Minutes of the meeting will be available for public inspection four weeks after the meeting at the Office of Land Use Coordination, National Capital Region, Room 206, 1100 Ohio Drive, SW., Washington, DC 20242.

Dated: April 28, 1986.

Manus J. Fish, Jr.,

Regional Director, National Capital Region.

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-199 (Final)]

Certain Dried Salted Codfish From Canada

AGENCY: International Trade Commission.

ACTION: Dismissal of a request to institute a section 751(b) review investigation concerning affirmative determination in investigation No. 731-TA-199 (Final).

SUMMARY: The Commission determines, pursuant to section 751(b) of the Tariff Act of 1930 (19 U.S.C. 1675(b)) and rule 207.45 of the Commission's rules (19 CFR 207.45), that the petition does not show changed circumstances sufficient to warrant institution of an investigation to review the Commission's affirmative determination in investigation no. 731-TA-199 (Final), regarding certain dried salted codfish from Canada provided for in item 111.22 of the Tariff Schedules of the United States.

SUPPLEMENTARY INFORMATION: On June 27, 1985, the Commission determined that the establishment of an industry in the United States was materially retarded by reason of imports from Canada of certain dried heavy salted codfish which had been found to be sold at less than fair value (LTFV).

On July 8, 1985, the Department of Commerce published notice of the issuance of an Antidumping Duty Order in the Federal Register (50 FR 27836).

On February 6, 1986, the Commission received a request to review its affirmative determination in investigation No. 731-TA-199 (Final). The request was filed pursuant to section 751 (b) by the law firm of Freeman, Wasserman and Schneider on behalf of BMT Commodity Corp., New York, NY, a domestic buyer of dried salted codfish from Canada, and Delca Distributors, Inc., San Juan, P.R., its wholly owned subsidary which sells the salted codfish product.

On February 28, 1986, the Commission published a notice in the Federal Register (51 FR 7136) requesting public comment concerning whether the following alleged changed circumstances were sufficient to warrant institution of a review investigation: (1) Codfish Corp., the only known potential producer, ceased prodution in November 1984, has not recommenced production, and filed for bankruptcy on November 18, 1985, (2) the continuing unavailability of a domestic source of supply has resulted in American consumers paying higher prices for imported codfish as a result of the dumping duties and in a decline in demand for codfish in Puerto Rico as the competitive gap widens between dried salted codfish and other less expensive sources of protein such as chicken and pork, and (3) even if Codfish Corp. were producing, it could not attain the level of production necessary to be a viable producer.

The Commission received comments supporting the institution of the investigation from Freeman, Wasserman and Schneider, counsel for the petitioner; from the Canadian Embassy; the Fisheries Council of Canada on behalf of Canadian producers and exporters of dried salted codfish; and Worldwide Fish Products, Inc., a U.S. importer/exporter of fish products. Comments opposing institution of the investigation were received from Patton, Boggs & Blow, counsel for Codfish Corp., Ponce, P.R., the petitioner in investigation No. 731-TA-199.

After review of the request for review and the comments received, the Commission has determine, pursuant to 19 U.S.C. 1675(b) and 19 CFR 207.45, that the request does not show changed circumstances sufficient to warrant institution of a review investigation regarding dried salted codfish from Canada.

The petition states Codfish Corp. ceased production in November 1984, filed for bankruptcy on November 18, 1985, and had not recommenced production at the time of the filing of the petition on February 6, 1986. It is true that the Codfish Corp. ceased production and filed for reorganization under the bankruptcy law, as alleged. However, Codfish Corp. recommenced production prior to the filing of the petition for a review investigation and is currently producing dried salted codfish at its plant in Puerto Rico.

The petition alleges that the nonavailability of a domestic source of supply and the imposition of dumping duties has resulted in consumers paying higher prices for imported codfish. An increase in the price of an imported product is not an unexpected result of the issuance of a dumping order and is not, of itself, a changed circumstance sufficient to warrant instituting a review investigation.

The petition also alleges that even if Codfish Corp. were producing, it could not attain the level of production necessary to be a viable producer. The question of Codfish Corp.'s viability was before the Commission at the time of its final determination. Allegations concerning the issue of whether or not Codfish Corp. can attain a level of production necessary to be a viable producer do not raise changed circumstances sufficient to warrant institution of a review investigation.

For the foregoing reasons, the Commission has determined that the petition does not show changed circumstances sufficient to warrant institution of a review investigation and has, therefore, dismissed the petition.

FOR FURTHER INFORMATION CONTACT: Vera Libeau, (202-523-0368) or David Coombs (202-523-1376), Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436.

By order of the Commission.

Issued: April 29, 1986.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-154]

Certain DOT Matrix Line Printers and Components Thereof; Provisional Acceptance of Joint Motions for Modification of Consent Order Agreement and for Issuance of a Consent Order; Referral to the Chief Administrative Law Judge for Issuance of a Recommended Determination

AGENCY: International Trade Commission.

ACTION: Provisional acceptance of joint motions for modification of consent order agreement and for issuance of a consent order (Motion No. 154-32) and referral to the Chief administrative law judge (ALJ) for issuance of a recommended determination.

SUMMARY: The Commission has determined to provisionally accept the joint motions for modification of the consent order agreement and for issuance of a consent order in the above-captioned case and to refer the motions to the Chief ALJ for issuance of a recommended determination.

FOR FURTHER INFORMATION CONTACT: Carolyn E. Galbreath, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202 523-0143.

SUPPLEMENTARY INFORMATION: On July 23, 1985, the Commission issued an action and order denying the Joint Motion to Withdraw the Motion for Modification of Consent Order Agreement and to Maintain the Underlying Settlement Agreement as Confidential Business Information (Motion No. 154-31). 50 FR 31049 (July 31, 1985). Among other provisions, the action and order stated that any motions to modify the terms of the consent order agreement, and thereby the terms of the Commission's consent order, should be made in accordance with § 211.57 of the Commission's Rules of Practice and Procedure (19 U.S.C. 211.57).

Accordingly, on December 24, 1985, the parties filed Joint Motions to Withdraw the "Motion for Modification of Consent Order Agreement and for Declassification of Information Under Protective Order," for Modification of Consent Order Agreement, and for Issuance of a Consent Order (Motion No. 154-32).

Authority for this action is found in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rule 211.57 (19 CFR 211.57).

Copies of the Commission's action and order and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 am to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

Hearing-impaired individuals are advised that information concerning this investigation can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Issued: May 2, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-288 (Final)]

Erasable Programmable Read Only Memories (EPROMS) From Japan

AGENCY: International Trade Commission.

ACTION: Revised schedule for the subject investigation.

EFFECTIVE DATE: April 23, 1986.

FOR FURTHER INFORMATION CONTACT: Judith C. Zeck (202-523-0339), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal on 202-724-0002.

SUPPLEMENTARY INFORMATION: On March 17, 1986, the Commission instituted the subject investigation and established a schedule for its conduct (51 FR 11358, Apr. 2, 1986). Subsequently, the Department of Commerce extended the date for its final determination in the investigation from May 27, 1986 to July 30, 1986. The Commission, therefore is revising its schedule in the investigation to conform with Commerce's new schedule.

The Commission's new schedule for the investigation is as follows: requests to appear at the hearing must be filed with the Secretary to the Commission not later than July 23, 1986; the prehearing conference will be held in room 117 of the U.S. International Trade Commission Building at 9:30 a.m. on July 25, 1986; the public version of the prehearing staff report will be placed on the public record on July 16, 1986; the

VOL 51 ISS 88 MY 7 1986 UMI

deadline for filing prehearing briefs is August 1, 1986; the hearing will be held in room 331 of the U.S. International Trade Commission Building on August 5, 1986; and the deadline for filing all other written submissions, including posthearing briefs, is August 14, 1986.

For further information concerning this investigation see the Commission's notice of investigation cited above and the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207), and part 201, subparts A through E (19 CFR Part 201).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

Issued: April 28, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-163]

Certain Indomethacin; Commission Decision Not To Review Initial Determination Terminating Respondent on the Basis of a Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of an initial determination (ID) terminating respondent Lederle Laboratories (Lederle) on the basis of a settlement agreement.

SUMMARY: The U.S. International Trade Commission has determined not to review an ID (Order No. 43) terminating respondent Lederle in the above-captioned investigation on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: Marcia H. Sundeen, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0480.

SUPPLEMENTARY INFORMATION: On Jan. 23, 1986, complainant Merck & Co., Inc. (Merck) and respondent Lederle filed a joint motion (Motion No. 183-77"C") to terminate Lederle as a respondent in the investigation on the basis of a settlement agreement. The presiding administrative law judge issued an ID granting the motion for termination on April 7, 1986.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rule 210.53 (19 CFR 210.53). Notice of the ID was published in the **Federal Register** of April 16, 1986 (51 FR 12938). No petitions for review of the ID were received, nor were any comments received from other Government agencies or the public.

Copies of the nonconfidential version of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Issued: May 2, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-249 (Final) and 731-TA-262, 264, and 265 (Final)]

Iron Construction Castings From Brazil, India, and the People's Republic of China

Determinations

On the basis of the record,[1] developed in the subject countervailing duty investigation, the Commission determines, [2] [3] pursuant to section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)), that an industry in the United States is materially injured by reason of imports from Brazil of heavy iron construction castings,[4] provided for in item 657.00 of the Tariff Schedules of the United States (TSUS), which have been found by the Department of Commerce to be subsidized by the Government of Brazil.

The Commission further determines,[5] pursuant to section 735(b) of Tariff Act of 1930 (19 U.S.C. 1673(b)), that an industry in the United States is materially injured by reason of imports from Brazil, India, and the People's Republic of China (China) of heavy iron construction castings and that an industry in the United States is threatened with material injury [6] [7] by reason of imports from Brazil, India, and China of light iron construction castings,[8] provided for in item 657.00 of the TSUS, which have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV) (investigations Nos. 731-TA-262, 264, and 265, respectively). The Commission further finds that it would not have found material injury but for the suspension of liquidation of entries of light iron construction castings.

Background

The Commission instituted the countervailing duty investigation effective August 12, 1985, following a preliminary determination by the Department of Commerce that imports of heavy iron construction castings from Brazil were being subsidized within the meaning of section 701 of the Act (19 U.S.C. 1671). The Commission instituted the antidumping investigations effective October 28, 1985, following preliminary determinations by the Department of Commerce that imports of iron construction castings from Brazil, India, and China were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notices in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notices in the **Federal Register** of October 2, 1985 (50 FR 40243, and November 15, 1985 (50 FR 47287). The hearing for all of these investigations was held in Washington, DC, on January 16, 1986, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in these investigations to the Secretary of Commerce on April 25, 1986. The views of the Commission are contained in USITC Publication 1838 (April 1986), entitled "Iron Construction Castings from Brazil, India, and the People's Republic of China: Determination of the Commission in Investigations Nos. 701-TA-249 and 731-TA-262, 264, and 265 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigations."

[1] The record is defined in section 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR (207.2(i)).

[2] Vice Chairman Liebeler dissenting.

[3] Commissioner Brunsdale finds threat of material injury. She further determines that she would not have found material injury but for the suspension of liquidation of entries of heavy iron construction castings.

[4] For the purposes of this investigation, the term heavy iron construction castings is limited to manhole covers, rings and frames; catch basin grates and frames; and cleanout covers and frames.

[5] Vice Chairman Liebeler dissenting with respect to heavy iron construction castings.

[6] Chairwoman Stern and Commissioner Lodwick find that a domestic industry is materially injured by reason of imports of light construction castings.

[7] Commissioner Brunsdale finds threat of material injury with respect to both heavy and light iron construction castings. She further determines that she would not have found material injury but for the suspension of liquidation of entries of heavy and light iron construction castings.

[8] For the purposes of these investigations, the term light iron construction castings is limited to valve, service, and meter boxes.

Issued: April 30, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-229]

Certain Nut Jewelry and Parts Thereof; Commission Decision Not To Review Initial Determination Granting Motion for Summary Determination

AGENCY: International Trade Commission.

ACTION: Nonreview of an initial determination granting a motion for summary determination of no violation of section 337 of the Tariff Act of 1930 as to one respondent.

SUMMARY: Notice is hereby given that the Commission has determined not to review the administrative law judge's initial determination (ID) granting the motion of respondent Betty's Import & Export, Inc. for summary determination that it has not violated section 337 of the Tariff Act of 1930 in the above captioned investigation.

FOR FURTHER INFORMATION CONTACT: Randi S. Field, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0375.

SUPPLEMENTARY INFORMATION: The authority for the Commission's disposition of this matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in § 210.53 of the Commission's Rules of Practice and Procedure (19 CFR 210.53). On March 4, 1986, respondent Betty's Import & Export, Inc., moved for summary determination to terminate the investigation as to it because it allegedly had not violated section 337. The complainant did not oppose this motion, and the motion was supported by the Commission investigative attorney. The presiding administrative law judge issued an ID granting the motion for summary determination. No petitions for review or comments from Government agencies or the public were received.

Copies of the administrative law judge's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Issued: May 1, 1986.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-271 (Preliminary) and 731-TA-318 (Preliminary)]

Oil Country Tubular Goods From Israel

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines,[2] pursuant to section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)), that there is a reasonable indication that an industry in the United States is materially injured [3] by reason of imports from Israel (investigation No. 701-TA-271 (Preliminary)) of oil country tubular goods,[4] provided for in items 610.32, 610.37, 610.39, 610.40, 610.42, 610.43, 610.49, and 610.52 of the Tariff Schedules of the United States, which are alleged to be subsidized by the Government of Israel.

Further, the Commission determines,[5] pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured [3] by reason of imports from Israel (investigation No. 731-TA-318 (Preliminary)) of oil country tubular goods,[4] provided for in items 610.32, 610.37, 610.39, 610.40, 610.42, 610.43, 610.49, and 610.52 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value (LTFV).

Background

On March 12, 1986, a petition was filed with the Commission and the Department of Commerce by Lone Star Steel Co., Dallas, TX and CF&I Steel Corp., Pueblo, CO, alleging that an industry in the United States is materially injured and threatened with material injury by reason of subsidized imports of oil country tubular goods from Israel, and by reason of imports of oil country tubular goods from Israel which are allegedly being sold in the United States at less than fair value. Accordingly, effective March 12, 1986, the Commission instituted preliminary investigations Nos. 701-TA-271 (Preliminary) and 731-TA-318 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of March 19, 1986 (51 FR 9540). The conference was held in Washington, DC, on April 7, 1986, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on April 28, 1986. The views of the Commission are contained in USITC Publication 1840 (April 1986), entitled "Oil Country Tubular Goods from Israel: Determinations of the Commission in Investigations Nos. 701-TA-271 (Preliminary) and 731-TA-318 (Preliminary) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

Issued: April 29, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[Investigation No. 337-TA-233]

Certain Pharmaceutical Closures; Commission Decision Not To Review Initial Determination Granting Motion To Terminate Investigation as to a Respondent on the Basis of a Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of an initial determination terminating the investigation as to respondent Pohl on the basis of a settlement agreement.

SUMMARY: Notice is hereby given that the Commission has determined not to review an initial determination (ID) (Order No. 7) granting joint motion to terminate the investigation as to respondent Pohl on the basis of a settlement agreement.

FOR FURTHER INFORMATION CONTACT: Carolyn E. Galbreath, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0143.

SUPPLEMENTARY INFORMATION: The authority for disposition of the matter is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and in Commission rule 210.53 (19 CFR 210.53).

On November 8, 1985, in response to a complaint filed by the West Company (West), the Commission instituted an investigation of allegations of unfair methods of competition and unfair acts in the importation and sale of certain pharmaceutical closures pursuant to section 337 of the Trade Act of 1930. Franz Pohl Metall-und Kunststoffwarenfabrik GmbH (Pohl) was named as a respondent on the basis of allegations of infringement of complainant West's common-law trademark and trade dress in violation of the Lanham Act, 15 U.S.C. 1125.

On March 9, 1986, West and Pohl entered into a settlement agreement. Certain contingencies in the settlement agreement were fulfilled on March 14, 1986. On March 21, 1986, pursuant to Commission rule 210.52 (19 CFR 210.51), West and Pohl filed a joint motion to terminate the investigation as to respondent Pohl on the basis of the settlement agreement (Motion No. 233-6). On April 2, 1986, the investigative attorney filed a response in support of the motion. On April 7, 1986, the investigative law judge issued an ID granting a joint motion to terminate. The Commission did not receive any petitions for review of the ID or any Government agency or public comments.

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

[Investigation No. 337-TA-236]

Certain Vacuum Cleaner Foot Switches

AGENCY: International Trade Commission.

ACTION: Nonreview of an initial determination granting a motion to terminate the investigation.

SUMMARY: On March 12, 1986, complainant The Scott & Fetzer Company (S&F) moved to terminate the investigation based on settlement agreement with respondent Buckeye Vacuum Cleaner Supply Company (Buckeye). S&F supplemented its motion on March 25, 1986. On April 1, 1986, the presiding administrative law judge (ALJ) issued an initial determination (ID) granting the motion to terminate the investigation. The ID also terminated the investigation with respect to the only other respondent, Torii Electric Co. (Torii). Torii did not participate in the investigation. Pursuant to section 337 of the Tariff Act of 1930, the Commission determined not to review the ID. The Commission's decision terminates the entire investigation.

FOR FURTHER INFORMATION CONTACT: Kristian Anderson, Esq., Office of the General Counsel, U.S. International Trade Commission, Washington, DC 20436, telephone 202-523-0074.

SUPPLEMENTARY INFORMATION: This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rules 210.51 and 210.53 (19 CFR §§ 210.51 and 210.53).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202-523-0161.

BILLING CODE 7020-02-M

[Investigations Nos. 731-TA-271 Through 273 (Final)]

Certain Welded Carbon Steel Pipes and Tubes From India, Taiwan, and Turkey

Determinations

On the basis of the record [1] developed in investigation No. 731-TA-271 (Final) the Commission determines,[2] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is materially injured, or threatened with material injury, by reason of imports from India of standard pipes and tubes,[3] which have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV). Chairwoman Paula Stern and Commissioners Alfred E. Eckes and Seeley G. Lodwick determine that an industry in the United States is materially injured by reason of the subject imports. Commissioner David B. Rohr determines that a domestic industry is threatened with material injury by reason of the subject imports. Commissioner Rohr further determines, pursuant to section 735(b)(4)(B) of the Act (19 U.S.C. 1673d(b)(4)(B)), that he would not have found material injury but for any suspension of liquidation of entries of the subject merchandise.

The Commission also determines, on the basis of the record developed in investigation No. 731-TA-272 (Final),[4] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Taiwan of line pipes and tubes,[5] which have been found by the Department of Commerce to be sold in the United States at LTFV.

The Commission also determines, on the basis of the record developed in investigation No. 731-TA-273 (Final),[6] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry is the United States in materially injured, or threatened with material injury, by reason of imports form Turkey of standard pipes and tubes, which have been found by the Department of Commerce to be sold in the United States at LTFV. Chairwoman Paula Stern and Commissioners Alfred E. Eckes and Seeley G. Lodwick determine that an industry in the United States is materially injured by reason of the subject imports. Commissioner David B. Rohr determines that a domestic industry is threatened with material injury by reason of the subject imports. Commissioner Rohr further determines, pursuant to section 735(b)(4)(B) of the Act (19 U.S.C. 1673d(b)(4)(B)), that he would not have found material injury but for any suspension of liquidation of entries of the subject merchandise.

The Commission finally determines, on the basis of the record developed in investigation No. 731-TA-273 (Final),[7] pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Turkey of line pipes and tubes, which have been found by the Department of Commerce to be sold in the United States at LTFV.

Background

The Commission instituted these investigations following preliminary determinations by the Department of Commerce that imports of certain welded carbon steel pipes and tubes from India, Taiwan, and Turkey were being sold at LTFV within the meaning of section 731 of the Act (19 U.S.C 1673). Notice of the institution of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the Federal Register of January 24, 1986 (51 FR 3272). The hearing was held in Washington, DC, on March 13, 1986, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determinations in these investigations to the Secretary of Commerce on April 29, 1986. The views of the Commission are contained in USITC Publication 1839 (April 1986), entitled "Certain Welded Carbon Steel Pipes and Tubes from India, Taiwan and Turkey: Determinations of the Commission in Investigations Nos. 731-TA-271 through 273 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigations.

Issued: April 30, 1986.

By order of the Commission.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-246]

Certain Xenon Lamp Dissolver Slide Projectors and Components Thereof; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 3, 1986, pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), on behalf of Bergen Expo Systems, Inc., 1088 Main Avenue, Box 2109, Clifton, New Jersey 07015. A supplement to the complaint was filed on April 18, 1986. The complaint, as supplemented, alleges unfair methods of competition and unfair acts in the importation of certain xenon lamp dissolver slide projectors and components thereof into the United States, and in their sale, by reason of alleged (1) direct, contributory, and induced infringement of claims 1, 2, 6-9, and 13 of U.S. Letters Patent 4,158,491; and (2) failure to mark the country of origin. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

FOR FURTHER INFORMATION CONTACT: Steven H. Schwartz, Esq., or Gary Rinkerman, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202-523-4877 and 202-523-1273, respectively.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation

Having considered the complaint, the U.S. International Trade Commission, on April 29, 1986, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain xenon lamp dissolver slide projectors and components thereof into the United States, or in their sale, by reason of alleged (1) direct, contributory, and induced infringement of claims 1, 2, 6-9, and 13 of U.S. Letters Patent 4,158,491; and (2) failure to mark country of origin, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is—Bergen Expo Systems, Inc., 1088 Main Avenue, Box 2109, Clifton, New Jersey 07015.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

---

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

[2] Vice Chairman Susan W. Liebeler and Commissioner Anne E. Brunsdale make negative determinations.

[3] For purposes of these investigations, the term "standard pipes and tubes" covers welded carbon steel pipes and tubes of circular cross section, 0.375 inch or more but not over 16 inches in outside diameter, provided for in items 610.3231, 610.3234, 610.3241, 610.3242, 610.3243, 610.3252, 610.3254, 610.3258, 610.3259, and 610.4925 of the Tariff Schedules of the United States Annotated (TSUSA).

[4] Commissioners Alfred E. Eckes and David B. Rohr dissent, finding threat of material injury. They would not have found material injury but for any suspension of liquidation of entries of the subject merchandise.

[5] For purposes of these investigations, the term "line pipes and tubes" covers welded carbon steel pipes and tubes of circular cross section, with walls not thinner than 0.065 inch, 0.375 inch or more but not over 16 inches in outside diameter, conforming to API specifications for line pipe, provided for in items 610.3208 and 610.3209 of the TSUSA.

[6] Vice Chairman Susan W. Liebeler and Commissioner Anne E. Brunsdale make negative determinations.

[7] Commissioners Alfred E. Eckes and David B. Rohr dissent, finding threat of material injury. They would not have found material injury but for any suspension of liquidation of entries of the subject merchandise.

D.O. Industries, Inc., 317 East Chestnut Street, East Rochester, New York 14445.

(c) Steven H. Schwartz, Esq., and Gary Rinkerman, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 701 E Street NW., Room 124 and Room 128, respectively, Washington, DC 20436, shall be the Commission investigative attorneys, a party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding administrative law judge.

Responses must be submitted by the named respondents in accordance with section 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules (19 CFR 201.16(d) and 210.21(a)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, DC 20436, telephone 202–523–0471. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Issued: May 1, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–55 (Sub-176X)]

Seaboard System Railroad, Inc., Exemption; Abandonment in Anderson County, SC.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Commission exempts from the requirements of prior approval under 49 U.S.C. 10903, *et seq.*, the abandonment of 1.76 miles of railread by Seaboard System Railroad, Inc. at or near Anderson, SC, subject to standard labor protective conditions.

DATES: This exemption is effective on June 5, 1986. Petitions to stay must be filed by May 17, 1986, and petitions for reconsideration must be filed by May 27, 1986.

ADDRESS: Send pleadings referring to Finance Docket No. AB–55 (Sub-No. 176X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423 and

(2) Petitioner's represenative: Charles M. Rosenberger, 500 Water Street, Jacksonville, FL 32202.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free (800) 424–5400.

Decided: April 29, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

Job Training Partnership Act: Semiannual Status Report for Titles II–A and III Programs, and Title II–B Summer Performance Report

AGENCY: Employment and Training Administration

ACTION: Notice of Revised Seniannual Status Report for Titles II–A and III, and Title II–B Summer Performance Report.

SUMMARY: The Department of Labor is issuing semiannual reporting requirements for programs under Titles II–A and III of the Job Training Partnership Act, revising the previous annually—submitted JQSR, and issuing a new Title II–B Summer Performance Report which conbines former JQSR data on Title II–B enrollment and spending with data on the characteristics of participants served.

The Title II–A and III report has also been revised to provide needed detail on the use of the 22% State setaside funds under Title II–A, and to present separate Statewide enrollment and spending information for Title III Displaced Worker formula programs, and Title III National Reserve programs.

EFFECTIVE DATE: July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Robert N. Colombo, Telephone (202) 376–6093.

SUPPLEMENTARY INFORMATION: On January 14, 1986, a document was published in the **Federal Register** at Volume 51, pages 1568–76, announcing proposed replacement of the Job Training Partnership Act quarterly status report (referred to as the JQSR) with a semiannual report (referred to as the JSSR). Since Program Year 1984, submission on the JQSR has been required only annually; in proposing revisions to the report content, the report was retiled to conform with scheduled submissions. Also, the document proposed the initiation of a once-per-year report on the statewide characteristics of participants served by the Title II–B Summer Program. Interested parties were invited to submit written comments through February 3, 1986. At the same time, the proposed revisions were forwarded to the Office of Management and Budget (OMB) for review pursuant to the Paperwork Reduction Act. The purpose of this notice is to advise the system of the nature of the comments received and the final action taken pursuant to the OMB review.

A. Authority and Purpose of the JTPA Semiannual Status Report and Title II–B Summer Performance Report Requirements.

Reporting instructions are necessary to comply with the Job Training Partnership Act's (JTPA's) provisions regarding the Secretary's responsibilities and authorities for program recordkeeping and reportng as indicated below:

• *Section 165—Reporting, Recordkeeping, and Investigations.* This section authorizes the Secretary to direct recipients to maintain records of expenditure that are sufficient to permit the preparation of required reports. Also, each recipient is to maintain records of program performance in such a way as to enable it to submit report as required by the Secretary. Section 165 requires that all recipients and subrecipients design and utilize Management Information System (MIS) to facilitate compilation of statewide programmatic and financial data necessary for reporting purposes.

• *Section 169—Administrative Provisions.* The Secretary is directed at (d)(1) to submit an annual report to the Congress summarizing the achievements of JTPA programs. Such a report will necessarily depend on and include data on performance of the entire JTPA block grant to each State.

• *Section 301—Employment and Training Assistance for Dislocated Workers.* The Secretary is authorized to reallot any amount of a State's Title III allotment to the extent that the Secretary determines that the State will not be able to obligate the funds within one year of allotment.

The basis for determining the first general revision and extension of current March 1983 program reporting requirements included:

• The Department's review of the experience and performance of the JTPA system after the completion of the first full program year (PY 1984), with attention to those areas where there were important gaps in the Department's knowledge about how the system faired in meeting certain statutory requirements.

• The necessity for more up-to-date and detailed information for the Department in the context of the revised Federal budget process. The current era of fiscal restraint makes this information, its accuracy and timeliness critical to all actors in the process. Due to the enactment of the Balanced Budget and Emergency Deficit Control Act, the schedule for the development of the FY 1988 Budget has been moved up by approximately one month at all stages.

• Requests made for information on JTPA program enrollment and expediture during congressional oversight, which identified areas where the existing reporting data base and sample tracking studies did not provide a sufficient foundation for responding to inquiries.

B. Reasons for the Revisions

These revisions are being made for several reasons:

• The Department's decision to place Title II–A and Title III programs on a semiannual expenditure reporting basis resulted from a review of the present system indicating that many of the budget pressures now faced were not anticipated when an annual JQSR submission was authorized starting with PY 1984 §629.36 of March 15, 1983 *Regulations).* Since each JTPA program year is forward-funded, the last available PY annual report data which can be used to respond to inquiries from Congress during its budget review is presently two years prior to the program year under consideration. Implementation of semiannual reporting will update the data base by six months, and provide a more adequate basis for the Department's budget recommendations, and for review by all parties to the Federal budget process. Semiannual reporting and the addition of the proposed expenditure detail will also give the Department information on expenditure rates among States and programs under the Act.

• Currently, the Department has incomplete information on how States utilize funds under the four setasides defined by section 202(b) of the Act. Information on expenditure of, and actual uses for section 202(b)(2)(A) performance incentive/TA funds has been a recurring issue. The Department has no information from the JQSR on expenditure of the 8% education and 3% older worker setasides. Information on 6% funds has been partial, only. The Department receives no information on levels of praticipation under Title II–A 8% and 3% setside programs. Current annual JQSR data aggregates these participants with those statewide SDA programs.

• The Department is responding to field reviews and to Congressional oversight revealing that some States have experienced difficulty in satisfying the 40% youth expenditure requirement of section 203(b) of the Act, by incorporating a separate line in the JSSR to track this program area.

• In the interest of minimizing the reporting burden on States of proposed semiannual reports, it was decided to require submission of JSSR Section III, "Participation and Termination Summary", only once per Program Year in the JSSR submitted after the fourth quarter. The report required after the second quarter will include semiannual expenditure detail, only (Sections I and II of the JSSR format).

• The Department has clarified Title III reporting issues by breaking out State Formula and National Reserve Title III programs on the JSSR format. This will allow for more informed analysis of Title III expenditure and performance by State, Federal, and Congressional decisionmakers, in considering budget and grant award options, and in improving performance where actual expenditures for displaced worker training and services have lagged despite plans and contract obligations.

• It was decided to remove from the new JSSR the once-pay-per-PY information on Title II–B Summer Youth Employment and Training Programs (SYETP), submitted currently on the JQSR form, and move this data on program enrollment and spending to the new Statewide Characteristics Summer Report (SCSR) format proposed in the January 14, 1986 Register Notice. Accordingly, the Title II-B cloumn has been removed from the JSSR, and incorporated with the proposed SCSR's data onto a new form, entitled "JTPA Summer Performance Report" (referred to as the JSPR). The JSPR consists of a total of 21 items divided into Section I "Program Expenditure Summary," Section II "Statewide Participation Summary", and Section III "Characteristics Summary". The program expenditures summary includes the same reporting items for total Title II–B expenditures, and separate breakouts of training, participant support and administrative expenses as found on the March 1983 JQSR.

This corrects an error made in the January 14, **Federal Register** Publication, in which lines for reporting Title II–B training and participant support had been inadvertantly deleted.

C. Discussion of Comments

There were 20 letters of comment received within the comment period. Several additional comments received after the deadline were reviewed and considered to the extent possible. The position of the Department following review with OMB is indicated below and reflected in the reporting instructions as appropriate:

General Issues Raised by Comments on Program Reporting Changes

A large majority of commenters were strongly supportive of the proposed semiannual and summer reports, indicating that the information requested and frequency of reporting seemed reasonable and would not require major changes in State/SDA fiscal and management information systems. Several commenters mentioned specifically their past concerns that the Department and Congress had in fact insufficient information at the national level to give an accurate assessment of how the JTPA system was performing.

VOL 51 ISS 88 MY 7 1986 UMI

Four commenters urged the Department to standardize treatment of dual enrollments under separate JTPA titles in program reports. One suggestion offered has been adopted in a revised definition of participant. For enrollment reporting purposes, funds must be expended under both titles for services given an individual during the reporting period for that individual to be properly counted as a participant simultaneously under both titles. Instructions for reporting SDA enrollments under 78% funding, with separate reporting lines on the JSSR for 3% older worker and 8% state education setaside program enrollments, deal with the main possibility for double-counting under Title II-A.

Responding to requests for standardization, the definition of participant has been reworded to be identical for JSSR enrollment and JTPA Annual Status Report (JASR) purposes.

Two commenters recommended that the JSSR incorporate information on State obligation of funds, in addition to information on State expenditures. Since the Department does not require State plans for obligation of annual allocations, there is no way this information could be evaluated if collected. The Department recognizes that procurement and obligation cycles and procedures vary from State to State, and are often continuous during the Program Year for some types of training, (in on-the-job training, for example).

Due dates for the Title II-A and III JSSR and the once-per-Program Year Title II-B JSPR have been corrected in reporting instructions. The request of one State for extended reporting deadlines was considered carefully in light of the difficulties some States have experienced with collection of data from the substate level in order to make timely submissions. Although the Department will continue to review this issue, it does not at present see that there is sufficient latitude in the Department's own schedule in answering Congressional and budget information requests to change State report due dates. To clarify, the JSSR will be submitted twice per program year. The performance standard-related JASR will continue to be required after the close of each program year and does not substitute for an end-of-year JSSR enrollment and expenditure report.

Two commenters, including one that endorsed proposed reporting changes, did express about increased costs and complexity. Although a number of commenters indicated specifically that proposed reports would not require changes in management information systems currently used to administer their programs, the Department recognizes that in some cases systems revisions will be necessary. The Department believes that this Notice will provide adequate time for these changes to be designed using existing staff and resources prior to implementation in PY 1988.

Finally, one commenter cautioned against making projections from the mid-PY JSSR by a simple doubling method. The Department understands the impact of final SDA billings for fixed unit price contracts on second versus first half of year expenditure rates, and will take this and other expenditure trend data into account in making expenditure and budget projections from mid-year reports.

JSSR—Related Issues

One commenter termed the semiannual JSSR cycle "a step in the right direction", observing that "data which are not current do not enable us to make informed decisions". A number of commenters endorsed improvements in detail on the 22% setaside programs, particularly enrollment and expenditure on Title II-A 3% and 8% programs. Two commenters did, however, express concerns about 3% and 8% data and the use to which national compilations might be put. The Department is aware that these setaside programs operate under different goals and designs among the States and will not interpret the data using assumptions of a national prototype. This reporting is instituted to correct a situation where the Department had no measures of utilization, as it does for the rest of the States' Title II-A program. While within-state MIS requirements for setaside activities may vary as they do for SDA-78% activities, standard guidelines for national reporting purposes are provided by the JSSR instructions. One further clarification is that all funds expended under each setaside during the program year, including funds carried in from a prior year allocation, are reported as they would be on the 7% SDA reporting line.

Five commenters addressed 6% Title II-A performance incentives/technical assistance (TA) expenditure reporting. Again, to clarify treatment of prior-year carry-in, JSSR entries on line 7 (Offset Planning Figure Box) and line 8 (Accrued Expenditures of 6% Funds for Technical Assistance) will include 6% carry-in planned to be expended for TA during the Program Year, and actual expenditures for TA through the report period. As with the previous JQSR report, funds given to SDA's as incentive bonuses for meeting or exceeding performance standards are reported on SDA expenditure lines. Incentive funds spent in serving youth are also included in line 12 "Special Breakout of Total Program Expenditures for Youth". Reporting of 6% funds also raised questions regarding applicable JTPA requirements. Section 202(b)(3)(B) of the statute sets forth the purpose of, and basic methodology for making incentive grants to SDA's, indicating that if the full amount of this setaside is not needed for incentive grants, then the balance is to be expended for technical assistance. Administrative cost limitations for 6% funds are presented in 20 CFR 629.39(b), and (c), and (d) (March 15, 1983 *JTPA Regulations*). The new JSSR format will allow States and the Department for the first time to identify the uses to which 6% funds are put.

Two commenters raised points about reporting of Title II–A expenditures to serve youth, on line 12 of the JSSR. Instructions reference the "40%" requirement found in section 208(b) of the statute. While section 203 (c) defines youth as ages 16 through 21, section 205 (c)(1) authorizes youth ages 14 and 15 to be served by Exemplary Youth Programs. Expenditures to serve 14 and 15 year olds in these Special Title II–A programs should be include in the "Total Program Expenditures for Youth" breakout, line 12 on the JSSR form. This clarification conforms instructions for the JSSR 40% compliance measure with JASR instructions on reporting expenditures for performance standard purposes.

Several commenters welcomed the separation of State Title III Formula programs from Title III National Reserve Programs on the new JSSR format.

Summer Youth Reporting Issues

Nearly all commenters on proposed characteristics reporting for State Title II–B Summer Youth Employment and Training Programs believed that information on youth served will be of benefit to the program. Two commenters suggested the addition of characteristics categories for youth offender, and member of a household receiving welfare. Weighing the utility of the data elements proposed and the length of the characteristics list, the Department decided against increasing categories. State laws define juvenile offenders using varying criteria, and the category "Single Head of Household with Dependent Children Under 18" presently on the characteristics list measures many of the participants who come from households receiving welfare. Responding to commenters' notes, the reporting item "High School Graduate, or Equivalent" has been clarified.

Finally, several commenters inside the Department pointed out that the Title II–B column of the January 14 proposed JSSR showed expenditure reporting items for training and participant support blocked out. Since these reporting items had been deleted through an oversight and the Department has been requested to report this detail to Congress on each year's summer program under JTPA, the revised Title II–B JSPR format includes them under Section I. "Program Expenditures Summary".

D. Contingency Approval From OMB.

The authority for submission of the JTPA Semiannual Status Report (JSSR) for the initial six months of PY 1986 is contingent upon final approval and publication of the revision to 20 CFR 629.36 regarding frequency of reports. (The revision was published "proposed" in the Federal Register on February 7, 1986.)

Paperwork Reduction Act of 1980

The appendix to this notice has been reviewed in accordance with the Paperwork Reduction Act by the Office of Management and Budget and approved for the period through December 31, 1988 (OMB No. 1205–0200).

Signed at Washington, DC, this 23rd day of April, 1986.

Roger D. Semerad,

Assistant Secretary of Labor.

Appendix—JTPA Semiannual Status Report (JSSR)

1. *Purpose.* The JTPA JSSR displays summary cumulative data on participation and program costs. The information will be used to determine levels of program service and expenditures.

These reporting requirements have been approved by the Office of Management and Budget (OMB) according to the Paperwork Reduction Act of 1980 under OMB Approval No. 1205–0200.

2. *General Instructions.*

a. A single JSSR covering Title II–A and Title III programs will be submitted by the Governor on a statewide basis. Entries are to be *cumulative* for the specified program year to date. Each report period begins on the start date of each JTPA program year, as stated in Section 161 of the Act. Reports are due in the National Office no later than 45 days after the end of the second and fourth quarters (i.e., submitted no later than February 15 and August 15). On the end-of-second quarter report, only Sections I and II of the JSSR must be completed (please see Instructions which follow).

b. Two copies of *each* JSSR are to be provided to:

Employment and Training Administration, U.S. Department of Labor,
ATTENTION: TVSR—Room S–5306 200 Constitution Avenue, NW.
Washington, DC 20210

c. An additional copy of *each* JSSR is to be provided to the appropriate Regional Administrator for Employment and Training in the DOL Regional Office that includes the State in which the JTPA recipient is located.

3. *Facsimile of Form.* See the following page.

4. *Instructions for Completing the JTPA Semiannual Status Report.*

a. *Recipient's Name and Address.* Enter the name and address of the recipient.

b. *Recipient's Grant Number.* Enter the recipient's grant number, as assigned by ETA in a separate issuance.

Column Heading

Column A

Record in this column information regarding specified expenditures of all *Title II–A* funds (Sec. 202(a) and Sec. 202(b)) and all participants in Title II–A and 202(b)(1) and (2) activities.

Column B

Record in this column information regarding specific expenditures all *Title III* Formula Allocation Federal funds (Sec. 301(b)) and all participants in Title III formula-funded activities.

Column C

Record in this column information regarding specified expenditures of Title III National Reserve Federal funds (Sec. 301(a)) and all participants in Title III National Reserve-funded projects.

Section I—Program Expenditures Summary

This information is to be completed on the State report for the end of the second quarter, and the report for the end of the fourth quarter.

The JSSR will be compiled on an accrual basis. If the recipient's accounting records are not normally maintained on an accrual basis, the accrual information should be developed through an analysis of the records on hand or on the basis of best estimates.

Item I.A. Total Program Expenditures (Federal Funds)

Enter total actual accrued expenditures for Title II–A (including setaside funds) and III of the State or recipient's program, through the end of the report period, in Columns A, B, and C, as appropriate, for *all* participants served under that title. Entries will be made to the nearest dollar.

Col. A., Items I.A.1., a., b., c.

Enter actual accrued expenditures of the 78% allotment funds allocated to service delivery areas (SDAs) under Sec. 202(a) of the Act, plus all funds distributed by the Governor to SDAs under Sec. 202(b) of the Act for *performance incentives*, and expended by SDAs in each of the following three categories (20 CFR 629.38, 629.39, 630.2):

Item I.A.1.a. Training
Item I.A.1.b. Participant Support
Item I.A.1.c. Administration

(Refer to Classification of Costs in the JTPA Regulations.)

Cols. B. and C., Items I.A.1.a., b., c.

Enter total statewide accrued expenditures of all Section 301, Formula (Col. B.), and Sec. 301 National Reserve (Col. C.) funds received by the Governor, under each of the following three categories (20 CFR 631.13):

Item I.A.1.a. Training
Item I.A.1.b. Participant Support
Item I.A.1.c. Administration

Col. A., Item I.A.2.

Enter total statewide accrued expenditures of all Sec. 202(b) setaside funds (lines (b), (c), (d) and (e)). Note: Include here setaside funds (other than Performance Incentive funds) distributed by the Governor to the SDAs and other service deliverers.

Col. A., Item I.A.2.a. Offset Planning Figure Box

Enter the State's Annual Planning target figure of funds reserved under the Sec. 202(b) 6% allocation that have been reserved for technical assistance during the current program year. (This is a non-add item, and therefore is offset from Col. A.)

Col. A., Item I.A.2.b. 6% Funds

Enter total accrued expenditures of all Sec. 202(b)(3)(B) 6% funds for *technical assistance* only.

Col. A., Item I.A.2.c. 8% Funds

Enter total accrued expenditures of all Sec. 202(b)(1) 8% funds for State educational programs.

Col. A., Item I.A.2.d. 3% Funds

Enter total accrued expenditures of all Sec. 202(b)(2) 3% funds for training of older individuals.

Col. A., Item I.A.2.e. 5% Funds

Enter total accrued expenditures of all Sec. 202(b)(4) 5% funds for auditing and State administration.

Section II—Expenditures for Youth (Special Breakout)

Col. A., Only (line 12)

This information is to be completed on the State report for the end of the second quarter, and the report for the end of the fourth quarter.

Enter total accrued expenditures of *all* Title II–A (Section 202(a)) funds for services to eligible youth, pursuant to Sec. 203(b) of the Act. Include any funds expended to serve youth ages 14 and 15 in exemplary youth programs authorized under Sec. 205(c)(1).

Section III—Participation Summary

This information is to be completed on the State report for the end of the fourth quarter, only [the report due to ETA no later than August 15).

Cols. A., B., C., Item III.A. Total Participants (cumulative)

Enter the total number of participants who are or were receiving employment, training, or services (except post-termination services) funded under that program title through the end of the fourth quarter, including both those on board at the beginning of the designated program year and those who have entered during the program year.

"Participant" means any individual who has: (1) Been determined eligible for participation upon intake; and (2) started receiving subsidized employment, training, or services (except post-termination services) funded under the Act, following intake. Individuals who receive *only* outreach and/or intake and assessment services or post-program follow-up are excluded.

Participants who have transferred from one Title to another, or between Title III Formula programs and National Reserve funded programs, should be recorded as terminations from the Title or program of initial participation and included as participants in the Title or program into which they have transferred.

Col. A., Item III.A.1.

Enter the total number of participants served by SDAs with 78% allotment funds under Sec. 202(a), plus funds distributed by the Governor to SDAs under Sec. 202(b) for performance incentives.

Col. A., Items III.A.2. and III.A.3. Setaside Participation Detail

Enter the total number of participants served by the Sec. 202(b)(1) 8% State education setaside, and the Sec. 202(b)(2) 3% older worker training setaside.

Cols. A., B., C., Item III.B. Total Terminations (Cumulative)

Enter by column the total number of participants terminated after receiving employment, training, or services (except post-termination services) funded under that program title, for any

reason, from the beginning of the program year through the end of the fourth quarter.

"Termination" means the separation of a participant from a given title of the Act who is no longer receiving employment, training, or services (except post-termination services) funded under that title.

Note.—Individuals may continue to be considered as participants for a single period of 90 days after last receipt of employment and training funded under a given title. During the 90-day period, individuals may or may not have received services.

Col. A., Item III.B.1.

Enter the total number of participants who have left SDA programs through the end of the fourth quarter which were funded by Sec. 202(a) 78% allotment funds plus Sec. 202(b) performance incentive funds.

Col. A., Items III.B.2. and III.B.3. Setaside Participant Detail

Enter the total number of participants who have left programs through the end of the fourth quarter which were funded by the Sec. 202(b)(1) 8% State education setside, and the Sec. 202(b)(2) 3% older worker training setaside.

JTPA Summer Performance Report (JSPR)

1. *Purpose.* The JTPA once-per-program year Summer Performance Report (JSPR) displays cumulative data on program costs, and on the characteristics of youth who participated in the Title II–B SYEP program throughout the State. This information will be used to determine levels of program service and expenditures, to give the Department information on who is served by the program and to respond to Congressional oversight.

2. *General Instructions.*

a. A single JSPR will be submitted by the Governor on a statewide basis, 45 days after the end of summer program report period on September 30, i.e., no later than November 15. Two copies of the JSPR are to be provided to:

Employment and Training Administration, U.S. Department of Labor
ATTENTION: TVSR—Room S–5306, 200 Constitution Avenue, NW., Washington, DC 20210

An additional copy of JSPR is to be provided to the appropriate Regional Administrator for Employment and Training in the DOL Regional Office that includes the State in which the JTPA recipient is located.

3. *Facsimile of Form.* See the following page.

4. *Instructions for Completing the JTPA Semiannual Status Report.*

a. *Recipient's Name and Address.* Enter the name and address of the recipient.

b. *Recipient's Grant Number.* Enter the recipient's grant number, as assigned by ETA in a separate issuance.

c. *Report Period.* Enter in "From" the beginning date of the designated JTPA Title II–B report year, i.e. October 1, and enter in "To" the ending date of the report period, as specified above.

LINE ITEM DEFINITIONS AND INSTRUCTIONS

Section I—Program Expenditures Summary

The JSPR will be compiled on an accrual basis. If the recipient's accounting records are not normally maintained on an accrual basis, the accrual information should be developed through an analysis of the records on hand or on the basis of best estimates.

Line 1. Total Title II–B Expenditures (Federal Funds)

Enter total actual accrued expenditures of all Title II–B funds (Sec. 251) by the SYETP program statewide through the closing date of the summer program for *all* participants served. Entries will be made to the nearest dollar.

Lines 2., 3., and 4

Enter the actual accrued expenditures statewide of all Title II–B SYETP funds expended in each of the following time categories (20 CFR 629.38, 629.39, 630.2):

Line 2. (a) Training
Line 3. (b) Participant Support
Line 4. (c) Administration

(Refer to classification of costs in the JTPA regulations.)

Section II—Statewide Participation Summary

Line 5. Total Participants

Enter the total number of participants who were receiving employment, training or services (except post-termination services) funded under Title II–B through the closing date of the summer program, i.e., those who have entered during the program's duration.

"Participant" means any individual who has: (1) been determined eligible for participation upon intake; and (2) started receiving subsidized employment, training, or services (except post-termination services) funded the Act, following intake. Individuals who receive *only* outreach and/or intake and assessment services or post-program follow-up are excluded.

Section III—Characteristics Summary

Sex

Line 6. Male
Line 7. Female

Distribute the participants by line according to sex. The sum of Lines 6. and 7. should equal Total Participants as shown on Line 5.

Age

Line 8. 14–15
Line 9. 16–17
Line 10. 18–21

Distribute the participants by line according to the proper age breaks. Lines 8., 9., and 10. should equal Total Participants (Line 5.).

Education Status

Line 11. School Dropout
Line 12. Student
Line 13. High School Graduate, or Equivalent, and above.

Distribute the participants by line according to education status. The sum of Lines 11., 12., and 13. should equal Total Participants (Line 5.).

Family Status

Line 14. Single Head of Household with Dependent Children under 18. Enter the number of participants for whom the above Family Status classification applies.

Race/Ethnic Group

Line 15. White (Not Hispanic)
Line 16. Black (Not Hispanic)
Line 17. Hispanic
Line 18. American Indian or Alaskan
Line 19. Asian or Pacific Islander

Distribute the participants by line according to the Race/Ethnic Groups listed above. For the purposes of this report, Hawaiian Natives are to be recorded as "Asian or Pacific Islander." The sum of Lines 15. through 19. should equal Total Participants (Line 5.).

Other Barriers to Employment

Line 20. Limited English Language Proficiency
Line 21. Handicapped

Enter the total number of participants in each line for whom the above-listed Barriers to Employment apply.

Appendix B—Definitions of Terms Necessary for Completion of Reports

Employment/Training Services

Assessment—services are designed to initially determine each participant's employability, aptitudes, abilities and interests, through interviews, testing and counseling to achieve the applicant's employment related goals.

Follow-Up—is the collection of information on a terminee's employment situation at a specified period after termination from the program.

Intake—includes the screening of an applicant for eligibility to determine: (1) Whether the program can benefit the individual; (2) the employment and training activities and services which would be appropriate for that individual; (3) availability of an appropriate employment and training activity; (4) a decision on selection for participation and (5) dissemination of information on the program.

Outreach—activity involves the collection, publication and dissemination of information on program services directed toward economically disadvantaged and other individuals eligible to receive JTPA training and support services.

Education status

School Dropout—An adult or youth (aged 14–21) who is not attending school full-time and has not received a high school diploma or a GED certificate.

Student—An adult or youth (aged 14–21) who has not received a high school diploma or GED certificate and is enrolled full-time in an elementary, secondary or post-secondary level vocational, technical or academic school or is between school terms and intends to return to school.

High School Graduate, or Equivalent and Above—A youth (aged 14–21) who has received a high school diploma, GED Certificate or has attended (or is attending) any post-secondary-level vocational, technical, or academic school.

Family Status

Single Head of Household—A single, abandoned, separated, divorced or widowed individual who has responsibility for one or more dependent children under age 18.

Race/Ethnic Group

White (not Hispanic)—A person having origins in any of the original peoples of Europe, North Africa, or the Midle East.

Black (not Hispanic)—A person having origins in any of the black racial groups of Africa.

Hispanic—A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin (including Spain), regardless of race.

Note.—Among persons from Central and South American countries, only those who are of Spanish origin, descent, or culture should be included in the Hispanic category. Persons from Brazil, Guiana, and Trinidad, for example, would be classifed according to their race, and would not necessarily be included in the Hispanic category. Also, the Portugese should be excluded from the Hispanic category and should be classified according to their race.

American Indian or Alaskan Native—A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander—A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent (e.g., India, Pakistan, Bangladesh, Sri Lanka, Nepal, Sikkim, and Bhutan), or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, and Samoa. Hawaiian natives are to be recorded as Asian or Pacific Islanders.

Other Barriers to Employment

Limited English Language Proficiency—Inability of an applicant, whose native language is not English, to communicate in English, resulting in a job handicap.

Handicapped Individual—Refer to Sec. 4(10) of the Act. Any individual who has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment. NOTE: This definition will be used for performance standards purposes, but is not required to be used for program eligibility determination (Sec. 4(8)(E)).

[FR Doc. 86–10202 Filed 5–6–86; 8:45 am]
BILLING CODE 4510–30–M

NUCLEAR REGULATORY COMMISSION

Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations; Bi–Weekly Notice

I. Background

Pursuant to Public Law (Pub. L.) 97–415, the Nuclear Regulatory Commission (the Commission) is publishing this regular bi-weekly notice. Pub. L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This bi-weekly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last bi-weekly notice which was published on April 23, 1986 (51 FR 15391) through April 28, 1986.

Notice of Consideration of Issuance of Amendment To Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comment should be addressed to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice.

By June 6, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

BEST COPY AVAILABLE

VOL 51 ISS 88 MY 7 1986 UMI

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amedment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provide that its final determination is that the amendment involves no significant hazards consideration. The final determinaton will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide the opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call toWestern Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Project Director):* petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specifies in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Baltimore Gas and Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendment requests: October 25, 1985 and December 22, 1983 as supplemented by letters dated April 21, 1986.

Description of amendment request: The proposed amendment would change the Unit 1 and Unit 2 Technical Specification (TS) as follows: (1) a provision would be added to TS 3.6.5.1, "Combustible Gas Control-Hydrogen Analyzers," to allow the changing of operational Modes with inoperable hydrogen analyzers (3.0.4 not applicable), (2) the reporting requirements of TS 4.4.5.5, "Reports-Steam Generators" would be clarified, and (3) a new TS 3/4.4.13, "Reactor Coolant System Vents" would be incorpoated in the TS.

Issuance of the above proposed TS would complete NRC action on the applications dated October 25, 1985 and December 22, 1983.

Basis for proposed no significant hazards considerotion determination: BG&E has proposed a change to TS 3.6.5.1 to allow the changing of operational Modes with inoperable hydrogen analyzers. The purpose of the hydrogen analyzers is to sample the containment atmosphere, following a loss-of-coolant accident (LOCA), in order to determine the need for hydrogen reduction (via hydrogen recombiners or venting.) At the present time, TS 3.0.4 is applicable to TS 3.6.5.1 which means that the reactor cannot change operational Modes (for example, the reactor could not start up if already shutdown) should a hydrogen analyzer become inoperable. BG&E proposes that the statement "Specification 3.0.4 is not applicable to this requirement" be added to TS 3.6.5.1.

The proposed change to TS 3.6.5.1 would not involve a significant increase in the probability or consequences of an accident previously evaluated. In this case, the changing of operational Modes (for examle, a startup of the reactor) does not significantly increase the likelihood of a LOCA and no change in the consequence of a LOCA would be involved. The proposed change in TS 3.6.5.1 does not create the possibility of a new or different kind of accident from any accident previously evaluated. The remedial action requirements of TS 3.6.5.1 were selected to assure that a hydrogen analyzer capability would be available in the event of a LOCA. The proposed change to the TS 3.6.5.1 does not change any remedial action requirements. Finally, the proposed change to TS 3.6.5.1 does not reduce any safety margins since no decrease in the availability or capability of the hydrogen analyzers is involved.

Based upon the above, the Commission proposes to detrmine that the proposed change to TS 3.6.5.1 involves no significant hazards considerations.

BG&E has proposed changes to TS 4.4.5.5 to clarify reporting requirements associated with steam generator tube inspections. Sepcifically, the following clarifications have been proposed: (1) the 15 day reporting requirement of TS 4.4.5.5a would be cross-referenced to the special reporting requirements of TS 6.9.2; (2) the annual operating report requirements of TS 4.4.5.5b would be cross-referenced to the annual operating report requirements of TS 6.9.1.5b; (3) the 30 day reporting requirement of TS 4.4.5.5c would be cross-referenced to the special reporting requirements of TS 6.9.2: and (4) the telephone reporting requirement of TS 4.4.5.5c would be corrected by removing the cross-reference to 6.9.2, since these are written reporting requirements. The proposed change to TS 4.4.5.5c would also identify the recipient of the telephone report as the Regional Administrator since the Regional Administrator is the recipient of other, similar, reports. The proposed changes to TS 4.4.5.5 would clarify the associated reporting requirements and reduce the likelihood of errors in the preparation and submittal of reports.

On April 3, 1983, the NRC published guidance in the **Federal Register** (48 FR 14870) concerning examples of amendments that are not likely to involve a significant hazards considerations. One example provided in 48 FR 14870 of amendments not likely to involve significant hazards considerations is example (i) which provides for "A purely administrative change to technical specifications: For example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." The proposed change to TS 4.4.5.5 helps to assure consistency within the TS and

BEST COPY AVAILABLE

thus the Commission proposes to determine that the proposed changes involve no significant hazards considerations.

BG&E has proposed adding a new TS for the reactor coolant system (RCS) high point vents to the existing TS. On November 1, 1983, the NRC issued Generic Letter No. 83–37 (GL 83–37) to all pressurized water reactor licensees. This letter contained guidance concerning TS which the NRC believed to be appropriate as addressed in NUREG–0737, "Clarification of TMI Action Plan Requirements". BG&E responded, in part, to GL 83–37 via their application for license amendment dated December 22, 1983 concerning the RCS High Point Vents. These vents, installed in the reactor vessel head and the pressurizer vapor space, would allow post-LOCA venting of non-condensible gases to enhance reactor core cooling via natural circulation. Following discussions with the NRC staff, BG&E supplemented their application by letter dated April 21, 1986.

BG&E's proposed TS for the RCS vents conform substantially to the model TS provided in GL 83–37. One area of difference is that BG&E's proposed TS allow use of the pressurizer power operated relief valves (PORCs) as a backup to the pressurizer high point vent. As indicated in BG&E's letter of April 21, 1986, the PORVs conform to most of the high point vent requirements in NUREG–0737 and thus represent an appropriate alternate pressurizer vent capability should the pressurizer high point vent become inoperable.

One example (ii) provided in 48 FR 14870 of a change not likely to involve significant hazards considerations involves a change ". . . that constitutes and additional limitation, restriction, or control not presently included in the technical specification. . . . " Since the proposed TS represent additional limitations not previously in the TS, these proposed changes are consistent with example (ii). Accordingly, the Commission proposes to determine that these proposed changes to the TS which provide new TS for the RCS high point vents involve no significant hazards considerations.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for licensee: Jay E. Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: Ashok C. Thadani.

Baltimore Gas and Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of amendment request: January 20, 1986 (partial response) as supplemented by letter dated April 25, 1986.

Description of amendment request: The proposed amendments would change the Unit 1 and Unit 2 Technical Specification (TS) as follows: (1) TS 4.7.1.2c.2, "Auxiliary Feedwater System," would be changed to reflect a revised flow test requirement. In addition, a typographical error would be corrected (Unit 2 only); (2) TS 4.7.8.1, "Snubbers" would be changed to subdivide the snubber surveillance population based upon snubber type; and (3) TS 4.9.12d.2, "Spent Fuel Pool Ventilation System," would be changed regarding the demonstration of negative pressure during system operation. Consideration of the above changes to the Unit 1 and Unit 2 TS is in partial response to the application dated January 20, 1986; the remaining issues associated with this application will be addressed in future correspondence.

Basis for proposed no significant hazards consideration determination: BG&E has proposed a change to TS 4.7.1.1.2c.2 and the associated Bases that would increase the 18 month demonstrated auxiliary feedwater (AFW) flow from 200 gpm to 300 gpm. A footnote would also be added which would clarify the flow requirement to indicate that the ". . . surveillance may be performed on one flow leg at a time." A flow leg is a flow path leading from the discharge of an AFW pump to one of two steam generators. The existing TS 4.7.1.2c.2 requires demonstration of ". . . a minimum of 200 gpm nominal flow to each flow leg."

The proposed change to TS 4.7.1.2c.2 and the associated Bases was necessitated by modifications to the motor driven AFW pump recirculation. The pump recirculation provides a flow path to supply cooling water, from pump discharge to the pump intake, the prevent pump damage during the period from initial pump operation to onset of pump flow. The modification to the recirculation path for the motor driven AFW pump allows the automatic recirculation valve to be overriden. In this condition the valve will be in permanent recirculation. The valve was originally installed to decrease the loading on the diesels by eliminating the continuous recirculation from the pump. As the AFW system was tested it became apparent that, with automatic auxiliary feedwater actuation at low steam generator pressure, the recirculation valve and flow control valves were causing a flow instability problem.

Corrective actions for the AFW flow instability problem are relatively straightforward; however, their impact on emergency diesel generator loading has had to be closely studied. Placing the automatic recirculation valve in permanent recirculation without restricting delivered flow to the steam generators would cause the pump to require additional power. This increased load would exceed the maximum diesel generator load that has been dedicated to AFW. Therefore, calculations were performed to reanalyze the minimum required long term AFW flowrate. The result of these calculations showed that 300 gpm delivered to a single steam generator, or distributed between both steam generators, is sufficient to remove decay heat from the primary system from full-power post trip conditions to a primary system temperature of 300 °F, after which shutdown cooling can be used to continue the cool-down process. The above assumes that off-site power has been lost. Previous calculations had indicated that a minimum AFW flow of 400 gpm was required. The 300 gpm value was attained by crediting initiation of charging flow (one pump) at 60 minutes, reanalyzing the reactor coolant system (RCS) heat capacity, and applying ANS–5 1971 for decay heat loads (as permitted by 10 CFR Part 50, Appendix K). With this AFW delivered flow, all decay heat can be removed and the RCS cooled down to less than 300 °F from normal operating conditions in the event of a total loss of offsite power. This cooldown is accomplished within the 6 hour criteria of the Calvert Cliffs FSAR Section 10.3.2.

The output of the AFW system is not limited to the capacity of the motordriven AFW pump. In addition to the 300 gpm provided by the motor-driven AFW pump, two steam turbine driven AFW pumps are available, each with a design flow of 700 gpm at 2,490 feet total dynamic head (TDH). In addition, should a motor-driven AFW pump become inoperable, the motor-driven AFW pump from the unaffected unit can be cross-connected to provide additional flow capability. However, the demonstration that the motor-driven AFW pump, alone, is sufficient to cool down the RCS to 300 °F, maintains the motor-driven pump as a 100% capacity component and represents the principal motivation of the licensee for recalculation of the required AFW flow rate.

VOL 51 ISS 88 MAY 7 1986 UMI

With the automatic recirculation valve in permanent recirculation, adequate AFW flow is provided to meet the FSAR and TS heat removal bases. Additionally, by imposing maximum flow limit on the motor-driven AFW pump, the design emergency diesel generator loading is not exceeded. Accordingly, the proposed change would not involve a significant increase in the probability or consequence of any accident previously evaluated. Since the proposed TS change assures that no equipment design limits are exceeded and the AFW design flow requirements can be achieved, the proposed TS change would not create the possibility of a new or different type of accident from any accident previously evaluated.

Finally, the proposed TS change does not involve a significant reduction in a margin of safety. Calculations performed indicate that 300 gpm supplied from the motor-driven AFW pump is sufficient to ensure that adequate AFW flow is available to remove decay heat and reduce the RCS temperature to less than 300 °F from normal operating conditions in the event of a total loss of offsite power. The Calvert Cliffs FSAR references Loss of Feedwater (LOFW) and Feedline Break (FLB) as undercooling scenarios. (FLB is not a design bases event for Calvert Cliffs, but it was analyzed for peak RCS pressure and 10 CFR Part 100 boundary dose calculations in association with the addition of automatic initiation of AFW). Undercooling events are of interest since they may be sensitive to AFW flow. For the LOFW event, the FSAR assumes that the Operator initiates AFW flow at 600 seconds with no minimum flow specified. The Operator, as stated in the bases, is assumed to be able to increase or decrease AFW flow to that required by existing plant conditions. Feedline Break is analyzed for peak RCS pressure and credits no AFW flow until well after the peak pressure has occurred. Therefore, this event is not affected by the change in AFW flow. Incorporation of this Technical Specification change, therefore, would not result in a significant reduction in the margin of safety for either of these events. Based upon the above, the Commission proposes to determine that the proposed changes to the TS involve no significant hazards considerations.

BG&E has proposed a change to TS 4.7.1.2c (Unit 2, only) that corrects a typographical error. The TS section designated as 4.7.1.2.c.a should be 4.7.1.2.c.1.

On April 6, 1983, the NRC published guidance in the Federal Register (48 FR 14870) concerning examples of amendments that are not likely to involve a significant hazards consideration. One example provided in 48 FR 14870 of amendments not likely to involve significant hazards considerations is example (i) which provides for "A purely administrative change to technical specifications: For example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." The proposed change to TS 4.7.1.2c would correct an error and thus the Commission proposes to determine that the proposed change involves no significant hazards considerations.

BG&E has proposed a change to TS 4.7.8.1 and the associated Bases in order to differentiate between "types" of snubbers for the purpose of surveillance. At the present time, TS 4.7.8.1. requires a representative sample of 10% of the snubbers to undergo surveillance on a sliding scale, depending on snubber performance, ranging from 18 months (no failures) to 31 days (eight or more failures). Moreover, should a snubber fail the "functional" test, an additional 5% of the snubbers must be functionally tested. BG&E proposes to define snubber "type" as follows: "As used in this specification, type of snubber shall mean snubbers of the same design and manufacturer, irrespective of capacity." The definition of "type" would also be incorporated in the functional test requirements of TS 4.7.8.1c such that snubber failures would result in additional tests for only a particular "type" of snubber rather than the general snubber population.

BG&E currently utilizes two types of hydraulic snubbers, both produced by the same manufacturer (Grinnell). The two types operate similarly in principle, but have different design features (irrespective of capacity related dimension differences). Small bore snubbers installed on various piping systems at Calvert Cliffs have bore sizes that range from 1–½" to 6". All small bore snubbers have the same design valve block and have only one valve block per snubber. The large bore snubbers, installed on the steam generators at Calvert Cliffs, all have 10" bores. The valve blocks on these snubbers are different in design from those on the small bore snubbers. Additionally, there are two valve blocks per snubber.

The differences between these two types of snubbers is apparent upon a review of functional testing load and acceptance criteria. Small bore snubbers are designed for loads up to 72,000 pounds force. The Locking Velocity (LV) and Bleed Rate (BR) acceptance criteria are as follows:

Inches Per Minute (IPM)
LV: 1–40
BR: .25–25 (Adjusted for room temperature)

The large bore snubbers are designed for loads up to 300,000 pounds force.

Their acceptance criteria are much more restrictive:

Inches Per Minute (IPM)
LV: 1.25–1.75
BR: 0.0625–0.1875

Based upon the above, a functional failure in the small bore snubber population is not significant with regard to the large bore snubber population and vice versa.

Although all snubbers at Calvert Cliffs are currently produced by the same manufacturer, Surveillance Requirement 4.7.8.1 was expanded using standard industry phraseology to define "type" as "of the same design and manufacturer." Inclusion of the word "manufacturer" precludes the necessity of a future Technical Specification change should BG&E replace certain snubbers with a different make. The difference between small and large bore hydraulic snubbers is explicity referenced in the proposed TS Bases to prevent interpretive difficulties.

Differentiation by snubber "type" with regard to snubber surveillance has been an NRC position for some time and is reflected in the NRC's Combustion Engineering Standard Technical Specifications.

Based upon the above, we conclude that the proposed change to TS 4.7.8.1 does not involve a significant increase in the probability or consequences of accidents previously evaluated. No modification to plant equipment is made by this proposed change. Each snubber "type" will continue to be inspected in accordance with the existing acceptance criteria in the TS. The proposed change to TS 4.7.8.1 also does not create the possibility of a new or different type of accident from any accident previously evaluated in that it does not involve a change to any component, system alignment, or operating procedure. This proposed change clarifies the current TS wording by recognizing the two "types" of snubbers currently utilized at Calvert Cliffs. This change allows for functional and visual snubber inspection criteria to be applied to each snubber "type" separately. This change does not involve a significant reduction in the margin of safety in that the snubber performance criteria contained in the existing TS for each type are not being altered and thus seismic induced stress margins, associated with components supported by the snubbers, are not reduced.

Based upon the above, the Commission proposes to determine that the proposed change to the TS involves no signficant hazards considerations.

BG&E has proposed a change to TS 4.9.12.d.2, which requires verification that each exhaust fan in the Spent Fuel Pool Ventilation System maintains a negative pressure in the spent fuel storage pool area. Currently, TS 4.9.12.d.2 requires that a "negative pressure greater than or equal to ⅛ inches Water Gauge" be maintained by each exhaust fan. The proposed change would require that a "measureable negative" pressure be maintained by each exhaust fan.

A minimum allowable "measurable negative" pressure will be established for the surveillance and will be controlled administratively. The differential pressure established will be verified, by smoke test of area access doors and hatches, to be negative enough to assure that, where leakage occurs, the air flow path is into the spent fuel pool area.

The reactor containment under refueling conditions and the spent fuel pool area are similar in that, in both cases, the degree of containment is based upon a fuel handling accident (i.e. the dropping of a spent fuel assembly within the refueling/storage pool.) The Bases for TS 3/4.9.4, "Containment Penetrations", states that "The OPERABILITY and closure restrictions are sufficient to restrict radioactive material release from a fuel element rupture based upon the lack of containment pressurization potential while in the REFUELING MODE." Similarly, a fuel handling accident in the spent fuel pool area would not result in a pressurization potential. A "measurable negative pressure" maintained by the spent fuel pool ventilation system is therefore sufficient to assure that any material that is released will be treated by the filters in the ventilation system.

Based upon the above, we conclude that the proposed change to TS 4.9.12.d.2 would not involve a significant increase in the probability or consequences of an accident previously evaluated. The design basis for the Spent Fuel Pool Ventilation System is to ensure that all radioactive material released from an irradiated fuel assembly will be filtered through the HEPA filters and charcoal adsorbers prior to discharge to the atmosphere. The system is assumed to perform this function for a Fuel Handling Incident as mentioned in the FSAR, Section 14.18. A "measurable negative" pressure in the spent fuel storage pool area will continue to assure that air flow is into this area from outside. Therefore, the amount of radioactive material released during a Fuel Handling Incident would not be significantly increased. The proposed change also does not create the possibility of a new or different type of accident from any accident previously evaluated since the change would not modify equipment or permanently change system alignments. The procedural change involved in performing the leakage tests would not create the possibility of a new or different accident since any system alignment changes would be corrected prior to returning the system to operation. Finally, the proposed change would not involve a significant reduction in a margin of safety. This proposed TS would allow fuel movement in the spent fuel storage pool area when pressure is "measurably negative." However, as discussed above, the amount of radioactive material released during potential incidents would not be significantly increased nor would the filter efficiency be changed so no safety margin would be significantly reduced with regard to off-site releases of radioactive material. Based upon the above, the Commission proposes to determine that the proposed changes to TS 4.9.12.d.2 involve no significant hazards considerations.

NRC Project Director: Ashok C. Thadani.

Boston Edison Company, Docket No. 50-293, Pilgrim Nuclear Power Station, Plymouth, Massachusetts

Date of amendment request: February 25, 1986.

Description of amendment request: The amendment would change the Technical Specifications by deleting discontinued American Society of Testing and Materials (ASTM) standard references for diesel fuel oil and replacing them with the current ASTM standard references.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning application of the standards for determining whether license amendments involve significant hazards considerations by providing certain examples (48 FR 14870). An example of an amendment that is considered not likely to involve significant hazards is (i) A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or change in nomenclature.

Updating the references to ASTM diesel fuel oil standards will be simply a change in nomenclature since no change in those standard specifications was made. Thus, the proposed amendment is similar to example (i). The staff has, therefore, made an initial determination that no significant hazard consideration is involved with this amendment request.

Local Public Document Room location: Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Attorney for licensee: W. S. Stowe, Esq., Boston Edison Company, 800 Boylston Street, 36th Floor, Boston, Massachusetts 02199.

NRC Project Director: John A. Zwolinski.

Commonwealth Edison Company, Docket No. 50-249, Dresden Nuclear Power Station, Unit No. 3, Grundy County, Illinois

Date of amendment request: February 21, 1986 as supplemented April 16, 1986.

Description of amendment request: The proposed amendment would change the nuclear limits to reflect the Cycle 10 9x9 reload, incorporate an expanded power/flow operating map, delete the license condition for Single Loop Operation (SLO) and incorporate SLO provisions in the body of the Technical Specifications, incorporate Linear Heat Generating Rate (LHGR) limits for Exxon 8x8 and 9x9 fuel as a limiting condition for operation and incorporate reactor stability monitoring and restrictions on the allowable operating conditions during SLO.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented its determination of no significant hazards consideration as follows:

Commonwealth Edison has evaluated the proposed Technical Specification amendment and determined that it does not represent a significant hazards consideration. Based on the criteria for defining a significant hazards consideration established in 10 CFR 50.92(c), operation of Dresden Unit 3 [in] Cycle 10 in accordance with the proposed amendments will not:

VOL 51 ISS 88 MY 7 1986 UMI

1. Involve a significant increase in the probability or consequences of an accident previously evaluated because:

a. The Exxon 9x9 fuel was first introduced to Dresden 2 Cycle 9 as Lead Test Assemblies (LTA) and these assemblies are currently going through their second cycle of irradiation. The Dresden 3 XN–3 and XN–3A reload fuel is very similar in design to the Dresden 2 LTAs with the exception in the number of water rods and Gadolinia-bearing fuel rods. The XN–3 and XN–3A 9x9 fuel thermal-hydraulic performance falls between that of the ENC [Exxon Nuclear Company, Inc.] 8x8 fuel and the GE 8x8 fuel indicating adequate compatibility for corresidence in the Dresden 3 core. ENC evaluated the XN–3 and XN–3A reload fuel mechanical design using the methodology which has either received prior NRC approval or is currently under NRC review. The transient analyses were performed using plant transient analysis methodology which is similar to that which was used to establish thermal margin requirements for Cycles 8 and 9. Finally, the LOCA–ECCS analysis for the 9x9 fuel was performed with generically NRC-approved methods and the results comply with 10 CFR 50.46 criteria. Thus, the XN–3 and XN–3A reload 9x9 fuel design is not significantly different from those previously found acceptable to the NRC for previous reloads at Dresden 3 and 2 and therefore does not increase the probability or consequences of an accident.

b. The removal of the provisions regarding SLO from the license and the incorporation of them into the Technical Speciefications, with some minor revisions and, additionally, the allowing operation in SLO above 50% power will not increase the probability or consequences of an accident because GE has previously performed analyses supporting SLO above 50% power. Furthermore, recent SLO tests performed at another plant site have demonstrated that operation in Single Loop does not represent a less stable mode of operation. ENC has evaluated the results of the GE analyses and concludes the results are also applicable for ENC reload fuel; therefore, Dresden 3 may safely operate in SLO under the conditions of the proposed license amendment. Stability monitoring surveillances consistent with Generic Letter 86–09 have been included in the proposed amendment to provide further assurance of stable reactor operation.

c. ENC has performed an Extended Loan Line Limit Analysis (ELLLA) that supports operation in an expanded POWER/FLOW region; Analysis shows that transients initiated from the most limiting point of this expanded region (100/87) would be bounded by the POWER/FLOW condition at 100%/100% and thus ensure that no safety limits would be violated. For LOCA–ECCS concern, limiting LOCA break calculations were performed for the 100/87 and the 100/100 conditions. Both operating conditions were found to result in essentially identical LOCA results with the POWER/FLOW condition of 100/87 giving the slightly higher peak cladding temperature which was used to verify the adequacy of LOCA–ECCS MAPLHGR Limits. By observing the MAPLHGR limits, the consequences of accidents (LOCA) remain within the existing accident criteria established for Dresden.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated because:

a. 9×9 fuel has been previously used in Dresden 2 and has exhibited operating characteristics similar to conventional 8×8 fuel. This operating experience plus analytical results demonstrating compatible hydraulic characteristics provides assurance that the cycle 10 core characteristics will not be significantly different from previous cycles.

b. Operation in Single Loop consistent with the proposed amendment has been previously evaluated by General Electric, Exxon Nuclear Inc and the NRC. SLO in the manner proposed is similar to that approved for previous cycles at Dresden and at other facilities and incorporates restrictions and surveillances consistent with NRC requirements (Generic Letter 86–09).

c. Operation in the ELLLA region does not allow any new modes of operation nor any new equipment which could initiate or change the nature of accident sequences.

3. Involve a significant reduction in the margin of safety for the same reason as 1. above. The proposed operation with 9×9 fuel, modified SLO provisions and utilizing the ELLLA region has been appropriately analyzed and necessary Technical Specification operating restrictions incorporated to assure that the margin to safety is maintained consistent with the NRC requirements and previous cycles.

The staff has reviewed the licensee's no significant hazards consideration determination and the technical content of the submittals and agrees with the licensee's analysis. Therefore, based on this review, the staff has made a proposed determination that the requested amendment involves no significant hazards consideration.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Attorney for licensee: Mr. Michael I. Miller; Isham, Lincoln and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Project Director: John A. Zwolinski.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: April 21, 1986, superseding March 4, 1986 and September 30, 1985 submittals.

Description of amendment request: The amendment would add operability and surveillance requirements for the alternate shutdown system. The amendment request also includes proposed technical specifications (TS) for the active fire barriers and the fire detection instrumentation for new facility Auxiliary Shutdown Building. All of these TS apply to equipment required by Appendix R to 10 CFR Part 50.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

10 CFR 50.91 requires that at the time a license requests an amendment, it must provide to the Commission its analysis, using the standards in § 50.92, about the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the licensee has performed and provided the following analysis:

The operation of Big Rock Point in accordance with the proposed amendment not involve a significant increase in the probability or consequences of an accident previously evaluated.

This change adds operability and surveillance requirements for equipment required to operate to assure a safe method of cooling the primary system, in the event of a fire. This proposed change (and associated modifications as previously approved in NRC Safety Evaluations dated March 8, 1983 and March 20, 1985) decreases significantly the consequences of a design basis fire.

The alternate shutdown system battery replaces the station battery as the power source for the main steam isolation valve, and emergency condenser outlet valves. The design and operability requirements of this battery system are consistent with those of the station battery currently addressed by the Big Rock Point Technical Specifications, thus not increasing the probability or consequences of an accident previously evaluated.

The operation of Big Rock Point in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed changes do not change the existing requirements for operability or surveillance of the shutdown system equipment except to place additional restrictions and surveillance requirements on such equipment. The changes do not allow the equipment to be operated in any new or different way from what is currently allowed and therefore do not create the possibility of a new or different kind of accident from any accident previously evaluated.

The operations of Big Rock Point in accordance with the proposed amendment will not involve a significant reduction in a margin of safety.

Existing Technical Specification operability and surveillance requirements have in no case been reduced by the proposed change. Only additional operability and surveillance requirements are added for safe shutdown equipment, thus no margins of safety will be reduced with issuance of this proposed change.

Consequently, this proposed change does not involve a significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposed to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

Consumers Power Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: March 17, 1986.

Description of amendment request: The proposed amendment would change the existing Technical Specifications for heatup and cooldown, and hydrostatic test of the reactor vessel by raising the pressure/temperature limits to account for the effects of irradiation on the Palisades reactor vessel materials. The existing limits are good for 6.6 effective full power years (EFPY) which will be reached in late summer of this year. The proposed limits would extend the limits to approximately 9.0 EFPY.

Basis for proposed no significant hazards consideration detemination: The licensee has made the following analysis with regard to the significant hazards consideration:

The revised pressure-temperature limits are required to meet the reactor vessel fracture toughness requirements in 10 CFR 50 Appendix G. In order to operate safely, the reactor pressure vessel (RPV) must be kept in the ductile region. Therefore, pressure-temperature limits are defined to ensure the RPV will not be stressed under conditions which promote brittle failure. Higher temperature and corresponding higher pressure limits are required to compensate for the effects of neutron exposure on the RPV material. The higher operating limits account for the irradiation effects and maintain the RPV within its nil-ductility transition temperature. Therefore, the proposed change does not involve an increase in the probability or consequences of a previously evaluated accident and a new or different kind of accident is not created.

Operation of the RPV within the nil-ductility temperature, as determined by the methodology in Regulatory Guide 1.99, revision 2, will ensure the margin of safety is maintained.

The staff agrees with this analysis and therefore proposes to detemine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: Van Zoeren Library, Hope College, Holland, Michigan 49423.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Project Director: Ashok C. Thadani.

Dairyland Power Cooperative, Docket No. 50–409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin

Date of amendment request: September 29, 1982 as revised October 29, 1982, September 16, 1985 and April 1, 1986.

Description of amendment request: The proposed amendment involves the consolidation and clarification of operability and surveillance requirements for the Emergency Core Cooling System (ECCS). This amendment request was originally noticed in the Federal Register on October 28, 1983 (48 FR 49583).

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

During the review, the staff determined that the September 29, 1982 application as revised by the letter dated October 29, 1982 did not have adequate surveillance requirements and required more stringent applicable conditions for the High Pressure Core Spray (HPCS) system. In addition the staff required the licensee to provide clarification of the bases for the Alternate Core Spray (ACS) system and requested the deletion of Section 2.4.7 of the Technical Specifications (TS), which is to be superseded by Section 4/5.2.23.

The licensee has presented its determinations of no significant hazards considerations as follows:

We have reviewed the hazards considerations referenced in 10 CFR Part 50, Sections 91 and 92, and have determined that with these criteria no significant hazards considerations result from these proposed changes.

1. *Operation of LACBWR, in accordance with the proposed changes, will not involve a significant increase in the probability or consequences of an accident previously evaluated.*

The additional surveillance requirements are to be performed during reactor shutdown conditions and will add further assurance that HPCS and ACS systems will perform as designed if called upon. The existing design specification states that the HPCS system shall be capable of manual start only if a full scram signal exists, but no surveillance was required to demonstrate this feature. Addition of the surveillance requirement will both demonstrate that the pumps can be started manually and that the design criteria specifying that a full scram signal must exist for the pumps to run if started in manual is met. Therefore, addition of these surveillance requirements will not increase the probability or consequences of an accident previously analyzed.

Requiring the low pressure core spray mode of HPCS to be operable during Operational Condition 4, without the exceptions listed in the previous submittal, can only increase the probability it will be available to mitigate the consequences of an accident. This more stringent requirement cannot increase the probability of an accident.

Clarification of the bases for ACS and deletion of Section 2.4.7 are strictly administrative type changes. The former results in a clear statement of the design capability of the ACS system. The latter eliminates redundancy. Therefore, neither of these administrative changes affects the probability or consequences of any type of accident.

2. *Operation of LACBWR, in accordance with the proposed changes, will not create the possibility of a new different kind of accident from any accident previously analyzed.*

Performing the additional surveillance on this installed equipment during reactor shutdown cannot create a new or different kind of accident. The more stringent applicability requirement for the low pressure core spray mode of HPCS does not require operation in any new manner; just operability during additional conditions. Therefore, this additional requirement cannot cause a new type of accident. the administrative type changes do not affect operation in any way and so cannot cause any type of accident.

3. *Operation of LACBWR, in accordance with the proposed changes, will not involve a significant reduction in the margin of safety.*

The additional surveillances are to be performed during reactor shutdown and so, will not involve a significant reduction in the margin of safety. Performing the surveillances will help assure that the equipment will perform as designed if needed. Requiring the low pressure core spray mode to be operable during additional conditions can only improve, not reduce, the margin of safety. The administrative changes will have no affect on the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with licensee's analysis. Based upon this review, the staff has made a proposed determination that the application for

amendment involves no significant hazards consideration.

Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Attorney for licensee: Roy P. Lessy, Jr.; O.S. Heistand; Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

Dairyland Power Cooperative, Docket No. 50-409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin

Date of amendment request: February 21, 1986.

Description of amendment request: The licensee's proposed amendment contains six specific requests described below.:

(1) The current operating requirements for the La Cross Boiling Water Reactor (LACBWR) electrical power system is contained in Section 4.2.3 of the Technical Specifications, while the disign of the electrical power supply is described in Section 2.6. The licensee proposes a two-step modification of these sections: (a) To delete Section 2.6 entirely and add it as the new bases for Section 4.2.3; and (b) to clarify and correct the description of the electrical power system in the new proposed bases. One of the proposed corrections is deletion of mention of the rotary inverter as a power supply to the 120 volt AC Non-interruptiable Bus 1B.

(2) The licensee requests that the aforementioned proposed bases be effective upon completion of the planned 1C Non-interruptible Bus modification, including installation of the static transfer switch.

(3) Several wording changes are requested in the bases portion of Technical Specification Section 4/5.2.25 on safety values. Revisons include changing pressures expressed in psia to psig. Additionally, because new data indicate that the turbine trip without bypass transient results in a peck pressure greater than the design basis main steam isolation valve closure transient, the turbine trip is discussed as the most limiting pressure transient.

(4) The licensee requests a minor wording change regarding reactor coolant chemistry in Specification 4.2.2.2. to help ensure that plant personnel will uniformly interpret the necessary actions to be taken.

(5) A new testing and monitoring schedule for area radiation monitors is being proposed. The new schedule would change the testing frequency of the monitors from bi-weekly to quarterly, and the calibration frequency from each refueling outage to at least once per 18 months.

(6) The licensee also requests that updated LACBWR Facility Organization chart, figure 6.2.2-1 of Technical Specifications, replace the old chart.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists for a proposed license amendment as stated in 10 CFR 50.92(c). The licensee has analyzed the proposed changes using the standards in 10 CFR 50.92 and concludes that the proposed amendment contains no significant hazards considerations. This conclusion has been reached because:

Operation of LACBWR in accordance with the proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

Transferring the updated electrical system description from the design section to the bases of the operability specifications, Item (1), is an editorial change. The operational requirements and surveillance of electrical systems will not be changed.

Revision the reactor coolant chemistry specification wording, Item, (4), is strictly an editorial change. The revision clarifies, without changing, the actions to be taken if the coolant conductivity and chloride concentration are above the normal limits.

Changes the functional test and calibration frequency for the installed area radiation monitors, Item (5), to coincide with the effluent monitors' test and calibration frequency does not cause a significant increase in the probability or consequences of an accident. The proposed change only affects the normal area radiation monitors, not the post-accident monitors, addressed by Specification 5.5.2. Because area radiation monitors have no automatic functions except for alarm capability, they cannot cause or change the consequences of an accident.

Insertion of the revised chart, Item (6), will update Technical Specifications but will have no affect on minimum shift staffing specifications, and thus cannot cause or change consequence of an accident.

Operation of LACBWR in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

Updating and relocating the description of the electrical system from the assign section to the basis of the electrical system, Item (1), does not change any mode of operation.

Clarifying the wording of the reactor coolant chemisty specification, Item (4), without changing the requirements cannot create the possibility of a new type of accident.

Changing the test and calibration frequency of area radiation monitors, Item (5) having no control function and no automatic function, except for alarm capability, cannot create the possibility of a new type of accident.

Insertion of the revised organizational chart, Item (6), is an administrative change. Because minimum shift staffing is not affected and the organizational changes do not affect any mode of plant operation, creating the possibility of a new kind of accident is not possible.

Operation of LACBWR in accordance with the proposed amendment will not involve a significant reduction in margin of safety.

Editorial changes, Items (1) and (4), do not affect the margin of safety.

Decreasing the testing and calibration frequency of the area radiation monitors, Item (5), does not decrease the margin of safety, since the monitors have no safety function.

Since minimum shift staffing is not being changed, updating the plant organization chart, Item (6), has no effect on the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that this action involves no significant hazards consideration.

Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Attorney for licensee: Roy P. Lessy, Jr.; O. S. Heistand; Morgan, Lewis & Bockius, 180 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

Dairyland Power Cooperative, Docket No. 50-409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin

Date of amendment request: April 7, 1986.

Description of amendment request: The proposed amendment would modify the existing specifications regarding primary coolant iodine spike reporting, and eliminate the 800 hour per 12-month period cap for exceeding activity limits.

Specifically, the licensee proposes to: (1) Eliminate discussion of requirements if Dose-Equivalent I-131 activity exceeds the normal limit for more than 800 hours per 12-month period or 500 hours per 6-month period; (2) eliminate discussion of requirements if offgas activity exceeds the normal limit for more than 800 hours per 12-month period or 500 hours per 6-month period; (3) remove paragraph on Reportable Occurrence reports from reactor coolant activity specification; (4) eliminate discussion of Special Report from reactor coolant activity specification; (5) add section to annual report requirements; (6) remove the unique limits for Cycles 6 and 7 from the reactor coolant activity specification, since they are no longer applicable; and, (7) correct a typographical error in the reactor coolant activity specification.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). The licensee has presented its determination of no significant hazards considerations as follows:

1. *Operation of LACBWR in accordance with the proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.*

The proposed change is in response to Generic Letter No. 85-19. The allowable primary coolant activity is not being changed, so the consequences of an accident will not be different. The requested revision to reporting requirements is a strictly administrative change and cannot affect the probability or consequences of an accident. Per the Generic Letter, the requirement for action if iodine activity limits are exceeded for 800 hours in a 12-month period is unnecessary, since proper fuel management and existing reporting requirements should preclude ever approaching the limit. The same is true for offgas activity limits. Therefore, the proposed amendment will not result in a significant increase in the probability or consequences of an accident previously evaluated.

2. *Operation of LACBWR in accordance with the proposed amendment will not create the possibility of a new different kind of accident from any accident previously evaluated.*

The proposed change is in response to Generic Letter 85-19. No mode of operation or primary coolant activity limits are being changed. Therefore, the proposed amendment will not create the possibility of a new or different kind of accident from any previously evaluated.

3. *Operated of LACBWR in accordance with the proposed amendment will not involve a significant reduction in the margin of safety.*

The proposed change is in response to Generic Letter No. 85-19. The primary coolant activity limits are not being changed. The activity limits being removed applied only to Cycles 6 and 7. As discussed in the Generic Letter, proper fuel management and existing reporting requirements should preclude approaching 800 hours per 12-month period above normal activity limits, so the requirements for action if 800 hours is exceeded is unnecessary. The same is true for 500 hours per 6-month period. The type of repost used for reporting activity above the limits does not affect the margin of safety. Excessive fuel degradation is required to be reported by 10 CFR 50.72 and 10 CFR 50.73. Therefore, the proposed amendment will not involve a significant reduction in the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that this action involves no significant hazards consideration.

Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Attorney for licensee: Roy P. Lessy, Jr.; O.S. Heistand; Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

Dairyland Power Cooperative, Docket No 50-409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin

Date of amendment request: April 7, 1986.

Description of amendment request: The amendment would modify the Technical Specifications (TS) to reflect the reorganization of the management staff and to update the offsite organization chart.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c).

The licensee has presented its determination of no significant hazards considerations as follows:

We have reviewed the hazards considerations referenced in 10 CFR 50 Sections 91 and 92 and have determined that with these criteria, no significant hazards considerations result from this proposed amendment.

1. *Operation of LACBWR in accordance with the proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.*

No method of operation is being affected. This change moves responsibilities from one senior management position which has been eliminated, to another and changes a title. The responsibilities remain the same. Therefore, the proposed amendment will not result in a significant increase in the probability or consequences of an accident previously evaluated.

2. *Operation of LACBWR in accordance with the proposed amendment will not create the possibility of a new or different kind of accident from any accident previously evaluated.*

No method or limits of operation are being changed, so a new kind of accident cannot be created by this change. Therefore, the proposed amendment will not create the possibility of a new or different kind of accident from any previously evaluated.

3. *Operation of LACBWR in accordance with the proposed amendment will not involve a significant reduction in the margin of safety.*

No method or limits of operation are being changed, therefore, the margin of safety won't be reduced. A senior management official, the General Manager, is assigned the same responsibilities as was the Assistant General Manager-Power Group. The goal of having a senior management official involved in the nuclear plant activities will still be met. Therefore, the proposed amendment will not involve a significant reduction in the margin of safety.

As determined by the analysis above, this amendment has no significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Based upon this review, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Documents Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Attorney for licensee: Roy P. Lessy, Jr.; O. S. Heistand; Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, DC 20036.

NCR Project Director: John A. Zolinski.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50-321 and 50-366 Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2, Appling County, Georgia

Date of amendment request: January 27, 1986.

Description of amendment request: These amendments would modify the Technical Specifications tables and footnotes related to monitoring radioactive gas effluents (Table 4.15.2.1 for Unit 1 and Table 4.11.2-1 for Unit 2) to: (1) Reduce the required frequency of estimating the flowrates, when less than the required minimum number of effluent monitoring flowrate instrument channels are operable, from once per 4 hours to once per 24 hours; (2) delete the requirement that grab samples of releases from the main stack and reactor building vents be analyzed for tritium activity levels following shutdown.

startup or thermal power changes exceeding 15 percent of the rated thermal power; (3) change the requirement for additional monitoring of principal gamma emitters so that additional monitoring is not required unless the dose equivalent iodine concentration in the primary coolant increases by more than a factor of three and greater than 0.02 micro-curries per gram; and (4) add a time frame requirement for performance of the additional activity analyses of the principal gamma emitters.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operation license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The probability of occurrence or the consequences of an accident or malfunction of equipment important to safety are not increased above those analyzed in the FSAR fue to these changes because they do not affect the mode of operation for function of any safety system.

The possibility of an accident or malfunction of a different type than analyzed in the FSAR does not result from these changes because this proposal does not change the mode of operation of any safety system.

The principal gaseous radioactive releases are though the mainstack and the flow through the mainstack is relatively constant. The releases are controlled to stay within the 10 CFR Part 50 Apendix I limits. Changing the frequency of estimating the flows through the release points as noted above in change 1 is therefore not expected to significantly change the margin of safety.

The margin of safety is not significantly reduced due to change 2, as discussed above, because tritium levels in BWRs are fairly low and do not significantly change during power level changes. FSAR section 11.1.3 identifies the primary source of tritium in a BWR as the activation of deuterium. Although the rate of tritium production due to activation is dependent upon power, it will not significantly change during the conditions described. In addition, Regulatory Guide 1.21 only requires that the tritium concentration be determined monthly for continuous releases.

The margin of safety is not significantly reduced due to change 3, as discussed above. because the change will eliminate redundant testing. Revising the footnotes to require additional testing after power level changes if the dose equivalent iodine increases by more than a factor of three and greater than 0.02 micro-curries per gram is similar to the Standard Radiological Effluent Technical Specifications for BWRs. The dose equivalent iodine (DEI) level is chosen to indicate a statistically significant increase above background while still being 10 percent of the Technical Specification limit. If the level should increase to a factor of three beyond a starting point of 0.02 micro-curries per gram the resultant level would still only be 30 percent of the allowable DEI and give sufficient time for remedial action.

The margin of safety is not reduced due to change 4, as discussed above, because the addition of a time limit for performing surveillance is more restrictive. The change is made to prevent a possible misinterpretation that the sample should be taken at all points before the gaseous radioactive effluent in question could reasonably be expected to be available for sampling.

On the basis of the above, the Commission has determined that the requested amendments meet the three criteria and therefore has made a proposed determination that the amendment application does not involve a significant hazards consideration.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

NRC Project Director: Daniel Muller.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Dockets Nos. 50321 and 50366, Edwin I. Hatch Nuclear Plant, Units Nos. 1 and 2, Appling County, Georgia

Date of amendment request: February 17, 1986.

Description of amendment request: These amendments would modify Section 6.1 and Figure 6.2.1–1 of Appendix 'A' Technical Specifications and Figure 5.2–1 of Appendix 'B' Environmental Technical Specifications, as appropriate, as well as the applicable parts of Section 5 of Appendix 'B' to: (1) Add the title and position of Senior Vice President Nuclear Operations. The Senior Vice President Nuclear Operations has assumed all of the functions for Plant Hatch formerly assigned to the Senior Vice President Nuclear Power. (2) Change the title of the Manager of Nuclear Chemistry and Health Physics to Manager of Radiological Safety, and indicate his responsibility for the Radiological Environmental Monitoring Program and management oversite of the Health Physics Program. (3) Eliminate the Manager Nuclear Engineering and Chief Nuclear Engineer's responsibility for elements of the Environmental Monitoring Program. (4) Change the title of Manager Nuclear Engineering and Chief Nuclear Engineer to Manager Nuclear Safety and Licensing. The position reports to the Senior Vice President Nuclear Operations. (5) Change of title and responsibilities of the General Manager Quality Assurance and Radiological Health and Safety to General Manager Quality Assurance. Concurrent with the change in title for the General Manager Quality Assurance, the Manager of Radiological Safety has assumed responsibilities similar to the Radiological Health and Safety Representative. (6) Remove the position of Radiological Health and Safety Representative from the organizational chart. (7) Remove the position of Vice President and Chief Engineer Power Supply Engineering and Services from the Engineering and Construction Services Department organization. (8) Change the title of Hatch Project Manager to Manager Nuclear Projects and move the position from the Engineering Department to the Nuclear Operations Department. Concurrent with the move of the Manager Nuclear Projects, the title of Manager Engineering Services is being removed from the organizational charts. (9) Indicate that the position of Manager Nuclear Training now reports to the Senior Vice President Nuclear Operations. (10) Remove the position of Manager Nuclear Generation, which has been vacant, from the organizational charts. (11) Remove the designation of "corporate responsibility for fire protection" from the Technical Specifications organizational charts. This designation, while required by Appendix R of 10 CFR part 50 for the Fire Plan, is not required for Technical Specifications. (12) Add nine positions to the offsite organization chart. These are: Manager Nuclear Support, Manager Nuclear Performance, Manager Engineering Liaison, Manager Maintenance and Modification, Nuclear Safety Reviews Manager, Nuclear Safety Manager, Nuclear Licensing Manager—Hatch, Nuclear Licensing Manager—Vogtle, and General Manager Plant Vogtle. (13) Amend the responsibilities of the Plant Review Board to limit review of Technical Specification violations to those which have been determined to be reportable. (14) Change the PRB responsibility for review of events for written notifications to the Commission to those that are required by Technical Specifications and/or 10 CFR 50.73. (15) Change one of the members of the PRB from the Superintendent of Maintenance to the Superintendent of Instrument and Controls. (16) Change the referenced figure in Section 5 of Unit 2 Appendix 'A' Technical Specifications for the exclusion area, low population zone, and site boundary. (17) Clarify the record retention period for certain Quality Assurance documents. This is accomplished by inserting additional wording into Specification 6.10.2.i. (18) Eliminate reference to the Environmental Program Description Document (EPDD) from Appendix 'B' Technical Specifications. The Environmental Program as described by the EPDD is now complete. Therefore, any reference remaining to it in the Technical Specifications is obsolete and confusing. (19) Renumber the Environmental Technical Specifications to accommodate the changes made to the Administrative Section as a result of deletion of the EPDD.

Basis for proposed no significant hazards consideration determination: In accordance with the Commission's Regulations in 10 CFR 50.92, the Commission has made a determination that the proposed amendment involves no significant hazards considerations. To make this determination the staff must establish that operation in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The proposed amendments in this instance do not involve a physical modification of the plant, a change in operating procedures, or a change in any limiting conditions of operation. Rather, the change is administrative, concerning changes in management organization, position titles, position responsibilities, and other administrative corrections. In view of the administrative nature of the proposed amendments, none of the criteria enumerated above apply.

Based on the foregoing, the Commission has made a proposed determination that the application for amendments involves no sigificant hazards considerations.

Local Public Document Room Location: Applying County Public Library, 301 City Hall drive, Baxley, Georgia.

Attorney for licensee: Bruce W. Churchill, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: Daniel R. Muller.

Indiana and Michigan Electric Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: March 14, 1986.

Description of amendment request: The proposed amendment would revise the Technical Specifications to change the HVAC Charcoal Filter Fire Suppression Systems to a manual mode of operation. The current automatic mode allows water up to the automatic valve and undetected leakage at that point has led to charcoal damage and filter failure.

Basis for proposed no significant hazards consideration determination: The HVAC charcoal filter located at the control room is to provide protection for the reactor operators in the unlikely event of a significant radiation release. The fire suppression system on these filters is to control a filter fire. At the Donald C. Cook Nuclear Plant, the automatic actuation on the fire suppression system has experienced leaks which allows water to soak and damage the charcoal filter. The proposed amendment will allow an upstream manual valve on the fire suppression system to be closed and would require operator action to open in the event a charcoal filter fire were to occur. The downstream automatic control will remain for further protection, i.e., if the manual valve were to be opened and there was no filter fire, the automatic valves would prevent the water spray and damage to the filter.

The accident evaluated within the charcoal filter which would be affected by the proposed action is limited to a charcoal fire. The control room operators would be immediately aware of a fire either from alarms or smoke from the air system. There would be little difference in the time for activating the spray system and this additional time would not significantly change the consequences of the filter fire. The change would not significantly increase the probabilities or consequences of the accident nor would it create the probability of a new or different kind of accident from any previously evaluated. There may be an insignificant increase in the time to actuate fire suppression however, by reducing the likelihood of leaks and inadvertent damage to the charcoal filter, the full safety potential for the filter is returned. We, therefore, have determined that the proposed change does not significantly reduce a margin of safety.

Based on the above consideration, the Commission proposes to determine that the requested changes do not involve a significant hazards consideration.

Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: B.J. Youngblood.

Mississippi Power & Light Company, Middle South Energy, Inc., South Mississippi Electric Power Association, Docket No. 50–416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: March 31, 1986.

Description of amendment request: The amendment would change the facility Technical Specifications to allow power operation with a single recirculation loop in operation and would add a new specification for neutron flux monitoring instrumentation to be used to detect and suppress power oscillations during single loop operation.

The changes to the Technical Specifications for single loop operation would include an increased minimum critical power ratio limit, changes to the average power range monitor reactor trip and control rod block setpoints, changes to the power distribution limits, and changes to the recirculation loop specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from

VOL 51 ISS 88 MY 7 1986 UMI

any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has provided an analysis of significant hazards considerations in its March 31, 1986, request for a license amendment. The licensee has concluded with appropriate bases, that the proposed amendment satisfies the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards considerations. The NRC staff has made a preliminary review of the licensee's submittal. The proposed changes would allow operation of the plant with only one recirculation loop in operation. The present Technical Specifications require plant shut down if one recirculation loop is inoperable. Implementation of the increased power oscillation surveillances will assure that oscillation is detected and suppressed and provides assurance that single loop operation can be performed safely. The licensee has analyzed accidents and transients considering single loop operation to determine reactor trip and control rod block setpoints and the minimum critical power ratio safety limit. The criterion used for these analyses is to maintain the same margin of safety during single loop operation as that which presently exists during two loop operation.

A discussion of the standards in 10 CFR 50.92 as they relate to this amendment follows.

Standard 1—Involve a significant increase in the probability or consequences of an accident previously evaluated.

The additional surveillance requirement to detect and suppress power oscillations offsets the larger probability for such oscillations with single loop operation. Therefore the proposed amendment would not involve a significant increase in the probability of an accident previously evaluated.

The results of the licensee's analyses for single loop operation show that:

(1) Loss of coolant accident (LOCA) analyses for single loop operation result in a more severe peak clad temperature (PCT). The maximum average power linear heat generation rate (MAPLHGR) limits have been reduced in order to maintain PCT below 10CFR50.46 limits. The decreased MAPLHGR limits are equivalent to a 300°F–500°F decrease in PCT for large pipe breaks. The small pipe break LOCA analyses resulted in an increase in PCT of about 50°F. The reduced MAPLHGR limits developed from the large break LOCA analysis more than offset the small increase in PCT due to the small break LOCA.

(2) The containment response for the design basis accident with single loop operation is bounded by the rated power, two-loop operation analysis presented in the Grand Gulf Nuclear Station Final Safety Analysis Report (FSAR) Section 6.2. For single loop operation, the differential peak drywell and wetwell pressures of 19.8 pounds per square inch gauge (psig) and 6.3 psig, respectively are less than the 22 psig and 9.9 psig results noted in the FSAR Section 6.2.

(3) All anticipated-transient-without-scram (ATWS) acceptance criteria are met during single loop operation. Because the initial power-flow condition is less during single loop operation that the rated power—flow condition for which the previous analysis was made, the transient response is less severe.

(4) The average power range monitor (APRM) reactor trip and control rod block setpoints are modified to account for reverse flow through the inactive loop jet pumps. The flow is in a reverse direction when the operating loop is producing high flow rates. Therefore, the APRM equations were conservatively modified considering reverse flow over the range of single loop flows. The modification maintains the same drive flow versus power relationship during single loop operation as is presently provided during two loop operation.

(5) Fuel thermal and mechanical performance for transient events occurring during single loop operation are within the fuel design bases. Reverse flow through the jet pumps in the inactive loop causes increased vibrations as evidenced by APRM flux noise and core plate differential pressure noise. Both of these indications of vibrations were analyzed and it was concluded that the vibrations are within the fuel mechanical limits. Based on these evaluations, the licensee concluded, and staff agrees, that single loop operation with the proposed Technical Specification changes does not involve a significant increase in the consequences of an accident previously evaluated.

Standard 2—Create the possibility of a new or different kind of accident from any accident previously evaluated.

The additional surveillance requirements do not require any change to plant design or operation. The remedial actions to suppress power oscillations involve normal plant operating practices. Therefore, the possibility of a new or different accident is not created by the addition of this Technical Specification. The idle recirculation pump start transient was previously analyzed in the FSAR. The licensee found that the MCPR remains above the safety limit for this transient. As summarized above, the other accidents and transients described in the FSAR were evaluated for single loop operation in the March 31, 1986 submittal. No new or different kind of accidents relative to the accidents previously evaluated were found.

Standard 3—Involve a significant reduction in a margin of safety.

The additional surveillance requirement provides a means for detecting and suppressing power oscillations to maintain the fuel within its safety limits when operating with a single recirculation loop. The changes in setpoints for reactor trips and control rod blocks and the MCPR safety limit during single loop operation are based on maintaining the same margin of safety which is presently available during two loop operation. Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

Accordingly, the Commission proposes to determine that the proposed changes do not involve significant hazards considerations.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Attorney for licensee: Nicholas S. Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 17th Street, NW., Washington, DC 20036.

Project Director: Walter R. Butler.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 3, 1986.

Description of amendment request: The proposed amendment would modify the Technical Specifications (TS), Table 3.6.14–1 and Notes for Table 3.6.14–1, to include the addition of an explanatory phrase to clarify the intention of the phrase "at all times". The addition of footnote (i) states that the intention of this phrase is to continuously monitor the Service Water System effluent line by alternately sampling the reactor building and turbine building service water return lines for approximately 15 minute intervals.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented its determination of no significant hazards consideration as follows:

10 CFR 50.91 requires that at the time a licensee requests an amendment, it must provide the Commission its analysis, using the standards in Section 50.92 about the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the following analysis has been performed:

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment incorporates an explanatory phrase clarifying the intent of the technical specification requirement. This phrase provides for the alternate sampling of the reactor building and turbine building service water return lines. The alternate sampling provides more information than continuously sampling both lines with one monitor because it can diagnose which system may be leaking. Therefore, the proposed amendment will invoke a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed amendment merely clarifies the already existing phrase "at all times." Interpreting the phrase to include monitoring conducted with approximate fifteen minute time intervals on alternate return lines does not create the possibility of a new or different kind of accident from any accident previously evaluated.

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve a significant reduction in margin of safety.

The method of alternately sampling the service water return lines of the turbine and reactor building will provide the necessary monitoring and additional diagnostic data. Therefore, the proposed amendment will not involve a significant reduction in a margin of safety.

As determined by the analysis above, this proposed amendment involves no significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: John A. Zwolinski.

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: February 14, 1986.

Description of amendment request: The proposed amendment would change the expiration date for Operating License DPR-22 from June 19, 2007 to September 8, 2010.

The current licensed term for Monticello is 40 years commencing with issuance of the construction permit (June 16, 1967). Accounting for the time that was required for plant construction, fuel loading and startup testing, the effective period of the license is 36 years and 9 months. The licensee's application requests a 40-year operating license term for Monticello. The licensee believes that the useful life of the Monticello plant is significantly more than 40 years requested in this license amendment application and is currently involved in a Plant Extension Program (PLEX) pilot project at Monticello.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

10 CFR 50.91 requires that at the time a licensee requests an amendment it must provide to the Commission its analysis, using the standards in 10 CFR 50.92, about the issue of no significant hazards consideration. Therefore, in accordance with the 10 CFR 50.91 and 10 CFR 50.92, the following analysis has been performed by the licensee:

1. The proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The plant was designed and constructed primarily on the basis of 40 years of plant operation. For example, the reactor vessel was designed and fabricated for a 40-year life. Analyses performed as part of the Monticello PLEX pilot program indicate a realistic service life of the reactor vessel of approximately 70 years.

The analyses contained in the Monticello Final Safety Analysis Report were performed primarily on the basis of 40 years of plant operation.

Analyses and information presented in the Monticello Environmental Report, in general, were not dependent on any specific period of plant operation.

Procedures and programs are in place to detect abnormal deterioration and aging of critical plant components. Examples include:

a. Plant pressure retaining vessels, piping, and support systems are inspected in accordance with Section XI of the ASME Boiler and Pressure Vessel Code and 10 CFR Part 50, Section 50.55(g). Safety related pumps and valves are included in a test program meeting the requirements of Section XI of the Code and the plant Technical Specifications.

b. Safety related electrical equipment has been environmentally qualified in accordance with the requirements of 10 CFR Part 50, Section 50.49. Aging analyses establish required intervals for equipment replacement.

c. A number of special inspections and investigations have been performed by the Monticello technical staff providing additional assurance that abnormal or unanticipated degradation will not [be] occurring in components required for safe and reliable plant operation. These inspections have included such items as pipe, valve, and fitting wall thickness measurements in steam lines subject to erosion and inspection of buried cables and piping. Additional inspections of this nature will be identified as part of the Monticello PLEX pilot study.

2. The proposed amendment will not create the possibility of a new or different kind of accident from any accident previously analyzed.

The proposed amendment involves only a change in the expiration date of the Operating License. No safety analyses are affected. No new or different accident type is created. The accident analyses presented in the Updated Safety Analysis Report remain bounding.

3. The proposed amendment will not involve a significant reduction in the margin or safety.

The proposed amendment involves only a change in the expiration date of the Operating License. No safety margins are affected.

The licensing basis of the plant, as described in the Updated Safety Analysis Report and the Environmental report, was 40 years of plant operation.

For the reasons stated above, this license amendment does not involve a significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, based on this review, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts, and Trowbridge, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: John A. Zwolinski.

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: April 9, 1986.

Description of amendment request: The proposed amendment would add operability and surveillance requirements for new fire suppression equipment in the Compressor Room. The proposed requirements are the same as currently approved requirements for similar fire suppression equipment located in other areas of the plant. Namely, the equipment should be operable and, if not, compensatory measures are called for. The proposed amendment would also correct a heading number on the top of page 3-83 of the technical specifications. The current heading number is 3.19. The correct heading number should be 3.15. The licensee considers this heading number change a clerical change to correct a typographical error.

Basis for proposed no significant hazards consideration determination: The licensee has made a significant hazards consideration determination pursuant to 10 CFR 50.92. The licensee has stated that the changes would not involve a significant increase in the probability or consequences of an accident previously evaluated because: (1) The changes are being made in order to provide operability and surveillance requirements for the new fire suppression system, (2) the changes will provide additional assurance that the probability and consequences of a fire in the compressor room will be reduced, and (3) the clerical change will correct a tyographical error. The licensee also stated that the possibility of a new or different kind of accident previously evaluated would not be created based upon the same arguments discussed above. Finally, the licensee stated that the changes would not involve a significant reduction in a margin of safety because the changes provide an increase in safety by providing assurance of the operability of the fire suppression capability in the compressor room.

The staff has performed a preliminary review of the licensee's no significant hazards consideration analysis and it does appear in our review that a no significant hazards consideration is involved. Based upon the above discussion, the staff proposes to determine that the proposed changes do not involve significant hazards considerations.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102.

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae 1333 New Hampshire Avenue, NW., Washington, DC 20036.

NRC Project Director: Ashok C. Thadani.

Pennsylvania Power & Light Company, Docket No. 50-387 and 50-388, Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: March 27, 1986.

Description of amendment request: The licensee in their March 27, 1986, submittal requested a Technical Specification change to support Drywell Cooling Sytem plant modifications in order to enhance the capability of the present Drywell Cooling System. This plant modification is being requested for Unit 2. Unit 1 has already implemented this modification which was previously approved by the staff via Amendment No. 46 to NPF-14. The licensee is also requesting a Technical Specification change for Unit 1. During the review of the Unit 2 changes, it was determined by the licensee that an error contained in Amendment No. 46 allowed as many as six fans to be inoperable for up to 30 days. The licensee is requesting that this error be corrected so that at least one fan from each pair of fans is required to be OPERABLE.

This modification which is being requested for Unit 2, and which has already been approved for Unit 1, entails revising the Limiting Condition for Operation (3/4.6.62) to reflect the replacement of one unit cooler subsystem (consisting of 2 unit cooler fans) with 2 recirculation fans. The subject unit cooler subsystem will now be serving the general drywell area and the new recirculation fans will be replacing the unit cooler subsystem with respect to the unit cooler subsystem's safety-related function of post-LOCA drywell atmosphere mixing. The Action and Surveillance Requirements have been altered to reflect these changes. Technical Specification Table 3.8.4.1-1 has been changed due to the addition of the drywell recirculation fans. Two pairs of Type HFB-TM circuit breakers have been added to Table 3.8.4.1-1 to support recirculation fans 2V418A and B.

Bais for no significant hazards consideration determination: The licensee has stated that:

1. The proposed changes do not involve a significant increase in the probability or consequence of an accident previously evaluated because:

A. Unit 2 Specification 3/4.6.6.2: These changes support design improvements to the Drywell Cooling System. The safety-related aspect of this change is that the post-LOCA hydrogen mixing will now be accomplished by the new recirculation fans, while the old unit cooler subsystem will now serve the general drywell area. The air flow capability of the new recirculation fans is the same as that of the unit cooler fans formerly used for the same purpose.

B. Unit 2 Table 3.8.4.1-1: The additional circuit breakers were added to meet design criteria specified for the additional recirculation fans, i.e., to provide overcurrent protection for primary containment penetration conductors. Therefore, no previous evaluations are affected.

C. Unit 1 Specification 3/4.6.6.3: As described, this change corrects an error which if left uncorrected, would have allowed a previous evaluation, that of post-LOCA hydrogen mixing, to be improperly supported. Therefore, this change ensures that the probability or consequences of an accident previously evaluated will not be degraded.

2. The proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated because:

A. Unit 2 Specification 3/4.6.6.2: This equipment change is in accordance with existing design criteria and will not adversely affect the function of any system; therefore, no new events should result.

B. Unit 2 Specification 3/4.6.6.2: The addition of these thermal magnetic breakers is in accordance with existing design criteria and will not adversely affect the function of any system; therefore, no new events should result.

C. Unit 1 Specification 3/4.6.6.3: This change corrects an error previously issued and ensures the validity of a related analysis. It does not create the possibility of a new event.

3. The proposed changes do not involve a significant reduction in a margin of safety because:

A. Unit 2 Specification 3/4.6.6.2: As described above, these changes maintain the safety margin currently provided.

B. Unit 2 Table 3.8.4.1-1: These changes ensure the safety margin currently provided for other primary containment penetration conductors.

C. Unit 1 Specification 3/4.6.6.3: As described above, this change will require the intended level of safety margin to be achieved.

The NRC staff agrees with the licensee's evaluation in these regards and proposes to find the proposed changes to not involve a significant hazards consideration.

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: December 27, 1985.

Description of amendment request: The application for amendment requests modifications of the Technical Specifications contained in Appendix A to Operating License No. NPF-1. Specifically, the Trojan Technical Specification (TTS) 3.4.1.1 would be modified to require four reactor coolant loops in operation when the plant is operating below the P-7 setpoint. TTS 3.4.1.2 would be revised to require that with any control rod drive mechanism (CRDM) energized all four reactor coolant loops shall be in operation and that with no CRDM's energized, at least two reactor coolant loops shall be OPERABLE with one reactor coolant loop in operation. A new Surveillance Requirement would be added to TTS 4.4.1.2 to require verification that all CRDMs are de-energized every 12 hours if less than four loops are in operation. Additional editorial changes would be made to incorporate this revision into the TTS.

This application for amendment supersedes in its entirety the licensee's application dated November 29, 1984 which was published in the **Federal Register** February 27, 1985 (50 FR 8000).

Basis for proposed no significant hazards consideration determination: TTS 3.4.1.1 currently requires that two reactor coolant loops be in operation when the plant is operating below the P-7 setpoint (MODES 1 and 2). In addition, TTS 3.4.1.2 currently requires that two reactor coolant loops be OPERABLE, with one loop actually in operation in MODE 3. However, the bank withdrawal from subcritical and low power accident analyses assume four loops in operation. The proposed change would ensure consistency between the TTS and the accident analyses.

The Commission has provided guidance concerning the application of the standards for making a no significant hazards consideration determination by providing examples (48 FR 14870). The examples of actions involving no significant hazards consideration include: (ii) Changes that constitute an additional limitation or restriction or control not presently within the technical specification, e.g., a more stringent surveillance requirement. The changes to TTS 3.4.1.1, 3.4.1.2 and 4.4.1.2, described above, proposed in this application for amendment are encompassed by this example because of the additional limitation and restriction that would be added by this Technical Specification amendment.

Another example of actions involving no significant hazards consideration is: (i) A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. The additional editorial changes which would be made to incorporate the revisions described above into the TTS are encompassed by this example.

Therefore, since the application for amendment involves proposed changes that are similar to examples for which no significant hazards consideration exists, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: Multnomah County Library, 801 S.W. 10th Avenue, Portland, Oregon

Attorney for licensee: J.W. Durham, Senior Vice President, Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204.

NRC Project Director: Steven A. Varga.

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: April 11, 1986.

Description of amendment request: The proposed amendment request would delete from the Design Features Section 5.3.1 of the Trojan Technical Specifications (TTS) the maximum fuel rod weight limit of 1,760 grams of uranium. The purpose of the change would be to permit the use of assemblies found to be slightly over the weight limit.

Fuel weights have increased slightly due to recent changes to the fuel design, including chamfered pellets with a reduced dish and use of the integrated dry route process. The weight increases have caused the assembly's averaged fuel rod weight of uranium to exceed the 1,760 gram Technical Specification limit by as much as 13 grams.

Basis for proposed no significant hazards consideration determination: In accordance with the requirements of 10 CFR 50.92, the licensee submitted the following significant hazards consideration determination:

1. Does the proposed license amendment involve a significant increase in the probability or consequences of previously evaluated accidents. The change in fuel rod weight that could occur without a Technical Specification limit is small because other fuel design constraints such as rod diameter, gap size, UO_2 density, fuel active lengths, etc., limit the variation in rod weights. The current safety analyses are not based on fuel rod weights, but more on parameters such as power, thermal conductivity, fuel dimensions, etc. These parameters are either: (1) Not affected at all by fuel rod weight, or (2) are only slightly affected. However, a review of parameters which may be affected indicates that a change in fuel weight does not cause other parameters to exceed the values assumed in the safety analyses, or to cause acceptance criteria to be exceeded. The slight effects are such that the monitored nuclear parameters (power, power distribution, nuclear coefficients, etc) remain within their Technical Specification limits. Thus, it is concluded that the change does not involve a significant increase in the probability or consequences of previously evaluated accident.

2. Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: The possibility of a new or different kind of accident from any previously evaluated has been considered and is not affected by this change. All of the fuel is contained in the fuel rod which is of the same dimensions and designed to function the same as previous fuel. The existing new and spent fuel criticality analyses bound the changes observed. Therefore, this change does not create the possibility of a new or different kind of accident.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: The margin of safety is maintained by adherence to other Technical Specification limits and the FSAR Design Bases. The deletion of fuel rod weight limits in Technical Specifications Design Features Section 5.3.1 does not directly affect any safety system or safety limits. Because safety margins are maintained by other limiting

Technical Specification, Design Features Section 5.3.1 will not affect the margin of safety.

In the April 6, 1983 Federal Register, NCR published a list of examples of amendments that are not likely to involve significant hazards concern. Example No. 6 of that list applies to the deletion of the fuel rod weight limit Technical Specification, and states that: ". . . a change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan: For example, a change resulting from the application of a small refinement of a previously used calculational model or designed method."

Based on the above analysis, the licensee concluded that the proposed amendment does not involve significant hazards considerations. The staff has reviewed the licensee's significant hazards considerations determination and agrees with the licensee's analysis. The staff has, therefore, made a proposed determination that the licensee's request does not involve a significant hazards considerations.

Local Public Document Room location: Multnomah County Library, 801 SW. 10th Avenue, Portland, Oregon.

Attorney for licensee: J.W. Durham, Senior Vice President, Portland General Electric Company, 121 SW. Salmon Street, Portland, Oregon 97204.

NRC Project Director: Steven A. Varga.

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, County, New York

Date of amendment request: January 21, 1986.

Description of amendment request: The proposed amendment would modify the Technical Specifications (TSs) to permit the appointment of an Alternate Vice-Chairman to the Safety Review Committee (SRC). The proposed change would facilitate the holding of SRC meetings in the event the Chairman and Vice-Chairman were unable to attend. The Alternate Vice-Chairman would be appointed in writing by the Executive Vice President-Nuclear Generation, would be a voting member, and have the identical duties and responsibilities of the Vice-Chairman. The current TS permit up to two alternate voting members of the SRC at any one time.

Basis for proposed no significant hazards consideration determination: In accordance with the Commission's Regulations in 10 CFR 50.92, the Commission has made a determination that the proposed amendment involves no significant hazards considerations. To make this determination the staff must establish that operation in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety.

The proposed amendment in this instance does not involve a physical modification of the plant, a change in operating procedures, or a change in any limiting conditions of operation. Rather, the change is administrative, concerning changes in management organization, position titles, position responsibilities, and other administrative corrections. In view of the administrative nature of the proposed amendment, none of the criteria enumerated above apply.

Based on the foregoing, the Commission proposes to determine that the proposed license amendment does not involve a significant hazards consideration.

Local Public Document Room location: Penfield Library, State University College of Oswego, Oswego, New York.

Attorney for licensee: Mr. Charles M. Pratt, Assistant General Counsel, Power Authority of the State of New York, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Daniel R. Muller.

South Carolina Electric and Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: August 2, 1985.

Description of amendment request: The amendment would change the duration of the Operating License (NPF-12) from 31 years to 40 years. This will change the license expiration date from midnight on March 21, 2013 to midnight on August 6, 2022.

Basis for proposed no significant hazards consideration determination: Plant equipment, components and structures were designed considering a 40 year service life of the plant. Some equipment, such as Class 1E electrical components, was designed for 40 years of service life. The equipment required to function post accident was designed to operate an additional year assuming an accident occurred during the 40th year of operation. Other equipment is not expected to last for a full 40 years; however, in those cases surveillance and maintenance procedures were implemented into the plant operation to assure that degradation is promptly identified and corrective actions are taken. Those procedures were designed according to various industry codes and the plant Technical Specifications to ensure that plant structures, equipment and components would operate safely and as designed.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations and examples of actions likely to involve significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendment and determined that should this request be implemented, it will not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because plant equipment, components, and structures were designed considering a 40 year service life, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the physical plant design is not being changed. Also, it will not (3) involve a significant reduction in a margin of safety because surveillance and maintenance procedures are implemented into the plant operation to assure that degradation is promptly identified and corrective actions are taken. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Attorney for licensee: Randolph R. Mahan, South Carolina Electric and Gas Company, P.O. Box 764, Columbia, South Carolina 29218.

NRC Project Director: Lester S. Rubenstein.

Virginia Electric and Power Company, Docket Nos. 50-338 and 50-339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: December 11, 1985.

Description of amendment request: The proposed change would amend Licenses NPF-4 and NPF-7 for NA-1&2, respectively, by adding a paragraph to the licenses that requires the implementation of the Virginia Electric and Power Company's (VEPCO) Integrated Implementation Schedule Plan (the Plan). The Plan provides a summary description of the mechanisms for changing and updating the implementation schedules developed under VEPCO's Integrated Implementation Schedule, the responsibilities of the NRC and VEPCO's staff with respect to the Plan and the mechanisms for modifying the requirements of the Plan. The implementation schedules are not a part of the Plan. This change results in additional controls on project and commitment management that are not presently included in the license. In addition, the proposed change is consistent with the NRC guidance suggested in Generic Letter 83-20 dated May 9, 1983 and Generic Letter 85-07 dated May 2, 1985.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The proposed amendments and the Plan are administrative in that they commit to and provide the ground rules for negotiating schedules for major projects or commitments of interest to both VEPCO and the NRC. The proposed amendments do not change in any way the design or operation of the station. Consequently, the changes do not: (1) Increase the probability of occurrence or the consequence of an accident or malfunction, (2) create the possibility of a different type of accident other than discussed in the NA-1&2 Final Safety Analysis Report; and (3) reduce the margin of safety as defined in the basis for any Technical Specifications.

Therefore, the NRC staff proposes to determine that the standards for determining that the proposed changes involve no significant hazards consideration are met, and that operation of the facility in accordance with the proposed changes would not involve a significant hazards consideration.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Lester S. Rubenstein.

Wisconsin Public Service Corporation, Docket No. 50-305, Kewaunee Nuclear Power Plant, Kewaunee County, Wisconsin

Date of amendment request: April 15, 1986.

Description of amendment request: The proposed amendment would revise the Kewaunee Technical Specifications (TS) Section 4.6, "Periodic Testing of Emergency Power System," by correcting an error in the surveillance tests of emergency diesel generators. The current TS require monthly testing of the diesels at 112 percent of nominal power rating which is in error. The current TS incorrectly cite paragraphs 6.4.1 and 6.4.3 of IEEE 387-1977 for the diesel loading and test duration. This change would bring the load to nominal power, which is called for in Paragraph 6.6.1 of IEEE 387-1977 and endorsed by NRC Regulatory Guide 1.108.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The examples of actions involving no significant hazards consideration include: (1) A purely administrative change to the Technical Specifications; for example, a change to achieve consistency throughout the Technical Specifications, correction of an error, or a change in nomenclature.

Therefore, since the application for amendment involves a proposed change that is similar to an example for which no significant hazards considerations exist, that is, an error correction, the Commission proposes to determine that the proposed amendment involves no significant hazards consideration.

Local Public Document Room location: University of Wisconsin Library Learning Center, 2420 Nicolet Drive, Green Bay, Wisconsin 54301.

Attorney for licensee: Steven E. Keane, Esquire, Foley and Lardner, 777 E. Wisconsin Avenue, Milwaukee, Wisconsin 53202.

NRC Project Director: George E. Lear.

Yankee Atomic Electric Company, Docket No. 50-029, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of amendment request: September 30, 1985, as modified January 20, 1986.

Description of amendment request: The proposed change would modify the Technical Specifications to: (1) Delete the requirement for performing I-131 analyses on surface water samples; and (2) clarify the TS audit requirements and references for effluent and environmental monitoring.

Basis for proposed no significant hazards considering determination: Current Yankee TS require performing routine analyses for I-131 on surface water samples. The anlaysis is performed to confirm that ingestion of I-131 does not occur through surface water that is being used as a drinking water supply source. Since the surface waters that are sampled are not used for supplies of drinking water, deletion of the requirement to perform routine analysis for I-131 on surface water samples will not change the licensee's routine monitoring of radioactive effluents' effects on the public.

The Commission has provided guidance concerning the application of standards for making a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). Example (i) of actions involving a no significant hazards consideration involves a purely administrative change to technical specifications: for example a change to achieve consistency throughout the TS, correction of an error, or a change in nomenclature.

The wording of the licensee's current TS regarding audit and procedural requirements for Radioactive Effluent Technical Specifications (RETS) are potentially confusing. The current wording regarding audits implies that the audit is to determine whether or not the licensee's Quality Assurance Program includes the provisions of specific Regulatory Guides. The wording is being modified to require audits of the performance of activities affecting quality, making the audit consistent with the intent of the licensee's Quality Assurance Program. This administrative change is to provide consistency in the Administrative section of the TS, and is consistent with Example (i).

Based on this discussion, the staff proposes to determine that the

VOL 51 ISS 88 MY 7 1986 UMI

requested action would not involve a significant hazards consideration.

Local Public Document Room location: Greenfield Community College, 1 College Drive, Greenfield, Massachusetts 01301.

Attorney for licensee: Thomas Dignan, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110.

NRC Project Director: George E. Lear.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this bi-weekly notice. They are repeated here because the bi-weekly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Indiana and Michigan Electric Company, Docket No. 316, Donald C. Cook Nuclear Plant, Unit 2, Berrien County, Michigan

Date of amendment request: March 14, 1986, and March 27, 1986.

Brief description of amendment: The proposed Technical Specification changes are related to the Unit 2 cycle 6 reload, additional provisions consistent with safety analyses, clarifications to make Unit 2 Technical Specifications consistent with Unit 1 and the Standard Technical Specifications, and editorial corrections.

Date of publication of individual notice in **Federal Register:** April 9, 1986 (51 FR 12249).

Expiration date of individual notice: May 9, 1986.

Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Notice of Issuance of Amendment to Facility Operating License

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama.

Date of application for amendments: November 22, 1985.

Brief description of amendments: Technical Specification Table 4.3-1 Note 9 is modified to clarify that turbine trip surveillance can be done prior to latching the turbine. The change corrects an unintentional error when Table 4.3-1 notations were developed.

Date of issuance: April 15, 1986.

Effective date: April 15, 1986.

Amendment Nos.: 62 and 53.

Facilities Operating License Nos. NPF-2 and NPF-8. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 15, 1986 (51 FR 1869).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 15, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama.

Date of application for amendments: November 27, 1985.

Brief description of amendments: Technical Specification (TS) 3.4.9 Action Statement a. is deleted. The change eliminates a shutdown requirement when coolant activity limits are exceeded for a cumulative period of time. Reporting requirements are expanded from a 30-day report to an item in the annual report. The definition of Dose Equivalent Iodine in TS 1.9 is also revised to refer to Regulatory Guide (RG) 1.109. These changes are in accordance with Commission guidance of Generic Letter 85-19 and the cited RG.

Date of issuance: April 16, 1986.

Effective date: April 16, 1986.

Amendment Nos.: 63 and 54.

Facilities Operating License Nos. NPF-2 and NPF-8. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** January 15, 1986 (51 FR 1869).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 16, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303.

Alabama Power Company, Docket No. 50-364, Joseph M. Farley Nuclear Plant, Unit No. 2, Houston County, Alabama.

Date of application for amendment: September 30, 1985, as supplemented March 27, 1986.

Brief description of amendment: Technical Specification Table 4.4-5 and Figures 3.4-2 and 3.4-3 are revised based on analysis of Capsule "U" Reactor Vessel Material Radiation Surveillance Program. Changes are in accordance with 10 CFR Part 50 Appendix G and H and are acceptable for eight Effective Full Power Years of Operation.

Date of issuance: April 21, 1986.

Effective date: April 21, 1986.

Amendment No. 55.

Facility Operating License No. NPF-8. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** December 4, 1985 (50 FR 49780).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 21, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303.

Arkansas Power & Light Company, Docket No. 50-368, Arkansas Nuclear One, Unit 2, Pope County, Arkansas

Date of Application for Amendment: November 20, 1985 as supplemented January 28, 1986.

Brief Description of Amendment: The amendment revised the Technical Specifications to allow storage of new fuel with a maximum enrichment of 4.1 weight percent U-235 in the new fuel storage racks.

Date of Issuance: April 16, 1986.

Effective Date: April 16, 1986.

Amendment No.: 71.

Facility Operating License No. NPF-6: Amendment revised the Technical Specifications.

Date of Initial Notice in **Federal Register:** March 12, 1986 (51 FR 8585).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 16, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Commonwealth Edison Company, Docket No. 50-237, Dresden Nuclear Power Station, Unit No. 2, Grundy County, Illinois

Date of application for amendment: March 10, 1986.

Brief description of amendment: The amendment extends the allowable outage period for the Dresden Unit 2/3 (Swing) Diesel Generator (DG) from 7 to 14 days on a one-time-only basis to allow installation of Appendix R modifications on the DG.

Date of issuance: April 28, 1986.

Effective date: April 28, 1986.

Amendment No.: 92.

Provisional Operating License No. DPR-19. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 26, 1986 (51 FR 10454).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 28, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Consolidated Edison Company of New York, Docket No. 50-247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of application for amendment: November 19, 1985.

Brief description of amendment: Revises the Technical Specifications to permit the use of higher enrichment reload fuel assemblies and storage of such assemblies both prior and subsequent to their loading in the reactor. The fuel enrichment is revised from 3.5 w/o U-235 to 4.3 w/o U-235.

Date of issuance: April 21, 1986.

Effective date: Immediately, to be implemented with 30 days.

Amendment No.: 111.

Facilities Operating License No. DPR-26: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** February 26, 1986 (51 FR 6821).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 21, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of application for amendment: December 23, 1985, as supplemented on February 4, 1986, and April 23, 1986.

Brief description of amendment: This amendment revises the Fermi-2, Technical Specifications to reduce, for a limited amount of time for the first fuel load, the minimum permissible source range monitor (SRM) count rate from 0.7 counts per second (cps) to 0.3 cps. This change is reflected in modifications to footnotes relating to the surveillance requirements for minimum permissible SRM count rates and the control rod block trip setpoints. Only those fuel changes required to replace the depleted neutron sources will be permitted. The licensee withdrew its request for amendment that would have reduced the minimum permissible count rate in Technical Specification 3/4.3.7.6 and that amendment request has thus not been acted upon.

Date of issuance: April 25, 1986.

Effective date: April 25, 1986.

Amendment No.: 1

Facility Operating License No. NPF-43: Amendment revised the Technical Specifications.

Dates of initial notice in **Federal Register:** January 29, 1986 (51 FR 3714).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 25, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: April 1, 1985, as supplemented October 14, 1985.

Brief description of amendments: The amendments revise a limiting condition for operation and bases associated with Technical Specification 3.7.10.1, Fire Suppression Water System.

Date of issuance: April 17, 1986.

Effective date: April 17, 1986.

Amendment Nos.: 55 and 36.

Facility Operating License Nos. NPF-9 and NPF-17. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 17, 1985 (FR 29009).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 17, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Duke Power Company, Dockets Nos. 50-269, 50-270 and 50-287, Oconee Nuclear Station, Units Nos. 1, 2 and 3, Oconee County, South Carolina

Date of application for amendments: November 19, 1985, as revised on January 14, 1986 and February 14, 1986.

Brief description of amendments: These amendments revise the Station's common Technical Specifications (TSs) to support the operation of Oconee Unit 1 at full rated power during the upcoming Cycle 10. The amendments change the following areas: (1) Core Protection Safety Limits (TS 2.1); (2) Protective System Maximum Allowable Setpoints (TS 2.3); (3) Rod Position Limits (TS 3.5.2); and (4) Power Imbalance Limits (TS 3.5.2).

These amendments also make administrative changes to clarify the TSs.

Date of issuance: April 25, 1986.
Effective date: April 25, 1986.
Amendments Nos.: 147, 147 and 144.
Facility Operating Licenses Nos. DPR–36, DPR–47 and DPR–55. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** February 28, 1986 (51 FR 7161).
The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 25, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina 29691.

Indiana and Michigan Electric Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: October 19, 1984 as supplemented by letters dated May 31, 1985, October 18, 1985, and February 7, 1986.
Brief description of amendments: The amendments: (1) Allow locked, sealed or secured valves, flanges and deactivated automatic valves, including some inside containment, to be verified as closed during cold shutdown on Unit 1; (2) delete a specific reference to a requirement for a cycling test every 92 days on containment isolation valves on Unit 1 and substitute a reference to measuring isolation times on containment isolation valves in accordance with applicable ASME Section XI requirements on Unit 1; (3) remove the column "Testable During Plant Operation" from Table 3.6–1 for Unit 1; (4) allow valves SM–8 and SM–10 (upper containment Grab Samples) to be opened intermittently under administrative controls during power operation on Unit 2: (5) correct valve designations in Table 3.6–1 inadvertently overlooked in Amendment 47 on Unit 2; and (6) remove a footnote on Table 3.6–1 which is no longer applicable for Units 1 and 2.
Date of issuance: April 23, 1986.
Effective date: April 23, 1986.
Amendments Nos.: 95 and 81.
Facility Operating Licenses Nos. DPR–58 and DPR–74. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** December 31, 1984 (49 FR 50805).
The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 23, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Indiana and Michigan Electric Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: January 21, 1986.
Brief description of amendments: The amendments revise the Technical Specifications as follows: In Tables 3.3–3 and 3.3–4, instrument numbers have been added for clarity, trip setpoints are now referenced to Table 3.3–6, and a statement added to indicate that the specification applies only during purge. In Tables 3.3–6 and 4.3–3, the instrument measurement ranges have been separated, the noble gas effluent monitors have been included by reference to the appropriate technical specification, the channel functional test and channel calibration have been better defined, and a statement added to indicate that the specifications apply only during purge. In Tables 3.3–12 and 3.3–13, instrument numbers have been added for clarity as has the statement that one monitor is required per train for the Service Water System effluent line, incorrect footnotes have been removed, and a note has been clarified that other requirements are for non-purging only. In Table 4.3–9, instrument numbers have been added. In Sections 6.12.1 and 6.12.2 for Unit 1, the wording is changed to be consistent with Unit 2 and the Standard Technical Specifications.
In Table 4.11–2, the term "charcoal filter" is being correctly identified and replaced with "iodine adsorbing media." In Table 3.12–1, the New Buffalo drinking water sample location is deleted. Editorial changes are made for Pages 3/4 12–3 and 6–21 and for several bases sections.
Date of issuance: April 22, 1986.
Effective date: April 22, 1986.
Amendments Nos.: 94 and 80
Facility Operating Licenses Nos. DPR–58 and DPR–74. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** February 26, 1986 (51 FR 6824).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 22, 1986.

Pennsylvania Power and Light Company, Docket No. 50–387, Susquehanna Steam Electric Station, Unit 1, Luzerne County, Pennsylvania

Date of application for amendment: July 22, 1983, as supplemented on July 26, August 2, 1983, as further supplemented with additional information on November 22, 1983, June 21 and November 13, 1984.
Brief description of amendment: This amendment changes the Unit 1 Technical Specifications to revise the Main Stream Line Radiation-High Setpoint from three times normal background to seven times normal background. The purpose of the Technical Specification change increasing the setpoint for Main Stream Line Radiation-High was to prevent unwarranted reactor scrams caused by N–16 spikes in the main stream line. The change was initiated by PP&L to correct operating problems experienced at Susquehanna Unit 1 with the condensate polishing system, which sometimes resulted in the releases of resin fines (impurities) to the reactor vessel. These impurities produced a transient increase in N–16 activity in the stream, which caused radiation levels to exceed the setpoint. As a result the Pennsylvania Power and Light Company requested a setpoint change to provide

BEST COPY AVAILABLE

additional margin against unnecessary main steam isolations. Subsequent to this request, the problem with the condensate polishing system was corrected by a design modification.

Date of issuance: April 15, 1986.
Effective date: April 15, 1986.
Amendment No.: 59.
Facility Operating License No. NPF-14: Amendment revised the Technical Specifications.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing. For exigent circumstances, a press release seeking public comment as to the proposed no significant hazards consideration determination was used, and the State was consulted by telephone. In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant, a shorter public comment period (less than 30 days) has been offered and the State consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see: (1) The application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By June 6, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Project Director)*: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this Federal Register notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Alabama Power Company, Docket No. 50-364, Joseph M. Farley Nuclear Plant, Unit No. 2, Houston County, Alabama

Date of application for amendment: April 18, 1986.

Brief description of amendment: The amendment deletes the fuel rod weight limit in Technical Specification 5.3.1.

Date of issuance: April 22, 1986.

Effective date: April 22, 1986.

Amendment No. 56.

Facility Operating License No. NPF-8. Amendment revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendment and final determination of no significant hazards consideration are contained in a Safety Evaluation dated April 22, 1986.

Attorney for Licensee: Ernest L. Blake, Jr., Esquire, 1800 M Street, NW., Washington, DC 20036.

Thomas M. Novak,

Acting Director, Division of PWR Licensing-A, Office of Nuclear Reactor Regulation.

[FR Doc. 86-10031 Filed 5-6-86; 8:45 am]

BILLING CODE 7590-01-M

Florida Power Corp. et al.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-72, issued to Florida Power Corporation (the licensee), for operation of the Crystal River Unit No. 3 Nuclear Generating Plant (CR-3) located in Citrus County, Florida.

The proposed amendment would permit plant operation with the reactor coolant pump supports redesigned in accordance with the recently noticed amendment to General Design Criterion 4 (GDC-4), 10 CFR Part 50, Appendix A (51 FR 12502), which will be effective May 12, 1986.

The proposed amendment would be in response to the licensee's application for amendment dated April 24, 1986, which requested that the previous exemption request dated February 1, 1985, as supplemented by several additional submittals, be considered an amendment request as required by the supplementary information in the notice for the amended GDC-4. It was further requested that noticing of this amendment be treated as an emergency since insufficient time exists for the Commission's usual 30-day notice without extending the current shutdown.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The amended GDC-4 states that "the dynamic effects associated with postulated pipe ruptures of primary coolant loop piping in pressurized water reactors may be excluded from the design basis when analyses demonstrate the probability of rupturing such piping is extremely low under design basis conditions." Based on the licensee's submittals and the Commission's review to date of these submittals, the advanced fracture mechanics techniques employed provide assurance that flaws in primary system piping will be detected before they reach a size that could lead to unstable crack growth. Therefore, the probability of large pipe breaks in the primary coolant system is sufficiently low such that dynamic effects associated with postulated pipe breaks need not be a design basis. In addition, based on the review to date, the revised design for the reactor coolant pump supports adequately considers all remaining design basis loads. The accident mitigation features (e.g., emergency core cooling system, containment) of the plant are not affected by the proposed amendment. Therefore, operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Based on the Commission's review to date, the revised design for the reactor coolant pump supports adequately considers all remaining design basis loads. The proposed change introduces no new mode of plant operation. Therefore, operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated.

Based on the Commission's review to date of the licensee's submittals, Code design criteria for the reactor coolant piping will not be exceeded. The revised design of the reactor coolant pump supports will result in improved support system reliability and may therefore improve overall safety margins for the plant. Therefore, operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety.

Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

The Commission has determined that failure to act in a timely way would result in extending the present unplanned outage. Therefore, the Commission has insufficient time to issue its usual 30-day notice of the proposed action for public comment.

If the proposed determination becomes final, an opportunity for a hearing will be published to the Federal Register at a later date and any hearing request will not delay the effective date of the amendment.

If the the Commission decides in its final determination that the amendment does involve a significant hazards consideration, a notice of opportunity for a prior hearing will be published in the Federal Register and, if a hearing is granted, it will be held before any amendment is issued.

The Commission is seeking public comments on this proposed determination of no significant hazards consideration. Comments on the proposed determination may be telephoned to John F. Stolz, Director, PWR Project Directorate No. 6, by collect call to 301-492-7286 or submitted in writing to the Rules and Records Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory the Commission, Washington, DC 20555. All comments received by May 19, 1986, will be considered in reaching a final determination. A copy of the application may be examined at the the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida 32629.

Dated at Bethesda, Maryland, this 2nd day of May 1986.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, PWR Project Directorate No. 6, Division of PWR Licensing-B.

POSTAL RATE COMMISSION

[Order No. 660; Docket No. A86-17]

Wallpack Center, New Jersey 07881 (George W. Schaeffer, Jr., Petitioner); Notice and Order Accepting Appeal and Establishing Procedural Schedule

Issued: April 30, 1986.

Before Commissioners: Janet D. Steiger, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; Bonnie Guiton, Patti Birge Tyson.

Docket number: A86-17.

Name of affected post office: Wallpack Center, New Jersey 07881.

Name(s) of petitioner(s): George W. Schaeffer, Jr.

Type of determination: Closing.

Date of filing of initial appeal papers: April 25, 1986.

Categories of issues apparently raised

1. Effect on postal services. [39 U.S.C. 404(b)(2)(C)]

Other legal issues may be disclosed by the record when it is filed; or conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition within the 120-day decision schedule [39 U.S.C. 404(b)(5)] the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the Petitioner. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memorandum previously filed.

The Commission orders

(A) The record in this appeal shall be filed on or before May 12, 1986.

(B) The Secretary shall publish this Notice and Order and Procedural Schedules in the Federal Register.

By the Commission.

Charles L. Clapp,

Secretary.
